American Railroad Journal.

Saturday, October 17, 1863.

Stock Exchange and Money Market.

The rise of gold to 155 within the last week has excited much speculation. The reasons given for it are various, but unsatisfactory. The large export of two millions a few days since for account of a young banking house "backed up" as the expression is, by one of ancient date and solid standing, is supposed to be the principal cause by many persons. Others with a show of more probability attribute it to the large imports. Others to the constant demand at the Custom House, and others again to a combination of operators. It is certainly to be regretted that the rise has taken place, since it enhances the price of all imported articles, many of which are those of necessity. More than this, prices of commodities of domestic origin sympathise with the others, and a general disposition is encouraged to make a profit as large as possible on everything for which there is a demand.

Meantime the amount in the sub-treasury is rapidly increasing, and is locked up for the time being and kept out of circulation, and use for any purpose whatever. It has been suggested that Mr. Chase might steady and lower the price of gold by disposing through the banks of at least three millions of gold per month, and then have enough left for the payment of interest, or if he will not do this, he might anticipate the November interest. We certainly think he has a right to do both.

Again, it is proposed that a check be given to excessive importations, by a voluntary self-denial on the part of consumers, and a general understanding not to purchase any articles which are not really wanted. Since it has been satisfactorily ascertained that the national debt is not now much on the increase, only twelve millions or thereabouts having been added to it within the last sixty days, and the receipts from customs and internal revenue being now declared to be equal to the current expenses of the Government, we see no cause for alarm, nor any reason for supposing that our Government currency is to be further

comparatively depreciated. Its circulation is active and useful. We never had so good a currency before, and strange to say, prices of the staples of the loyal States are not greater even now than they have frequently been within the last twenty years. Meantime the general industry of the country was never more prosperous, nor its exports greater. A large class of persons have never before had the handling of much money, and debtors as a general thing, individuals as well as companies, have been rapidly extricating themselves from their difficulties. Paper money has therefore done these persons a great service, and as to the capitalists, we can only say that it is quite fair that they who can well bear it, should not always be the dominant power in the market.

It is really quite encouraging to perceive what entire faith the old rich and the new rich have in the stability of the Government, and the value of its obligations. The conversions into the 5-20's, and the stocks of '81 continue to be large and constant, at the rate of one million per day. The four or five hundred millions of treasury notes are being rapidly absorbed, and we should not be surprised if our currency ere long, was to be mainly supplied by the new National Banks. To this end everything seems to be tending.

We notice as proof of this probability, the recent exertions of some of the old and influential Banks of this city to refuse fraternizing with them, and also to decline their affiliation with them at the Clearing House. Appeals to the public ear have already been made against the new system, and one would think that some sort of a financial war might be expected. We console ourselves with the reflection, that the country is able to maintain both, since its rapidly developing resources will require all its means and credit, with each advancing year. We have full faith in its resources, and believe we shall look back on this period with surprise at our want of sagacity.

If this was an old country, limited in area, populous beyond the means of support, if labor went unemployed, and we had a poor house system like that of England, we might feel a very natural alarm at any deviation from our accustomed habits, or usual expenditures. But ours is a new case under the sun, and we shall find that events will take care of themselves. Should any sudden and unforeseen revulsion take place, we doubt whether it would be a general one. Neither the farmers, nor the real estate holders have as yet been much benefitted by the increase of paper money, though the dealers in merchandize with large stocks on hand might greatly suffer. We must also remember that almost all purchases are now made for cash, and the long credits once given by our merchants have almost entirely ceased. If this system is vigorously maintained, everything will have been paid for when the return to specie payments takes place.

The bank statement on Monday last, as compared with the previous week, shows an increase in loans of $464,129, and in circulation of $146,592; with a decrease in specie of $137,333, and in deposits of $2,616,211. Again the deposits are down and the loans up. In a fortnight the former have declined six millions; the loans are within $200,000 of the highest average ever reported—that of the 19th ult. The decrease of deposits reflects the steady absorption of money by the conversion of currency into 5-20 bonds.

From the official tables prepared at the Custom House, it appears that the aggregate imports of foreign goods during the month of September at the port of New York amounted to $15,421,709, against $18,026,599 in September, 1862—showing a decrease of $2,604,890. The foreign exports of domestic products in September, 1863, were $11,717,761, against $14,734,993 in September, 1862—a decrease of $3,017,232. The amount of specie exported during the month of September, 1863, was $3,480,385; in September, 1862, $3,085,-919—an increase of $394,466. The imports of foreign goods during the last nine months, viz: from January 1, to September 30, 1863, have been $137,538,400, against $125,500,800 during the same period of 1862—an increase of $12,037,600. The exports of domestic produce during the same period in 1863, were $125,476,100; in 1862, $100,-838,200. During the same time in 1863, the exports of specie from this port were $32,846,700, against $42,843,000 in 1862. The general result, therefore, of the past nine months' business appears to be, that our exports of domestic produce from this city have been $24,637,900 *more*, and our exports of specie $9,996,300 *less* than for the corresponding period of the previous year. The amount of cash duties paid in gold into the Treasury at this port during the month of Septemtember, 1863, was $7,270,544, against $5,239,046 in September, 1862. For the nine months, the receipts of revenue from customs at this port have been $42,323,076, against $42,276,834, in 1862. In 1861, the cash duties received in September were $1,642,382; and for the first nine months of the year, $15,856,232.

The following is a statement of the specie movement at this port for the month of September:

Specie in Banks and Sub-Treasury, Sept. 1, 1863	$38,011,999
Received from California	750,279
Imported from foreign ports	78,231
Gathered in from hoards	3,786,333
Total supply	$42,626,842
Exported to foreign ports	3,480,385
Leaves in bank and Sub-Treasury Oct. 1.	$39,146,457

The movement from the commencement of the year is as follows:

Specie in Banks and Sub-Treasury, Jan 1, 1863	$40,971,000
Received from California	9,603,712
Imported from foreign ports	1,228,141
Gathered in from hoards	20,190,098
Total supply	$71,992,951
Exported to foreign ports	32,846,494
Leaves in banks and Sub-Treasury, Oct. 1, 1863	$39,146,457
Same time in 1862	41,382,000
" " 1861	53,400,000
" " 1860	25,400,000
" " 1859	25,855,000

It is confidently asserted at Washington, for reasons best known there, that gold will fall at least 10 per cent within a short period. Money continues to be easy. Governments are firm. It is said that the Russian and French fleets now in the Hudson, are disbursing large amounts of money for supplies, and if the former remain here all winter the amount will be very considerable.

The Railway market is quite firm and prices have been uniformly better. We notice that the last dividends on the Virginia State stock were unpaid in England, and much dissatisfaction is expressed. The apology of Gov. Letcher for the default is not considered satisfactory. If Virginia is unable to pay her interest either in money or cotton, what chance is there for the payment of the confederate loan? The recent declarations of Lord Russell in a speech at Blair Gowrie, are conclusive that England intends to refrain from any further violations of neutrality, and this must have effect on the policy of France. The recent position taken by a British Consul in the South, with regard to the required military services of British subjects, is singularly in harmony with the new policy of its Government at home. We need not fear any intervention from Europe. Various rumors are in circulation as to the issue of 18,000 shares by the Hudson river railway, and of immediate and vigorous exertions by the Harlem Co. to extend their lines to the North.

The Cleveland and Pittsburg Railroad Company has declared a dividend of four per cent, free of Government Tax, payable at the office of the Farmers' Loan and Trust Company, on stock registered in that office, on the 20th inst.

The Cleveland and Toledo Railroad Company have declared a semi-annual dividend of four per cent, payable at the office of Messrs. Vermilye & Co., No. 44 Wall street, New York, on the 26th day of October next, free from Government tax.

The Central Railroad Company of New Jersey has declared a quarterly dividend of 2½ per cent, payable on the 15th inst.

The Cincinnati, Hamilton and Dayton Railroad Company have declared a half-yearly dividend of 5 per cent., payable at the Bank of America on the 15th inst.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The M'Gregor Western Railway will be completed to Ossian, 40 miles, by November prox., the whole business of which will pass over the line of the Prairie du Chien, and, of necessity, add very largely to the receipts of the latter road.

☞ The New York and Boston Air Line was opened on Wednesday between Boston and Woonsocket.

Illinois Central Railroad.

The official reports for three quarters of this year, ending 30th September, show a gain of 70 per cent. upon the entire business. The collection of arrears of interest upon the lands which are set apart for the interest fund exceed six hundred thousand dollars. If the last quarter brings in corresponding collections the interest on the 7 per cent. bonds, of which there are less than twelve millions outstanding, will be met from the land fund without encroaching on the profits gained by traffic.

	1863.	1862.	Gain.
Traffic	$3,164,936 95	$2,322,141 67	$842,795 28
Sales of Land	1,623,251 80	695,270 12	927,981 68
Cash collected	933,831 87	327,586 66	611,245 21
Total	$5,727,020 62	3,344,998 45	2,382,022 17

Illinois River Railroad.

The track, rolling stock, right of way, and other appurtenances of the Illinois River Railroad were sold under a decree of chancery, at Springfield, Ill., on the 1st inst., the principal bondholders becoming the purchasers, for $400,000. Messrs. Arnold, Allen & Trowbridge represent $954,000 of the bonds, while only about $50,000 are in other hands. The route extends from Jacksonville to Peoria—that part from Virginia to Peoria being in operation. The purchasers intend to put the division from Virginia to Jacksonville under contract immediately, with a view to the early completion of the road through its whole length. The stockholders are also endeavoring to effect an arrangement with the Bureau Valley and Hannibal road, to secure a through route to Chicago. The name of the road is to be changed to the Jacksonville, Peoria and Chicago Railroad.

Erie Railway Company.

The following gentlemen have been elected directors of this company for the years 1863–'64: Samuel Marsh, Daniel Drew, John Arnot, William B. Skidmore, Cornelius Vanderbilt, Robert H. Berdell, Dudley S. Gregory, Ralph Mead, Nathaniel Marsh, Ambrose S. Murray, William Evans, J. C. Bancroft Davis, D. A. Cushman, Alexander S. Diven, Thomas W. Gale, Isaac N. Phelps, Horatio N. Otis. The road is thus secured efficient management and the continued confidence of its shareholders.

Volunteer Soldiers' Family Aid Fund Bonds.

We publish elsewhere the Advertisement of the City Comptroller for subscriptions to this fund. Its object is so patriotic and humane that we do not doubt it will receive support from all classes of our citizens.

Long Island Railroad.

The Long Island Railroad Company have closed a contract for the construction of the Glen Cove, Roslyn and Mineola Branch of their railroad, 8½ miles in length, to be completed by the 1st of May, 1864. The contractors are J. I. Shipman and John Mortin.

Connecticut and Passumpsic Rivers R. R.

The extension of this road from Barton Landing to Newport, on Lake Memphremagog, a distance of about 20 miles, having been completed, the opening of the line was celebrated on Thursday last by the directors and officers of the company, and a number of invited guests from Boston and this city. As the JOURNAL was ably represented upon this occasion, we hope to be enabled to give full particulars of the event in our next issue.

Toledo and Wabash Railroad.

The following gentlemen have been elected directors for the ensuing year: Azariah Boody, New York; J. N. Brotherton, New York; James Spears, Lafayette; Isaac H. Knox, New York; Hector Morison, New York; J. R. Jessup, New York; John Ross, New York; William Kidd, Rochester; George Cecil, Logansport; Robert Brackenridge, Fort Wayne; William Kent, Williamsport; William Baker, Toledo; Warren Colburn, Toledo; Chauncey Vibbard, Albany; J. N. Drummond, Toledo.

Tax on Locomotives, etc.

It has just been decided in a case in the U. S. Circuit Court of Pennsylvania, brought by the Pennsylvania Railroad Company against the U. S. Tax Collector, that locomotives are not liable to taxation, when manufactured by a railroad company and not made for sale. This decision will apply to all articles manufactured by railroad companies for their own use. The bill was filed to restrain the Collector and Assessor of the Fourth Collection District from assessing and collecting a tax upon the manufactures of the Pennsylvania Railroad Company. The company make extensively new cars and locomotives, and do a large amount of repairs in their own workshops. The Internal Revenue Department contend that they are liable to pay the three per cent. fixed by law upon these manufactures, as are all manufactures. The company, on the other hand, contended, and successfully, that as they do not make for sale, but for their own use, they are not manufacturers within the meaning of the law.

Rome, Watertown and Ogdensburg R. R.

The Utica *Herald*, alluding to the extension of that company's business by their undertaking to run the Oswego and Rome road, shows the advantages of the connection thus: "It makes theirs much the shortest route from Oswego to New York, and with reasonable freight charges, must draw off from the Oswego and Syracuse railroad and canal lines large quantities of freight. Travelers, too, *via* the great lakes, will be attracted over that section of the road. But the chief benefits of this new branch are not likely to appear until it is extended and taps the Central at Rochester, which the stockholders are sanguine will very soon be. The road, together with the Central, would in that case constitute a sort of lake short route with the best possible terminus, and competing with the Grand Trunk Railway in Canada. We might speculate as to the business that would result, but an examination of the supposed route and connections on the map will probably satisfy any one of its importance and value."

The Atlantic Telegraph.

Cyrus W. Field Esq., writes to the associated press of New York that at a meeting of the Directors of the Atlantic Telegraph Company, on the 5th ult., the tender of Messrs. Glass, Elliot & Co. to manufacture and lay down in the summer of next year a good submarine telegraph cable between Ireland and Newfoundland was unanimously accepted.

Valuation of Fall River.

The valuation of Fall River this year is: Real Estate, $6,485,700; Personal, $6,210,405. Total, $12,696,105. The rate of taxation is $1 15 per $100.

Charcoal Pig Iron in Michigan.

It is now but six years since the iron region of Michigan was opened, and yet to-day there are eight furnaces in operation, and one building, while several others are in process of organization. This is indeed a mighty progress, the newness of the country considered. But it is the good beginning surely indicating that her vast and unequaled iron hills and immense forests of timber will gradually but as certainly come together in a hundred furnaces, making the production of charcoal pig one of the leading, if not the leading interest of the State, making Northern Michigan, considered by many almost worthless, a "fruitful field."

Nor will it be an uncertain business. Because of the superiority of charcoal iron, and especially Lake Superior iron, from the fact that it commands a premium over that produced by the fossil coals for every purpose requiring a superior iron, and from the fact also that a high tariff in the very nature of things must prevail for a long series of years upon imported metals, with the additional fact that Michigan offers extraordinary facilities for its production, we venture the prediction *that no business in the country will pay richer rewards for the next five years than the capital at once thus invested.*

We shall be much disappointed if at least another half score of furnaces does not go up the next two years, and over a score the next five. With the market we have, and the inducements there are for investment, the public attention and capital cannot lie dormant, but will seek investment.

Within the next twelve months at least *seventy miles* of new railroad will be put in operation, connecting with a large portion of the iron district, opening a new and highly favorable country for this purpose, a country where cheap wood can be had, where in some cases fine water powers exist, and where the wood and power exists in connection with the road, so that the ores can be delivered directly to the furnaces.—*Lake Superior* (*Marquette*) *News and Journal.*

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., **213 Broadway, corner of Fulton st.**
Local Agents wanted everywhere. 6m41

COPAKE IRON MINES.

THIS Company is now prepared to deliver, in quantities of 2,000 to 20,000 tons monthly, the very superior **IRON ORE** produced at its Mines in the town of COPAKE, Columbia County, N. Y.

The **COPAKE ORE** is a Hematite of the best quality known in the country, and has been extensively used by Iron Manufacturers for many years.

Applications will be received at the office of the Company, **No. 7 Nassau st.,** over the Continental Bank, New York. Communications by Mail may be addressed to **CHARLES H. MILLS,** President. 6m42

BROWN'S ENGLISH
ROOFING PAINT.

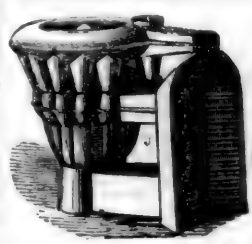
THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—
THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,
LOCOMOTIVE
AND STEAMBOAT SMOKE PIPES,
And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.
It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.
SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 379 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

PROPOSALS FOR $500,000
Volunteer Soldiers' Family Aid Fund Bonds,
No. SEVEN.

SEALED Proposals will be received at the Comptroller's office, until Saturday, Oct. 31, 1863, at 2 o'clock P. M., when the same will be publicly opened, for the purchase, at not less than their par value, of the whole or any part of the sum of five hundred thousand dollars of the "Volunteer Soldiers' Family Aid Fund Bonds, No. 7," authorized by an ordinance of the Corporation, passed Oct. 9, 1863, and an act of the Legislature of the State of New York, passed March 6, 1863.

The said bonds will bear interest at the rate of five per cent. per annum, payable semi-annually, on the first day of May and November in each year, and the principal will be redeemed Nov. 1, 1871.

The proposals will state the amount of bonds desired, and the price for one hundred dollars thereof, and the persons whose proposals are accepted will be required to deposit with the Chamberlain of the City, within five days after the opening of the bids, the sums awarded to them respectively.



On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive bonds for equal amounts of the par value thereof, bearing interest from the dates of payments.

Each proposition should be sealed, and endorsed "Proposals for Volunteer Soldiers' Family Aid Fund Bonds, No. 7," and inclosed in a second envelope addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if the interest of the Corporation require it.

MATTHEW T. BRENNAN, Comptroller.

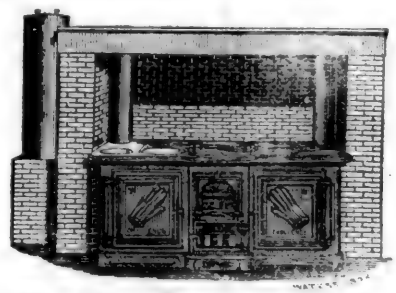
CITY OF NEW YORK, DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE, Oct. 10, 1863. 3t42

Sanford's CHALLENGE HEATERS
SET IN BRICK,
PORTABLE
OR AS
FIRE PLACE
HEATERS,
FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR
Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,
WITH AND WITHOUT REGISTERS.
THE MOST POWERFUL HEATERS AND THE
Greatest Fuel Savers in the World:
With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.
SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of
WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN
SLEEPING CARS,
would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their
SLEEPING CARS,
and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.



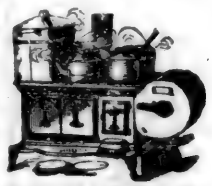
The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown st., PHILADELPHIA,** will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.



Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light
SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y.

The COSMOPOLITE
PARLOR RADIATOR, &
GAS BURNER,

Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

KRUPP'S PATENT CAST STEEL

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk; Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination.

They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enameled Iron Water Pipe, Steel Tubes, etc., etc.

They have received the highest approval from all RAILWAY COMPANIES that have them in service

THOMAS PROSSER & SON,

GENERAL HARDWARE & IRON MERCHANTS,

BIRMINGHAM.

SANFORD'S MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York.

A Good Chance for Investment.

WANTED a Partner with a capital of about $40,000, to join in Machinery and Iron Ship Building business, in a most favorable location on tide-water and railroads. Address Business Partner, care of A. F. KINDBERG, 25 Rector st., New York. 1t

NOTICE TO BUILDERS OF RAILROAD CARS.

THE CENTRAL TRANSPORTATION COMPANY will receive proposals from Car Builders until the 20th day of October next, at their office

No. 1347 BROWN ST., PHILADELPHIA,

for constructing FIVE SLEEPING CARS—said cars (excepting the Quilts, Comforts, Sheets, Pillow-Cases and Towels to be furnished by the Company) are to be fully equipped and in all respects completed and delivered ready for use by the 20th day of February, 1864.

For a full knowledge of the plan and dimensions of said Cars in all their parts, and of the kind and quality of the materials to be used, the character of workmanship and the style of finish required, reference may be had to Cars Q, R, S, and T, now running on the PENNSYLVANIA CENTRAL RAILWAY; to Cars M and N, on the BELLEFONTAINE LINE; to Cars O and P, on the NORTHERN CENTRAL, and to Car T, on the NEW JERSEY CENTRAL RAILROADS.

Persons whose propositions may be accepted, will be required immediately to enter into contract to construct the aforesaid Five Cars similar to, and in all respects as perfect as the Cars above referred to, either of which may be made the basis of a proposition, in which should be stated the price per car.

Good and sufficient security will be required for the faithful performance of the work, and the contract will provide for monthly payments to the contractor, as the work progresses.

Proposals will also be received at the same time and place for the construction in like manner, and of the same description as the five above named,

Twenty Additional Sleeping Cars,

to be completed within the year 1864. The proposals should also state the price per Car, for all or such portion of the whole number as the proposer can complete and deliver within the first four months; also the price per Car for all, or such portion of the whole number, as the proposer can complete and deliver within the first eight months, next succeeding the 15th day of February, 1864.

The Company reserve the right to reject all propositions which they may deem unfavorable. All propositions addressed as above, to the CENTRAL TRANSPORTATION COMPANY, must be sealed and endorsed "*PROPOSAL for BUILDING SLEEPING CARS.*"

2t41 O. W. CHILDS, *President.*

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc, for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine. Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—(Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—(Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—(Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $2. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

NOTICE TO CONTRACTORS.

ALBANY AND SUSQUEHANNA R R.

SEALED PROPOSALS WILL BE RECEIVED by the undersigned at the Engineer's Office, in the village of Unadilla, Otsego county, until Thursday, the 29th day of October instant, at 10 o'clock A. M. of that day, for Grading, Masonry, Bridging and Fencing of about 45 miles of the line of said railroad, extending from the village of Oneonta, in Otsego county to and including the Tunnel of about 2,000 feet through Webster Summit, in the Town of Colesville, in Broome county.

The line will be divided into Sections of convenient length, and proposals will be received for single Sections, or for the whole line.

The line will be ready for examination on and after Monday, the 19th inst., and Maps, Profiles and Plans, with Specifications may be examined at the Engineer's Office, in Unadilla, on and after that date.

Blank proposals, with all necessary information, will be furnished to those wishing to propose for work, at the Office of the Company, 73 State Street, Albany, and at the Engineer's Office, in Unadilla.

Proposals should be enclosed in an envelope and endorsed "Proposals," and directed to the undersigned at Unadilla.

The proposals which may be received in pursuance of this notice will be opened by the undersigned and canvassed, and the results reported to the Directors to aid them in making a proper award of the work.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The right is reserved to reject any or all proposals, as may be deemed for the interests of the Company

Albany, October 1st, 1863.

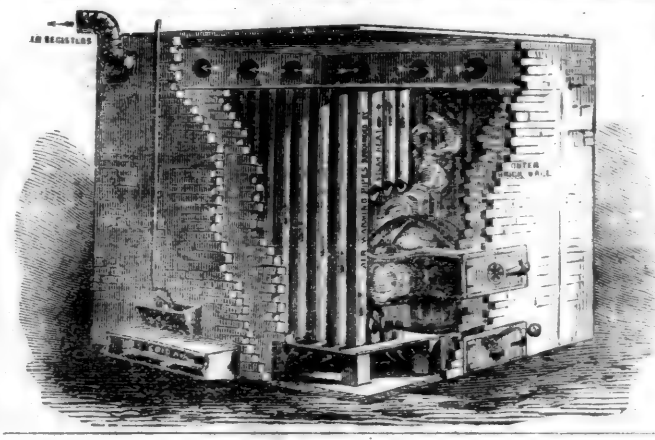
WILLIAMS & PAGE'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make the Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

MUNN & CO'S
PATENT OFFICE.
ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS,

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,
No. 37 Park Row, New York,
Or corner F and 7th sts., opposite Patent Office, Washington, D. C. 3m36

The Mercantile Mutual
INSURANCE
COMPANY,

CHAS. NEWCOMB, Vice Pres't.
C. J. DESPARD, Secretary.

ALEXANDER'S
ROOFING
CEMENT-PAINT
FOR
Railway & Steamboat Co's,
BUILDERS and BUILDINGS generally.

THIS PAINT is warranted not to **Crack** or **Scale** either on **Wood, Iron, Tin,** or **Canvass.**

The ingredients in its composition are **all** of a preserving and protective nature. This Paint is now extensively used by Railway Companies and pronounced much **cheaper,** more **durable** and satisfactory than what was previously used. It is 2-5ths heavier in body than any other Paint.

Give this Paint a trial, and if not found as represented no charge will be made for it.

Send for descriptive circular and references.

W. G. PERKINS, Gen'l Ag't,
271 Broadway,
NEW YORK.

SUBSTITUTE FOR
CAR DUCK.
Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK,** but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
March 1863. **Boston.**

HAMILTON E. TOWLE,
CIVIL AND MECHANICAL ENGINEER
OFFICE, } **156 BROADWAY,** NEAR MAIDEN LANE, NEW YORK.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.
In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.
You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

American Railroad Journal.

New York, Saturday, October 24, 1863.

Baltimore and Ohio Railroad.

The regular monthly meeting of this company was held at its office in Baltimore on the 14th inst.—J. W. GARRETT, Esq., President, in the chair. The attendance was unusually full, nearly all the members on the part of the State and the city, and the private stockholders being present.

No quorum having met for the three preceding months, a large amount of business had accumulated, which, during a session of three hours, was transacted with great unanimity.

The reports from the different departments exhibited a full maintenance of the condition of the road, machinery and organization of the Company, for a continued large business.

An important contract was submitted by the Committee on Transportation between the Companies forming the route from Chicago to Bellaire via Monroeville and Newark, by which the Sandusky, Mansfield and Newark Railroad agrees to alter its gauge between Newark (a point on the line of the Central Ohio Road) and Sandusky, from its present width of 5 feet 4 inches to 4 feet 9½ inches, so that cars can be loaded in Chicago and run through without change to Bellaire, opposite the terminus of the Baltimore and Ohio Road on the Ohio river. This route will be sixty-six miles less in distance than the line used at present via Toledo, and will present to the commercial interests of Baltimore a direct connection with Sandusky, which possesses one of the finest harbors upon Lake Erie, and will furnish to the Baltimore and Ohio line a most desirable and vastly improved communication with Chicago and the Northwest.

The agreement met with the decided approval of the Board, and in this connection it was stated that the gauge is now being changed, and it is expected that this valuable avenue will be opened for the commerce of Baltimore and Washington and the business of the Government, during the present winter.

The nomination of James L. Randolph, Esq., formerly an esteemed officer in the service of the Company, was unanimously confirmed, as Engineer to take charge of the construction of the bridges over the Ohio river, between the main stem of the road at Benwood and the terminus of the Central Ohio at Bellair, and a bridge to connect the Northwestern Virginia and Marietta and Cincinnati Railroads, as soon as arrangements can be effected for the financial reorganization of the former Company.

The nomination by the President of J. J. G. Riley, Esq., as superintendent of the Telegraph Lines of the Company, was also unanimously confirmed.—Mr. C. Westbrook, heretofore in charge of these lines, will act hereafter as an officer of the American Telegraph Company.

The Committee of Finance submitted the following resolutions, accompanied by statements regarding the earnings and expenses of the Company for the semi-annual periods terminating March 31st and 31th September ultimo:

Resolved, That a dividend of six per cent. be declared on the stock of the Main Stem of the Baltimore and Ohio Railroad, payable on the 26th of October instant, at the Merchants' Bank of Baltimore, and that the transfer books be closed on the 16th instant, and remain closed until the 17th of November proximo, the day after the annual meeting.

Resolved, That the United States tax be paid by the Company.

Resolved, That a dividend of five per cent. be declared on the Stock of the Washington Branch Railroad for the half year ending 20th September ultimo, payable on and after the 16th October, at the Merchants' Bank of Baltimore.

Resolved, That the United States tax be paid by the Company.

After remarks by members of the Finance Committee and others, the President made the following general statement of the policy and condition of the Company in connection with this subject:—

The Board would recollect that during the present administration of the road (which had commenced in 1858) regular semi-annual dividends of 3 per cent. upon the Main Stem had been paid, except in the fall of 1861. Although at the commencement of the war the Company was in a most prosperous condition, its surplus cash assets amounting to $984,154, yet it was deemed prudent and judicious to retain its means, in view of the threatened dangers to its lines, so that it might meet the various difficulties which it might be expected to encounter in the progress of events.

The wisdom of this course was proven by the ability of the Company during a period when the depression of business was so great that mechanics and laborers generally could not obtain employment, to retain all its employees, and to continue vigorously the construction of machinery, so as to maintain its capacity to meet the large subsequent requirements of the transportation which presses upon it in the service of the Government, and for commercial purposes. It thus protected its large force of employees during a protracted period of difficulty to mechanics and laborers generally, and anticipated the great necessities for machinery which afterwards occurred.

With three intervals of possession by the enemy of portions of its route, during the past fiscal year, yet for an aggregate period of six months and ten days the Company had control of its entire line for transportation between Baltimore and its termini on the Ohio river. The Company has thus been enabled to participate partially in the large revenues being earned by the Northern Atlantic trunk lines, and the results of its business are such, that the Executive had it in his power to recommend the proposed dividend of six per cent. on the Main Stem, thus making the dividends equivalent to six per cent per annum from 1858 to this period.

It was evidently a source of gratification to the Board, as it would be to the community, that the Company had it thus in its power to relieve to this important extent the tax payers of the City of Baltimore and the State of Maryland, as well as to prove the capacity of the Company, under circumstances of unparalleled embarrassment to earn a proper remuneration upon the capital invested in the work. The City of Baltimore will receive of this amount $278,000, and a most satisfactory ad-

dition be made to the revenues of the State and for all parties interested in the property of the Company.

It will be observed that the sinking funds have been fully maintained during this difficult period. On the 1st of October, 1862, the aggregate of the sinking fund for the redemption of the mortgage debts and ground rents amounted to $1,037,889 99, and on the 1st of October, 1863, to 1,246,441 21. At the former date the amount of the sinking fund for the redemption of the five million city loan was $812,664 72, and on the 1st of October, 1863, it was $859,965 24, exhiting an aggregate increase for the twelve months of $255,851 74.

The Company has continued to make all its purchases for cash, and therefore is free from any floating debt. It also reserves, in available assets and uncollected revenue, a large sum, regarded as quite adequate for the reconstruction of its bridges, the restoration of its works, and for effecting desirable improvements upon its line.

The vote was then taken, and the resolutions adopted unanimously.

After the transaction of some further business, the Board adjourned until its next regular monthly meeting.

Amalgamation of the Grand Trunk and Montreal and Champlain Railways.

This project for some time under consideration is now likely to be carried through. Passengers to and from Montreal by the Montreal and Champlain Railroad, instead of crossing the river in the ferry steamer *Iron Duke*, as is now necessary, will hereafter, if the amalgamation be completed, cross the Victoria bridge, a third rail being intended to be laid to suit the gauge of the Montreal and Champlain road, and extended to Bonaventure street, and the new junction line near the "Tanneries."

A special meeting of the shareholders of the last named company was held in Montreal on the 12th inst., for the purpose of considering and "consenting to a certain agreement entered into between the Directors of the Montreal and Champlain Railroad Company, and the Directors of the Grand Trunk Railway Company of Canada for the regulation and interchange of traffic passing to and from the railways of the said companies, and for the working of the traffic over the said railways respectively, and for the other purposes mentioned in the said agreement."

At this meeting the form of the agreement to amalgamate, as settled by the Directors of the companies respectively, on the 25th of September last, was read, and resolutions were adopted authorizing the ratification of the agreement which appears to be of the following nature and description:

It is proposed to extend the arrangement for interchange of traffic, &c., entered into with the Grand Trunk Railway Company, and place the entire management of the line in the hands of that company. After deducting working expenses, the net earnings of the two lines are to be divided in the ratio of one fifteenth part to the Montreal and Champlain Railroad, and the other fourteen-fifteenths to the Grand Trunk Railway, the latter company agreeing that the net earnings of the Montreal and Champlain Company during the years 1864–'65 shall not be less than $100,000 a year. It is also said that it is proposed to apply for an act giving the Grand Trunk Railway power to purchase the Champlain road by assuming all its bonds and meeting them when matured, also paying a sum not exceeding $500,000 for shares, rolling stock, plant, steamers, &c., of the road; but until such legislation is effected neither company is to be liable for the debts of the other. As soon as the agreement is sanctioned, a third rail will be laid on the Grand Trunk track between the Bonaventure street station and the intersection of the road with the Montreal and Champlain Railroad on the opposite side of the river, so that the trains of the latter may cross the bridge.

This arrangement now only waits the sanction of the shareholders of the Grand Trunk, a large majority of whom are residents of Great Britain.

Portland, Saco and Portsmouth Railroad.

The receipts and expenditures of this road for the fiscal years ending May 31, 1862 and 1863, have been as follows:

Receipts:	1862.	1863.
From passengers	$144,418 72	$195,146 13
" freights	49,111 48	74,582 86
" express	3,565 96	3,712 91
" mails	7,837 44	7,837 44
" sundries	2,550 15	1,917 45
	$207,483 75	$283,197 79
Expenditures, viz:		
Maintenance of way	$31,217 57	$26,931 59
Locomotive power	35,246 29	31,242 23
Train expenses	13,068 10	15,093 68
Office establishment	12,034 95	16,490 82
Station expenses	10,209 10	11,661 65
Machine shop	1,207 39	1,401 01
Credit renewal fund	10,000 00	10,000 00
	$112,983 40	$112,920 98
Net earnings	$94,500 35	$170,275 81
Dividends, six per cent. and U. S. Tax		92,782 50
Surplus		$77,492 31
Surplus per report May 31, 1862		43,348 34
Add for under-estimate		943 34
Total surplus May 31, 1863		$121,783 99
Allowed Kennebec & Portland R. R.	$2,999 11	
Paid Eastern and Boston & Maine R. Rs.	47,000 00	
		49,999 11
Leaves present apparent surplus		$71,784 88

This surplus is chiefly invested in improvements, stock of materials for use, and wharf at Portland. The report says:

It will be seen by the statistics presented that the business of the road has been more remunerative than in any former year. The past winter was unprecedented for its mildness, without any storms and deep snows, saving much expense in clearing snow drifts from the track. This made quite a saving the past winter.

The expenses for the coming year must be considerably increased, on account of the high rate of labor, and the high price of all materials used in keeping the road in order, and in the running expenses.

The Boston & Maine and Eastern Railroads, by their Presidents, in consideration of our prosperous condition, have agreed to pay from the income the Government tax of three per cent. on your dividends. Also to return to the holders of stock of last December, the deduction then made for the Government tax. We would observe in this connection that the road pays to the General Government three per cent. on its gross passenger receipts, which is taken from the income of the road. The tax of three per cent. on dividends is a tax upon the shareholders, and the only agency we seem to have in the matter is, that our Treasurer is made by act of Congress the Collector of this Government tax.

The contract between this road, the Eastern and Boston & Maine roads, stipulates that three dollars per share be paid to the stockholders of this road in December and June in "gold or silver coin of the currency of the United States." The lessees of the road will not pay in coin unless compelled by the Courts in a suit at law. We lay the matter before the stockholders for their consideration and action, if any is required.

There have been no delays or accidents of any kind on the road, either to passengers, employees, or in the transportation of troops. We have carried over the road by regular trains 242,977 passengers, and over fourteen thousand troops for the Government by extra trains.

The equipment of the road consists of 10 locomotives; 2 passenger, 2 baggage and mail, 52 platform, 44 box, 2 stone and 10 hand cars. The passenger cars for the through business are furnished principally by the Eastern and Boston & Maine railroads.

Trial Balance, May 1, 1863.

Kennebec & Portland Railroad	$100,000 00
Notes receivable	2,728 87
Railway	1,360,183 97

President.—Ichabod Goodwin.
Treasurer.—Eliphalet Nott.
Superintendent.—John Russell, Jr.

Colombian Loan in England.

Proposals have been issued in London for a 6 per cent loan of 200,000*l.*, on the part of the United States of Colombia, at 86. The objects of the loan are the construction of roads within the territory of the republic, the improvement of the navigation of the River Magdalena, and the promotion generally of the commercial resources of the republic. Interest is to be payable half-yearly, at the London and County Bank, in Lombard-street, on the 1st April and the 1st October, and the instalments extend up to the 1st April next. The bonds, which are to be of 100*l.* and 200*l.* each, are to be redeemed at par by a sinking fund commencing in October, 1864, and it is calculated that the entire debt will be redeemed by the year 1874. The security for the interest and the redemption of the principal consists of a mortgage from the Government of the republic of 15 per cent. of the gross revenues of eight salt mines belonging to the nation, on which the present loan is a first charge, three of which alone now return an annual product of 181,919*l.* The Government further hypothecates the right of the nation to redeem within twelve years the privilege of the Panama Railway, which will become public property by right of redemption in 1875; and this loan after the date of the redemption will enjoy a special lien on the value and revenue of the railway. The prospectus describes the advantages of these liens in the event of a renewal of the concessions to the railway company, and a right in reserve to the Government to pay off the loan at par at any time. We are informed that a portion of the loan is already subscribed. We think the Panama Railroad Com-

pany should have offered to take this loan, instead of letting it go to England. There are very obvious reasons why it would have been good policy to have done so.

The Legal Tender Act Declared Constitutional.

POWER OF CONGRESS TO ISSUE TREASURY NOTES; AND TO MAKE THEM A LEGAL TENDER IN PAYMENT OF DEBTS. CONTRACTS REQUIRING THE PAYMENT OF MONEY CONTEMPLATE SUCH MONEY AS SHALL BE "LAWFUL MONEY OF THE UNITED STATES."

The Court of Appeals of the State of New York, have now decided the cases of the Metropolitan Bank *et al vs.* the Superintendent of the bank department, and Lewis H. Meyer *vs.* James J. Rosevelt. Both of these cases depend upon the decision of the same question of law for their determination. In the first case, the plaintiffs refused, on demand of the holder thereof, to redeem one of their circulating notes of the denomination of ten dollars, in gold or silver coin of the United States, but each tendered to such holders a treasury note of the denomination of ten dollars, issued under the authority of the act of February 25, 1862, as and for a legal redemption and payment of the circulating notes respectively issued by them. The bank notes were protested for non-payment in gold or silver coin, and the notes and protest thereof filed in the office of the Superintendent of the Banking Department, who gave notice to the banks to pay the same. The general banking law makes it the duty of the Superintendent, in case of a default of the banks to redeem their circulating notes in lawful money of the United States, to sell the stocks or trust funds in his hands belonging to the banks for their redemption. Apprehending that the Superintendent would take such proceeding, on the ground that the plaintiffs had failed, upon lawful demand, to redeem their circulating notes in the lawful money of the United States, the Banks and the Superintendent, upon a case agreed on, submit to the court the questions, whether the act of Congress, approved February 25, 1862, is constitutional and valid, and also, whether the refusal of the plaintiffs, to redeem their notes, on demand, in the gold or silver coin of the United States, and their offer to redeem their notes in the notes of equal denominations, issued, as aforesaid, by authority of Congress, was a failure or refusal to redeem their notes in the lawful money of the United States. If the court was of the opinion that the act was constitutional, and that the plaintiffs offered to redeem their notes in the lawful money of the United States, then judgment was to be entered restraining the Superintendent from taking any steps towards redeeming any of the notes of the plaintiffs in cases where they have offered to redeem in the legal tender notes of the United States. But if the court should be of the opinion that the act is unconstitutional, and that a refusal to redeem in the gold or silver coin of the United States is a refusal to redeem in the lawful money of the United States, then judgment was to be entered dismissing the complaint.

The second case was also submitted. The facts were these: In August, 1854, the defendant loaned to Samuel Bowen the sum of $8,000, and Bowen executed and delivered to him his bond conditioned for the payment thereof, with interest half yearly, on the 23d August, 1857. As a further security, Bowen executed a mortgage on certain real estate in Richmond county. On making the loan to Bowen, the defendant gave him his check for $8,000 on the Chemical Bank in the city of New York, payable in gold at the option of Bowen. The plaintiff in May, 1861, became the owner in fee of the mortgaged premises, and assumed the payment of the mortgage. In June, 1862, being desirous of paying and discharging the mortgage, he tendered to the defendant the sum of $8,170, being the amount of principal and interest, in notes of the United States, issued under the act of February 25th, 1862. The defendant refused the same as legal tender, and claimed that the re-payment should be made in gold coin of the United States, as being the money in which the loan was made. It was then agreed that the defendant should receive the said sum of $8,170 in United States notes, conditionally, and the question be submitted to a court having jurisdiction whether they are or were a legal tender in payment of the mortgage debt and interest. If the court should decide that they were a legal tender in payment and discharge of the bond and mortgage, then the defendant was to deliver up the mortgage and discharge the same of record; but if the court should decide that the treasury notes were not a legal tender in payment of the mortgage debt, then the plaintiff was to pay to the defendant the further sum of $321 78, being the difference between the market value of the notes and gold coin of the United States on the 11th June, 1862. Upon these facts, the single question submitted was: were the notes of the United States a legal tender on the part of the plaintiff?

The Apellate Court decide that the powers necessarily incident to powers expressly granted in the constitution to Congress, are amply sufficient to sustain the constitutionality of the act of Congress passed on the 25th of February, 1862, both as to the issuing of the treasury notes and to making of them a legal tender in payments of debts.

The court further decide that a contract to pay a sum of money at a future day, contemplates that the payment will be made in such money as at that time may be the lawful money of the United States. Upon this point Judge Emott, in an opinion rendered by him, says:

"It is said that the act making these Government notes, equally with gold, a tender for the payment of this and other debts contracted before its passage, is unconstitutional as impairing the obligation of contracts. The opinion has been expressed and would seem to be well sustained, that the States only, and not the Federal Government, are forbidden by the constitution to pass laws impairing the obligation of contracts. However, this may be, if this act of Congress is open to no other exception, it cannot be successfully impeached for impairing the contracts between debtors and creditors to which it may apply. The contract of the obligor in this bond was simply to pay the amount stipulated, as so many dollars in the lawful money of the country, that is, in that which should be its lawful money when such payment was due. It was not either in terms or in effect a contract for the delivery or the return of so much gold and silver, except as that was involved in the idea of payment of the debt, while gold was the only medium in which debts could be paid. Gold and silver coin, and money, are not necessarily convertible terms. The latter word is used in various senses, and has various shades of meaning. It is generally the representative of values, and the instrument of exchanges. But it is no part of a contract of debt made at one time for the repayment of money at another, that this representative or instrument should possess the same exchangeable value or the same purchasing power at the time of payment as at the time of incurring the debt. All that the debtor contracts to do is to return to his creditor in dollars and cents so much as he has received, and the advance and repayment are alike to be made in that which, by competent and valid authority is made the medium of account and payment. The only question here is whether, under the constitution of the United States, Congress has the power to make notes or bills issued by the Government, such a medium and tender in payment of debts."

The following are the concluding remarks of Judge Wright, in an opinion delivered by him:

"The purposes of the act in question were threefold: First, to borrow money; second, to pay the public debts; and third, to collect the internal revenue and other demands of the Government. The mode devised for borrowing money was by the issue of treasury notes. It is not denied that Congress possessed the power to use treasury notes; and I think it was empowered to impart to them such properties as would enable them to be used most advantageously in executing the borrowing power. If a note of the Government, having the function of money, among other characteristics, was an eligible and appropriate means for effecting the object, Congress had the right to select those means, unless prohibited in the choice of them by the constitution. They are not repugnant to the constitution, unless, as is contended, that instrument was established for the express purpose of creating and maintaining an exclusive metalic standard of value; which proposition, in my judgment, cannot be successfully maintained. It is no objection to the means chosen to execute a constitutional power, that private contracts may be indirectly affected or impaired. This may be the indirect effect of carrying into execution many of the express or implied powers of Government. The embargo laws impaired the obligation of numerous private contracts, yet these laws were adjudged to be constitutional. The Government may debase the coin, and has done it, yet the obligation of private contracts would be affected precisely as by attaching to a paper currency the quality of money, and subjecting it to the fluctuations of the market. As parcel, therefore, of the means that might be constitutionally used in executing the power to borrow, was a note of the Government, clothed with the capacity to circulate and having the functions of money. It is not denied that Congress may create and use such an instrument, without the money and legal tender clause as to private debts, in the exercise of the borrowing power, or the power of paying the public debts, or of collecting the internal revenue. If it is constitutionally fit and proper in the exercise of those powers to impart to the Treasury notes the quality of money for any purpose, it is no objection that they are constituted a medium in which private debts may be paid. The question is whether they may be lawfully made money at all. If Congress can clothe them with the attributes of money, and as such, use them in payment and discharge of debts due from and to the Government, there is no valid reason why they may not be made to have the same operation in respect to private debts. Individuals are always parties on one side or the other in transactions with the Government; and the idea that it is an invasion of private rights even to be compelled in private money transactions to use the same currency, having the same standard of value as that used in transactions between the Government and individuals, rests on no just or sensible foundation. It is not true, however, that the direct result of the legal tender clause as to private debts, is to compel the creditor to surrender a portion of his debt to the man who owes it. This effect is only worked out by assuming that the creditor is enti-

tled to have his debt paid in gold or silver coin, and that whatever may be the difference in value in the market between coin and legal tender notes, is so much surrendered to the debtor. But his rights is to have his debt paid in lawful money, whether it be coin or paper, and what he loses or gains cannot be estimated by the market fluctuations in value of the medium. A Treasury note of the denomination of ten dollars is legally as valuable for the purposes of money as a coined eagle. The value of each is fixed at ten dollars money of account. If a gold eagle be worth more in the market than a ten dollar legal tender note, it is because it is wanted to pay duties and settle balances abroad. Indeed, what is called a demand note of the Government receivable for duties, has a value in the market about equal to gold or silver coin. The market value of gold and demand notes is, therefore, regulated by the demand and supply. This demand for gold may be for legitimate purposes, as suggested, and it may be for speculative or illegitimate purposes; and, unfortunately, at the present time, most of the difference in value of gold coin and legal tender notes, is the result of a species of gambling in the metallic medium of circulation, as private or public stocks are gambled with. It cannot be said that a measure of value thus effected by extraneous causes, fluctuating in its character, which may be more to-day and less to-morrow, can be any just criterion of what a creditor loses or gains. Applying the test to-day to the private creditor's contract, he may lose; to-morrow the market difference in value between gold and legal tender notes may be nothing, so that whether he is compelled to surrender anything by the legal tender provision depends upon circumstances fluctuating in their nature and extrinsic to the action of the Government or the creditor. But that the creditor releases anything is more ideal than actual. Take the case of the defendant in one of the present cases. What of value does he, in fact, release by the operations of the legal tender provision? He did not lend gold, nor was the debtor's contract to repay in this specific article. He drew his check for $8,000, and the bank transferred so much of his credit to the borrower. The debtor received $8,000, but not in gold. The medium of dealing between the parties was a bill of credit. But now the creditor claims that he is entitled to be paid so many dollars in gold, stamped and valued at the United States mint, because when the transaction was had such coinage was the only lawful money and a legal tender. Not getting it, however, how can it be said that he has actually released value to his debtor? He receives for his debt as many dollars in money by being paid in treasury notes as if paid in gold eagles. One description of money satisfies the contract equally with the other. Indeed, the paper money discharges the debt by the currency in which it was created. If the creditor surrenders value at all to the debtor, it is because he may dispose of coin in the market at a higher rate than he can a treasury note, and the former is more valuable as a medium of exchange in the commercial world than the latter. In this way, and in no other, can the proposition that the operation of the legal tender provision is to transfer a part of the creditor's property to another, be worked out. It might better be characterised as an attempt to extort from the debtor more than the law justifies or requires.

I am of the opinion, therefore, that the selection by Congress of the legal tender note as a means of carrying into execution the borrowing power, the power of collecting the internal revenue, and paying the debts of the nation, was within the measure of its legislative authority under the Constitution. As means, it was not forbidden by that instrument. There is nothing in it expressly prohibiting Congress from creating and using a paper currency in the exercise of its specific constitutional powers, and this is admitted. But it is said that the Constitution was established for the express purpose of creating and maintaining a metallic standard of commercial and monetary values, and hence the making Treasury Notes money and a legal tender is the exercise of a power repugnant to the spirit of the instrument. There is nothing in the letter of the Constitution indicative of a design of its framers or the people that the Government should be exclusively a metallic currency Government. It is true, that one of the express powers conferred by Congress was that of coining money and regulating the value thereof, and of foreign coin; but the grant of this power does not show that ours was intended to be an exclusively metallic money government. Full effect may be given to the coining money clause without imparting to the great and sagacious men who framed the instrument any such visionary idea. The same duty and trust in respect to this power was imposed on Congress as in respect to all others of the enumerated powers in the Constitution. It would be going a great way to argue from the fact that the power to emit "bills of credit" was proposed to be given to Congress on the first draft of the Constitution, and was subsequently stricken out; that the purpose of inserting the coinage clause was to impose on the Government a special trust to create and maintain a National metallic currency, to the exclusion of any other. But the fact has no significance for any purpose. In the first draft of the Constitution, one of the clauses in enumerating the powers of Congress, read: "To borrow money and emit bills of credit." In the progress of the deliberations of the convention, the words "and emit bills of credit" were stricken out; but as the instrument was finally adopted the clause read: "To borrow money on the credit of the United States." It is claimed that by striking out the words "and emit bills of credit," the convention evinced the intention that Congress should not possess the power of creating or issuing a paper currency, or passing laws making any thing but gold or silver a legal tender in the payment of debts. The question is, not what the members of the convention intended, but what was the intention of the people who adopted the Constitution; and this can only be determined from the instrument itself. There is nothing in the Constitution expressly prohibiting Congress from passing laws providing for issuing the notes of the Government to be used as currency, and making them a legal tender, though the passing of laws making any thing but gold and silver a legal tender in payment of debts, was expressly prohibited to the States. This latter prohibition is significant as showing that the subject of tender was not overlooked by the convention or people, and that having it in mind, any restrictions upon the legislative power of the Federal Government were omitted.

My conclusions are, that the act of Congress, approved on the 25th February, 1862, is not in any of its features unconstitutional. The clause objected to, which makes the notes issued by the Government lawful money and a legal tender in payment of public and private debts, was not outside of the measure of the authority given to Congress in the execution of its powers. In carrying into execution the power to borrow money on the public credit, (if in the execution of no other specified power,) it was fully justified as a means. There is no prohibition of the use of such means in the Constitution, and Congress, in executing the great governmental powers conferred by that instrument, may use any modes or means, not prohibited, most fit and appropriate in its judgment, whether directly or indirectly conducive to the attainment of the end of the power. That the public exigencies required a resort to the particular means complained of, is most manifest, though that was a question to be determined by Congress. We cannot, however, shut our eyes to the magnitude of the necessity. If the Constitution and the national life were to be preserved, more money was required than had ever been coined at the national mint from the precious metals, and when the act was passed, four times greater in amount than there was gold and silver in the whole country. This money must be borrowed, and mainly from our own people. We have been admonished of the frightful consequences in the future, to result from an irredeemable paper currency, based on the credit of the nation; but if all the evils so strongly pictured, and which are mainly figments of the imagination, were to occur, how insignificant in comparison with a destruction of the Government. If this magnificent governmental structure of ours falls, it will matter little that in the effort to save it, disorder and ruin were brought on the commercial and monetary interests of the country.

I am in favor of affirming the judgment of the Supreme Court in the first of the above entitled cases, and reversing it in the latter.

Opening of the Connecticut and Passumpsic Rivers Railroad.

The railroad which bears the name of the two rivers along the banks of which it passes, was eighty-nine miles in length between its southern terminus and its northern one, Barton. It has recently been extended from Barton to Newport or Lake Memphremagog, a distance of 20 miles. In order to celebrate its completion and opening to traffic, the directors and friends of the road made an excursion to the lake on Wednesday last, accompanied by several gentlemen as their guests, among whom were parties connected with the press of Boston and New York. Proceeding by differe t routes they met together at White River on Wednesday, where they dined, and from whence they were forwarded over the rails to Newport, reaching that place at 7 P. M. the same day.

We have so recently published an account of the road, and the financial condition of the company, that is only necessary here to state that its capital is $1,280,500. Its bonded debt is $800,000. Its earnings the last year were $208,867 45, being an increase from the preceding one of $44,103 05. It has a sinking fund of $111,140, and out of its earnings, the extension from Barton to Newport has been made without recourse to new loans. It connects at its southern terminus with the Vermont Central, and Vermont and Canada, with the Connecticut River, and the Vermont Valley roads, and through these with the lines terminating at New York; it has numerous connections east and west with other lines, all in excellent condition and highly prosperous, and passes through a thickly settled and well cultivated country. It is the upper part of the great vertebral column of the Connecticut Valley railways. No less than thirteen other railways connect with it and contribute to its business, which may be compared to ribs, and to carry the figure a little farther, we see by the numerous saw-mills along its route it has a *lumbar* region like man himself.

Stopping at Barton hitherto, was like approaching a house which one desired to enter, yet halted at the door. So that the Passumpsic Company determined to proceed and make a connection with Lake Memphremagog and the splendid country beyond, known as the eastern counties of Canada. After years of exertion, skilful engineering, good financial management, and very persistent efforts of the solid men of Boston, the link was completed. The road passes over two and a half miles of piles driven into a marsh which intervenes at the southern end of the lake, and seemed almost to be without bottom. As it would have been impossible except, perhaps, to such engineers as General Gilmore to have operated at this point in ordinary seasons of the year, the Directors resorted to the novel expedient of waiting till the ice had formed, and upon it were

placed their pile driving machines, holes were cut through the frozen surface, and piles driven sometimes twenty and thirty feet into the ground below. In this way this part of the line was constructed. It is to be solidified with earth hereafter in the usual way.

The party, present to rejoice over the accomplishment of their plans more than ten years old, but interrupted by the usual hindrances which have beset almost all our railway projects, were now assembled to contemplate the work of their unwearied hands, and the accomplishment of their long cherished design. We take pleasure in recording their names, and preserving them for the gratification of those who in some future day, or even now, may wish to know who were the men who carried out this grand idea.

There were present then the following gentlemen:

Henry Keyes, President of the company, and its agent, Emmons Raymond, William Thomas, President of the Webster Bank, and F. S. Carruth, Director, and N. P. Lovering, Treasurer.

Lorenzo Sabine, author of the history of the American Loyalists and Secretary of the Boston Board of Trade, S. R. Spaulding, Wm. B. Spooner, and C. E. King, representing the Board of Trade. James Hayward, Eliphalet Jones, Charles A. Read, Wm. A. Crocker, S. S. Crocker, Mr. Burrall of the New Haven, Hartford and Springfield Railroad, and a number of other well-known and influential merchants and manufacturers of Boston of whose names we were not advised, but whose agreeable qualities of head and heart were appreciated. The whole party numbered about thirty-six, and among them were Mr. Frothingham of the Boston *Post*, Mr. Hale of the *Daily Advertiser*, and two other gentlemen who represented the *Journal of Commerce* and the AMERICAN RAILROAD JOURNAL.

At Newport was found a very excellent hotel, three stories in height, with surrounding piazzas of three tiers, commanding a most beautiful view of the lake, not unlike that obtained from the Fort William Henry Hotel at Lake George, only that the scenery was on a more magnificent scale. Here were very excellent accommodations, the tables bountifully provided, and well served, in the most modern style of hotel-keeping. The bed-rooms and furniture were in excellent order, neatly kept and quite assuring of comfort to the traveler. Between the hotel and the water's edge was a large open space, for the present bearing the appearance of a shipyard, where mechanics were busily preparing the lumber for the construction of depots, freight houses and the other usual appendages of a great line of railway. At a wharf close by, lay a neat little steamer of about one hundred tons burthen, carrying the British flag, with the poetical designation of the Mountain Maid. This trim craft had navigated the lake between the Canadian and American village ports for thirteen years, not very profitably to its enterprising and undiscouraged owner and captain. The extension of the road, however, was now about to reward him with a large increase of traffic and corresponding advantages. Early on Thursday morning he placed his vessel at the disposition of the Boston gentlemen, for a short excursion up the lake to the Mountain House, about twelve miles distant on the west side of the lake, placed on a knoll of rocks immediately at the foot of Owls head, a lofty mountain about three thousand feet high. A more picturesque though secluded spot could not be imagined.

It was a large shapely looking building with piazzas, and had a small summer house perched on a rock near the wide stairway which led up from the wharf to the entrance. Everything about it was unexpectedly neat and attractive, and being within her Majesty's lines about five miles, was quite beyond the necessity of offering its guests, bad sugar, tea, coffee, or liquors.

"All around was silence." On every side rose the most towering mountains of the most imposing forms, each vieing with the other for pre-eminence. It was stated that there was some traffic on the lake, the British collector sometimes receiving as much as $200 duties in a day. Timber rafts are sent down to Newport, and this branch of business is expected to increase enormously, now that the markets of the Connecticut Valley have been opened to it by this extension.

Returning from this very interesting excursion, the party entered carriages provided for them to make a short journey into the eastern townships across the line. Proceeding north and east for about twelve miles, passing Derby, an American village close to the boundary, and also through Stanstead just beyond it, the party, increased by the addition of numerous Canadians, among whom were several members of Parliament, and the distinguished member from Sherbrooke, Mr. Galt, ascended a hill known as Morrell's hill, to enjoy one of the most extensive and suggestive views to be found on this continent. On the top of this hill which had a smooth and equal surface of some acres, the eye took in a horizon literally walled in with mountains, some of their peaks towards Canada being fifty miles distant, so that the diameter of this splendid amphitheatre was about one hundred miles in nearly all directions. At about ten miles northeastwardly, lay in golden brightness the lake known as the Massawippi, a twin of Memphremagog, though not of the size of its brother, and from the place where the company assembled a valley of many miles connecting these waters, wide and smooth could be easily traced by the eye. This was pointed out as the surveyed route of the Massawippi Valley Railroad, for which a charter has been obtained from the Canadian Government, and by which a connection will be made with the Grand Trunk at Waterville or Lennoxville, a distance of between 27 and 29 miles, according to the selection made for the terminus.

One of the objects of the present gathering, was to form an opinion of the propriety of the extension of the Passumpsic Railroad from Newport to the Grand Trunk, to effect which the Canadian Charter was necessary, and was obtained. Among the prominent parties interested in this project, besides Mr. Galt, the President of the Company, were Col. Pomroy, and Mr. Knight, members of Parliament, Mr. Brooks, Mr. Colby, Mr. Morrell, and Mr. Pierce, of Canada, and several gentlemen of Boston already named. Here the party lunched *al fresco*, in bright sunshine; the air, of summer warmth, and the clouds with a summer aspect. If the RAILROAD JOURNAL, was allowed to indulge in anything else, but the most prosaic of all composition, facts and figures, it might find a very novel and agreeable occupation in reporting what was said and done on this occasion at Morrell's hill. It is very pertinent, however, to its objects to state, that after examining the lay of the land, and discussing the merits of the project, those present unanimously resolved, that the Massawippi railroad was now a necessity, and next that it should be made. This opinion was expressed in a resolution to that effect by Mr. Bloodgood of New York, and adopted unanimously with three cheers.

The meeting then adjourned, its long cavalcade being directed to Newport, where a dinner was provided and partaken of by the whole party.

In the course of the evening, a meeting was held, organized by Mr. Keyes, at which many gentlemen from Boston made addresses of the most interesting character. The principal topics, were the immediate construction of the Massawippi road, and the necessity and value of the work. Mr. Sabine opened the discussion in a pleasant speech. Mr. Galt spoke at some length in an easy and graceful manner proving the affirmative of the proposition with clearness and force. He was followed by Mr. Spaulding, Mr. Spooner, Mr. Read, Mr. Frothingham of the Boston *Post* Mr. Hale of the *Advertiser*, and on a call from the chair, by Mr. Bloodgood, of New York, whose speech like those of the gentlemen, who preceded him was received with the most friendly demonstration. The next morning the party separated for their homes, at the White River Junction, a very important point in the vertebral column we have already alluded to.

And now we should be unmindful of our duty as Journalists, and of the support given by it to the American Railway system for more than thirty years, if we did not state the impressions this excursion to Newport left on our minds. All were struck with the vast importance of the Connecticut and Passumpsic railways and their auxiliaries. What the Hudson river and Central are to the State of New York, the Connecticut Valley and Passumpsic are to the States of Connecticut, Mass., New Hampshire and Vermont. They form its grand trunk, and traverse one of the most lovely, and productive regions of this country. The valley of the Connecticut and those of its branches are rich, fertile, populous and beautiful. The roar of the various trains all pouring in upon this air line, is incessant, and the products of the Country, and the return merchandize from the cities below, press the railway lines to their utmost capacity.

But at Newport it is observable at a glance, that there are more worlds to conquer. No one who has not been across the line at Stanstead C. E., could possibly imagine what he may there behold. He who expected to find rocks and forest wilds, a sterile soil, and the struggling life of unsuccessful labor, will be astonished to perceive the richest soil, boundless fields cultivated with the greatest success, not a rock, scarcely a stone, not a stump, on any of the great farms which lie in the wide vallies, and reach up the hill sides. The whole country wears a cultivated and prosperous air. It is as beautiful as any part of Canada west, and as prolific. On Morrell's hill one might have imagined himself in some parts of England, and this is the character of the Eastern townships generally. Here are raised the finest cattle, sheep, and horses, particular reference being had to the breed. These are sent to various markets in New

England as best they can be. Wool is clipped in enormous quantities, and the Eastern speculators have recently been taking up all they could find at 50 and 60 cents, per lb. Now it is evident that the extension of the Passumpsic will give a new direction and opening to this trade, by an almost air line to New York, the best and most satisfactory market for the Canadians, south of Boston. The Massawippi effects this desirable object, and it goes further, since it opens a direct route to Quebec by a junction with the Grand Trunk, and shortens the distance between the two cities by 65 miles. In addition to all this, we must remember, that the business of copper mining in this part of Canada East, is receiving a vast impulse from the recent discoveries, and companies are multiplying to work them. The whole country is alive on the subject, and the development of this one interest would support a railway in their vicinity.

The plan determined on at the meeting of which we have spoken, appears to be to raise the amount of money necessary to construct the Massawippi Road, by subscriptions in cash, and in no other way. It was also proposed that the Passumpsic Company should work the extension and guarantee 6 per cent to the subscribers to the stock. This will probably be done. Some of the gentlemen present offered to be among one hundred who should take the whole stock at once. It is also thought Quebec, Montreal, and all the principal towns and cities on the Connecticut will subscribe liberally, in proportion to their ascertained interest in the new traffic and passenger business, and that New York, always ready for a good enterprise, will close up the subscription with whatever may be wanted.

One thing else should be mentioned. A new watering place, hitherto "remote and inaccessible" is now opened to our citizens. There is no such scenery to be found elsewhere in the United States, as in Vermont and New Hampshire. To the well known grandeur of the Green and White mountains, is now for the first time added the magical beauty of this mountain lake. Switzerland itself has no more beautiful water. Canadian gentlemen of fortune are already purchasing largely upon it for their summer residences, and find another "land of the mountain and flood" beside those they have known. A salubrious air, mountain scenery, the most delicious of fish, and the finest of mutton, must have their influence on that large class also, who will search for *them* if nothing else. In a few years the tide of travel will as surely turn aside in this direction as it now flows to Saratoga, Niagara and Lake George.

In conclusion we have only to add to these hasty remarks, falling far below the reality, that the excursion was a most agreeable one, and that the vigilant attention, constant humor and obliging manners of the President Mr. Keyes, are most gratefully remembered by the gentlemen from New York who were the recipients of his untiring courtesy.

In another column we publish the address of Mr. S. DeWitt Bloodgood, delivered on this occasion.

Flint and Holly Railroad.

The contract has been taken to build this road from Holly, on the Detroit and Milwaukee Railway, to Flint, the county seat of Genesee, where it will connect with the Flint and Pere Marquette road, already completed to Saginaw. The work is to be completed by the 1st day of July next.

Commerce of New York.

Connecticut and Passumpsic Rivers R. R.

The following is a report of the remarks of Mr. S. DeWitt Bloodgood at the Memphremagog House, Newport, Vt., at the celebration of the opening of the extension from Barton to that place on the 15th instant, an account of which is published elsewhere in our present issue. Other addresses were made of the most interesting and valuable character, by gentlemen from Boston and Canada, which we hope will be duly reported and published.

Mr. President and Gentlemen!

The journey through the upper valley of the Connecticut river would of itself be an ample compensation for the time and trouble of any traveller. Picturesque, historical, everywhere exhibiting industry, enterprise and success, it fills the eye and feasts the mind of the lover of nature, and inspires sentiments of admiration and respect for the steady-minded and prosperous people who have made it their home. Though coming from the Hudson, with a high estimate of its importance, its towering palisades and its lovely highlands, I can appreciate to the fullest extent the beautiful character of the scenery of the Connecticut, the grandeur of the mountain ranges which flank it on either side, and the majesty of this lake of the North; and more than that, the evidence which it presents, at almost every mile of its vallies up to the highest point of its tributaries, of thrift, enterprise, industry and contentment. If the population on its banks have sometimes found its rocks untameable and sterile, they seem to have turned every drop of water to good account. At an early day its importance was recognized and various projects were inaugurated to improve the navigation of the river by locks, dams and canals, and indeed at one time it was proposed to connect this very Lake Memphremagog with its waters, to secure a boat navigation to Springfield. White river and Barton river were both of them used in former days. But the introduction of steam changed all this, and we now have the rail and the iron horse, to supersede the canal, and to penetrate regions where canals are impossible. What was once remote and inaccessible is now within a few hours time from the cities and marts which line our northern coasts. New elements of power have been created, new fields of industry, new spheres of action, and here on the very confines of neighboring States, the outposts of our own, we are in the midst of civilization and refinement, and one of the most beautiful countries I have ever seen.

I congratulate the Directors and Company of the Connecticut and Passumpsic River Railway, that their efforts thus far have been so eminently successful.

As a New Yorker I honor the liberal policy of the capitalists of Boston in opening this line of travel, and a commercial route, which offers to New York as well as to themselves, an easy and speedy access to the ancient and wealthy city of Quebec and the participation with themselves in the trade of the lower province. You, gentlemen, have done well, and when you and your friends across the line get ready to construct the short remaining link which will complete the route, come to New York, and what you have not obtained of the necessary capital from the flourishing towns and cities on the line already finished it will endeavor to furnish. I think I may venture to assure you of the hearty support of the press of our city, and as a member of the Chamber of Commerce I will be but too happy to bring your plans early to its notice.

I for one most heartily approve of extending our railways towards and even into Canada, if it so desires. I am for reciprocity in trade not only, but the most intimate commercial relations with the provinces. The same ocean washes our shores, the same sky is azure to us both, it is our common canopy. The lakes and their outlets to the sea are open to both, we speak the same language, we have the same standards in law, religion and literature. If there be those who have looked with unfriendly eyes on the Canadas, I am not one of them. If any rashly speak of future military occupation, I do not. It is for them and them alone to determine their future condition, either to grow into an independent nation when they think proper to do so, or to remain the Colonies of an Empire which with all its faults,—and what country is without them, certainly not ours—we must ever respect and for whose *people*, whose sympathies have been so strongly with us, we must entertain a sincere regard. The Canadas, if they have suffered themselves to hesitate as to giving our Northern and Western States their full sympathy in this, their hour of trial, should not forget that to those States they owe the prosperity of their greatest lines of railways, and a very large portion of their trade; and here to-day emulating the men of Illinois, Michigan and Wisconsin, we have opened them another avenue for their traffic, and propose another chain of iron to bind together their interests and those of New England and New York. Certainly in view of these facts, of this disposition to fraternize with them, we deserve at least some share of their sympathy, and I am happy to say that in this part of Canada I find in that respect, but one sentiment and that, all we could desire. And still further, regarding the frequent expression of a wish on the part of the most intelligent Canadians to open a convenient and ample water communication with the Hudson, as a pledge of continued intercourse, I am prepared to say, that the project of a ship canal between the St. Lawrence and that river has recently been revived in our State, is attracting much attention and enlisting the most powerful support. We feel greatly obliged to those eminent merchants of Montreal, the statesmen in the Canadian Parliament, and those eminent provincial engineers, who have expressed their wish for the construction of such a work. I hope they will second the exertions now making in our State to bring it about. Our own Legislature had the subject partially before them the last session, and I have with me a report and maps which show the entire practicability of the work; the natural advantages of the route, and the smallness of the sum necessary to complete it. To the Canadas East and West, to the prosperity of the project known as the Ottawa Canal, to the interests of the Northwestern States, a navigation like that proposed, almost free from tolls, certainly free comparatively speaking, by a ship canal of the proper size will conduce more than any other project of the day. To the State of Vermont it will offer the largest field for commerce it has ever had, and we would here respectfully remind such of its citizens and those also from Massachusetts and New Hampshire who are present to-night, who cannot but see they too have a deep interest in the enterprise, that now is the time for action, if they wish to open the great West and the Canadas to their manufactures. The Connecticut and Passumpsic road, having been as I learn from its recent reports a well conducted one, is now a success and has elements of large and continued prosperity. May it flourish and reward its proprietors with satisfactory dividends, each mile of extension adding to its revenue, and the area of business increasing as "the square of the distance."

In the flowery months of May and leafy June the valley of the Connecticut, and it mountain slopes are peculiarly charming to the lovers of the picturesque, but they have never appeared more interesting, at least to myself, than within the last few days as I passed northward to its sources. The fields were covered with the secured stacks of corn and hay, the barns were full, the ground was yielding up its rich esculents, the orchards were groaning with the ripened fruit; everywhere the husbandmen were rejoicing in the plentiful returns of their labor; and I could not but perceive that this railway was in the right place to give access to the markets, and ensure them the rewards of their enlightened industry. For to this end all labor is directed. The man who could make two blades of grass grow where but one grew before, has been pronounced a public benefactor. If so, what is he who has provided the method of carrying this product to the marts where it can be exchanged or parted with, with regularity, economy and rapidity, which last is money also, if time is yet money as it was in the days of Franklin.

The poetry of motion is to my mind best illustrated by that of the swift train which lightens the labor and the expense of transportation. It is a pleasant sound that of the busy bee, but it is the gathered honey, and not the architectural beauty of the cell, which gives the greatest satisfaction to practical men.

In conclusion I beg leave to express the great obligations I am under to the Directors of this road for the pleasure they have given me by introducing me to this magnificent scenery of lake and mountain. May the enterprise we this day celebrate, be pursued till it accomplishes its great object, of extending and strengthening the friendly relations now existing between the North and Canada, and opening to American markets, the products of this rich agricultural country of which we have seen a noble and yet only a fair specimen this day. It is plainly to be seen that our friends across the line, for they are our friends, fully appreciate the immense advantage of this new connection with the cities of Boston and New York.

Shipments of Oil.

The amount of oil received at Salamanca and taken over the Erie Railway during the month of September was 66,369 barrels; 43,612 barrels came up over the Oil Creek Road, and 20,757 over the Franklin branch.—*Jamestown Journal.*

Albany and Susquehanna Railroad.

The Albany and Susquehanna Railroad Company, we are gratified to learn, have borrowed one million of dollars on their bonds in New York. The money is to be paid—$50,000 a month till April, and then at the rate of $250,000 per month. This will finish the road to Oneonta, and ensures its completion to Binghamton.—*Albany Journal.*

Grain Shipments and the Price of Gold.

One cause of the recent rise in gold has been the falling off in the demand for breadstuffs in Europe, consequent on the favorable harvests there. A statement from one of the largest grain houses in New York gives an actual account of sales of a shipment of corn to Liverpool. The quantity shipped was 7714 bushels of 56 pounds each, which is equal to 900 quarters in Liverpool. The price of corn here is 94 cents, and in Liverpool 26s. 6d., freight 6d. per bushel, and exchange 160. It will be seen that corn costs 28s. on board, and the price there is 27s. 6d.

The results are as follows:

7,714 bushels at 94c. cost		$7,252 16
½c. brokerage	$38 07	
½c. weighing, &c.	38 07	
2½c. commision	281 50	249 64
Cost on board		$7,501 80
900 quarters, sold at 26s. 6d.		£1,192 10 00
Charges:		
Insurance & war risk, 3 pr ct.	£36 00 00	
Freight and premium, 6d.	202 10 00	
Duty and dues	60 09 11	
Master porterage	10 02 00	
Fire insurance wharf	13 00	
Use of Jack ties	18 00	
Porterage, weighing, &c.	10 03 06	
Interest cost and charges	10 08 07	
Carriage samples	05 02	
Bank commission, ¼	2 09 00	
Commission and guarantee	47 06 06	
4 per cent on £1,192 10		381 05 08
Net proceeds		£811 04 04
This sum, at $4 44 the £, equals		$3,600 84
Exchange, 60 per cent. premium		2,161 80
Proceed of bills		$5,761 84
Cost as above		7,501 80
Net loss, 22⅝c. per bushel		$1,739 96

This is not an isolated case of loss, but represents what has been the rule. In the last three months, out of eighty successive shipments the loss runs 10c.@30c. per bushel. As a consequence of these losses, the export has declined as follows:

EXPORTS OF CORN FROM NEW YORK.

	1862.	1863.
June, bush	1,025,267	1,605,270
July, "	1,116,267	1,619,100
Aug. "	830,678	504,799
Sept. "	522,944	254,475
Oct. 1 to 7	178,126	21,090

Foreigners in the United States.

It appears by census tables (not yet printed,) that the entire population of the United States, born in foreign countries, was, in round numbers, in 1860, four millions one hundred and thirty-six thousand. This aggregate was distributed in states and territories, in round numbers as follows:

Alabama, 12,000; Arkansas, 3,000; California, 146,000; Connecticut, 80,000; Delaware, 9,000; Florida, 3,000; Georgia, 11,000; Illinois, 324,000; Indiana, 118,000; Iowa, 106,000; Kansas, 12,000; Kentucky, 58,000; Louisiana, 81,000; Maine, 37,000; Maryland, 77,000; Massachusetts, 260,000; Michigan, 149,000; Minnesota, 58,000; Mississippi, 8,000; Missouri, 160,000; New Hampshire, 20,000; New Jersey, 122,000; New York, 998,000; North Carolina, 3,000; Ohio, 328,000; Oregon, 5,000; Pennsylvania, 430,000; Rhode Island 37,000; South Carolina, 10,000; Tennessee, 20,000; Texas, 47,000; Vermont, 32,000; Virginia, 35,000; Wisconsin, 276,000; Colorado, 3,000; Dacotah, 2,000; District of Columbia, 12,000; Nebraska, 6,000; Nevada, 2,000; New Mexico, 6,000; Utah, 12,000; Washington Territory, 3,000.

Southern Minnesota Railroad.

Letters have been received in town from Col. Stoddard, who is in New York, stating that he has succeeded in securing funds with which to pay for the iron on the first ten miles of the Southern Minnesota Railway West from La Crosse. The opposition of the Wisconsin Railroad Consolidationists has been incessant. They will have to encounter the friends of the Southern Minnesota Railroad at the next Wisconsin Legislature, and will find their hostility to the Mineral Point and La Crosse Railroad, and to the Southern Minnesota Railroad, will be a swift witness against permitting any monopoly that will attempt to shut off new enterprises which are as worthy as existing interests.—*La Crosse Republican.*

Mississippi and Missouri Railroad.

We learn that a company of surveyors, in the employ of this Company, are now engaged surveying, and according to their instructions they have commenced their survey at the mouth of the Platte river. There can be no doubt but that the iron horse will first reach the great Platte Valley by passing through this county.—*Platte Valley Times.*

Flint and Holly Railroad.

The contract for building the Flint and Holly Railroad has been awarded to Messrs. J. B. Walton and C. M. Wright, who have given heavy bonds to complete the work by July 1st, 1864.

Erie and Pittsburg Railroad.

The Erie and Pittsburg Railroad is expect to be completed to Pittsburg toward the end of November.

☞ The yield of fruit in Michigan this year will be the largest ever known. The peach crop is estimated to be five times that of last year.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Oct. 9, 1863, was as follows:

Passengers	$29,340 68
Freight and live stock	32,359 42
Mails and sundries	1,243 08
Total	$62,943 18
Corresponding week of 1862	62,715 04
Increase	$228 14

The earnings of the Grand Trunk Railway for the week ending October 3, 1863, were:

Passengers	$33,400 28
Freight and live stock	59,449 45
Mails and sundries	3,000 00
Total	$95,849 73
Corresponding week, 1862	89,519 34
Increase	$6,330 39

The earnings of the Galena and Chicago Union Railroad for the 2d week of Oct., 1863, were:

Freight	$52,603 41
Passengers	13,199 13
Mails	1,300 00
Total	$67,102 54
Same week, 1862	44,249 71
Increase	$22,852 83

The earnings of the Chicago and Alton Railroad for the 2d week of October, 1863, were:

Passengers	$17,164 88
Freight	29,402 21
Sundries	1,789 45
Total	$48,356 54
Same week last year	32,234 91
Increase	$16,121 63

The earnings of the Cleveland and Toledo Railroad for the 2d week of October, 1863, were $30,656 00
Same week, 1862 23,475 00
Increase $7,180 00

The approximate earnings of the Marietta and Cincinnati Railroad, in the 1st week of October, 1863, were $15,939 27
Do., 1862 13,881 84
Increase $2,057 43

The earnings of the Chicago and Rock Island Railroad for the 2d week of October, 1863, were $47,628 00
Do., 1862 33,652 00
Increase $13,976 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in Oct. have been $43,848 66
Same week, 1862 31,248 85
Increase $12,599 81

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2d week in October have been $46,744 48
Same week, 1862 31,957 03
Increase $14,787 45

The earnings of the Chicago and Northwestern Railway for the 2d week in October, 1863, were $46,158 15
Do., 1862 25,211 81
Increase $20,946 34

The earnings of the Michigan Central Railroad for the 2d week of Oct., 1863, were $85,176 00
Same period, 1862 68,291 00
Increase $16,904 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of Oct., 1863, were $76,448 00
Do., 1862 68,852 00
Increase $7,596 00

The Crops in England and Canada.

The London *Mark Lane Express* of Sept. 19th, notes the progress of gathering in the crops in various parts of England and Scotland. The wheat crop will be, from present appearances, above the average. The reports in regard to other crops are also favorable. A recent number of the Montreal *Gazette* contains reports of the station masters throughout the whole extent of the Grand Trunk Railroad line of Canada, in reply to circulars sent from Montreal, and thus sums up the result:—

On the whole the picture they present is not altogether so flattering as we had expected to find, and particularly with respect to the great staple—wheat. From the westerly section of Upper Canada the accounts of spring wheat are uniformly poor. From only a few of the stations is there a good account of wheat. A large crop was expected some weeks ago, but the weevil, the midge and continued dry weather have worked evil. The reports of coarse grains are favorable from all parts. The reports from Lower Canada are much more favorable than those from Upper Canada. Something must be allowed for the chronic farmers' grumble in Upper Canada; but making this allowance it is impossible to conceal that the wheat crop is not what we had all hoped and had been led to believe it would be.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

American Railroad Journal.

Saturday, October 24, 1863.

Stock Exchange and Money Market.

One of the principal topics of conversation of the day, is the opposition of the leading banks in Wall street to the new system of National institutions organizing under the plan of Mr. Chase. Among the most prominent opponents is James Gallatin, Esq., President of the National bank, an upright and talented financier, who has recently published his views *in extenso*, as delivered by him to his associates at the Clearing house. He takes the ground that the inflation of our paper money system is likely to end as did the schemes of the famous John Law, and as those of Jefferson Davis are now ending. He contends that this inflation is largely increasing the prices of all articles, and that it is affording foreign capitalists an advantage of at least 60 per cent. in the purchase of U. S. stocks; that Mr. Chase's system is giving the control of the whole monetary power of the

country to a Bureau at Washington, and that the old existing banks are more secure and more likely to return to specie payments from the nature of their origin and management than the national banks, and finally that this system of paper money tends "to impoverish a nation and discourage the labor and savings of the people."

To the abstract propositions to which Mr. Gallatin lays down as to the consequences of an undue issue of paper money there is no answer to be made. All those familiar with history or finance, must admit the correctness of what he generally affirms. But there are other truths no less obvious. The first is, that it would be impossible to carry on this war on a specie basis. Paper currency has always been the medium of our internal trade and commerce. Without it this country never could have been what it is. If the policy of Mr. Gallatin had been adopted of using the existing banks of the loyal States, and especially those of New York, Boston and Philadelphia as the financial agents of the Government, we should have had paper money after all, and their whole currency would have been unequal to the required expenditure. The suspension of specie payments would have depreciated it just as much, compared with gold, as the notes of the Treasury now are in that relation. So that we should have gained nothing by their use and substitution, and worse than this, they would not have passed universally even at their nominal par, but have been subject to local discounts wherever they were paid out by the Government to the troops, or contractors. We should have had both these evils to encounter. Our present national currency and the new currency of the national banks have an eminent advantage over any local bank issues, in this, that they are actually at par for the payment of taxes and debts to the Government except in the single exceptional case of dues at the Custom House on importations. So too the glaring inconsistency would have occurred of the Government taking and using a currency of bank origin which was founded on national securities, and paying therefor interest, when the Government may issue its own obligations of the same value and solidity, such as legal tender notes, without paying any interest at all! It seems to us that the policy and action of the Treasury have therefore been eminently sound and sagacious. Inflation must have come even under Mr. Gallatin's plan, and we should have suffered equally as much in its use when employing bank currency, as we do under our present system. Besides, as long as the nation receive and prefer the Government notes everywhere in preference to bank notes, and the prices of our leading staples most of them, have not enhanced in price, as may be seen by examining the reports of the domestic produce markets for the last ten years, the depreciation of paper does not obtain in domestic transactions, having reference to home commodities to any great extent. Flour and provisions, and real estate, can be bought as cheap for paper, as they could years ago. It is only when we deal with foreign nations and have to pay balances in the par currency of the world, that the depreciation of our own is much felt.

The remedies for what inflation exists are near at hand. These consist in the rapid absorption of the national currency in such securities as the 5-20's, which is now going on at the rate of two millions a day; while the expenditures of the Government for carrying on the war are largely decreasing, having fallen off, as appears from official statements, many millions during the last three months, compared with the three months previous; and it being now announced that the receipts from customs and the internal revenue are quite equal to those expenditures. It must be remembered in confirmation of these assertions, that we have on hand a vast materiel of war which will last through the remaining contest, such as ships, artillery, forts, clothing, small arms, &c. We have also other quantities of munitions not requiring any further outlay. But there is another thing to be considered. In the instances cited by Mr. Gallatin of the disastrous effects of inflation produced by the systems of John Law and Jefferson Davis, there is no correspondence in the accompanying status of the parties which suffered and now suffer by it. No such immensity of commerce, no such resources of taxation, no such natural supplies of gold and silver were, or are within the reach of the French or the confederates. Even Mr. Law had the sense to perceive that there must be some means of redemption of paper money. His bank was to be the depositary of the public receipts. He looked to commerce and an immense return from the plantations of Louisiana through the medium of the Mississippi Land Company. But there were no revenues from the State, even to pay the interest of his loans, no commerce, and no results from Louisiana. Our loans and expansion have all the reimbursing power which he could not find, and the annual profits of our national industry are twelve thousand millions of dollars. So that one-sixth of this gain in a single year, is adequate to the extinguishment of our whole debt, even if it reaches two thousand million of dollars, though it yet lacks nearly eight hundred millions of that amount.

We may, we do suffer great inconveniences, but we believe that they would have been greatly increased, if the Government had relied on the Banks, rather than itself, and that the resources of the Nation are adequate to any demand which the war has made upon it.

The condition of the Market the last week has been unsteady in many particulars. Gold has risen and fallen, still ruling 25 per cent above the quotations a few weeks ago. We view this rise, all things considered, to be unwarranted by the true state of things. We believe the recent exportations were forced for speculative purposes. Our importations are large we know, but our stocks of goods are kept short, and are bought for cash and exported products, which are sold for cash. So that when peace returns there, will be no drain for credits to any considerable amount. On the contrary when the Union is restored, and the stability of the Nation secured, the drain will be from Europe to the United States, for the purchase of stocks, whose value and reputation will be increased and secured by this result. The movement in railway securities has been eccentric. The most remarkable fluctuation has been in Harlem. It has been down to 75, having been at the period of its greatest popularity as high as 170. It is said the whole capital stock has been sold within the last two weeks at falling prices, and as this capital is about $5,700,000, averaging the losses to certain parties at 50 per cent only, since the greatest rise, somebody has or somebodies have lost $2,350,000.

This road pays no dividends, but it has a great future, if it be well managed. It has been its fate however, several times to have become the prey of speculation. The decision of Judge Hogeboom, we do not consider of much import; there is an appeal from it, and we can not imagine on what his opinion was founded. There can be but two points. One the illegality of the grant by the corporation; the other, some right in the stage company, to the use of Broadway. We believe neither of them is of any force whatever.

We understand that subscriptions to the Massawippi Valley Railroad are likely to be sought in this market, as well as in Quebec, Montreal and the cities in the Connecticut Valley, to construct a short railway between Newport in Vermont, and the Grand Trunk, of 27 miles in length. Six per cent dividend will probably be guaranteed by the Passumpsic Railroad, which will work the line. Sixty seven miles will be saved by its construction between this city and Quebec, and a direct route opened to the rich copper mines in the Eastern countries, C. E. We have given large space in this number of the JOURNAL to this important subject.

The Chicago, Burlington and Quincy Railroad Company have declared a dividend of four per cent in cash, free from government tax, payable on the 16th of November to holders of stock at the close of business on the 30th of October, payable in this city at the Bank of Commerce, in Boston at the office of J. E. Thayer & Brother, and in Chicago at the office of the Treasurer.

The Toledo and Wabash Railroad Company will pay, on the 2d of November, at their office, 132 Broadway, the semi-annual interest of 3½ per cent on the preferred stock. Also, at the same time, at the Bank of the Republic, the interest due Nov. 1st on the second mortgage bonds, the interest bonds and the equipment bonds of the company.

The Pennsylvania Railroad Company have declared a semi-annual dividend of five per cent, payable at the company's office, in Philadelphia, after November 15th, free from State and National tax.

The Lehigh Valley Railroad Company have declared a quarterly dividend of 2½ per cent, clear of all taxes, payable on demand.

The Hudson River Railroad Company will pay October 30th, a scrip dividend of ten per cent., bearing six per cent. interest, and running ten years, but redeemable at the pleasure of the company on any dividend day hereafter, upon giving thirty days' notice of their intention to do so.

The Baltimore and Ohio Railroad Company have declared a dividend of six per cent. on the stock of the main stem, payable at the Merchants' Bank, Baltimore, on the 26th of October. Also, a semi-annual dividend of five per cent. on the stock of the Washington Branch Railroad, payable at the same place on and after the 16th. Both free of Government tax.

The interest warrants due November 1, on the second mortgage bonds of the Cincinnati, Hamilton and Dayton Railroad Company, will be paid at the Bank of America, N. Y.

Copake Iron Mines.

In the JOURNAL of October 3d, we called the attention of our readers to the great importance and the satisfactory increase of the Iron Mining Interest of this Country; and as one of the many proofs of the active preparations for a great extension of this interest, we would call the attention of Iron Manufacturers to the advertisement, in our columns, of the *Copake Iron Mines.* These Mines are in the town of Copake Columbia County, about 20 miles from the city of Hudson. They are directly upon the line of the New York and Harlem Railroad, over which and the Hudson and Berkshire Railroad the ores are brought to the Hudson River. The Company is prepared to contract for the delivery of ten thousand tons monthly, and have the ability to increase this amount indefinitely. The ores are taken from the Old Pomeroy Ore-bed, well known for the excellent quality of the iron for many years furnished to the Government for use at the National Armories for Gun-barrels and other purposes, for which, the very highest quality of iron was required; and we hazard nothing in saying that for toughness and strength it has never been exceeded by iron from any part of the United States.

Boston and New York Air Line Railroad.

It was announced last week that the first passenger car from Boston on the route of the Boston and New York Air Line Railroad had entered Woonsocket, R. I. The road, we understand, is not yet ready for business, as cars now run regularly only to West Medway, but it is anticipated that trains will be formally opened to Woonsocket about the 1st of November. The company have nearly all the equipment required except freight cars. The road is graded most of the way from Woonsocket to Pascoag, some fifteen miles, and there is a prospect that it will be completed to that point in another year. Another portion of the road, east of New Haven, was also partially graded some years ago. The length of the road from Bostoa to Woonsocket is 87½ miles.

St. Paul and Pacific Railroad.

The road commences at St. Paul, runs northwest along the Mississippi river to St. Cloud, from which point it extends in nearly a straight line to Georgetown, upon the Red river of the North, to which point the boats run which do the large business of the Hudson Bay Company. It is in contemplation to continue this road to the state line, and also through the British possessions, by parties interested in the Hudson Bay Company, and the requisite surveys have already been made.

The distance is less than 1,200 miles, and the country traversed is very fine. Arrangements have already been made to build a telegraph line from St. Paul to Pembina, and from there to the Pacific Ocean. The St. Paul and Pacific road is to be opened to Anoka, about thirty miles, during the next month.

Albany and Susquehanna Railroad.

At the annual election of the Albany and Susquehanna Railroad Company, held on the 14th inst., the following persons were chosen directors for the ensuing year: Ezra P. Prentice, Joseph H. Ramsey, Peter Cagger, Jacob Leonard, Albany; Charles Courter, Cobleskill; John Westover, Richmondville; John Cook, Worcester; Jared Goodyear, Milford; Eliakim R. Ford, Oneonta; Arnold B. Watson, Unadilla; Lewis Northrup, Colesville; Alonzo Everts, Sherman D. Phelps, Binghamton. Ezra P. Prentice was elected President, and Jared Goodyear Vice-President, for the ensuing year.

Hudson River Railroad.

The work of building a double track on the Hudson River Railroad, between Poughkeepsie and Albany, is progressing. It already extends from Albany to Coxsackie, and will be completed to Stockport, twenty-four miles from Albany in December. From Poughkeepsie the second track is completed nearly to Rhinebeck. It will be ready for use to that place about the first of December.

Erie Railway.

We have received from the Superintendent of the Erie Railway a neat little volume from the press of the Company, with the title of "Instructions for the running of trains, etc." It shows with what care and watchfulness the traffic of the road is conducted, and it is a model for other companies, as well as a curious illustration of the responsibilities of good management.

Chicago, Burlington and Quincy Railroad.

In connection with the recent declaration of a dividend by this company, the directors have issued a circular addressed to the stockholders, of which the following is an extract:

For the purpose of paying for the extension of the road from Aurora to Chicago, now far advanced in construction, and for the necessary equipment to enable us to accommodate the largely increased business of our Road, it is deemed by the Directors most prudent, and decided by for the interest of all the Stockholders, to issue new Stock instead of the long Eight per cent. Mortgage Bonds originally provided for the building of the extension; and they have *voted* to issue and sell to the Stockholders, in proportion to the Stock held by each of them on the 30th current, one new share free of November dividend, for seven old shares, at $100 per share, as cash, on 16th November.

And to allow parties who wish to pay in previous to that date, interest at the rate of 6 per cent

per annum, also to allow them to adjust their accounts fully with the Treasurer before 30th October, if they please, and receive new certificates on 17th November.

Fractional shares to be adjusted at the rate of 21 per cent. premium, or $3 00 per fraction, thus:

A stockholder holding 60 shares, by paying extra for three fractions, will receive 9 shares, which at par, and $3 extra for each of the three fractions, is. $909 00
The cash dividend on 60 shares at $4 is.. 240 00

Balance due for the 9 shares, as cash, 16th November..... $669 00

The rights to take this stock are of course valuable—the balance sheet of the Company, of August 31, 1863, shows that our expenditures and assets are $1,176,092 37-100 above our capital and indebtedness, equal to $20 474-9000 per share.

Stockholders who do not wish to take new stock are solicited to dispose of their rights themselves, and to notify the Treasurer thereof, by sending for entry, transfers like the annexed, to reach Chicago on or before 2d November. After said 2d November, that no injustice shall be done to stockholders who do not hear of these arrangements in time, or who are prevented from acting under them, the stock to which they would be entitled will be sold by the Company, in the market, for their benefit, and the proceeds above par, less the charges be divided among them.

Hudson River Railroad.

The business of this road for the year ending September 30, 1863, was as follows:

Gross receipts		$3,590,937 63
Transportation	$1,730,241 58	
Interest	648,354 05	
		2,378,595 63
Net earnings		$1,212,342 00
Cash dividend 3 per cent. Feb. 10, 1863, and 4 per cent. September 15, 1863		287,162 97
Leaving an undivided balance of profits, September 30, 1863		$925,179 03

Northern Central Railway.

The ordinance granting permission to the Northern Central Railway to construct a lateral branch from their track, through North and East Baltimore and Canton to the wharves binding on the east side of the harbor, with other privileges, which was vetoed by the Mayor, but notwithstanding passed the Second Branch, was lost in the First Branch, there being only ten votes in its favor. It required two-thirds of the members to pass it.

☞ The New Castle and Beaver Valley Railroad, which connects with the Pittsburg, Fort Wayne and Chicago Railway, at Homewood station, and runs to New Castle, in Lawrence county, Pa., was opened on the 5th inst.

☞ The old scheme of building a railroad from Collinsville through New Hartford to Winsted, only 14 miles, is again revived. An extension in the same direction to Great Barrington is also suggested.

Sanford's CHALLENGE HEATERS

SET IN BRICK,
PORTABLE
OR AS
FIRE PLACE
HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR
Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,
WITH AND WITHOUT REGISTERS.
THE MOST POWERFUL HEATERS
AND THE
Greatest Fuel Savers in the World:
With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

Central Transportation Co.

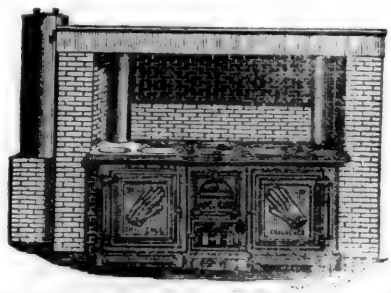
THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN
SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.



The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

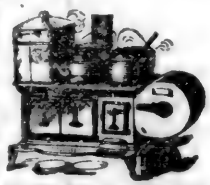
Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown st., PHILADELPHIA**, will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

Challenge Air-tight KITCHEN RANGES,



May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL**, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light

SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,

Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

KRUPP'S PATENT CAST STEEL

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enameled Iron Water Pipe, Steel Tubes, etc., etc.

They have received the highest approval from all RAILWAY COMPANIES that have them in service.

SANFORD'S

MAMMOTH

OR

GLOBE

HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York.

BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,

PROPRIETOR,

Depot, 279 Third Avenue, New York.

PROPOSALS FOR $500,000

Volunteer Soldiers' Family Aid Fund Bonds,

No. SEVEN.

SEALED Proposals will be received at the Comptroller's office, until Saturday, Oct. 31, 1863, at 2 o'clock P. M., when the same will be publicly opened, for the purchase, at not less than their par value, of the whole or any part of the sum of five hundred thousand dollars of the "Volunteer Soldiers' Family Aid Fund Bonds, No. 7," authorized by an ordinance of the Corporation, passed Oct. 9, 1863, and an act of the Legislature of the State of New York, passed March 6, 1863.

The said bonds will bear interest at the rate of five per cent. per annum, payable semi-annually, on the first day of May and November in each year, and the principal will be redeemed Nov. 1, 1871.

The proposals will state the amount of bonds desired, and the price for one hundred dollars thereof, and the persons whose proposals are accepted will be required to deposit with the Chamberlain of the City, within five days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive bonds for equal amounts of the par value thereof, bearing interest from the dates of payments.

Each proposition should be sealed, and endorsed "Proposals for Volunteer Soldiers' Family Aid Fund Bonds, No. 7," and inclosed in a second envelope addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if the interest of the Corporation require it.

MATTHEW T. BRENNAN, Comptroller.

CITY OF NEW YORK, DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, Oct. 10, 1863. 3t42

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—(Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—(Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—(Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $2. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

NOTICE TO CONTRACTORS.

ALBANY AND SUSQUEHANNA R R.

SEALED PROPOSALS WILL BE RECEIVED by the undersigned at the Engineer's Office, in the village of Unadilla, Otsego county, until Thursday, the 29th day of October instant, at 10 o'clock A. M. of that day, for Grading, Masonry, Bridging and Fencing of about 45 miles of the line of said railroad, extending from the village of Oneonta, in Otsego county to and including the Tunnel of about 2,000 feet through Webster Summit, in the Town of Colesville, in Broome county.

The line will be divided into Sections of convenient length, and proposals will be received for single Sections, or for the whole line.

The line will be ready for examination on and after Monday, the 19th inst., and Maps, Profiles and Plans, with Specifications may be examined at the Engineer's Office, in Unadilla, on and after that date.

Blank proposals, with all necessary information, will be furnished to those wishing to propose for work, at the Office of the Company, 73 State Street, Albany, and at the Engineer's Office, in Unadilla.

Proposals should be enclosed in an envelope and endorsed "Proposals," and directed to the undersigned at Unadilla.

The proposals which may be received in pursuance of this notice will be opened by the undersigned and canvassed, and the results reported to the Directors to aid them in making a proper award of the work.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The right is reserved to reject any or all proposals, as may be deemed for the interests of the Company.

Albany, October 1st, 1863.

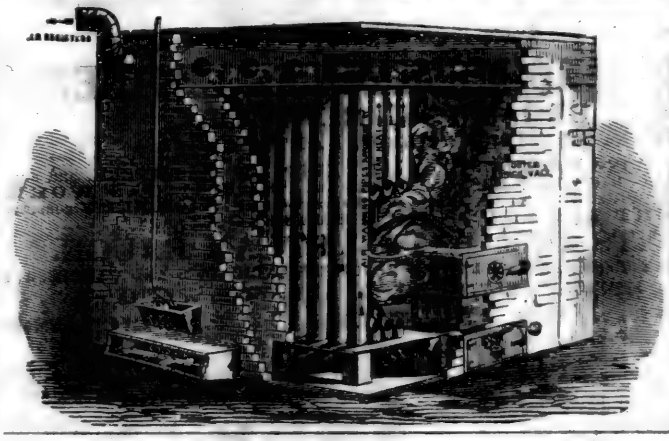
WILLIAMS & PAGE'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

SIMONDS' PATENT STEAM HEATER.

FOR Warming and Ventilating Buildings of all descriptions, Graperies, Greenhouses, etc.

THIS HEATER HAVING BEEN THOROUGHLY TESTED, has proved to be the MOST PERFECT WARMING APPARATUS IN USE. Parties having them in use, and to whom reference can be given, give them the highest recommendations.

Those requiring a SAFE AND PERFECTLY EFFICIENT APPARATUS FOR WARMING PURPOSES, are invited to call and examine before purchasing elsewhere.

Personal attention given to erecting the same, and a guarantee given for their successful operation.

MUNN & CO'S
PATENT OFFICE.

ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,
No. 37 Park Row, New York,
Or corner F and 7th sts., opposite Patent Office, Washington, D. C. 3m35

The Mercantile Mutual
INSURANCE
COMPANY,
No. 35 WALL ST., NEW YORK.

INCORPORATED, APRIL, 1843.

ASSETS OVER $1,250,000.

MARINE and Inland Transportation risks on Vessels, Freight and Merchandise insured on the most favorable terms.

Policies are issued, loss, if any, payable in Gold, or at the office of RATHBONE, BROTHERS & CO., Liverpool, if desired.

Parties effecting insurance at this office may participate in the Scrip dividend of profits, or receive an equivalent cash discount, at their own option.

The risk of war covered at the lowest current rates.

ELLWOOD WALTER, Pres't.
CHAS. NEWCOMB, Vice Pres't.
C. J. DESPARD, Secretary.

ALEXANDER'S
ROOFING
CEMENT-PAINT
FOR
Railway & Steamboat Co's,
BUILDERS and BUILDINGS generally.

THIS PAINT is warranted not to **Crack** or **Scale** either on **Wood, Iron, Tin,** or **Canvass.**

The ingredients in its composition are **all** of a preserving and protective nature. This Paint is now extensively used by Railway Companies and pronounced much **cheaper,** more **durable** and satisfactory than what was previously used. It is 2-5ths heavier in body than any other Paint.

Give this Paint a trial, and if not found as represented no charge will be made for it.

Send for descriptive circular and references.

W. G. PERKINS, Gen'l Ag't,
271 Broadway,
NEW YORK.

SUBSTITUTE FOR
CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK,** but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
Boston.

March 1863.

HAMILTON E. TOWLE,
CIVIL AND MECHANICAL ENGINEER
OFFICE, } **156 BROADWAY,** NEAR MAIDEN LANE, NEW YORK.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 23, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 23 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

American Railroad Journal.

New York, Saturday, October 31, 1863.

Atlantic and Great Western Railway.

A paragraph in relation to this work, which we published in our issue of the 12th of September last, has attracted so much attention among practical engineers and operatives, that we are induced to republish it for their benefit: "The Atlantic and Great Western Railway has established its machine shops at Meadville, Penn. It has also erected a large number of comfortable residences for its employee's, which are to be rented to them at low prices. Every occupant who pays his rent for ten years, and remains in the company's service that length of time, is then to receive a deed of his house as a reward." This we consider an example of enlightened liberality worthy of praise and imitation.

It is expected that the portion of the Atlantic and Great Western Railway between Akron and Galion, O., will be completed in November. Galion is 80 miles from Akron, and is the point of intersection of the Cleveland, Columbus and Cincinnati and Bellefontaine and Indiana Railways. The A. & G. W. crosses the Pittsburg, Ft. Wayne and Chicago Railroad, at Mansfield, at which place a large Union depot is to be erected.

Silver Lead Mines of Lake Superior.

An intense excitement exists in Wisconsin on the subject of the recent discoveries of lead and silver ore at Silver Lake, and the head waters of Rapid river back of Marquette. The assays of the ores show a yield of $20 to $25 per ton. The location of these deposits is around a small lake, in the northwest quarter of Town 40, Range 28 west. The formation is granite, and has long been considered metalliferous. The veins are either fissure or gash, though most probably the former, as the explorers state that they have traced them to a considerable distance, and find they have a regular course between north and east. There are now four companies organized on the land entered in the vicinity of the lake, now called Silver Lake, two of which are organized under the laws of the State. The other two, we believe, are or soon will be organized. The Silver Lake embraces eight or ten quarter sections scattered around the lake, and when the country is explored, can hardly fail to be equally rich with the rest. Some fine specimens have been brought in from these lands.

Chicago and North Western Railroad.

The income account of this company for the six months ending September 30, 1863, is as follows:

Earnings from passengers		$256,864 69
" " freight		453,729 75
" " express		8,066 68
" " mail		12,199 98
" " miscellaneous		923 95
		$731,785 05

		488,087 49
Net		$243,697 56

The Broad Gauge to St. Louis.

It is understood that the Erie Railway Company expect to be able to run broad gauge cars through from the Long Dock, opposite New York, to Cleveland, in a week or two, and to St. Louis by the 1st of March next. Some of the Atlantic and Great Western managers calculate for an earlier opening throughout, expecting to complete their line to Cincinnati in January, and thus to perfect the broad gauge connection by way of the Erie, Atlantic and Great Western, and Ohio and Mississippi Railroads, between New York and St. Louis. We have already noticed the contract with the Cincinnati, Hamilton and Dayton Company for a third track to accommodate the broad gauge line from Dayton to Cincinnati. The President of the Company has already made his arrangements for the requisite amount of rails to complete the third track before the New Year.

Southern Railroads.

Mr. John B. Hoxie who has been identified for several years with Southern Railroads, but is at present United States Superintendent of railroads running into Knoxville, gives some important information as to the condition of the rebel lines of communication. Nearly all of them, he says, are rapidly becoming worthless. The endurance of track, road-bed and rolling stock has been stretched to the utmost, and their facilities for repairing are so limited, that the roads can be of but little further service to the Confederacy. It is generally supposed that all the roads of the State are of the same gauge, but this is a mistake. The roads running from Richmond to Charleston by way of Weldon, N. C., are four inches narrower than the roads running from Richmond to the south by way of Lynchburg and Knoxville. This fact now becomes important. Our seizure of the Knoxville road has diminished by one-half their facilities of communication between Richmond and the south. Their possession of nearly all the rolling stock of the East Tennessee and Virginia and East Tennessee and Georgia roads will do them very little good as none of it will fit the roads south from Richmond by way of Weldon. Mr. Hoxie is of opinion that there is not a main trunk in the south that can maintain it elf for six months longer, unless they get materials for repairing outside of the "Confederacy."

Dubuque and Sioux City Railroad.

The following is the official report of the condition of the Dubuque and Sioux City railroad, just placed upon the list at the Stock Exchange:

Its Capital Stock is limited to $6,000,000, of which not exceeding $2,000,000 to be Preferred Shares. The present position of the Company is, (with 100 miles of road completed:)

Preferred Stock, shares $100 each, entitled to 7 per cent per annum, not cumulative, but participates with the common stock in any dividend in excess of 7 per cent	$1,982,180 37
The Preferred Stock is secured by a Mortgage to prevent the creation of a prior lien, unless by a written consent of the owners of three-fourths of the Preferred Stock.	
Common Stock, shares $100 each	1,010,247 05
First mortgage Bonds, upon the present 100 miles of road, 7 per cent at 20 years from 1st of January, 1863, coupons 1st January and July, (of which now negotiated $261,000.) The bonds are $1,000 and $500	300,000 00
Tetal	$3,292,427 42

Furthes issues of stock may be ma.e by vote of stockholde.s.

Lehigh Coal and Navigation Company.

The various parties in interest in the Lehigh Coal and Navigation Company are aware that a suit in Equ.ty is pending in the Supreme Court of this State, and that it will probably be heard in January next. The purpose of this issue is to determine the legal right of the Company to borrow money and to convert $1,803,000 of scrip. Issued by the Company at various times *pro rata* to shareholders, into the capital stock of the Company, thereby, as is alleged, weakening the other securities of the Company. The suit is brought by parties who are loan and shareholders, but not scripholders, to restrain the officers of the Company from the conversion of the scrip mentioned into dividend bearing shares. The officers of the Company were formerly opposed to this conversion, but since the vote of shareholders in May last, recommending it to be done, and pending the present litigation, were understood to stand neutral. They were necessarily made parties to the suit, and, with the party representing the scripholders, have filed their answer to the complainants' bill. Their answer, signed by their counsel, Hon. Wm. M. Meredith, is a clear and highly favorable exhibit of the condition of the Company, and from some expressions in its concluding paragraph which we here append, looks very much as though the officers contemplate the consummation of the purpose of the scripholders, if they do not favor it. It says:

"Under these circumstances these respondents believe that the security of the loanholders does no longer require that the whole surplus profits of the Company shall hereafter be applied to the sinking fund; but that the sum necessay to pay an annual dividend of 6 per cent, to the holders of the scrip, if now to be converted into stock, might be so paid without impairing the security of the boudholders in fact. If, therefore, it should be decided by this honorable Court that the respondents cannot lawfully carry into effect the resolutions herein before referred to, then these respondents (unless restrained by this honorable Court), will proceed to convert the said scrip into stocks with the view of thereafter declaring dividends thereon as on the other stock of the Company."

This expression of opinion in a legal paper from the Company fully accounts for the very decided advance in the price of the scrip. It is now selling at par, and the shares at 58 or 6 per cent. above par. If the Supreme Court shall decide in favor of the legality of the conversion at this time, the scrip becomes shares and draws the same dividends; if otherwise, the conversion of the scrip, by the terms of the deed of trust accompanying the mortgage loan, is deferred to 1870, during all which time it draws no dividend.—*Phila. Ledger Oct.* 23.

Great Western (Ill.) Railroad.

The earnings and expenses of this road for the years ending March 31, 1862 and 1863, have been as follows:

	1862.	1863.
From passengers	$213,050 76	$289,032 84
" freight	326,238 66	402,301 84
" mail	27,939 18	18,020 00
" express		8,312 68
" rent of cars and engines	24,180 32	21,561 65
" other sources		2,868 17
Total	$591,408 92	$742,097 18
Expenses, viz:		
Repairs of road	$89,454 26	$91,490 52
" bridges	14,115 88	3,497 20
" locomotives	30,320 89	37,248 20
" cars	20,494 56	27,544 36
" mach'ry, etc.	2,649 48	6,152 56
" shops, depot, etc	4,256 28	5,523 88
Train hands	32,416 24	38,620 29
Station expenses	24,203 77	24,066 20
Fuel	32,511 11	46,816 87
Oil and waste	4,065 26	6,664 35
Watchmen & switchmen	6,987 51	7,529 47
Loss and damage	9,075 66	14,010 24
Salaries & general exp.	17,344 20	14,724 96
Taxes	10,539 78	14,040 72
U. S. tax on passengers		3,955 04
Other operating exp.	23,405 47	23,736 46
Total	$321,840 35	$364,621 32
Net earnings	$269,568 57	$377,475 86
Construction expenses.	31,963 74	57,229 58
Balance	$237,604 83	$320,246 28

The increase of gross earnings as compared with those of the previous year was $150,688 26; of operating expenses, $42,780 97; of net earnings, $107,907 29; and of net earnings, after deducting construction expenses, $82,641 45. The ratio of operating expenses to gross earnings was 49.13 per cent, against 54.42 per cent the previous year.

The number of miles run by locomotives in 1862-'63 was: with passenger trains, 217,904; with freight trains, 243,753; with other trains, 20,186—total, 481,843. Miles run in 1861-'62, 404,700—increase, 77,143. The earnings per mile run by all trains were $1.54 against $1.46 in the previous year; and the expenses 75.67 cents, against 79.50 cents. Net gain per mile run, 11.73 cents. Passengers carried, 175,991. Tons transported, 215,682.

The equipment of the road consists of 21 locomotives; 11 passenger, 5 second class and baggage, 4 mail and express, 6 caboose, 119 platform and coal, 122 live stock, and 257 box cars. One locomotive, 15 box and 10 live stock cars were purchased during the year; and 8 live stock cars built in the company's shops.

Length of road from State Line to Naples, 174⅛ miles; Meredosia branch, 5½ miles; side tracks, 15½ miles—total 195⅛ miles. The report says:

The business of the year, as compared with that of former years, may be considered highly satisfactory, but the Freight Earnings would have been at least fifty thousand dollars more had the Toledo and Wabash Railway Company furnished its due share of Cars for the joint business.

In consequence of the increased cost of labor, fuel and all other materials, the expenses for the last six months of the year were much higher than they would otherwise have been.

It will be seen that after paying interest for the current year 1862-'63, $194,500—a balance of $125,746 28 was left, which would have been applicable to a Dividend on Stock, had it not been necessary to apply it to the extinguishment of $41,000 of the Sangamon and Morgan Railroad 10 per cent. past due Bonds and deferred Interest Warrants issued during the years 1860, '61 and '62. The Road being now clear of all claims except the current interest, $194,500, on its mortgage debt, it is hoped and expected that future net earnings can and will be applied to dividends on the stock.

The completion of the Illinois and Southern Iowa Railroad gives us a direct connection with Keokuk, from which we expect to derive a large increase to our through business.

It is proposed to make a new Mortgage for the sum of $2,500,000, and to issue bonds payable in twenty-five years, and bearing seven per cent. interest payable semi-annually in New York, and to give the holders of the Bonds now outstanding, the privilege of exchanging them for those of the new issue, at par. It will be seen that the present bonds are secured by mortgages upon different sections of the Road, and that the seven per cent. bonds are due in 1865, and the ten per cent. bonds in 1868, while the new mortgage is to be upon the entire Road and Rolling Stock of the Company. As soon as the mortgage is prepared and the bonds ready for delivery, the bondholders will be notified, and those holding the seven per cent. bonds will undoubtedly avail themselves at once of this privilege, while those holding the ten per cent. bonds, will, as they approach nearer maturity, undoubtedly be willing to take the long bonds, bearing seven per cent. interest, in preference to having their bonds paid off. The bonds, as exchanged, will be held by the trustees, and not cancelled until all the bonds are exchanged in order that the present holders may not lose any of their security as a first lien upon the road.

Arrangements have been made by your Company to operate the Quincy and Toledo Road, for account and risk of the latter Company, from the first of May, 1863, which will doubtless prove advantageous to both Companies.

Arrangements are also in progress for the operating by your Company of the Illinois and Southern Iowa Railroad, which, if consummated will prove equally advantageous to both Roads.

The income account of the company for the year ending March 31, 1863 is as follows:

Balance April 1, 1862	$164,253 93
Earnings as above	742,097 18
	$906,351 11
Expended for construction purposes	$57,229 58
" in operating the road	364,621 32
Paid claims against old company	701 35
" matured interest coupons	170,517 50
" deferred interest warrants	97,500 00
Balance	215,781 36
	$906,351 11

The authorised capital stock of the company is $2,500,000. The amount issued is $1,648,561 20. The cost of the road is represented by—

Capital stock	$1,648,561 20
Sangamon and Morgan Railroad Co. 10 per cent bonds	41,000 00
Great Western Railroad Co. 10 per cent bonds, due in 1868	1,000,000 00
Great Western Railroad Co. 7 per ct. bonds, due in 1865	1,350,000 00
	$4,039,561 20

The Sangamon and Morgan Railroad Company bond have been paid during the past year. The 10 per cent bonds of the Company, due in 1868, are secured by a first mortgage on that part of the road west of Decatur, about 100 miles, including

the Meredosia Branch. The 7 per cent bonds, due in 1865, are secured by a first mortgage on that part of the road east of Decatur, 80 miles, and by a second mortgage on the road west of Decatur.

GENERAL STATEMENT.

Cost of road, as above	$4,039,561 20
Material, etc. on hand	26,550 12
Bills receivable	724 45
Sundry accounts	9,764 72
Geo. Griswold treasurer	52,728 37
U. S. certificates in New York	31,000 00
State warrants at Springfield	15,123 00
Military accounts at Springfield	19,446 87
Cash at Springfield	19,443 93
	$4,214,342 56
Capital stock	$1,648,061 20
First mortgage bonds	1,000,000 00
Second " "	1,350,000 00
Balance	215,781 36
	$4,214,342 56

President—L. TILTON.

Directors—J. N. A. Griswold, G. G. Gray, E. T. H. Gibson, F. T. Frelinghuysen, Wm. A. White, Geo. Griswold, L. Tilton, Jas. L. Lamb, Jas. Dunlap.

Superintendent—F. W. BOWEN.

Secretary—WM. B. CORNEAU.

Treasurer—GEORGE GRISWOLD.

Transfer Agent in N. Y.—E. T. H. GIBSON.

Statistics of our Foreign Population.

A Washington correspondent says: It appears by census statistics just compiled that the natives of Ireland are most numerous in this country, as there were one million six hundred thousand in 1850. Germany, or the several German States, come next, with over one million three hundred thousand; England follows with 431,000; British America has 249,000, Scotland 108,000, France 107,000; Switzerland 53,000, Wales 45,000, Norway 43,000, Spain 42,000, China 35,000, Holland 38,000, Mexico 27,000, Sweden 18,000 Italy 10,000; Belgium 9,000, Denmark 9,000, Poland 7,000, W. I. Islands 7,000, Portugal 7,000, Russia, 3,000; South America, 3,000; Asia, Africa, Australia, Atlantic Islands, Central America, Greece, Pacific Islands, Sardinia and Turkey are to be counted each by hundreds. From data in various forms it is estimated that about $400,000,000, have been brought to this country by immigrants and there were remitted by them to the Bank of England, from 1848 to 1860, eleven and a half millions of pounds.

The Telegraphic Belt around the World.

The work of encircling the world with a line of telegraph is progressing. On Wednesday night last two messages passed through the Chicago telegraph office—one from Omsk, Eastern Siberia, and the other from Alexandria, Egypt, each directed to San Francisco, Cal. The Russian American Telegraph Company expect in the next two years to complete the connection between St. Petersburg and San Francisco. Under the Russian charter, the wires, according to one dispatch alluded to, have now reached Omsk, and are rapidly progressing, while the California State Telegraph Company are moving on the American end of the great line with all possible speed. These messages were severally dated Sept. 13, and were delivered in San Francisco on the night of the 23d, making ten days time between these remote local cities, including the conveyance across by steamers. Thus one more link is added to the chain which will ere long circumvent the world.—*Chicago Tribune.*

Trade and Commerce of Cincinnati.

We give below, compiled from the Annual Statement published in the *Cincinnati Price Current*, an abstract of the Report on the Trade and Commerce of that city for the years 1862–'63.

Notwithstanding the affairs of the country, and especially those of Ohio presented a gloomy appearance at the close of the last year's statement, this is now entirely changed, and abundance and prosperity have returned to an extraordinary degree. The statement is a most gratifying one in all respects.

Money Market.—The great abundance of money led to a large demand for all kinds of property, the Government currency was most favorably received, and an advance in prices of about 25 per cent was generally realized. Exchange on the Eastern States in consequence of the legal tenders was steady and uniform.

The Weather and Crops.—The weather having been unfavorable, the tobacco, potatoes and corn suffered accordingly. Hay was a light crop, but of flax the yield was enormous.

Navigation and Railways.—On the whole, the water of the river between Cincinnati and Pittsburgh, has been sufficient to admit of transportation of all the freight between these two cities.

The Railways have done a fair business, and an enormous amount of produce has been sent by them and the canals and lakes to the seaboard.

Steamboats.—The number of the steamboats, and the amount of tonnage, employed in the trade of Cincinnati are as follows; Steam vessels 304; Barges 43.

Tonnage of the former	65,174 tons.
" " latter	6,551 "
Total	71,725 "

The number of new vessels built was in 1858–'9, 28; in 1860–'1, 11; in 1861–'2, 4; and in 1862–'3, 43.

Alcohol.—About the first of October, the tax on whiskey went into operation, and the distillation fell off. The exports for the last four years were as follows:

1860	27,302
1861	43,461
1862	52,460
1863	15,973

Ale and Beer.—The demand has improved. Prices have increased about $1 per barrel. The imports and exports for the last four years are as follows:

	Imports.	Exports.
1860	6,934	25,581
1861	5,844	20,160
1862	5,361	19,870
1863	8,806	26,063

Apples.—The crop is an average one. The price per bbl. has ranged from 4½ to 5½cts. per lb. and peaches 7 to 9cts. per lb.

The imports and exports of apples were:

Green:	Imports.	Exports.
1860	95,811	25,098
1861	84,759	39,103
1862	98,053	23,320
1863	149,758	42,161
Dried:		
1860	64,186	15,498
1861	91,684	45,502
1862	106,403	62,508
1863	54,245	19,794

Tanner's Bark.—The demand has been fully up to the supply. Prime chestnut has brought from from $11 to $13 per cord.

Butter.—This has averaged in 1862–'63 about 18½cts. per lb. not so high by 1ct. as it was in 1858–'9. The following are the imports and exports for the last four years:

	Imports.		Exports.	
	bbls.	firkens.	bbls.	firkins.
1860	15,209	34,468	4,054	48,298
1861	12,395	21,860	2,385	32,046
1862	5,916	14,090	248	9,262
1863	4,408	28,364	877	15,481

Beef Cattle.—The dry weather diminished the supply. The exact number brought to the market is not known, but it is estimated at 7,000 head driven in from points convenient to the city. The price per gross cwt. August 26 last, was $4. The prices in 1855–'6 were $7.56 in 1856'–7 $4.57, showing that the advance in consequence of the war has not been very great.

The following table shows the Imports and Exports of Cattle by Railway, the last four years:

	Imports.	Exports.
1860	43,182	20,593
1861	40,585	19,357
1862	37,904	23,467
1863	31,915	16,739

Barley and Barley Malt.—The new crop is a good one, and the quality excellent. Prices $1.12 to $1.33 per bushel.

The following shows the average prices of Prime Fall Barley, the last four years:

1859–'60	$0 76
1860–'61	0 69
1861–'62	0 69
1862–'63	1 36

The following table shows the imports and exports of Barley the last four years:

	Imports. Bushels.	Exports. Bags.
1860	352,829	47,580
1861	493,214	29,289
1862	323,884	21,026
1863	336,176	9,157

Barley Malt.—The imports and exports for the same period are:

1860	117,593	209,487
1861	70,153	155,779
1862	102,064	125,051
1863	104,724	146,239

Boots and Shoes.—There has been a brisk trade and a profitable one in these articles, and it is in a healthy condition. Prices owing to the advance in labor and leather have enhanced 25 per cent.

The following table shows the imports and exports of Boots and Shoes, the last four years:

	Imports.	Exports.
1860–'61 cases,	30,915	10,881
1861–'62 do	22,401	5,738
1862–'63 do	42,840	13,538

With regard to the number of houses engaged, the number has not increased much, being, wholesale 29, and retail 369, making in all 398 houses engaged in all departments of the business.

Beans.—Large crops are expected but the demand is likely to exceed the supply.

The following table shows the imports and exports of Beans, the last four years:

	Imports. Bushels.	Exports. bbls
1860	20,352	3,445
1861	23,004	7,567
1862	39,260	12,796
1863	55,490	15,643

Cheese.—There is a marked improvement in this department. The summer has been favorable for the manufacture, but the farmers are holding on for a rise.

The following were the average prices the last four years:

1859–'60	8⅛
1860–'61	7 4-5
1861–'62	6 3-10
1862–'63	10 2-5

It is thus seen that the highest price was paid for cheese last year which has been paid the last four years; and, indeed, the highest price ever paid during the last twenty-five years.

The following were the imports and exports of Cheese, the last four years:

	Imports. boxes.	Exports. boxes.
1860	227,095	172,753
1861	156,583	121,233
1862	103,861	59,545
1863	124,996	71,839

Coffee.—Prices have gradually risen and stood in August at 29 cts for Rio (wholesale).

The following were the imports and exports for the last four years:

	Imports. bags.	Exports. bags.
1860	129,930	90,165
1861	160,683	109,262
1862	117,022	110,258
1863	101,083	104,078

Clothing.—This manufacture has been growing rapidly, large amounts of capital, and great numbers of hands being employed in consequence of the war. There are 131 houses engaged in the business.

Corn.—The crop was a good one in all parts of the west except Southern Ohio, Kentucky, and parts of Indiana, owing to the dry weather. There has been consequently a falling off in the receipts.

The closing price in August was 60 cts. In 1856–'7 it was 50 cts. The following are the imports and exports for the last four years:

	Imports. bush.	Exports. bags.
1860	1,346,208	48,867
1861	1,340,690	127,269
1862	1,708,292	141,150
1863	1,504,430	265,934

Clover Seed.—The new crop was a good one.

The following were the average prices each of the last four years:

1859–'60	$4 85
1860–'61	4 75
1861–'62	4 17
1862–'63	6 03

The following table shows the imports and exports of Clover and Timothy Seed the last four years:

	Imports. brls.	Exports. brls
1860	28,224	16,642
1861	18,673	13,065
1862	9,753	5,579
1863	13,552	6,159

Candles and Soap.—A very large increase in these articles has taken place, and large purchases were made for foreign use in consequence of the rise of gold and exchange. Prices of tallow average 13 cents. Star 20.

The following table shows the annual exports of Candles and Soap for the last four years:

	Soap, boxes.	Candles, boxes.
1860	66,267	175,226
1861	69,836	138,234
1862	113,687	245,997
1863	76,005	263,912

Cotton Yarns.—The last quotation was 75 cts. per lb. and the demand ceased.

The imports of Yarns the last four years were as follows:

	pkgs.	lbs.
1860	12,841	2,455
1861	13,253	18,353
1862	5,267	1,388
1863	3,478	2,113

Coal.—The imports have been light owing to low water, and scarcity of labor. The prospects are still discouraging. The total receipts during the past year have been 7,388,218 bushels, and the price rules at present at 28 cts.

The comparative receipts for four years stand as follows:

	Bushels.
1859–'60	17,600,000
1860–'61	12,500,000
1861–'62	8,500,000
1862–'63	8,000,000

Dry Goods.—Incredible amounts of money have been made by all parties engaged in this trade; all who had stocks on hand became rich.

The following table shows the imports and exports of Dry Goods for the last four years:

	Imports. pckgs.	Imports. tons.	Exports. pckgs.	Exports. tons.
1859–'60	1,153,910	4,404	1,702,220	17,957
1860–'61	978,000	5,120	1,558,700	10,420
1861–'62	1,669,000	10,574	1,817,800	11,264
1862–'63	1,101,800	18,484	1,961,850	9,172

The number of houses engaged in the business was in—

	Wholesale.	Retail.
1860	66	199
1861	60	167
1862	53	182
1863	57	129

Eggs.—Have been largely in demand, and have sold at from 12 to 6 cents per dozen.

The following were the imports and exports of eggs, the last four years:

	Imports. boxes & bbls.	Exports. bbls.
1860	22,670	8,528
1861	23,579	10,069
1862	17,643	6,293
1863	15,264	4,037

Flour.—The advance in gold gave great activity to flour, the decline in midsummer, however, caused great losses to holders who had relied upon its steadiness. Large quantities which had cost $6, were then sold at $3.75.

Flour is not now so high in Cincinnati as it was in 1856, $6.30, or in '–56, '–57.

The following were the average prices the last four years:

1859–'60	4 60
1860–'61	4 45
1861–'62	4 08
1862–'63	5 03

The following were the annual imports and exports of flour for four years, each year ending August 31:

	Imports. bbls.	Exports. bbls.
1860	517,229	478,308
1861	490,619	426,625
1862	588,245	460,574
1863	619,710	404,570

Iron.—The market has been active.

The local or city demand for all kinds of iron increased considerably the past year, and the market has been, on the whole, more active; but there was a further falling off in the export demand. Pig was forced up about the middle of October to $40, but the demand was light. Holders again put up prices to $43, when the great excitement existed, about the 1st of February, regarding the advance in gold, and afterward to $45, in March; but manufacturers bought sparingly, failing to see the future in the same light the furnace men did; and, in April, prices gradually declined, and from that time on, during the summer months continued to recede until they reached $33@34, in July. But the demand at these rates became active, and prices improved on to the close of the year. The tax has influenced the value of both pig and bar, and the latter advanced early in the year, and during the last six months has ruled at 4¼ and 5¼c. for common and charcoal.

The following table shows the imports and exports of iron, in various shapes, the last four years each year ending August 31:

IMPORTS.

	Tons.	Pieces.	Bundles.	Pig, Tons.
1860	8,378	397,466	95,448	37,550
1861	8,835	142,997	29,821	23,632
1862	6,756	130,283	34,920	23,702
1863	16,747	146,446	23,130	39,151

EXPORTS.

	Tons.	Pieces.	Bundles.	Pig, Tons.
1860	6,934	575,268	129,030	4,667
1861	4,281	327,205	107,964	5,143
1862	7,982	258,370	55,550	5,302
1863	13,332	177,278	39,623	4,968

Linseed Oil and Flaxseed.—An unusual amount of seed has been sown, and the demand for it and for the oil is large. The price for oil ruled in August last at $1.08 per gallon.

The following were the imports and exports of flax-seed, the last four years:

	Imports. bbls.	Exports. bbls.
1860	26,307	1,144
1861	19,278	753
1862	18,970	2,117
1863	34,784	3,184

As the exports of linseed oil come under the general head of "Oil," we cannot give them separately, but give them under the head of "Lard Oil," which constitutes the great bulk of the oil exported.

Lard Oil.—Owing to the high price of lard, this article has ruled higher than the previous season; but the demand has been active throughout, and it will be perceived there is a large increase in the exports. The advance in the price of this article has been more imaginary than real; for, taking specie as the standard of value, the advance in the price of this and most other articles of produce, has been but slight. But yet, while this is true, the people have been benefitted to nearly as great an extent as if the advance was a reality. The foreign demand has been large.

The price of No. 1, was in August 83 cents per gallon.

The following were the imports and exports of lard and linseed oil, the last four years:

	Imports. bbls.	Exports. bbls.
1860	24,844	50,846
1861	43,549	53,803
1862	24,025	58,465
1863	15,059	78,429

Leather.—The demand for leather has continued the whole yeer. In August last the price was 38 cents per pound.

The following table shows the prices of domestic shoe and harness leather at the close of August the last three years:

	1861.	1862.	1863.
Sole, City tanned, per lb.	22c	27c	38c
Hemlock, City tanned, per lb.	20c	25c	35c
Harness leather, per lb	22@26c	25@26c	38@40c
Skirting, per lb	24@25c	26@27c	38@40c
Rough harness, per lb	19@21c	20@22c	34@36c
	1861.	1862.	1863.
Calf skins, per dozen	$23@25	$23@25	$30@35
Kip skins, do	28@36	32@40	49@70
Upper leather, do	33@35	33@35	37@40
Bridle leather, do	38@43	38@43	45@50

The following were the imports of leather the last four years, and the exports the last four years, each year ending August 31:

	Imports. bdls.	Exports. bdls.
1860	19,626	24,018
1861	17,460	24,204
1862	27,788	30,461
1863	31,626	28,024

NOTE.—A bundle weighs 80 to 100 pounds.

Lumber.—This has been scarce and high, owing to the war taking so many lumberers to the field for the high bounties. The river prices in the Spring were $18 to $20 per 1,000, taking the rafts as they run, and the yard prices for seasoned at the close were as follows:

Clear pine	per M.	$40 00 to $45 00
First common	"	32 50 to 35 00
Second common	"	27 50 to 30 00
Third common	"	20 00 to 22 00
Framing	"	25 00
Poplar	"	25 00
Shingles, No. 1	"	5 57

Molasses.—There is a considerable decrease in the interior trade, owing to the use of sorghum, and the absence of the New Orleans supply. Some small amounts of this last came by way of New York. The price on the 31st of August, was 68 cents per gallon.

The following are the annual imports and exports for the last four years:

	Imports.	Exports.
1860	91,807	51,814
1861	71,698	51,776
1862	21,855	28,359
1863	38,634	19,594

Oats.—The receipts have been very heavy, the crop being a large one. The price per bushel, 31st of August last, was 49 cents.

The prices in 1856–'57 were 46 cents; 1860'–61 26½; 1861–'62, 30; 1862–'63, 58¼.

The annual imports and exports for the last four years, are as follows:

1860	894,515	111,823
1861	838,451	134,311
1862	1,338,950	450,851
1863	1,312,000	937,139

Pork and Provisions.

The following table shows the annual imports and exports of provisions the last four years, each year ending August 31:

Years.	Pork & bacon hhds.	Pork tierc'e.	Pork bbls.	Pork lbs.	Lard bbls.	Lard kegs.
IMPORTS.						
1860	4,662	3,892	25,456	23,250,222	47,499	11,319
1861	5,136	6,459	37,477	21,912,796	50,632	12,245
1862	10,082	3,879	46,903	23,708,694	99,085	33,582
1863	8,443	10,361	47,457	33,215,723	93,707	11,800
EXPORTS.						
1860	52,532	39,833	104,347	345,932	60,658	55,701
1861	47,851	32,251	121,635	776,571	100,806	46,643
1862	39,458	40,965	86,363	2,038,393	139,596	61,352
1863	27,746	53,735	123,900	696,659	144,147	33,699

Petroleum.—This has superseded coal oil for illumination. The price for refined was 65 cents per gallon and the demand good. The imports for the two last years were 23,000, and 2,000 barrels.

Rye.—There is a large falling off in the receipts, and the quantity used for distilling is small. The price August last, was 88 cents.

The imports and exports were as follows:

1860	131,487	59,177
1861	157,109	69,075
1862	247,187	84,436
1863	138,935	25,415

Rice.—The market has been supplied with foreign, exclusively, at 7½ cents during the past year.

Sugar.—There has been a marked increase in the trade in this article. Louisiana was imported as long as it could be obtained, the bulk, however, came from Cuba and Porto Rico. The stock is light, and higher rates are expected. The present year's crop in Louisiana is estimated at only between 25 and 40,000 hhds.

The average prices were:

In 1860–'61	6¼
" 1861–'62	9½
" 1862–'63	12¾

The following were the annual imports and exports of sugar of all kinds, for four years:

	Imports. hhds.	Imports. bbls.	Exports. hhds.
1860	40,551	37,950	32,433
1861	39,452	46,672	36,054
1862	18,168	87,345	29,377
1863	26,081	71,431	3,098

Salt.—The large demand has kept up the price. When the salt works at Kanawha were in possession of the rebels, the price rose to 75 cents.

The stock now in the West is light, and prices remain high in New York and Boston. A large amount of domestic has been made, as the prices pay a large profit. The leading salt works in the Ohio Valley are the Ohio River Co.'s Works and the Mason City, both on the Ohio, and the Kanawha Salt Works on the Kanawha.

In August 31st last, Turks Island was held at 58 cents per bushel, of 50 lbs., and the Ohio and Kanawha at 50 cents.

The following were the imports and exports of salt, the last four years:

	Imports. bbls.	Imports. bags.	Exports. bbls.	Exports. bags.
1860	119,751	61,058	59,046	12,502
1861	110,295	44,603	81,202	12,604
1862	162,857	69,350	87,211	23,703
1863	159,730	75,190	83,563	21,969

Tallow.—This, like most other articles of produce and merchandise, responded to the high premium on gold, and ruled considerably above the prices current the previous year. It was taken largely for export to England.

The price August 26 last, was 9½c. per lb.

The following were the imports and exports of tallow, the last four years:

	Imports. bbls.	Exports. bbls.
1860	7,075	927
1861	7,282	7,434
1862	7,965	11,214
1863	4,905	9,000

NOTE.—All packages are reduced to barrels, in making up the imports and exports.

Tobacco.—The crop now growing is said to be good, but as the cultivation has been greatly extended in other States, prices must be affected.

The following were the imports and exports of all kinds of Tobacco, the last four years, each year ending August 31st:

	Imports. Hhds.	Imports. Bales.	Imports. Boxes and kegs.	Exports. Kegs and boxes.	Exports. Hhds.	Exports. Bales.
1860	6,261	7,239	49,552	49,882	4,074	49,882
1861	14,448	7,001	35,455	43,141	14,232	3,971
1862	31,944	13,147	37,813	75,968	27,955	7,928
1863	33,261	6,981	31,683	65,457	29,736	6,492

It will be seen from the above that the trade in leaf tobacco has largely increased since the war. A very well arranged and permanent tobacco market has been established in this city.

Hides.—The market has become active and prices recovered. The prices of dry flint, August 31, 1863, ruled at 18 cents.

The following table shows the imports of hides, the last four years:

	Imports. Pieces.	Imports. Pounds.
1860	169,203	91,417
1861	189,032	63,700
1862	150,344	78,795
1863	150,501	32,089

Wheat.—Has not turned out very well in the Northwest. When the new crop came into the market in July, prices closed to 95c. and closed at 93c. We quote prime red. Indiana and Ohio White ruled at prices about 10c. above the price of Red, and prime Kentucky from 5 to 10c. above Ohio and Indiana White, but there is often great irregularity in rates, there being sometimes a demand for Red that will run it up to within 5c. per bushel of the price of White.

The crop, the present season, in all the sections of country tributary to this city, has been below an average. Owing to the very dry Fall, there was a great deficiency in the breadth of land sown, which diminished the quantity, and then a large portion of Kentucky wheat is smutty.

The price of wheat in August last, fluctuated between 93 and 95 cents.

The following were the annual imports and exports for four years:

	Imports. bushels.	Exports. bushels.
1860	1,057,118	321,495
1861	1,129,007	525,065
1862	2,174,924	1,293,680
1863	1,741,491	1,177,108

Whiskey.—The tax on distillation and other causes, produced a large falling off in production, consumption and exportation. The price of proof whiskey ruled 31 August last, at 43 cents.

The following were the average prices the last four years:

1859–'60	20
1860–'61	14 2-5
1861–'62	18¼
1862–'63	87 3-5

Deduct 20c. from the last year's average, and it will be seen that the average is below that of the previous year, whilst the average prices of corn and rye are vastly above those of that year, showing the business has been far from satisfactory.

The following are the imports and exports for the last four years:

	Imports. bbls.	Exports. bbls.
1860	433,168	389,310
1861	381,763	309,939
1862	429,036	238,316
1863	160,858	162,007

The annexed statement shows the value of the principal imports into Cincinnati during the years ending August 31, 1862 and 1863:

	1863.	1862.
Apples, green	$1,874,395	$19,606
Ale, Beer and Porter	44,030	21,444
Buffalo Robes	29,400	106,782
Beef	16,763	14,126
Bagging	7,700	19,455
Barley	336,176	178,136
Beans	138,275	78,520
Butter	333,156	233,569
Blooms	49,920	27,020
Boots and Shoes	2,441,880	1,048,649
Bran, Middlings, &c	117,792	113,464
Crockery Ware, &c	185,274	837,000
Candles	65,064	54,924
Corn and Corn Meal	848,847	532,932
Cider	18,641	3,715
Cheese	344,315	250,666
Cotton	12,310,410	4,750,270
Coffee	4,953,067	3,744,904
Cooperage	152,939	142,762
Cattle	1,755,325	2,160,528
Cement and Plaster	45,384	26,100
Eggs	91,584	105,858
Flour	3,036,579	2,490,039
Feathers	170,370	194,880
Fish	282,024	153,535
Fruits, dried	94,928	159,605
Grease	311,724	246,012
Glass	110,337	73,932
Glassware	197,136	149,067
Hemp	1,282,206	55[illegible],600
Hides	1,132,928	640,900
Hardware	2,647,096	1,240,470
Hay	272,724	157,113
Hogs	5,794,305	3,643,212
Hops	66,120	77,740
Horses	8,171,295	5,174,020
Iron and Steel	1,556,649	815,542
Iron, Pig	1,096,228	663,656
Lead	352,590	234,156
Lard	1,904,870	1,976,028
Leather	569,268	472,396
Lemons	81,792	55,860
Lime	54,431	44,200
Liquors	187,220	148,010
M ise and Sundries	57,935,000	43,970,880

Jeffersonville Railroad.

The work on the extension of the Jeffersonville Railroad to New Albany has been commenced, and is being pushed forward with great vigor. We understand the grade has already been completed from the depot to the State Prison.

Bank Law.--Agency of Presidents.

BANK PRESIDENTS HAVE NO POWER TO CERTIFY THEIR OWN CHECKS SO AS TO BIND THE BANK. THE ADVERSE INTEREST OF A PRESIDENT RENDERS HIM INCOMPETENT TO ACT AS THE BANK'S AGENT.

The plaintiffs, Claflin *et als.*, brought an action against the Farmers and Citizens Bank of Long Island to recover the amount of three checks drawn on the defendant, and alleged to have been certified and accepted by the bank through C. W. Houghton, its president.

The action was tried before a Referee, who reported that the checks were drawn by the respective drawers thereof on the days of their several dates, and severally accepted and certified, indorsed and delivered. That the said checks at the times they were respectively drawn and delivered to the payee therein named, were so accepted and certified by C. W. Houghton, as president of the said bank; and he at the time of such acceptance and certification was the president of the defendant's bank, and as such president authorized by such bank to certify checks drawn upon said bank; said checks were so certified by said Houghton at his business office in the city of New York; but of such fact the plaintiffs when they received the same and paid the money thereupon, had no notice. The said checks were each of them delivered to the payee, who upon receiving them paid to the respective drawers, the full amount of the face of each check. The payees of such checks, on the same day of the respective dates of them, respectively endorsed and transferred the same and each of them to the plaintiffs; and the plaintiffs when they received the said checks respectively paid to the payee thereof the full amount of the face of each check, and that the said plaintiffs so received the said checks in good faith. That on the first day of December, 1854, the plaintiffs presented the checks to the defendants at their bank for payment, and payment thereof was demanded and refused, the whole amount of the checks with interest was $26,224.

The Referee determined, as a matter of law, that the defendants were liable upon the checks, by reason of such certification of them by the president of such bank.

Judgment was entered upon this report of the referee, and an appeal taken therefrom by the Bank to the Supreme Court. The Supreme Court affirmed the judgment, holding the law applicable to the case to be such as determined by the Referee. From the judgment of the Supreme Court. The defendants again appealed to the Court of Appeals of the State of New York. This appellate Court, now decides in favor of the Bank, reversing the judgment below, and holding that a bank check drawn by the president of the bank in his individual name, payable to another person, and certified "good" by the drawer *as president*, renders the acceptance *void* in the hands of the drawer, irrespective of the question whether or not he has funds in the Bank. That as the want of authority in the president as agent, to bind the bank, appears upon the *face of the check*, of course there can be no *bona fide holder* of the check. And it does not alter the case that a general authority to certify checks had been conferred by the bank on the president. The question is one of agency, where the president cannot act as the agent of both parties to the contract; nor as agent in re-

gard to a contract in which he has any interest, or to which he is a party, on the opposite side.

The reasons given by the Supreme Court for sustaining the judgment are embodied in the following portion of an opinion rendered by JUSTICE LEONARD:

"An agent cannot, in general, act so as to bind his principal in matters touching his agency, where he has an adverse interest in himself. There is an exception in the application of this principal in favor of the holders of negotiable paper acquired in good faith before due, for value, without notice of the misconduct of the agent, or the knowledge of such facts as would amount to a want of good faith in the taker of such paper. In the case before us, the interest of Houghton is assumed to be at variance with his duty. His interest was an inducement to him to certify his own checks without funds. It was his duty not to do it. The public however cannot be apprised, from the face of the checks, of the existence of this conflict between interest and duty. The president of the bank may have money there on deposit as well as another man. The money being in bank, the certification of his own check would not be adverse to the duty of the president. As between the bank and its own officer, it is entirely clear that such a certification would create no liability."

"The general authority to certify checks had been conferred by the bank on their president. The identity between the name of the drawer and the president of the bank who certified the check, did not necessarily inform any one, by the mere force of that fact, that the drawer had certified his own check, without funds in the bank. It was possible that he had so done. It was not probable, however; and the usual presumptions of innocence and fair dealing were against the existence of doubts about the conduct of the president of the bank."

"The presumption of bad faith on the part of the plaintiffs does not necessarily arise from the manner of certification. That fact with other circumstances, might have brought the referee or a jury to the conclusion that here was a want of good faith on the part of the plaintiffs in taking the checks; but the certification in the manner mentioned was not conclusive, as evidence, to deprive the plaintiffs of the protection afforded to *bona fide* holders of negotiable paper."

The following is the opinion rendered by the Court of Appeals.

SELDEN J.—The only question in this case which seems to me to require serious consideration, is, whether Mr. Houghton could bind the bank by accepting checks or drafts drawn by himself. It is a well settled rule of the law of agency, to which I apprehend *there is no exception*, that no person can act as the agent of both parties to a contract, although he may himself have no interest on either side; nor can he act as agent in regard to a contract in which he has any interest, or to which he is a party, on the side opposite to his principal. In the present case Mr. Houghton, as the drawer of the checks, was the party with whom the contract of acceptance was primarily made, and stood therefore precisely in those opposite relations which the rule referred to forbids. It is not necessary for the principal in such cases to show that the agent has acted unfairly, or that he himself has sustained any injury. The act of the agent is deemed to be unauthorized, and the contract is void.

It is conceded, in the opinion of the Supreme Court in this case, that as between the bank and Mr. Houghton, the certificate of acceptance of the latter would not be obligatory. But the court supposed that a subsequent *bona fide* holder could nevertheless avail himself of such certificate. The difficulty in the way of this conclusion, however, is, that the want of authority in Mr. Houghton to bind the bank appeared upon the face of the check. There could be no *bona fide* holder of such an instrument. An indorser of commercial paper may it is true, very frequently acquire rights superior to those of the original party; but never so far as I am aware, when he has notice of the defect. If he knows the facts which would render the paper void in the hands of the party from whom he derives title, he cannot recover.

The Supreme Court seems to have supposed that to prevent the plaintiffs from being considered as *bona fide* holders, they must have known that the drawer had no funds in the bank to meet the check. This was clearly an error. The acceptance was void in the hands of the drawer, irrespective of the question whether he had or had not such funds. The double relation in which Mr. Houghton stood alone rendered it void, and of this the plaintiffs were apprised by the check. It could not be necessary that they should have had notice of any other fact in order to defeat their recovery, as the same facts which render commercial paper void in the hands of the original party, will equally avoid it in hands of any subsequent holder having notice of such facts.

It is of no importance that the Referee has found as a fact that the plaintiffs were *bona fide* holders. This finding is opposed by the plain law of the case, and is therefore nugatory.

Judgment of the Supreme Court reversed and a new trial ordered.

New York and New Haven Railroad.

At a special meeting of the directors of this company held on the 24th inst., the following resolution was adopted:

Resolved, That for the sole purpose of settling and compromising the claims against this Company and not admitting any legal liability thereon, this Board is ready to accept the terms proposed in the communication before it, viz.: to issue and exchange o e new Share of its Stock for two of the spurious Shares held by any owner thereof in good faith and without notice or fault, to be received in full settlement thereof and of all claims of every kind connected therewith and for the moneys paid or advanced thereon and for any supposed negligence or breach of duty; and to increase the Capital Stock of the Company not exceeding one million of Dollars for that purpose: provided these terms shall be agreed to, in writing, by the holders and owners of such claims, on or before the 16th day of November next.

Railroad Earnings—Monthly.

The following is a comparative statement of the earnings of the Chicago and Milwaukee Railway for September:

	1862.	1863.
Passengers	$21,609 44	$28,279 62
Freight	8,406 77	13.282 83
Miscellaneous	1,513 09	1,973 40

To which add town lot sales			2,916 45
Total of all			$226,853 13
Acres sold since Jan'y 1, 1863	151,153.04	for	$1,637,104 93
Acres sold previously, net sales	1,198,326.00	"	15,139,473 89
Total	1,349,479.04	"	$16,776,578 82
Construction bonds cancelled previous to September 30, 1863			$2,530,000 00
Cash collected in September			119,990 68

TRAFFIC DEPARTMENT.

Receipts from passengers	$185,161 38
" freight	264,499 75
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in September, 1863	$466,919 46
" " 1862	414,543 36
Receipts from Jan. to Sept. 30, 1863	$3,164,407 81
Do. do. do. 1862	2,303,435 26
Increase	$860,972 55

The earnings of the Cleveland and Toledo Railroad in September, 1863, were $132,130 00
Do., 1862 102,176 00
Increase $29,954 00

The earnings of the Milwaukee and Prairie du Chien Railroad for Sept., 1863, were $155,417 00
September, 1862 109,661 00
Increase $45,756 00

The receipts of the New York and Harlem Railroad for September, 1863, were $124,615 18
September, 1862 99,435 24
Increase $25,179 94

The month of September completes the fiscal year, which shows an increase of $251,414 75 over the previous year.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of September ult., compared with the same period of last year, were as follows, viz:

	1863.	1862.
From freights	$281,802 51	$195,256 40
" passengers	156,466 18	183,523 87
" express matter.	2,793 75	2,600 00
" mails	7,825 00	7,825 00
" rent of railway.	7,083 34	7,083 34
" miscellaneous	1,350 29	1,237 05
Total	$467,321 07	$397,525 16
Increase	$69,795 91	
Earnings from Jan. 1 to September 30.	$3,676,990 06	$2,608,793 00
Increase for 9 months	$1,068,197 06	

Increase for September, 17.6 per cent.; increase to September 30, 40.9 per cent.

The decrease in the earnings from passengers arises from the fact that those for September, 1862, include charges for transportation of troops, amounting to $83,815 26, while in September, 1863, nothing of this kind is included. The regular passenger business of the Company, in the latter month, has increased $56,758 17 or 57 per cent.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Oct. 16, 1863, was as follows:

Passengers	$24,975 78
Freight and live stock	40,330 72
Mails and sundries	1,720 64
Total	$67,027 14
Corresponding week of 1862	59,766 57
Increase	$7,260 57

The earnings of the Grand Trunk Railway for the week ending October 10, 1863, were:

Passengers	$34,144 34
Freight and live stock	51,061 05
Mails and sundries	2,800 00
Total	$88,005 39
Corresponding week, 1862	84,439 03
Increase	$3,566 36

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of Oct., 1863, were $81,876 00
Do., 1862 76,228 00
Increase $5,648 00

The earnings of the Cleveland and Toledo Railroad for the 3d week of October, 1863, were $32,753 00
Same week, 1862 23,895 00
Increase $8,858 00

The earnings of the Michigan Central Railroad for the 3d week of Oct., 1863, were $88,840 00
Same period, 1862 72,189 00
Increase $16,651 00

The earnings of the Toledo and Wabash Railroad Company for the 2d week of October, 1863, were $31,049 76
Same week, 1862 36,141 75
Decrease $5,091 99

The earnings of the Toledo and Wabash Railroad Company for the 3d week of October, 1863, were $37,013 00
Same week, 1862 38,861 00
Decrease $1,848 00

The earnings of the Chicago and Rock Island Railroad for the 3d week of October, 1863, were $48,887 00
Do., 1862 42,365 00
Increase $6,522 00

The earnings of the Galena and Chicago Union Railroad for the 3d week of October, 1863, were:

Freight	$54,435 81
Passengers	11,384 41
Mails	1,300 00
Total	$67,120 22
Same week, 1862	50,763 48
Increase	$16,356 74

The earnings of the Chicago and Alton Railroad for the 3d week of October, 1863, were:

Passengers	$14,205 07
Freight	30,395 65
Sundries	1,534 23
Total	$46,134 95
Same week last year	37,621 22
Increase	$8,513 73

American Railroad Journal.

Saturday, October 31, 1863.

Stock Exchange and Money Market.

Our financial barometer is gold, but it is not uniformly reliable. It indicates the condition of our foreign trade somewhat more accurately than it does the condition of our domestic values. Gold may go up or down without effecting the prices of a large number of articles of necessity, which are the staples of our country, while it influences the prices of others which are the subjects of exportation. Gold is the standard of values in the world's markets, and if we trade with other countries and buy largely, we must send gold if they will take nothing else.

It is a curious fact that while we feel every rise in the prices of our imported supplies, we care little about it in various other departments of traffic. It is also worthy of note that a rise of gold is rather liked in the agricultural regions of the West. Our readers will observe that we have

given in another column a very full report of the trade and commerce of Cincinnati for the last year; but when compiling it, we were struck with the circumstance, that in that city a rise in gold has been hailed with satisfaction, since it enabled the shippers of flour to get more for that commodity, than when the equality of paper and gold was greater. It is said that Mr. Chase is aware of this fact, and has therefore refused to ease the gold market by any disposition of his surplus deposits, though urged to do so by very sagacious parties. It is certainly well if we can turn this condition of our currency to account.

But it must also be remembered that while the agricultural and commercial interests of the West may so far be benefitted by a rise in gold, yet they suffer in return when they come into the Atlantic markets to purchase imported goods, for the importer is sure to make himself whole by an increase of price. It is said that partial evils are universal good, and that all nature's difference makes all nature's peace. We certainly rejoice that there are compensating principles at work in all human transactions. We should prefer for ourselves that the price of gold should fall to a just medium. Twenty-five per cent. premium is as much as the commodity is really worth at the present moment, and all above that, is what is forced by partial causes, temporary necessities, speculation and rumor. It has fallen since the beginning of the week 4 per cent., and is certain to fall still further if our army, naval or military meet with expected success. All this time quite irrespective of its movements, Governments are firm as a rock. Railway securities are active and improving, and some have advanced quite rapidly from their previous quotations. Railway enterprises are again becoming numerous, and new companies properly organized and managed may expect to find favor with the public. Among the latest projects is one proposed by parties connected with the Rock Island, to loan $114,000, recently obtained by the company from a sale of stock, and $300,000 more, to the Mississippi and Missouri Railroad for the purpose of completing it to the Missouri river, so as to form a connection with the Union Pacific now about to be organized for active operations. The Pacific Eastern division is at the same time pressing onwards to the 100th parallel. Some of the old contractors on this road, when under its first organization, have recently taken hold of it, and are advertising for a large number of laborers. The work is progressing rapidly, and for many miles the track is ready for the iron. The Erie Directors are considering the propriety of converting the 4th and 5th mortgage bonds of the company into stock equal to the issue of 10,000 new shares. As these would sell for from 8 to 10 per cent. premium, it is probable there will be no great objection on the part of the holders of the bonds.

The Treasury continues to be in a sound condition. The conversions into 5-20's are still on a large scale, and show conclusively that the tendency of the present issues of paper, is towards investment in these favorite securities. We imagine if the war should close suddenly, (and there is no telling how soon that event may take place, for the symptoms are very marked,) that nearly the whole of the Treasury issues would be absorbed in the Government stocks, and the currency would thenceforward be almost exclusively that of the National Banks. We are at liberty to state that some of the best banks in Boston have in contemplation the winding up of their business. And the reasons for it were given us recently by the President of one of the leading institutions of that city. It is the holder of $900,000 of Government securities. The reasons given are, that there is little commercial paper to be had, for the long credit system is going out of date. The City Banks have no valuable circulation, depositors will hereafter prefer holding the Treasury legal tender interest paying notes, to leaving their funds in the banks without interest, and as six per cent. dividends are as much as careful capitalists can expect with perfect security, the best thing to be done is for the greater part of the present institutions to wind up, and for their present stockholders to bank with the Treasury at once. In Boston there are upwards of forty-five banks, and fourteen or fifteen would be sufficient for all purposes. This statement struck us with force. Certainly if the existing banks wish to have any future circulation, they will have to re-organize under the National law.

The exports of produce from this port for the week ending October 26th, are larger than they have been for any one week in the last four months, confirming the suggestions we have already made in this article. Exclusive of specie they have been for the week, $4,166,179; previously reported, $139,276,601—making a total since Jan. 1, of $143,442,780, against $124,045,068 in the corresponding period of 1862; and $108,955,531 in 1861.

The balance in the Sub-Treasury on Tuesday last was $37,398,349 52. On the 1st of November about six millions of gold are to be disbursed, a much larger sum than can be used to any advantage by commercial houses in their business.

Money is to be had according to the character of the borrowers, from 4 to 7 per cent., and is considered easy.

The New York and New Haven Railroad Company have declared a dividend of $3 per share, free of Government tax, payable on Nov. 2.

The Manchester and Lawrence Railroad Company have declared a dividend of $4 per share, payable Nov. 2, to holders of Oct. 22.

The Cleveland and Mahoning Railroad Company have declared a dividend of four per cent., free of Government tax, payable at the office of the company, Nov. 10.

The coupons due November 1, on the Chicago and Alton Railroad Company, sinking fund bonds will be paid by Messrs. G. S. Robbins & Son, at their office in William street, on presentation.

Coupons from the first mortgage bonds of the Chicago and Milwaukee Railroad Company, due Nov. 1, will be paid at the office of Schuchardt & Gebhard, 21 Nassau street.

Coupons from 300 first mortgage bonds of the Scioto and Hocking Valley Railroad Company, signed John McDowell, Secretary, due 1st of November, 1863, will be paid, less tax, on and after November 2, by Bank of Commerce, in New York.

The Farmers' Loan and Trust Company will pay the coupons of the Evansville and Crawfordsville Railroad, due November 1.

The outstanding matured bonds of the Cleveland and Toledo, and Toledo, Norwalk and Cleveland Railroad Companies, will be paid on presentation at Vermilye & Co.'s, No. 44 Wall street.

Messrs. Schuchardt & Gebhard, 21 Nassau street, offer for sale bonds of the Atlantic and Great Western, Sacramento Valley, and Chicago and Milwaukee Railway Companies.

The Harlem Railroad will pay the coupons on its first mortgage bonds on and after November 2, at its office.

British Railways.

It appears that at the recent session of parliament, railway acts were passed which authorized the construction of 790⅜ miles of roads, with capitals amounting to £17,062,000, and power to make loans to the extent of £5,711,540. The number of companies incorporated is one hundred and twenty.

McGregor Western Railroad.

As the railroad that is being built west from McGregor will be an important connection with the Prairie du Chien Railway, it will be interesting to learn, that the track is walking westward at the rate of half a mile per day, and nothing but the most unfavorable weather through the season can prevent its construction as far as Monona, by the 1st of January at farthest. Iron for thirty miles of track is now on hand, with all necessary rolling stock to push on the work.

It is the intention of the company to use one track to Postville, and then iron the line northwest to the State line, while the other line via Clermont, West Union, &c., &c., will be the main western line from McGregor.

Krupp's Patent Steel Tires.

A lot of these tires discharging from the "Bremen" Steamer foot of Chambers street, have been the subject of much curiosity. They were destined for the Camden and Amboy, New Haven, Naugatuck and other roads. We noticed in the *Evening Post* a few days since a statement that Krupp's piston-rods, had come into universal use in Great Britain, so that his celebrated manufactures are getting all the reputation they deserve.

Messrs. Thos. Prosser & Son, are the agents in New York. A good indestructible tire and axle are essential to the safety of railway passengers, and no railway management is justifiable in using inferior articles.

Through Trains from N. Y. to Washington.

By the 20th of November the arrangement for running through trains between New York and Washington will be completed. The Philadelphia and Trenton Railroad Company have had a number of cars constructed with wheels that will suit the gauge of the Philadelphia, Wilmington and Baltimore Railroad Company, and on and after the 20th, the passengers from New York for Washington will be conveyed through without change of cars or baggage. The trains will leave the Trenton road, near Lehigh avenue, and pass over the Reading Railroad and cross the Falls of Schuylkill bridge, and thence to the foot of the old inclined plane at the Columbia bridge, at which point the train will follow the west bank of the Schuylkill on the Junction Railroad to the West Philadelphia water works and there connect with the Pennsylvania Railroad and cross the Schuylkill again over the new bridge, near the Arsenal, so as to get upon the Baltimore road. This route will be used until the Junction road is completed, and the new route for the Trenton road to connect with it is ready for use.

Boston and Maine Railroad.

Business has so increased on this road as to render it necessary to make extensive alterations at the station in this city. A new freight house upwards of one hundred feet in length, has just been completed, to take the place of the old one which has been torn down; additional tracks have been laid for the accommodation of freight trains, and the grounds have been nicely graded about the premises. A new engine house is being constructed, and a large turn table placed inside the structure. The accommodating spirited manifested by the President and all the officers of this road makes friends of those doing business with them. They will probably lay a track to the river next Spring.—*Newburyport Herald.*

Central New Jersey Railroad.

When the progressing extension of this road to Jersey City is completed, the length of the main road from the Delaware river at Phillipsburg to the Hudson River, in the Harbor of New York, will be seventy-two and a half miles. The extension, which comprises about eleven miles of new road, includes a pivot bridge across the channel in Newark Bay, with extensive piling between the channel and the shores; also much piling from the mainland south of the Morris Canal at Jersey City, out into deep water, where extensive shipping piers will be erected. The work is costly, but it will be done in a permanent manner; and when completed, the Central New Jersey Railroad will possess facilities and docks in the bay of New York, amidst the shipping of the port and near the business of the city. These advantages will increase alike the importance, the facilities, and the earnings of the Central Railroad of New Jersey, which is the shortest fuel route to this city, and a commercial line of fast-growing consequence and magnitude.

Coal Mining Machines.

They are beginning to dig coal by machinery in England. Compressed air would seem to be the motive power from the following description of the engine used in the West Ardley Colliery:—

"The steam engine works an 18-inch air pump, at a pressure of about fifty pounds to the square inch. The air is conducted down the shaft in 4 inch pipes, and thence about eight hundred yards to the workings in gap-piping, and connected by 1 inch India rubber piping to the machine, which travels on rails.

"It is propelled a little by a hand wheel after every blow given by its pick, and generally it passes three times over the face of the coal-seam, on each occasion armed with a longer pick; the first cut being about 18 to 20 inches, the second 9 to 11 inches, and the third 6 to 8 inches; the depth aimed at being about a yard. The actual quantity of work done in six consecutive days of eight hours each by one man and two boys with the machine was 618½ yards, or about 800 tons of coal. A man will average 7½ yards per day, so that if the machine were worked by shifts of eight hours, three men and six boys would do the work of forty men. The machine also effects a saving of good coal from destruction equal to an average of ninepence per ton."

Several attempts have been made in this country to contrive machines to take the place of miners, or to lighten their labor; but, so far as we know, without success.

Stamps, Real Estate and Taxes.

The commissioner concludes a long opinion on stamp duties, in answer to many inquiries as to construction, as follows. We quote a portion of it:

In commercial transactions, notes, checks, and drafts are often transmitted by mail in payment of dues. If such evidences of indebtedness are to be deemed void when unstamped by the debtor, and to be incapable of being validated on receipt by the creditor, the most meritorious party to an instrument would be to punish for the carelessness or bad faith of the other, and be relieved from an obligation which he once voluntarily assumed. The grievance arising from such an interpretation of the will of Congress would be intolerable. It would render the law odious, without advantage to the revenue. Rather than adopt it, I should hold that the maker of an instrument, by duly executing it, gives authority to the person for whose use it is made to affix and cancel the stamp. The time when an instrument is used may become a question for the courts to determine. I do not see how it can come before the commissioner. It may be suggested, however,

that if a note or check is to be considered as used when delivered, it does not follow that it cannot be stamped by the promissee or grantee. The delivery is not the act of one party. An acceptance by the other is necessary to its completion, and for this, after an examination of the instrument tendered, sufficient time for a discreet determination of any question affecting it is necessary to be allowed. The grantee may refuse to accept an unstamped deed placed in his hands by the grantor on discovering the defect, or he may signify his acceptance by affixing the stamp. The acceptance, to be binding, must be an absolute assent of the mind, which is not to be inferred from a mere possession, without the means of knowing the contents, or from possession for a time insufficient for the detection of blemishes. An acceptance may be in a qualified degree; as, for instance, subject to the right to affix the proper stamp, which, if promptly done, will suffice. There are no fractions of a day in law, and I see no reason why a grantee may not perform such an act at any hour within the day of delivery, and thus save his deed. I have no doubt that holders of real estate may sleep soundly on titles, the evidences of which are stamped by themselves at the time of delivery, and that the time of delivery is capable of such reasonable extension in law as is sufficient for the intelligent performance of the act where proper diligence is used.

The Atlantic Telegraph.

It is confidently expected that in July next a renewed attempt will be made to lay a telegraph cable across the Atlantic. The directors of the Atlantic Telegraph Company have succeeded, after very great exertions, in obtaining a subscription list of about £300,000 towards the new capital required to make and lay the cable. Having obtained this sum, the directors referred to a scientific committee, consisting of Captain Galton, Mr. William Fairbairn, Mr. Whitworth, Professor Wheatstone, and Professor Thomson, the various plans for the construction of the cable, which had been sent in by different makers. The result of the reference was that the committee made a preliminary report, and recommended the directors to accept the tender of Messrs. Glass and Elliott. This recommendation, however, applied only to the copper or the conducting wire, and the covering of gutta percha, the committee declining to give any opinion as to the external coating until they had made a number of experiments to enable them to decide upon the best form to be adopted. There are seven copper wires formed into one strand to form the conductor. Every portion of the wire is to be carefully tested for "conductivity," and this testing is now going on at the works of Messrs. Glass and Elliott, under the superintendence of an electrician appointed to represent the company. Some surprise has been expressed that the committee should have recommended the use of gutta percha instead of the more complete insulating material India-rubber. The committee, however, state in their report that in a matter of so much importance, and in a work of such magnitude as the Atlantic telegraph, it would not be advisable to make anything like an experiment, but that the proper course would be to follow the practice hitherto adopted. Without expressing any opinion as to the relative merits of India-rubber and gutta percha, they adopt the latter material simply on the ground that it has been used and tried on former occasions. The experiments which were made by the government committee some time since proved, in the most conclusive manner, that India-rubber was a much better insulator than its rival, and it is matter of regret that this substance has not yet been more extensively adopted. At present the supply of gutta percha is a complete monopoly, and we are informed that the small body of capitalists who import or purchase all that comes into this country, finding that the material of which they had large quantities in store would be required for the Atlantic cable, had raised the price more than fifty per cent. The monopolists, however, finally consented to some modification of their terms; but, as it is, the cost of the core of the cable alone, the copper wire and its thin covering of gutta percha, will cost about £120 per mile. If the electricians and engineers would for once leave the beaten path and try the more serviceable and not more expensive India-rubber, they would establish a competition which would be most wholesome and valuable to the cause of electric telegraphy.

The entire cost of making and laying the cable has been estimated at £600,000, and of that sum—the subscribed capital of the company being only £300,000—the contractors take upon themselves, in round numbers, one-half. Their interest is therefore identical with and equal to that of the general body of shareholders. The risk which they undertake is a very serious one, and it is only by the complete success of the undertaking that any profit can be realized. On the laying of the cable and transmission of the first message the contractors will receive one instalment, and one each month until the expiration of the first year of the actual and continued working of the telegraph; they will also receive further instalments, until the whole of the contract price has been paid to them. The experiments which have been made lead to the belief that the rate of transmission through the cable when laid will be at the rate of eight words a minute. The tariff will probably be five shillings a word, so that a very large return of profit may be looked for, if only the line continues to work. The government of the United States gives a minimum subsidy of $75,000 a year, and our own government £20,000 a year to the company so long as the line continues to work, to go in payment of the messages sent by the respective governments. The two governments also give a joint guarantee of eight per cent. on the capital expended while the line is at work. As to the laying of the cable nothing has of course yet been decided; but if the Great Eastern should be delivered from her present financial troubles, and be again made fit for sea, it might be very usefully employed for carrying and laying the Atlantic telegraph.—*London Observer, Oct. 3.*

☞ The Troy and Cohoes Railroad has been opened for public travel.

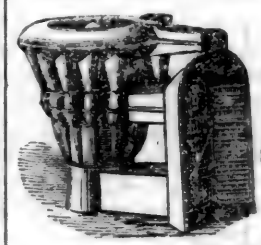
KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc, for young Marine Engineers, Students, and others. By the late W. R King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.
"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—[Boston Daily Advertiser.
"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—[Philadelphia Press.
"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—[Philad. Ev. Bulletin.
In one volume octavo, with illustrations, price $2. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.



BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.
TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., 512 Broadway, corner of Fulton st.
Local Agents wanted everywhere. 6m41

CALIFORNIA AND NEVADA MINING STOCKS.
THE undersigned will buy and sell on commission, through their San Francisco House, all Stocks pertaining to the Pacific Coast. Orders promptly filled.
Quotations by telegraph furnished to parties desiring them.
ROSS, DEMPSTER & CO.,

Central Transportation Co.
THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of
WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN
SLEEPING CARS,
would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their
SLEEPING CARS,
and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.
The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.
Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.
Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown st., PHILADELPHIA**, will receive immediate attention.
Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that intringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such intringement will be expected. Address as above,
O. W. CHILDS, President.

The COSMOPOLITE
PARLOR RADIATOR, &
GAS BURNER,

Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a small, pleasant heat is desired.
Fire may be kept all winter with an astonishingly small supply of coal.
Send for description and testimonials.

KRUPP'S PATENT CAST STEEL.

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.
CITY RAILWAY COMBINATION WHEELS AND AXLES.
PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enamaled Iron Water Pipe, Steel Tubes, etc., etc.

They have received the highest approval from all RAILWAY COMPANIES that have them in service.

THOMAS PROSSER & SON,

GENERAL HARDWARE & IRON MERCHANTS,

BIRMINGHAM.

SANFORD'S MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in the waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any here tofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

N. B.—JOBBING PROMPTLY ATTENDED TO.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the LARGEST OVENS of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary ECONOMY OF FUEL, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light

SUMMER AND WINTER

PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,

239 and 241 Water st., N. Y.

BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,

PROPRIETOR,

Depot, 279 Third Avenue, New York.

All Orders promptly attended to. Best City References given.

PROPOSALS FOR $500,000

Volunteer Soldiers' Family Aid Fund Bonds,

No. SEVEN.

SEALED Proposals will be received at the Comptroller's office, until Saturday, Oct. 31, 1863, at 2 o'clock P. M., when the same will be publicly opened, for the purchase, at not less than their par value, of the whole or any part of the sum of five hundred thousand dollars of the "Volunteer Soldiers' Family Aid Fund Bonds, No. 7," authorized by an ordinance of the Corporation, passed Oct. 9, 1863, and an act of the Legislature of the State of New York, passed March 6, 1863.

The said bonds will bear interest at the rate of five per cent. per annum, payable semi-annually, on the first day of May and November in each year, and the principal will be redeemed Nov. 1, 1871.

The proposals will state the amount of bonds desired, and the price for one hundred dollars thereof, and the persons whose proposals are accepted will be required to deposit with the Chamberlain of the City, within five days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive bonds for equal amounts of the par value thereof, bearing interest from the dates of payments.

Each proposition should be sealed, and endorsed "Proposals for Volunteer Soldiers' Family Aid Fund Bonds, No. 7," and inclosed in a second envelope addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if the interest of the Corporation require it.

MATTHEW T. BRENNAN, Comptroller.

City of New York, Department of Finance, Comptroller's Office, Oct. 10, 1863. 3142

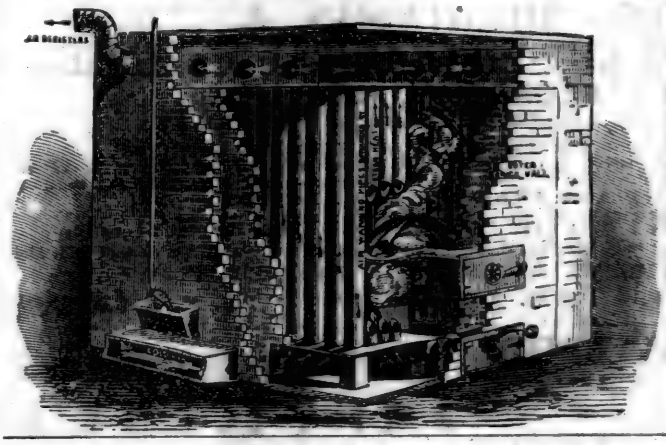
WILLIAMS & PAGE'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors, and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

SIMONDS' PATENT STEAM HEATER.

FOR Warming and Ventilating Buildings of all descriptions, Graneries, Greenhouses, etc.

THIS HEATER, HAVING BEEN THOROUGHLY TESTED, has proved to be the MOST PERFECT WARMING APPARATUS IN USE. Parties having them in use, and to whom reference can be given, give them the highest recommendations.

Those requiring a SAFE AND PERFECTLY EFFICIENT APPARATUS FOR WARMING PURPOSES, are invited to call and examine before purchasing elsewhere.

Personal attention given to erecting the same, and a guarantee given for their successful operation.

CHARLES D. GIBSON. RICHARD S. PALMER.

MUNN & CO'S
PATENT OFFICE.
ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,
No. 37 Park Row, New York,
Or corner F and 7th sts., opposite Patent Office, Washington, D. C.
3m35

The Mercantile Mutual
INSURANCE
COMPANY,
No. 35 WALL ST., NEW YORK.

INCORPORATED, APRIL, 1842.

ASSETS OVER $1,250,000.

MARINE and Inland Transportation risks on Vessels, Freight and Merchandize insured on the most favorable terms.

Policies are issued, loss, if any, payable in Gold, or at the office of RATHBONE, BROTHERS & CO., Liverpool, if desired.

Parties effecting insurance at this office may participate in the Scrip dividend of profits, or receive an equivalent cash discount, at their own option.

The risk of war covered at the lowest current rates.

ELLWOOD WALTER, Pres't.
CHAS. NEWCOMB, Vice Pres't.
C. J. DESPARD, Secretary.

ALEXANDER'S
ROOFING
CEMENT-PAINT
FOR
Railway & Steamboat Co's,
BUILDERS and BUILDINGS generally.

THIS PAINT is warranted not to **Crack** or **Scale** either on **Wood, Iron, Tin,** or **Canvass.**

The ingredients in its composition are **all** of a preserving and protective nature. This Paint is now extensively used by Railway Companies and pronounced much **cheaper,** more **durable** and satisfactory than what was previously used. It is 2-5ths heavier in body than any other Paint.

Give this Paint a trial, and if not found as represented no charge will be made for it.

Send for descriptive circular and references.

W. G. PERKINS, Gen'l Ag't,
271 Broadway,
NEW YORK.

SUBSTITUTE FOR
CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK,** but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
Boston.
March 1863.

HAMILTON E. TOWLE,
CIVIL AND MECHANICAL ENGINEER.
156 BROADWAY, NEW YORK,

AGENT for the SALE and APPLICATION of the celebrated **JAPAN PAINTS** specially adapted to resisting HEAT and the action of the WEATHER on IRON, BRICK and WOOD WORK. Metal ROOFS, etc., painted by contract and guarantied to be tight.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.
In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.
You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

New York, Saturday, November 7, 1863.

Railways, the Latest and Best Friends of Progress.

We are living in the midst of great events, and scarcely realise them. We are so mixed up one way or the other in the *melee*, that we can not take it in as a whole. People who jostle each other in the crowd can not describe its proceedings as well as those who stand a little way off. Those who come after us when they read the history of this war will comprehend its vastness, and the nature of its operations better than we do ourselves. So of the Railway system, which is spreading itself over the world. We have a good idea of a car and the rails, and appreciate their great convenience and personal advantage to ourselves when we travel, or receive an article of necessity or a bale of merchandize, that has come a thousand miles in three days in answer to a telegraphic despatch. Still we are of the opinion that the final results of railways upon the social condition, and progress of nations are not even now fully realised. "In the days of stage coaches" says a recent writer "the majority of people were born, lived, and died amidst the prejudices and habits of their progenitors. They seldom travelled beyond the confines of their business spheres, and, as a consequence, they had a narrowness of ideas; still, there was a desire to look at other pictures than those of their own back-parlor. Man naturally inclined to explore distant places, but the difficulty of locomotion fettered him. True, there were horses and latterly canals, coaches, he might carry himself without any other help, but he could neither travel at fifty miles an hour in this way, or journey for three cents a mile. Money and time in large quantities were indispensable. Unfortunately, the mass had them not, and, therefore, were debarred from that extensive contemplation of nature's grandeur and variety which is so inspiring, so refreshing, and so thought-arousing to every intelligent creature."

Some of us remember the slow progress of locomotion before the introduction of railways, when journies were first performed on horseback. Mr. Perrit late President of the Chamber of Commerce as he recently informed us, made his first journey to the banks of the Ohio from New York in this way, and was many weeks on his journey. Flatboats on the Mississippi which descended, but never ascended the streams, sloops sometimes a fortnight on the voyage between Albany and New York, batteaux on the Mohawk two or three days descending the river from Utica to Schenectady, and a week or ten days in returning, a distance of about one hundred miles, then the post coaches which with fresh horses every ten miles, made the same distance in twelve and fourteen hours, and finally canal boats very comfortable but very slow, were all the means the public had for passing from one point to another, no matter in what haste they might be. New York was in fact quite in advance of the other states even with this sort of locomotion.

Railways have superseded all this. In the words of the same writer we have already quoted, they "have given us access to the snowy peak, the sunny vineyard, the restless ocean, the placid valley. They have given to the toiling thousands of pent up cities the bracing breeze and the open country, where the simple daisy springs freshly above her grassy bed, and the minstrelsy of a myriad of sinless warblers echoes from vale to vale. Again, they have brought together all nations. They have aided the establishing of competitive emporiums, where numberless arts outvie each other, and men of different tongues meet together with one object—the social advancement of mankind."

In this country they have done more than this. They have created and populated states, but a few years since merely vast forests and plains. In Europe they have merely established easy connections between ancient cities and ports; here they have called new ones into existence. Immigration from one country to another even now, is not very common in the old world; here it is going on at the count of millions. It is not unusual to see whole colonies passing westward over the rails, to settle down, where "life, liberty, and the pursuit of happiness" are at last secured. From New York to Chicago a thousand miles, we travel comfortably in two days and a night. Before the rebellion we could reach New Orleans in four days. The country was then united in bonds which seemed infrangible, and it would have remained so but for the ambitious and reckless men who opposed themselves to progress, fraternity and peace.

Our postal communications have also been vastly improved by the introduction of railways. Postage itself is reduced from 25cts. and 12cts. a letter to three, and this reduction of expense has been a great boon to humanity, a great quickener of commercial enterprise, a cementation of distance and even separate interests, and was making as a family of brothers.

The transmission of useful and entertaining knowledge, has become practicable through the mails at a moderate charge. Publishers distribute through the Post offices, large quantities of their newest and most valuable works, and their advertisements to this effect are constantly seen in the newspapers, an evidence that the method is popular and remunerative. It would not be possible to transport the present amount of mail matter by the old method of mail coaches. The number of miles of railways in the United States, constructed and in progress of construction is 51,114. The exact number of passengers transported annually is estimated at twice that in England, or about three hundred millions, most of whom would never have traveled at all but for railways. What a vast intercourse has thus been created by their means. What life and animation, and opportunity for im-

provement, and business, has the system produced? So in a sanitary point of view. Railways assist in the preservation of health, particularly that of cities. We should not be able to warm our dwellings without the fuel which our railways bring us from Pennsylvania and Maryland, nor supply our tables but for the cattle which they transport to us from a thousand hills, the wheat from the prairies, and the esculents from distant fields. Our fish, flesh, fruit, meat and milk come to us almost exclusively by railway. New York could never have become or remain what it is, without its aid, nor any of our great cities, especially those in the interior.

Our agricultural interests are equally promoted in the same way. Land which laid waste, is now reached and cultivated with profit. So also lands of virgin soil have become accessible, and the Great West and North Weet have been opened to settlement, and "the wilderness now blossoms as the rose." Railways have in fact doubled the area of the United States, as well as their population, and they are destined to connect the Atlantic and Pacific Oceans, and give us a Continental breadth, and an Imperial power. They have developed our latent and natural strength to such an extent, that we are in equality with the greatest and oldest nations on the globe, with the prospect at the end of the present century of being the most populous of any of them, except China perhaps. And this population, if they are true to themselves, to the principles taught them by their fathers and the institutions we have inherited, will, with their material strength be the instructors, guides, of nations and the masters of the future.

Opening of the Fordham Horse Railroad.

An act authorizing a Company to lay Railroad tracks from Harlem bridge in Morrisania to Fordham was passed at the last session of the Legislature, and approved by the Governor 2d May last. The action of the company under this law was restrained by an injunction obtained by certain parties from Buffalo and Jersey City, and it was only after several month's litigation the injunction was removed and the Company enabled to proceed. On the 2d November, the road was opened for travel, and the occasion interesting in the highest degree to the people of Westchester, brought out a large number to witness the ceremony. Five cars with double teams left the depot on the South side of Harlem bridge, at about 2 o'clock p. m. of that day, laden with officials and invited guests, among whom were the President, Jno. B. Haskin, Esq., and Mr. Van Haack, Vice President of the Company; Mr. Darling the President of the 3d Avenue Railroad Company, P. C. Tallman, Esq., Ex-member of Assembly, A. B. Tappan State Prison Inspector, F. B. Gilley, Mr. D. Armstrong, Superiptendent, and other distinguished persons, one of them the oldest living inhabitant of the county. The train was greeted along the route by the inhabitants, embracing all classes of people, who expressed the most lively satisfaction at the success of the work. At Morrisania, the guests were conveyed in stages to Fordham, to which place the road will be completed by the 25th inst., and where an excellent dinner was prepared for them at Ittner's Hotel. Appropriate speeches were made and toasts drank in honor of the event, and all expressed their pleasure at the consummation of wishes long and ardently expressed.

There can be no doubt this road will be very advantageous to the beautiful Westchester suburbs of New York for many obvious reasons, and that it will pay well, cannot for a moment be doubted. We hope to see more of these roads established in the vicinity of New York.

Indianapolis and Madison Railroad.

The earnings of this road for the year ending March 31, 1863, were:

From passengers		$70,249 79
" freight		102,697 04
" military passengers and freight		17,962 83
" Jeffersonville Railroad		66,314 27
" express, mail, etc		19,431 85
		$276,655 78
And the expenses were:		
Running road	$27,791 92	
Repairs of road	59,801 60	
Repairs of cars and machinery	34,443 48	
Wood	7,910 45	
Oil and waste	3,382 15	
Salaries	8,199 92	
Depots	12,040 65	
All other expenses	4,135 78	
		157,205 95
Net earnings		$119,449 83

The receipts of the Company from all sources during the year were:

From transportation, as above		$276,655 78
Rent, Sales of iron, etc		4,404 28
Columbus and Shelby Transp. $12,617 86; less expenditures, $8,741 18		3,876 68
Sundry balances		1,037 21
		$285,973 95
And the disbursements were:		
Current expenditures, as above		$157,205 95
Taxes, $2,923 22; commissions $1,606 35		4,529 57
Interest, $21,964 67; less, $2,711 25 interest received		19,253 42
Interest, Premium on exchange, etc		33 85
Uncollected accounts		21,013 27
J. & S. Ferguson		644 89
" " special deposit		80,000 00
T. P. Matthews, treasurer		3,299 50
		$285,973 95

The earnings show a gratifying increase, being in excess of any 12 months since 1854, and $71,032 24 over those of the year 1861. The President, in his report, says:

The proceedings for the foreclosure of the first mortgage upon, and sale of the Madison and Indianapolis Railroad under said mortgage, and a copy of the Articles under which the Indianapolis and Madison Railroad Company was organized, were set forth in the Report made by the undersigned, dated July 14, 1862, now distributed herewith, and referred to.

The amount of the first mortgage bonds, with the arrears of interest thereon, having been made a charge upon this Company, an issue of $685,000 of new mortgage bonds, payable with interest semi-annually at 7 per cent. on May 1, 1881, was made to provide for them. It was subsequently ascertained that $682,000 would cover the indebtedness, whereupon $3,000, of the bonds were cancelled, and a further sum of $21,000, having been since purchased and cancelled by the Trustees of the Sinking Fund, the whole bonded indebtedness of the Company was reduced on 31st March last to $661,000.

For the payment of fifty per cent. of principal and interest, of the income or second mortgage bonds and certificates for a scrip dividend, issued by the Madison and Indianapolis Railroad Company, provision as per Article of Agreement, was made by the creation of 8,500 shares, of $50 each, of Preferred Stock of this Company, on account of which 7,157 shares, and $2,449 27 in Certificates, convertible into shares, had been issued when the books closed for dividend, on the 16th ult. Bonds and Certificates with arrears of interest due thereon for $721,598 54, having been surrendered.

The holders of the Capital Stock of the late Company being entitled by the Articles of organization to shares of Common Stock in the new Company, to the amount of one-fourth of their several interests as they appeared on its Stock Ledger, there were issued in conformity to said articles, upon the organization of this Company, Certificates for 8,129 shares of $50 each of Common Stock, and for $5,562 50 in fractions, convertible into shares, making together $412,012 50 or, equal to one-fourth of the capital of the old Company. These were placed in the hands of the Agents of the Company, Messrs. J. & S. Ferguson, 35 Pine Street, N. Y., to await the surrender of the old certificates; and $2,450 of the Certificates for fractions having been converted to full shares, on the 16th of May, last, there were then outstanding 8,178 shares of Common Stock.

The Income Bonds and Dividend Scrip of the old Company still outsanding, and the certificates given for fractions convertible into full shares, will nearly absorb the capital of the Company, upon which dividends are declared, although no dividends are to be paid on fractions, until converted into shares.

By Resolution of the Board, allowances will be made to holders of Income Bonds and Certificates of Dividend Scrip, converted into preferred shares previous to April 1, 1864, equal to the dividend on like shares for the past year. Holders of such after 31st of March, 1864, will by said resolution be excluded from any participation in the dividends of the Company previously declared.

The number of passengers, exclusive of military, carried over the road were 74,883, of which 38,589 were carried south, and 74,294, north. The length of the main line, from Indianapolis to Madison, including the Inclined Plane from North Madison to the Company's depot in Madison, is 86 miles. There are second tracks and sidings equal to three miles. The equipment of the road consists of 17 locomotives; 10 passenger and 263 baggage, mail, express, freight and other cars. The Company owns at North Madison and also at Indianapolis, several lots of valuable land upon which are erected extensive Shops, which will afford room, with some additions, sufficient for making all the repairs necessary for its Cars and Machinery, and the manufacture even, of all the Locomotives and Cars required for its own use. The Company also owns in the hands of the Trustees of the Sinking Fund, a claim secured by pledge of the First Mortgage Bonds, which mortgage may hereafter be foreclosed, and 5,495 shares of $50 each of the Capital Stock of the Columbus & Shelby Railroad Co., which was built as a branch, running from Columbus to Shelbyville, 26 miles. It is at present operated by this Company, and is valuable as a tributary to its business. There are also in the Trustees' hands 722 shares of $50 each, in the Shelby & Rush Railroad Company, an extension of the former line, of twenty miles, being also a tributary to the business of this Company, and operated by it. A debt incurred for Rail, and in construction, is being worked out, and when this is accomplished a fair annual return in dividends may be looked for; meanwhile both Roads should continue valuable auxiliaries to the business of this Company.

The interest in these properties, and the other remaining assets of the late Company referred to in item 5 of the agreement, were placed in the

hands of the Trustees of the Sinking Fund, as therein provided. There had, on the 31st of March last, been $18,815 99, realized from these sources, and expended by the Trustees in the purchase of $21,000 of this Company's Mortgage Bonds, as before stated.

The balance of the year's net earnings applicable to the Sinking Fund, will, as realized, be paid to the Trustees for investment in like manner.

The net income of the Company as shown by statement, for the year ending 31st March last, was $122,001 94, which was appropriated on the 1st inst. as required by the articles organizing the Company, as follows, viz:

To pay Interest due Nov. 1, 1862....	$23,712 50
To pay Interest due May 1, 1863....	23,135 00
To pay Dividend of 8 per ct. on Preferred Stock.....	35,020 00
To pay Dividend of 6 per ct. on Common Stock.....	26,265 00
To pay Commission, &c. paying Interest and Dividend.....	450 00
Balance to be paid to Trustees of S. F.	13,419 44
	$122,001 94

The period to which the Board of Directors was appointed by the Articles of Organization was limited, expired on the 27th of March last, when an election was held, and the management of the affairs of the Company, conferred upon the present Board, who will retain their offices until the 4th Wednesday in May next, as in accordance with the By-Laws adopted by the Company, the annual meeting of Bond and Shareholders for the election of Directors, is to beld on that day.

President—F. H. SMITH.

Directors—Nathan Powell, William M. Dunn, Jacob B. McChesney, Peter McMartin, Edmund H. Miller, John Ferguson, E. Cauldwell, Elihu Day, Frederick H. Smith.

Secretary—THOMAS POLLOCK.

Treasurer—T. P. MATTHEWS.

Superintendent—D. C. BRANHAM.

Philadelphia and Erie Railroad.

On the 20th ult., the Philadelphia and Erie Railroad was opened from Driftwood to Emporium, in Camaron Co., Penn., a distance of 18 miles, making the length of road now completed from Sunbury westward, 139 miles. It is confidently expected that the rails will be laid during the present month as far as St. Mary's, 22 miles beyond Emporium. From the west, the road will soon be opened to Buena Vista, 85 miles from Erie—making the total of completed road 246 miles—leaving only a gap of 23 miles unfinished between Philadelphia and Erie. These 23 miles (from Buena Vista to St. Mary's) are nearly all graded, and at no very distant day will be ready for the rail.

How we Ride in New York.

We give the illustrations accompanying this article for the double purpose of giving our distant readers an idea of the style of vehicles in which our streets are traveled by the general public, and of showing the improvement that has been made in them during the past few years.

The omnibus (fig. 1,) with entrance behind and seats on the sides, facing each other, originated in Paris in 1827. In 1830 the first one was made in New York and run on Broadway. As many as

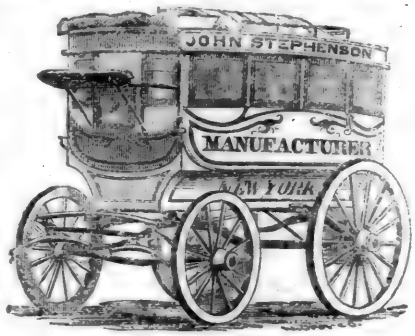

FIG. 1.—THE OMNIBUS.

five hundred have been in use here at one time; but in consequence of the introduction of street railways (which our London cousins insist still are a nuisance) the number of omnibuses, or stages, as they are almost universally called here, has been considerably reduced.

To stand the hard usage and jolting over the pavements an omnibus is required to be built of the toughest and best seasoned wood, and put together in the most perfect manner—putty joints do not answer. To give an idea of the hard usage, we would state that the iron tires of a New York omnibus are, when new, an inch thick, and are only expected to last four months.

To secure ease of draft the wheels are made as large as they possibly can be and still retain the proper line of draft, from the shoulder of the horse to the centre of the forward axle, thus giving to the forward wheels a diameter of from forty to forty four inches, and to the hind wheels one of fifty to fifty-six inches. The width of track is from fifty-six to fifty-eight inches. The

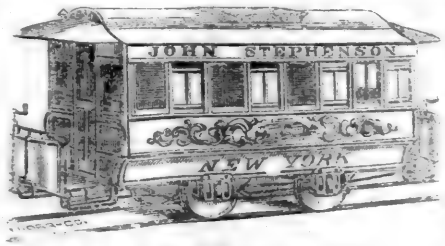

FIG. 2.—A STREET RAILWAY CAR.

average weight is about 2,500 pounds, and the cost from $600 to $700.

Figure 2 represents a street railway car, such as are now in extensive use in New York and many other cities in the United States, and are rapidly superseding the omnibuses, over which they have many advantages, the principal of which are, they are more convenient for entrance and exit; the noise and jolting is in a great measure avoided; two horses draw with the same ease three times the number of passengers; being confined to definite parts of the street, accidents are less frequent; and the capital invested and running expenses being less, they can afford to carry passengers at a less rate. As an example of cheap traveling, we may note the Second and Third Avenue Railroads carrying passengers a distance of eight miles for six cents. The weight of each car is about 4,000 pounds, cost $800 to $900.

Mr. John Stephenson, whose name appears on the engravings, is well-known throughout the country as one of the most extensive manufacturers in his line in the world. In his establishment, which is located in Twenty-seventh street, New York, he employs between two hundred and three hundred hands. Mr. Stephenson has received and filled orders for cars and omnibuses to be sent to England, Chili, Peru, Bogota, Buenos Ayres, Brazil, Mexico, Cuba and other West India Islands, California, and all parts of the United States and Canada, and in the principal towns of all of these countries they are now in daily use, bearing creditable testimony to the business enterprise of our fellow-townsman.

On the occasion of the late riot Mr. Stephenson, instead of yielding to the demand of the mob and stopping his work, as many did, armed his men, planted cannon, and set the lawless miscreants at defiance, showing that he possesses pluck as well as enterprise.—*American Phrenological Journal.*

Important Patent Suit.

The suit brought by Irvin A. Williams *vs.* the Buffalo Steam Gauge Company for infri gement of Letters Patent for an improvement on locomotive lamps, which has been on trial this week in the United States Circuit Court before his honor, Judge Hall, was terminated last night by a verdict in favor of Mr. Williams, fully sustaining his patent and giving him costs and damages, and also the right to injunctions against all infringers. This is the same patent upon which a suit was tried in this city last January against one John Carton, of Utica, and which resulted in a verdict for the defendant. Mr. Williams then commenced the present action, in which he has now succeeded.

The matter is of considerable importance to locomotive lamp manufacturers and to railroad companies throughout the country, as it confers upon Mr. Williams the exclusive right of making and selling "Head Lights" which contain oil reservoirs constructed with compartments.

The counsel for the defendants were Messrs. E. B. Forbush, Esq., of Buffalo, and Charles M. Keller, Esq., of New York, and the counsel for the plaintiff were B. Cozzens and S. D. Cozzens, Esqs., also of New York.—*Albany Atlas and Argus, Oct.* 29.

Union Pacific Railroad.

This great National work has assumed another phase of importance.

Pursuant to notice an election of Directors of the Company took place on Thursday 29th ult., and the following gentlement were chosen: Wm. B. Ogden, George Opdyke, John A. Dix, N. Thayer, C. S. Bushnell, T. C. Durant, J. V. L. Pruyn, Geo. T. M. Davis, E. W. Dunham, Pickering Clark, C. A. Lambard, E. T. H. Gibson, Charles Tuttle, J. F. D. Lanier, A. G. Jerome, A. A. Low, E. Cook, J. Edgar Thomson, A. Belmont, George Griswold, John F. Tracy, L. C. Clarke, J. E. Henry, Judge E. H. Rosekrans, H. V. Poor, H. S. McComb, Augustus Kountzo, S. C. Pomeroy, J. J. Blair, J. H. Scranton. The Board of Directors, convened at the office of the company, No. 54 William st., N. Y., on the 30th ult., and elected the following officers:—General John A. Dix, President; Thos. C. Durant, Vice President; John J. Cisco, Treasurer; H. V. Poor, Secretary.

Among these names will be recognised some of the most eminent, and influential in the Northern and Western States. Gen. Dix, the President, is also at the head of the Mississippi and Missouri Railroad; Mr. Ogden, of Chicago, is well known for his long connection with the railroad system of the Northwest; Mr. Opdyke is the esteemed

Chief Magistrate of this city; Mr. Pruyn is Treasurer of the New York Central Railroad Company, and will in all probability be elected to Congress from the District where he resides; Mr. Lanier, as well as Mr. Jerome, are wealthy and popular Bankers; Mr. Low is a China merchant, and President of the N. Y. Chamber of Commerce. Indeed all are men of mark, and their connection with this great enterprise is a fortunate thing for the country. We hope no time will be lost in pushing it through to a successful termination.

A very grave question however, suggests itself at this moment, which we imagine will require the action of Congress, and which has been a source of great anxiety to the friends of the project. It arises under the 7th section of the act of Incorporation, which, as our readers probably remember, became a law on the 1st of July, 1862, when it was approved by the President. The first clause of this section reads as follows:

"*And be it further enacted*, That said Company shall file their assent to this act under the seal of the said Company in the Department of the Interior within *one year* after the passage of this act."

Now, as the Company did not exist until the 29th or 30th of October last, the year for the filing of its assent under its seal had expired for more than three months, and therefore the present organization falls to the ground, and with it the charter under which it proposes to act.

It is true that at Chicago it was resolved to file an assent of the Corporators as soon as practicable, though we do not learn whether the Executive Committee attended to it or not. Probably it did, but it is contended that their assent was not required by the charter; the corporators had no seal, and were no Company, nor had they the rights of one. In the act they are not treated as such. On the contrary they are styled the "Board of Commissioners," and their duties were expressly declared to be those of preparing and securing an organization of the Company, by obtaining subscriptions to a certain amount, securing an election of Directors, and after that, they were to cease as a body politic and corporate. So that their assent was not required by the law, and, if given, was without effect. The word Company is exclusively applied to the new organization; and it is their assent, under seal, which the law requires to be filed within one year from July, 1862. If it should turn out that in consequence of the delay in organization the charter has fallen through, it is a proper inquiry as to whose fault it was. The Executive Committee are apparently the responsible parties, for what they did in October might just as well have been done in July last, and within the year required.

It would seem then that some further legislation will be required to remedy this defect in the present organization. And doubtless Congress will be willing to apply the remedy, if it shall appear that the present proceedings are in good faith, and unconditional, as from the character of the principal parties connected with it, would appear. We consider the Pacific Railroad one of the grandest projects of our day, and we should deeply regret any delay in its construction. This however is not so likely to occur as might be supposed, since the Eastern and Western divisions of the Pacific Railroad are now being constructed by other parties, who are recognised by the act, and endowed by it with privileges in common with the Union Pacific Railroad Company, and may construct the remaining, or central divisions, without the aid of any further legislation.

It will be for Congress to determine this interesting question. But be this as it may, we feel assured that this great chain between the Atlantic and Pacific Oceans is certain to be made, and is no longer to be considered as questionable.

Crossing Railroad Tracks.--Duty of Persons to Look Both Ways for Trains.

MOTION FOR NON-SUIT. SUPERVISORY POWER OF COURTS OVER THE VERDICTS OF JURIES. PLAINTIFF MUST SHOW THE ACCIDENT TO HAVE RESULTED FROM NO NEGLIGENCE OF HIS OWN IN ORDER TO RECOVER OR TO SUSTAIN A VERDICT IN HIS FAVOR.

This was an action brought against the Hudson River Railroad Company, to recover damages for causing the death of Henry Ernst. The case was tried at the Rensselaer Circuit in May, 1859, before Mr. Justice Gould and a jury. The judge declined to submit any question of fact to the jury; and directed a non-suit, and ordered the plaintiffs' exceptions to be heard in the first instance at the General Term of the Supreme Court. The following are the controlling facts as stated by the General Term:

For half a century there has been a public highway leading from Sandlake to the city of Albany, passing through the village of Bath, and over the Hudson River, by what is known as the Bath Ferry.

The defendants operate the Troy and Greenbush Railroad, which is located on the east bank of the Hudson River, and crosses, at the same level, this public highway at Bath. The company have a station house there, located east of the track, and just north of the highway leading to the ferry, and ordinarily, have a flagman stationed at the crossing.

On the 29th of December, 1855, the deceased, having a pair of horses attached to a sleigh, was passing upon this highway, bound for the city of Albany. His home was in the eastern part of the county of Rensselaer, some fourteen or fifteen miles from Bath. His family consisted of a wife, (the plaintiff,) and six daughters.

On arriving at Bath, he stopped at a tavern about 158 feet east of the railroad track. As the ferry-boat was ready to start, and was only waiting for him, the deceased unhitched his team, seated himself upon the sleigh bottom facing the west, and drove at a quick pace directly towards the boat. Just as he approached the railroad crossing, he came in collision with the defendants' train of cars moving south, receiving an injury that caused his death.

The plaintiff's testator was a teamster, and for more than twenty-five years used the road to Albany, crossing at the Bath Ferry, and very frequently crossed there. On the morning of the accident, he went to Bath by the Sandlake road, from which the cars were visible if looked for, as far as the Nail Factory, some miles distant, and might be seen nearly all the way from there to Bath crossing. He stopped at Dearstyne's tavern till the ferry-boat was ready to start; he then came out hurriedly, and drove towards the ferry-boat at a rapid rate of speed. He had a two-horse team and an empty sleigh. It was cold weather and he had a shawl about his face. He had no bells on his horses. In going from the tavern to the boat, the road is nearly level, or a little ascending for 158 feet, when it is crossed by the railroad track. For the whole of this distance, except in passing the station house, a building twelve or thirteen feet wide, there is no obstacle to seeing a train approaching from the north. The approach of a train can be heard without bell or whistle, from one to two miles. The noise of that train had been heard by one Ostrander, same time before deceased left the tavern. When deceased was at the middle of Mineral street, 125 feet from the track, Ostrander, whom he had nearly run into, heard the noise of the coming cars, looked round, and saw them coming. The cars were moving at the rate of from thirty to forty miles an hour. Although in a situation to hear, no witness who was examined heard the bell or whistle before the collision. This omission on the part of the engineer in charge of the train, attracted the attention of the ferryman at the time of the collision.

Miller, the regular flagman, was absent, and no flagman or other person was present to warn travelers of the approach of the train. The flagman is ordinarily there for the purpose of signalizing the train when to stop for passengers.

Shortly before the collision, and as the deceased approached the track, some person on the ferry-boat made signals and motioned for deceased to come on. At the same time there was other hallooing in the street near the crossing. Other motions were made; one man motioned with his hand, waving it towards the east. The bystanders understood the meaning of these signals differently; one thought it meant to keep off; another thought it meant to come on the boat; while others did not understand the meaning at all.

The approach of the train was perceived by several persons near the crossing; some saw it; some heard it. The witness did not observe whether the deceased looked up or down the railroad track, as he approached the crossing, and it did not appear that he looked in either direction.

The negligence imputed to the company by the plaintiff, and on which the claim to maintain the action was founded, consisted in the omission, by the defendants' engineer to ring the bell and sound the steam whistle, as required by the statute, for a distance of eighty rods before reaching the crossing.

The defence consisted in an attempt to prove that the plaintiff's intestate was also guilty of negligence, and that such negligence occasioned the collision of the train with his team which caused his death.

The General Term of the Supreme Court rendered judgment in favor of the plaintiff. The Court of Appeals now reverse that judgment, and hold that Justice Gould, was right in granting the non-suit at the trial.

The following are portions of the opinion rendered at the decision of the case by the Court of Appeals:

E. DARWIN SMITH, J.—Practically, a duplicate issue arises on the trial in all this class of cases; and to recover, plaintiff, it is held, must prevail upon both issues. But in principle, there is but a single issue. The plaintiff must present a case of *unmixed* negligence; a case where the injury is the

result, exclusively, of the defendant's negligence; where no negligence or fault of his own contributed in any degree to producing such injury. A party sueing for negligence must come into the court faultless. He must not present a mere balanced case. The burden of proof is upon him, and he must satisfy the court, by the greater weight of the testimony, that without any carelessness or blame on his part, he has suffered an injury from the wrongful act, default or negligence of the defendant. For such injury the law gives redress. This is the principle upon which the action for negligence at common law is based.

When the application for a non-suit was made on the trial of this action, did the plaintiff present such a case? Most clearly, it seems to me he did not. It was at best, upon the undisputed evidence, a clear case of mixed negligence. It is impossible, I think, to hold or find otherwise upon the whole evidence. A verdict finding that the death of the plaintiff's intestate was caused by the exclusive negligence of the defendants, and without any want of due care and caution on the part of the deceased, would I think, be utterly unwarranted by the evidence, and unsustainable, according to the view in respect to the degree of care required of persons attempting to cross a railroad track, hereinafter more fully discussed. In this view, it was the clear duty of the judge to direct a non-suit.

In no case, as I understand the rule, is it the duty of the circuit judge to submit a case to the jury, unless the evidence is so doubtful or conflicting, that a verdict for the plaintiff or defendant could be sustained, and ought not to be disturbed, upon the principles governing the review, by the courts, of the verdicts of juries. * *

It is not the jury, but the courts which administer justice. The duty and responsibility of seeing that equal and impartial justice is meted out to all men, devolves under the constitution, by the common law, upon the judges of the courts. Juries are mere *assistants* of the courts, whose province it is to aid them in the decision of disputed questions of fact. If there is no real *dispute* in a case the court gives judgment. * * *

So far as the duty is clear and definite upon undisputed facts, it belongs to the courts to declare and apply the law. But when the duty depends upon the exercise or omission of *ordinary care*, or common prudence, the question I agree, is one of *fact*, and belongs to the jury; but it is to be determined by them upon principles known and recognized by the courts. On an application for a non-suit in such a case, the circuit judge is called upon to apply to the evidence his observation, common sense, and common experience, and to determine whether allowing every legitimate inference which the jury might possibly draw from it, they would be authorized to find a verdict for the plaintiff; and the same rule applies in the review of this verdict, if the case should have been submitted to them and a verdict rendered.

What in a given case would be ordinary care, or common prudence, would be a question of judgment. It would be what, in the case supposed, would be the conduct of a majority of men in like circumstances. It would be for the jury to consider and decide this question with reference to the known and recognized interests of human nature, and the ordinary rules and principles of human conduct. In asserting and obeying the primary instincts of every human being to preserve and protect life, common sense and the law concur in declaring the rule of common prudence to be *such a degree of care and caution as will be in due proportion to the injury or damage to be avoided.* Persons riding, driving or passing in the crowded streets of a city, or driving horses upon a race course, will ordinarily exercise, and are bound and required to exercise a much higher degree of care than travelers upon the common highways of the country. So with persons crossing a railroad track, where trains are constantly passing, propelled by the powerful agent of steam. Such collisions almost invariably and inevitably are attended with fatal consequences, and occasion more or less loss of life. Common prudence requires a much higher degree of care and caution.

We come then to the question, what is common prudence, or what degree of care does common prudence enjoin and require in the crossing of a railroad track? This case illustrates the rule, and presents as I conceive a complete negative answer to the question. The conduct of Ernst, the intestate, in his attempt to cross the defendants' railroad, at the time of the collision which caused his death, shows most clearly, as I think, what is not *common prudence* in the crossing of a railroad track. * * * * *

I think the conclusion is rational and legitimate that in the judgment and opinion of a majority of men, *common prudence forbids* the attempt by any person, to cross the track of a railroad in constant use, without first taking the precaution to *look both ways* upon the track, and see and ascertain that a train is not approaching in either direction, and that the omission to do so is *per se, gross negligence*, in view of the danger to be avoided, and the fatal consequences in any accident resulting from such omission.

As therefore, upon the whole issue, it was impossible for the jury to find that the plaintiff had made out a clear affirmative case of negligence on the part of the defendants, unmixed with any degree of negligence on the part of the deceased, contributing to the injury sustained, it was not the duty of the circuit judge to have submitted the case to the jury, and the motion for a non-suit should have been granted.

Judgment reversed, and a new trial ordered.

The Crops of 1862 and 1863.

We have an abstract of the report of the Commissioner of Agriculture, giving a comparative statement of the crops of 1862 and 1863 in the loyal States. The amount of the crops in 1862 is estimated from the census returns of 1860. The amount for 1863 is made up chiefly from the returns to the Agricultural Department. The report shows an increase in the crop of wheat over last year of 1,074,739 bushels, an increase in oats of 2,337,170 bushels, a decrease in corn of 137,540,580 bushels, and a decrease in potatoes of 15,663,083 bushels. Assuming that the domestic consumption of wheat and corn in 1864 will be the same as in 1863, it is found that there will be a surplus of 41,761,047 bushels of wheat for exportation, and a deficiency of 125,860,238 bushels of corn, which must be provided for by greater economy in feeding and a greater proportional consumption of wheat. The number of stock hogs is about the same as in 1862; the tobacco crop is larger than that of last year by nearly fifty million pounds; the hay crop shows a considerable decrease. From the present condition of the crops in England it is judged that its demand for breadstuffs in 1864 will return to the general average rather than continue at the great amount since 1860.

Pennsylvania Railroad.

The following is an extract from the annual report of John P. Laird, Esq., Master of Machinery, Pennsylvania Railroad:

The cost of repairs of locomotives, for the year ending December 31st, 1862, are as follows:

Eastern Division (including two new engines)	$121,209 33
Middle Division	124,619 86
Western Division	145,070 39
Total for 1862	$394,899 58
" 1861	344,468 87
Increase	$50,430 71

There being an increase of 675,997 in the number of miles run.

The cost of fuel for the year ending December 31st, was $304,522 47; of fluid, oil, waste and tallow, $62,779 33.

The average cost per 100 miles run was as follows:

	1862.	1861.	Saving.
Repairs	$7 76	$7 81	5 cts.
Fuel	5 98	6 41	43 "
Stores	1 02	95	6 "

A continued saving in cost of fuel has been effected, as is shown by the following comparative statement:

	Total number of miles run.	Cost of Fuel.	Cost of Fuel per 100 m. run.
1859	3,294,220	$250,138 75	$7 59
1860	3,633,442	260,679 57	7 17
1861	4,413,036	288,083 07	6 41
1862	5,089,033	304,522 47	5 98

Being a saving of 43 cents per 100 miles over the cost of last year, although the cost of coal per ton had materially advanced during the last months of the year.

A saving has also been effected in repairs of five cents per 100 miles, with an increase in the item of stores of six cents per 100 miles, which is accounted for in the increased cost of stores, some of which have doubled in price in the past year.

All engines in the freight service are now using coal for fuel. Ten engines are burning coal on passenger trains with success; one of the latter is built for anthracite coal.

The merits of the two kinds of coal, as a fuel for locomotives, are being thoroughly tested. Steel fire-boxes are on trial in several of the engines, and appear to wear well. Steel promises to prove to be the best material for fire-boxes.

The use of new engines with modern improvements, has demonstrated practically, by the amount of service rendered at a cost, the importance of those improvements, among which may be mentioned:

A wheel base which will secure the easiest and best riding machine, and at the same time diminish the wear and tear of the engine and the road; the proper counterbalancing of the reciprocating parts, the momentum of which are known to be most destructive to machinery; a valve motion which, while it is simple and durable in its parts, is the most economical and effective in its operation.

No good material has been laid aside to make way for any changes; but where an opportunity has presented itself, improvements have been made with great success.

The total number of cars owned by the Pennsylvania Railroad Company, at date December 31st, 1862, were 4,265 eight-wheeled cars, and 524 four-wheeled cars.

Valuation of Pennsylvania.

The following is the valuation of all property in Pennsylvania for 1863, by the Revenue Board:

Counties.	Valuation.
Adams	$ 5,138,390
Allegheny	26,123,389
Armstrong	3,027,873
Beaver	4,193,151
Bedford	3,458,223

Wyoming	1,009,014
York	12,915,506

Old Colony and Newport Railroad.

At a meeting of the stockholders of this company, held at Providence on the 29th ult., it was voted to accept all acts and resolves enacted by the Legislatures of Massachusetts and Rhode Island affecting the interests of the Old Colony and Newport Railroad corporation. It was also voted to give authority to the directors to dispose of the stock owned by the corporation, and issue 8,849 new shares of the par value of $100 each. The present number of shares in the corporation is 31,151, of which 25,783 shares are held by stockholders, and 5,368 by the company. Judge Abbott said the vote contemplated the possible increase of the capital stock of the corporation to $4,000,000, although the present condition of the road did not require that the stock should actually be greater than $3,500,000. The charter of the road allows the increase of the capital stock to $4,230,000. It was likewise voted to request the directors to make, as soon as consistent with the interests of the road, a dividend from the surplus earnings of the corporation; and a proposition that the time for making such dividend should not be further ahead than four months, was also adopted.

Progress of the New York City Railroads.

Notwithstanding the publicity given to the railroads now building in our city, we are continually beset with inquiries for information in regard to where the new roads commence and where they terminate, their general route, and so forth. From the communications which we daily receive in reference to the new roads, we are led to believe that if there is one subject more than another upon which our citizens are in a blissful state of ignorance, it is on the matter of the new city railroads.

With the Second, Third, Fourth, Sixth, Eighth, and Ninth avenue lines, the people have grown familiar; but the "Gridiron and the "Grand Belt" are enigmas which they cannot solve. The more they try the more they are mystified, and after many attempts to straighten the matter in their minds, finally give it up in despair. Many persons walk a block or two further and take cars or roads the routes of which they know, rather than take passage on cars of which they know not whence they come nor whither they are going. Beside the Gridiron and belt, there are the Avenue A, Avenue D, East Broadway, and other roads, which are equal mystifications. The contemplated route of the road technically known as the "Belt Railroad" is as follows:

Starting from South Ferry, foot of Whitehall street, which is the southern termini of the Belt and Gridiron, the cars will proceed up Whitehall street to Bowling Green, turning thence into Battery place, will pass the upper end of the Battery, and continue their course through West street and Tenth avenue to Fifty-ninth street, through which street a track will be laid connecting with the east side of the city, whence following the East River, as far as practicable, the line will be extended until it enters South street; thence down South street to the South Ferry. On South street a track has already been laid as far as Market street. A track will be laid also in Front street, belonging to the same road. The cars of the Belt road are now running on the west side of the city as far as Fifty-ninth street. The company intend when the road is in full working order to run 150 cars. Twenty-six cars are at present running on the line daily. A temporary depot has been established at Fifty-second street.

The Gridiron road will be formed by the co-operation of several companies whose charters empower them to lay tracks for the most part on the intersecting streets of New York, that is from East to West. The East Broadway road will commence at the Williamsburgh Ferry, foot of Grand street, and run thence down Grand street and East Broadway to Chatham street, where, taking the Third avenue track, it will continue to the City Hall Park, establishing its terminus on the open space in front of Tryon row. Operations will not, in all probability, be commenced on this road before next Spring.

The Avenue A road also has its beginning at the Williamsburgh Ferry, passing through Grand and Lewis streets to Avenue A, thence to Fourteenth street, where, taking a westerly course, it crosses the First, Second, Third and Fourth avenues, and terminates at Broadway. The Avenue D road commences at the Houston street Ferry, and will pass westerly and northerly through various streets and avenues to Broadway. A long time will elapse before either of these roads will be completed.

The Broome street road passing through Broome, Greene, and Wooster streets, University place, Broadway to Central Park, is now in operation, and enjoying a liberal share of patronage.

A track is now being laid in Canal street as a part of the "gridiron," which will connect the Jersey City Ferry at the foot of Desbrosses street with Williamsburgh Ferry foot of Grand street, passing through Canal, Division, Grand, and the avenues on the east side. There is also a line in course of construction in Thirty-second street which will extend from the east to the west side of the city. These are in brief the routes of the roads now being constructed in New York, all of which will doubtless be in successful operation by this time next year.—*Tribune.*

Finances of California.

California has an area of 188,892 square miles, and in 1860 contained 379,994 inhabitants, showing a density of 2.01 persons to the square mile.

The private wealth in the State in 1862 amounted to $160,869,072, of which $80,735,855 represented real estate, and $72,647,666 personal property. This gives $422 03 to each inhabitant.

The amount of taxes levied on property in 1862 amounted to $3,673,129, of which $1,221,064, was for State purposes (including federal tax,) being 77 cents per $100 valuation, and $2,453,065 for county purposes. The State tax averaged $3 21 to each inhabitant.

The receipts into the State Treasury, from all sources in 1862 amounted to $1,031,529, and the expenditures for the same year to $1,146,744. The expenditures were equal to $3 02 to each inhabitant.

The following table shows the valuation, and receipts and expenditures, yearly, since the formation of the government:

Years.	Valuation for taxes.	Receipts from all sources.	Expenditures on all acc'ts.
1850.	$57,670,689	$3,156	$351,321
1851.	49,231,052	330,796	742,272
1852.	64,579,375	366,825	1,020,239
1853.	95,335,646	454,985	1,456,815
1854.	111,191,630	1,022,647	1,499,265
1855.	103,887,193	1,155,587	1,471,937
1856.	95,007,440	723,290	1,632,765
1857.	126,059,461	799,794	1,018,203
1858.	123,955,877	1,215,128	983,353
1859.	131,060,279	1,184,221	1,109,143
1860.	148,193,540	1,198,582	1,165,718
1861.	147,811,617	1,292,718	1,462,691
1862.	160,369,072	1,031,529	1,146,744
Total		$10,779,212	$15,060,667

The indebtedness of the State on the 1st December, 1862, amounted to $5,569,284, and was as follows:

Bonds issued under act of April 28, 1857.		$3,727,500
" " " act of April 30, 1860.		198,500
Audited claims on file in comptroller's office	$427,780	
Salaries of officers due	62,000	
Appropriated for schools	50,434—	540,214
War bonds and coupons*	558,930	627,551
War claims audited but not bonded	68,621—	627,551
Civil fund warrants in hands of the State treasurer belonging to school fund, not funded		475,520
Total indebtedness		$5,569,284
The annual interest on the funded debt of 1857 is		$260,925
The annual interest on the funded debt of 1860 is		13,895
The annual interest on civil fund warrants is		33,286

* The general government has allowed the sum of $229,000 to be paid on these bonds.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Oct. 23, 1863, was as follows:

Passengers	$23,207 66
Freight and live stock	40,412 06
Mails and sundries	1,287 04
Total	$64,906 76
Corresponding week of 1862	63,496 34
Increase	$1,410 42

The earnings of the Grand Trunk Railway for the week ending October 17, 1863, were:

Passengers	$33,352 69
Freight and live stock	58,857 36
Mails and sundries	2,800 00
Total	$95,010 05
Corresponding week, 1862	93,067 61
Increase	$1,942 44

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week in Oct. have been $41,457 80
Same week, 1862 39,812 14
Increase $11,645 66

The earnings of the Dubuque and Sioux City City Railroad Company for the 3d week in Oct., 1863, have been $9,321 25
Same week, 1862 6,825 25
Increase $2,496 00

The approximate earnings of the Marietta and Cincinnati Railroad, in the 3d week of October, 1863, were $18,167 12
Do., 1862 22,292 43
Decrease $4,125 31

The earnings of the Chicago and Alton Railroad for the 4th week of Oct., 1863, were $51,941 00
Same week, 1862 34,887 00
Increase $17,054 00

The earnings of the Chicago and Northwestern Railway for the 3d week in October, 1863, were $50,411 26
Do., 1862 28,224 56
Increase $22,186 70

The earnings of the Galena and Chicago Union Railroad for the 3d week of October, 1863, were:

Freight	$64,356 34
Passengers	16,000 48
Mails	1,300 00
Total	$81,656 82
Same week, 1862	63,800 54
Increase	$17,856 28

☞ The great Russian Railroad Company have received and expended one hundred and twenty-five million of dollars in the course of their operations, obtained on the faith of a five per cent. guaranty by the Government. The extent of the line now worked is one thousand and ten miles, and the traffic for 1862 was twice that of 1861.

☞ The American Express Company have extended their operations over the Susquehanna Railroad as far as it is opened, and propose at Albany to fill orders the same day they are received. This will be very advantageous to the retailers in the city of Albany that city, and the people along the route.

American Railroad Journal.

Saturday, November 7, 1863.

Stock Exchange and Money Market.

One of the marvelous events of our time is the readiness with which the people of the North and West furnish the Government with money to carry on the war for the restoration of the Union.

In the revolution it was almost impossible to obtain means for that great struggle, and we finally had to depend on foreign aid to help us through it. In the war of 1812–'15, the credit of the Government was low and its stocks depreciated a long way below par. Even during the administration of John Tyler, Mr. Robinson went abroad at his request to obtain pecuniary aid and returned unsuccessful. In Mr. Buchanan's administration at its close, so dark were the prospects of the country, that money even in small sums was obtained with difficulty at 12 per cent., and now within three years past when assailed by internal foes, carrying off as it seemed one ha

the States, our treasury and mints robbed by public men to whom the nation had given its confidence, some of the stoutest hearts began to despair of the republic. Under the pressure of these difficulties, with battles lost, all our Southern seaports captured from us, the Mississippi closed, and our National capital threatened with destruction, it seemed as if nothing but the interposition of Divine Providence could snatch us from impending ruin.

When in addition to these domestic embarrassments we were compelled to submit to serious injuries inflicted upon us abroad, the two greatest powers of the Eastern world hastened to give to the rebellion the dignity of a just war, and we were told that not a dollar should be loaned us in our need, it appeared as if we were about to be overwhelmed in the struggle which had been forced upon us, and sink into the Lethe of Nations. But what have we lived to see? The most extraordinary resources that nothing can impair, the most cheerful acquiescence in the necessities of the time, the utmost readiness to be taxed, and pay our taxes, the wealth of the nation freely offered in the public service, the money demanded by the Government poured forth from every fountain and reservoir, its securities sought for with avidity, its stocks rising to par and keeping there steadily through all the fluctuations of the market, or the temporary reverses of the contest, the interest paid regularly in gold as if we were still at peace, and, notwithstanding the people had already lent the Government eight hundred millions of dollars, and were circulating at par nearly four hundred millions of Treasury notes on which there was no interest, we see, even within the last fortnight, thirty-six millions more have been subscribed to the public loans, although the rate of interest is low compared with that of the commercial and financial world. While our taxes have necessarily increased, the interest of money has fallen, offering this compensation in a most effective and timely way; and so without asking Europe for its sympathy or its aid we stand on the impregnable base of our native wealth, our national strength, our unflinching courage, and our unchanged convictions. The old world may well be surprised at such a spectacle, and regard such a nation with unfeigned astonishment. We are surprised ourselves. Connected with all these circumstances, we must not forget the value of that system which has so well harmonized with public opinion, and has been so effectual in directing the financial power of the conntry. With the exception of a few mistakes at the outset, the general administration of the Treasury department has been of the most masterly character, and if we could separate the Minister of Finance from the political aspirant, he would be the most faultless Cabinet officer in our history.

There is not a shadow of a doubt existing in the minds of the people, that the public funds of this country are of the most solid character, that the evidences of our national debt are the securest of all our public securities; that investments made in that direction are the most desirable that accumulating capital can desire, and that the income of the nation is not only now sufficient for every present and future demand upon it, but offers the certain means for returning the principal, at an earlier day, than is really desirable for the holders. It is a foregone conclusion, visible to every eye, that this war is near its close, and that the country is to come out of it with a lustre which will pale all its former brightness. Nor can the observing writer on finance shut his eyes to the results of the recent state elections, as an evidence of the determination of the people, to forget all the faults of their Constitutional Government, all its haste, or weakness or errors in the one grand determination, that the unity of our system is to be maintained, all our correlatives are to be kept in their former places, and the industry, wealth, power, and character of the country as it was, are to be fully maintained, against treason within our borders, or a world in arms without. Such a Nationality as we are now establishing in this wondrous way, makes its financial system impregnable, its progress certain, our prosperity measureless and enduring.

The money market has been rather close for some time past, and the rate of interest on the street 7 per cent to all but the most favored borrowers. It is certainly a remarkable fact, that notwithstanding the supposed if not actual inflation of the currency beyond all former precedent, that money frequently becomes scarce in Wall st., and the operators there especially, although "to the manner born" often find it difficult to carry their stocks for a day without paying pretty dear for the privilege. We should argue from all this, that the legitimate business of the country is increasing as fast as money can be had to carry it on, and that no matter whether there are three hundred or six hundred millions of paper in circulation, new and profitable channels of employment will be created in which it will float without difficulty. It certainly looks so, notwithstanding all the counter experience of other nations.

The Stock market has with singular non-conformity to old theories improved in the face of the street money market. The dividend paying Railways stocks are being gradually absorbed in large quantities for *bona fide* investments, by people who are determined to hold on, who believe in railways, in progress, and the final grand destinies of the Nation.

The rumor of a combination bid for the last $100,000,000 of the 5-20's is pronounced to be untrue. As the Country is supplying Mr. Chase with all the money he wants, any attempt of the kind proposed would savor of an arrangement, tainted and unjustifiable. There is no such movement in contemplation.

The news from abroad is favorable in all respects. The result of the recent election in this state gives further assurance that no political creed can stand in the way of the Union sentiment, and thus the Nation grows stronger every day, and its financial stability is secured.

The Nashua and Lowell Railroad Company have declared a semi-annual dividend of 4 per cent. payable Nov. 2, free of Government tax.

The Coupons of the Preferred Second Mortgage, Series D., and of the Income Bonds of the St. Lonis, Alton and Terre Haute Railroad Co., due on 1st November, 1863, will be paid at the Bank of North America, less the Government Tax.

The coupons due November 1, 1863, from funded coupon bonds, of the Chicago and Northwestern Railroad Co., will be paid on presentation at the office of the Company No. 8 Wall st. Coupons from bonds registered will be paid only to parties in whose name they are registered or upon their written order.

The Schuylkill Navigation Company boat and car loan of 1855, due Nov. 1, 1863, will be paid on the surrender of the certificates thereof. The interest thereon ceased on that day.

The coupons due 1st November on the mortgage bonds of the Indianapolis and Madison Railroad Co., will be paid at the office of J. & S. Ferguson, No. 35 Pine st.

The coupons of the Evansville and Crawfordsville Railroad Company, due on the 1st November, will be paid at the office of the Farmers' Loan and Trust Co.

The coupons due November 1 on the mortgage bonds of the Cleveland and Pittsburg Railroad Company will be paid at the office of Wm. C. Gilman, No. 45 Pine st.

The injunction against the payment of the dividend, due on the 25th of August last, by the Chicago and Alton R. R. Co. having been removed, it will now be paid by Messrs. G. S. Robbins & Son.

William Peters and John D. Probst, late with Marie & Kanz, have formed a new stock commission house under the firm of Peters & Probst, at 25 William street.

The firm of Weston, Dortic & Co., has been dissolved. Mr. Dortic retiring. The business of the house will be continued by Weston, De Billier & Co., at No. 24 Exchange Place. H. T. Dortic Esq., has established himself in the stock and exchange commission business on his individual account, at No. 1 Hanover-st.

The firm of Crommelin, Curtis & Co., having expired by limitation, R. O. Crommelin and W. E. Tillinghast of that firm will continue the stock commission business at No. 30 Wall street, under the name of Crommelin & Tillinghast.

Nathl. Dole, Thos. Richardson and Nathl. R. Cobb have formed a copartnership under the firm of Dole & Co., for the transaction of a general Banking and Stock Brokerage business, and have taken offices at No. 12 Wall st.

By telegram from San Francisco, dated 28th Oct., to Ross, Dempster & Co., the leading stocks are quoted as follows: Ophir, $1,500 per foot; Savage, $2,900 do.; Gould & Curry, $4,400 do.; Sierra Nevada, $76 do.; Yellow Jacket, $1,800 asked; Potosi, $1,800 asked; California State Telegraph Company 20 bid.

The Gould and Curry Silver Mining Company have declared a dividend of $100 per foot, payable, if desired, at No. 36 Wall street, by Eugene Kelly & Co.

Springer Harbourgh of Pennsylvania, and T. J. Carter of Illinois, have deen appointed as the two Government Directors of the Pacific Railroad Company as provided by law.

R., 18½@19.

OUR NEW STOCK AND BOND LISTS.

We give this week, in addition to our ordinary Stock and Bond Lists, etc., a new table of Federal and State Securities; also tables of Preferred and Guarantied Railroad Stocks, Mining Stocks, and Canal and Navigation Loans. Next week we shall have ready our new City Passenger Railroad Share and Bond List; and the succeeding week a table of City Loans, similar to that of State Securities in our present issue. And in order to do this, without encroaching upon our ordinary reading columns, we propose to add four pages more to the JOURNAL, making two and a quarter sheets containing thirty-six pages, in each number. The large accession to our subscription list within the past year warrants us in incurring this extra expense. We hope in time to make the AMERICAN RAILROAD JOURNAL the leading financial paper of the day—if indeed it is not already such.

Bourne's Catechism of the Steam Engine.

We have received from D. Appleton & Co., a copy of this work, republished from the English copy, revised and corrected so as to be better adapted to the use of American engineers. The advances of science in the construction and management of the steam engine have been so rapid within a few years past, that the old text books have become comparatively useless. Even the Chevalier Pambour's work is hardly anything more than a curiosity, and Dr. Lardner's is almost out of date. This catechism of Mr. Bourne, (for in that shape he has treated his subject,) is precisely what is wanted, and meets every possible inquiry. We hope to have room hereafter to publish some extracts from it in the JOURNAL. In a cursory perusal, we notice his explanation of the manner in which the great speed of modern English steamers is obtained, (as our blockade squadrons have learned to their cost,) and his directions to locomotive engine drivers as being exceedingly interesting and valuable.

Atlantic and Great Western Railway.

The following report has been made to the Stock Exchange by the Standing Committee on the Securities to be dealt in, in reference to the bonds of the Atlantic and Great Western Railway Company:

The Atlantic and Great Western Railway—a line of broad gauge, single track, partly completed, from Salamanca on the Erie line to Dayton in Ohio, soon expected to be finished, and by means of junctions with and leases of other lines, to complete a broad gauge between New York and Cleveland, and New York, Cincinnati and St. Louis—is a *separate corporation in each* of the three States of New York, Pennsylvania and Ohio, but united as one company in interest by mutual contracts. The New York and Pennsylvania divisions are complete, and have been built almost exclusively by negotiation of bonds and stock in Europe; the Ohio division is in progress, and though the funds have been mainly furnished in Europe, a portion of the 1st mortgage bonds has been negotiated in New York, and application is made to place the bonds of the Ohio Company upon the regular list. The interlacing of the interests of the Ohio Company with those of New York and Pennsylvania, makes it necessary to submit the statements herewith as to each of them, obtained from official sources. It is recommended that the first and second mortgage bonds of the Atlantic and Great Western Railway of Ohio be regularly called; the bonds of $1,000 and $500 to constitute regular delivery. The bonds of $100 may be specially called free.

We learn that this road, under the enterprising contractors and their efficient agents, is now being pushed forward rapidly to completion. The Akron *Beacon* says that the track has already reached Norton, while the company have a large quantity of iron and ties on hand, for the purpose of putting the road in running order as fast as the grading is completed.

Freight on Horse Railroads.

An important decision has recently been made at the quarter sessions in the city of Philadelphia by Judge Thompson, arising out of the following circumstances:

David R. Porter, a conductor on the Tenth and Eleventh Streets Passenger Railway, was charged with committing an assault and battery upon a passenger. It was alleged that the passenger got on the front platform with a trunk. After paying his fare, the conductor demanded pay for the trunk. This was refused as the passenger alleged that he had no more money. It was alleged that the conductor then struck the man on the face and threw him from the car.

The defence alleged that when the conductor required the money for the trunk the passenger raised a hammer which he held in his hand and threatened to pay the conductor with that instead of money. The conductor then ordered him to get off, and upon his refusal pushed him off.

Neither the charter nor the regulations of the Company were put in evidence at the trial, as to the carrying of baggage. The Judge was of the opinion, that the cars were only for passengers, and that it was questionable whether any one had a right to inconvenience them by incumbering them with baggage. The case went to the Jury in this condition, and they not being able to agree on a verdict, were discharged. In this city, a charge

is always made for boxes or trunks which take up much room.

Boston and Worcester and Western Railroads.

A special meeting of the stockholders of the Western Railroad is to be held in Boston on the 19th inst., to see if they will direct the officers of the corporation to petition the Legislature for an Act of Consolidation with the Boston and Worcester Railroad corporation, and to co-operate with the committee on the subject appointed last year in procuring all necessary legislation for said union.

OFFICE OF THE

COLUMBIAN (MARINE) INSURANCE COMPANY,

Corner of WALL and NASSAU Streets.

CASH CAPITAL....$1,000,000.

Total Assets, June 2nd, 1863, less Losses adjusted and paid, $2,008,651 03.

BOURNE'S CATECHISM OF THE **STEAM ENGINE.**

D. APPLETON & CO., Nos. 443 and 445 Broadway,

PUBLISH THIS DAY

A CATECHISM OF THE STEAM ENGINE,

ITS VARIOUS APPLICATIONS TO MINES, MILLS, STEAM NAVIGATION, RAILWAYS AND AGRICULTURE,

WITH PRACTICAL INSTRUCTIONS

FOR THE

MANUFACTURE AND MANAGEMENT OF ENGINES OF EVERY CLASS.

By JOHN BOURNE, C. E.

New and Revised Edition.

1 vol. 12mo., Illustrated. Cloth, $2.00.

In offering to the American public a reprint of a work on the Steam Engine so deservedly successful, and so long considered standard, the Publishers have not thought it necessary that it should be an exact copy of the English edition. There were some details in which they thought it could be improved and better adapted to the use of American Engineers. On this account the size of the page has been increased to a full 12mo, to admit of larger illustrations, which, in the English edition, are often on too small a scale, and some of the illustrations themselves have been supplied by others equally applicable, more recent and to us more familiar examples. The first part of Chapter XI., devoted in the English edition to English portable and fixed agricultural engines, in this edition gives place entirely to illustrations from American practice, of steam engines as applied to different purposes, and of appliances and machines necessary to them. But with the exception of some of the illustrations and the description of them, and the correction of a few typographical errors, this edition is a faithful transcript of the latest English edition.

D. A. & CO. HAVE JUST PUBLISHED:

APPLETON'S UNITED STATES POSTAL GUIDE.—Containing the Chief Regulations of the Post-office, and a Complete List of Post-offices throughout the United States. Price, 25 cents.

KRUPP'S PATENT CAST STEEL

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any other being cheaper at three times than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk; Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enamelled Iron Water Pipe, Steel Tubes, etc., etc.

They have received the highest approval from all RAILWAY COMPANIES that have them in service.

SANFORD'S MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any here tofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

GREENPOINT, L. I., N. Y.

N. B.—JOBBING PROMPTLY ATTENDED TO.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the LARGEST OVENS of any in the market; BAKES PERFECTLY, never failing to brown at the bottom: BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary ECONOMY OF FUEL, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,

239 and 241 Water st., N. Y.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS' AND OTHER PATENTS FOR SEATS AND COUCHES IN SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, No. 1347 Brown st., PHILADELPHIA, will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above.

O. W. CHILDS, President.

BROWN'S ENGLISH ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES.

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,

PROPRIETOR,

Depot, 270 Third Avenue, New York.

All Orders promptly attended to. Best City References given.

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—[Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—[Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—[Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $2. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

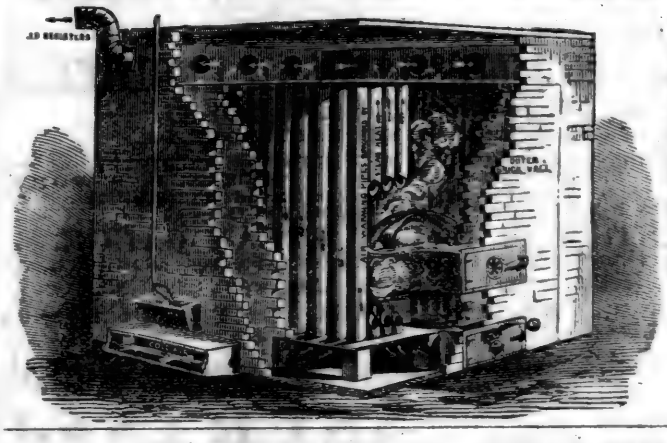
WILLIAMS & PAGE'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors, and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

MUNN & CO'S
PATENT OFFICE.
ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,
No. 37 Park Row, New York,
Or corner F and 7th sts., opposite Patent Office, Washington, D. C. 3m35

The Mercantile Mutual
INSURANCE
COMPANY,
No. 35 WALL ST., NEW YORK.

ALEXANDER'S
ROOFING
CEMENT-PAINT
FOR
Railway & Steamboat Co's,
BUILDERS and BUILDINGS generally.

THIS PAINT is warranted not to **Crack** or **Scale** either on **Wood, Iron, Tin,** or **Canvass.**

The ingredients in its composition are **all** of a preserving and protective nature. This Paint is now extensively used by Railway Companies and pronounced much **cheaper,** more **durable** and satisfactory than what was previously used. It is 2 5ths heavier in body than any other Paint.

Give this Paint a trial, and if not found as represented no charge will be made for it.

Send for descriptive circular and references.

W. G. PERKINS, Gen'l Ag't,
271 Broadway,
NEW YORK.

SUBSTITUTE FOR
CAR DUCK.
Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK,** but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
March 1863. **Boston.**

HAMILTON E. TOWLE,
CIVIL AND MECHANICAL ENGINEER
256 BROADWAY, NEW YORK,

AGENT for the SALE and APPLICATION of the celebrated **JAPAN PAINTS** specially adapted to resisting HEAT and the action of the WEATHER on IRON, BRICK and WOOD WORK. Metal ROOFS, etc., painted by contract and guarantied to be tight.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

Increased Speed in Steamships.

It is patent to every person of the least information, that the steamship builders in England have been able to build vessels of a speed hitherto unknown on the ocean. Operating on some principle which appears to have been unconsidered, to say the least, by our own engineers, they have sent to sea steamers which have escaped by their fleetness from the fastest in our own navy, and which in the hands of the confederates have done our commerce the greatest injury. The American flag has almost disappeared from the ocean, and not a rebel vessel has been captured on the seas as yet, by our fleetest cruisers. We attribute this result in part to the stolidity of those eminent personages who have the direction of our naval affairs, although their friends persistently claim for them superior wisdom. We know that in the navy there is a general feeling on the subject which we do not care to express. We find for example, that whole fleets of British blockade runners pass in and out of Wilmington, North Carolina, almost with impunity. We have no vessels on that station which can readily catch them. They pass alongside, receive a shot and are out of range in a few minutes. Certainly we have constructors competent not only to build the finest models, but engine builders who can furnish the most admirable engines. What reason is there that the combined energies of these men cannot procure for us steamers as swift as those that are launched at Birkenhead or on the Clyde. We imagine the pride of opinion, and the arrogance of place and power are in the way of our naval success.

Perhaps there is another reason, which we may as well mention, and which is indeed our inducement for alluding to the subject at this time. We find in the *Catechism of the Steam Engine*, by Mr. BOURNE, an eminent British Civil Engineer, of whose work we have already spoken in the highest terms, some interesting observations on a recent method of obtaining high speed even in condensing engines of the ordinary construction. This may give the whole explanation, and let out the secret of the success of the recently built British steamers.

This question is asked:

"Can you suggest any eligible method of enabling condensing engines to work satisfactorily at high speed?"

This is the answer:

"The most feasible way of enabling condensing engines to work satisfactorily at high speed, appears to lie in the application of *balance weights* to the engine, so as to balance the momentum of its moving parts, the engine being made *very strong and rigid*. It appears to be advisable to perform the condensation *partly in the air pump* instead of altogether in the condenser, as a better vacuum, and a superior action of the air pump valves will thus be obtained. Engines constructed upon this plan may be driven *four times* the speed of common engines, whereby an engine of large power may be purchased for a very moderate price, and be capable of being put into a very moderate compass; while the motion from being more equable, will be better adapted for most purposes for which a rotary motion is required." Working at four times the speed, it exerts four times the power. The impulse communicated by the piston is less in amount and more frequently repeated, so as to approach more nearly to the condition of a uniform pressure.

This, then, is probably the explanation of the high speed recently obtained in the British engines, and if so is worthy of the attention of our American constructors. Mr. Bourne is also evidently in favor of giving a large area to the ports of cylinders, especially to those engines which are to travel fast. He lays down the rule as follows: "Multiply the area of the cylinder in square inches, by the speed of the piston in feet per minute, and divide the product by 4,000: the quotient is the area of each cylinder port in square inches." We are not informed whether this rule is recognized in the American engine shops.

We make these suggestions in the belief that they are somewhat new, and if they are, we shall have only performed our duty in giving them to the public. If they are not, then our constructors are to be blamed for not securing speed with as much success as their English competitors.

It is well-known that among the elements of American power the inventive faculty holds a high rank. In this country, steamers were first successfully set at the world's work. Here were constructed and set afloat the first clipper ships. Here the most powerful and elegant locomotive engines were first placed upon railways, here were originated the cotton gin, the best spinning machines for cotton and wool, the steam printing press, and the noblest hydraulic works, and lately, we have produced the revolver, the rifle, and heavy artillery of a character and utility in war, which leave all other nations behind us.

Why can we not build the swiftest steamers as well as the heaviest batteries. We see no reason except it be that "red tape" is always at hand to strangle our Hercules in his cradle. Private skill is in this country, indeed in most countries in advance of Governmental knowledge, and perhaps the reason is, it is confused by the immensity of the appeals which are made to it for assistance. Yet if to the possession of political tact were added more frequently the knowledge of science and the arts of life, there would after all be found a greater success in the expenditure of the public money.

New York Canals.

The quantity of Flour, Wheat, Corn and Barley, left at tide-water, from the commencement of navigation to the 1st of Nov., inclusive, during the years 1862 and 1863, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barl'y, bu.
1862.	1,201,100	26,262,600	18,601,900	1,101,900
1863.	1,071,200	16,356,600	20,313,600	1,679,800
	Dec...129,900	De 9,876,000	In. 711,600	In 577,900

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, show a deficiency equal to 2,105,100 bbls flour.

The receipts at tide-water of the principal articles of produce, from the opening of the canals, to and including the 31st of Oct., in the years indicated were:

	1861.	1862.	1863.
Canal opened....	May 1.	May 1.	May 1.
Flour, bbls...	1,037,400	1,201,100	1,071,200
Wheat, bu....	21,656,100	26,232,600	16,356,600
Corn, bu.....	19,234,500	18,691,900	20,313,500
Barley, bu....	1,180,800	1,101,900	1,679,800
Oats, bu.....	4,386,300	4,143,900	7,905,100
Rye, bu.....	651,900	729,800	353,700
Beef bbls	1,200	12,400	10,000
Pork, bbls....	7,900	167,200	228,300
Bacon, lbs....	568,900	5,834,600	3,501,500
Butter, lbs....	1,076,700	2,334,900	1,891,300
Lard, lbs.....	807,000	8,204,600	18,689,900
Cheese, lbs...	3,358,000	3,190,500	5,250,800
Wool, lbs.....	1,682,200	1,697,100	253,200

Atlantic and Great Western Railroad.

Annual Report of the President of the Atlantic and Great Western Railroad Company, (Ohio Division,) Presented at the Annual Meeting, held July 14, 1863.

I congratulate the stockholders of the Atlantic and Great Western Railroad Company of Ohio, upon the fact, that at this, your Twelfth Annual Meeting, a considerable portion of your road is in operation. Indeed, considering the dependence of this company upon the Pennsylvania and New York divisions, both of which have been so far completed as to be in good running order, I feel satisfied that all the more serious difficulties attending the completion of the whole line have been overcome, and assured that before the next annual meeting, your long deferred hope, that an unbroken broad gauge railroad from New York to St. Louis, will be realized.

Most of you are familiar with the general history of this enterprise from its commencement to the present time, and are aware that it has been retarded by not a few embarrassments, some of which arose out of the nature of the undertaking itself. Among these may be mentioned the magnitude of the work. From the Erie Railway at Salamanca to Dayton is 385 miles, the whole of which distance was embraced in the plan of constructing the Ohio portion, and although the country through which the line passes is very favorable for a railroad, yet so many miles of road necessarily involve the expenditure of a large amount of money.

The company commenced with a comparatively large share capital, and, although the country has at different times, during its progress, passed through severe financial trials, yet the unflinching fidelity of a large portion of the subscribers enabled the managers to so far progress with the work, as to form a basis for the issue of its bonds. But all who are conversant with American railroads, and the sad state of collapse into which their securities fell in the years of 1858, 1859, 1860, and 1861, know what difficulties we have had to contend with in placing these bonds at their fair value.

Considering the great degree of disfavor into which the Atlantic and Great Western Railway had fallen from the many ineffectual attempts to carry it forward, the opposition it encountered from rival interests, the calumnies which were heaped upon it and its promoters, its successful prosecution has been one of enormous difficulty. Add to these adverse causes, that terrible civil war, which unhappily rages even now, and some notion may be formed of the obstacles which have been overcome.

When the road is completed, it will be proper, and no doubt interesting to the stockholders and the public, to review the history of the company from its organization, and to place before them a statement, somewhat in detail, of its various transactions; but, at present, we shall consider our duty fully discharged when the principal transactions of your Board of Directors during the past year have been presented for your consideration.

Permit me, first, to say a few words in regard to the new contract for construction. You have heretofore been informed, that on the first day of March, 1861, the contract was entered into between this company and James McHenry, Esq., of London. One of the stipulations therein contained was that work should be recommenced on the first day of June of that year; and although this was done, it became evident that some misunderstanding was preventing the rapid advance of the works. It being thought advisable, a meeting of the Board of Directors was called on the 27th day of September, 1861, in order that measures might be adopted to ascertain the real causes of the delay.

The Board at this meeting appointed T. W. Kennard, Henry A. Kent and William Reynolds, Esquires, a committee to proceed to Europe. These gentlemen, accepting the trust, sailed about the 10th day of October of the same year. They visited London, Paris and Madrid, and had interviews with the parties directly and indirectly interested in the contract; and were enabled to perfect all former arrangements, and to make such further ones as to secure the immediate and rapid execution of the work. But here another trouble arose, which it was for the time feared, would indefinitely postpone, if not entirely defeat all our plans. I allude to the difficulty which sprung up between the United States and Great Britain, in regard to the steamship Trent. War between the two powers for a while seemed imminent. Amicable relations, however, were restored, but this affair caused such delay, that the work was not energetically recommenced until the spring of 1862. Although very little had been done, at this time, west of Corry, the road was opened to Ravenna in January last; and the first passenger train ran from New York to Franklin Mills on the 7th day of March, and in about a month thereafter to Akron, a distance of two hundred miles from the junction of the Erie Railway at Salamanca, and more than half the distance of the entire line to Dayton.

You see, then, that from Corry to Akron, a distance of one hundred and forty miles, the road was opened for business in less than one year from the resumption of the work. Comparatively nothing on this portion had been done in Pennsylvania and but little in Ohio. As to the engineering, although general and complete surveys had been made and estimates taken, it was found necessary to re-locate and stake the line. Substantially, then, one hundred and forty miles of the main line of this railroad was surveyed, laid out and estimated, the right of way obtained, the grading done, cross-ties purchased and delivered, the track laid, water tanks and temporary station houses erected, a large number of engines and freight and passenger cars constructed, and the whole placed in working order within less than one year. But this is not all; two important branches, extending into the oil districts of Pennsylvania, have been built within the year, one to Titusville, and the other to Franklin, each of about twenty-seven miles. These, with the main line, amount to about two hundred miles of railway, and all this, too, at a period in the history of our country, when so many able-bodied men were required by the Government for military service that the procurement of laborers has been very difficult, and many had to be sought in Canada, and elsewhere abroad and transported from thence to the works. We believe the railroad history of the world can scarcely furnish a parallel to this achievement, the credit of which, principally belongs to the contractor,* and to T. W. Kennard, Esq., the Engineer-in-Chief of the company.

Mr. Kennard has already achieved great reputation by his energy and ability, for the qualification of quickly perceiving and timely removing all obstacles likely to produce delay, and for requiring all under his charge to promptly and diligently perform their duties. It is gratifying that we are able to speak in high commendation of our contractor and Engineer-in-Chief, by whose energy and ability the friends of this great enterprise will be enabled to vindicate their judgment in estimating its importance in our great national system of railways, and of its benefits to the localities through which it passes.

The original charter of the company located the road "from the village of Franklin in the County of Portage, to Warren in the County of Trumbull, thence," &c. But the people of Warren for some reason, principally it is presumed, on account of the large expenditure by them in the construction of the Mahoning road,† took but little interest in this and had furnished no stock subscription for the company. A cheaper line being found north of that town, it became a question whether the company by its charter was obliged to locate its road to the village. To set this matter at rest a law was passed by the Legislature, in 1858, which provided that the road might be located anywhere within the township of Warren, since which it had been contemplated by the company to locate the road about two and one-half miles north of the village, but on the eighth day of July, 1862, the citizens of Warren

* It will be long remembered that at a time of unusual depreciation of American Railway Securities—especially in Europe—Mr. McHenry supplied almost the whole of the means necessary to build and thoroughly equip nearly five hundred miles of railway.

† Now leased to the Atlantic and Great Western Railway for ninety-nine years, securing an outlet on Lake Erie at Cleveland of the highest value.

presented to the board such considerations as to induce the location through the town, having presented to the company a donation of about $25,000, and the right of way for about six miles, including that through the corporate limits. This, of itself would not fully compensate the company for adopting this location, but taking the importance of the town into account, we are satisfied that the interests of the road will be thereby promoted,

The contract with Mr. McHenry required the company to furnish a quantity of second mortgage bonds. There being a doubt whether the charter of the company conferred the right, additional legislation was obtained last spring conferring ample powers to make such mortgage. Accordingly a second mortgage has been executed for the issue of $4,000,000 additional bonds, dated on the first day of July, instant, and payable twenty years from date, bearing seven per cent. interest, payable semi-annually, with interest coupons attached. I will also state, in this connection, that a mortgage of further assurance has been executed, which does no more than carry out and perfect the stipulations of the first mortgage as provided for by that instrument.

We present, for your consideration, contracts with the Cleveland and Mahoning, Cleveland and Toledo, Cincinnati, Hamilton and Dayton, and the Little Miami Railroad Companies, which have been recently entered into, subject to your approval.

The Atlantic and Great Western Railway being represented by three companies, one in each of the States of Ohio, Pennsylvania and New York, some time since, agreements were entered into, so far uniting them as the laws of the different States would permit. In pursuance of these agreements and for the purpose of devising some plan for the benefit of all, the three boards met at Meadville, on the sixth day of March last. After mature deliberation the plan of creating a Central Board was adopted, consisting of two persons to represent the interests of the Board of each company, and T. W. Kennard, Esq., constituted an additional member, as being equally interested for each of the three. A Secretary and Treasurer was appointed by the Central Board, whose office was located at Meadville.

The Committee appointed to represent the Ohio Board were W. S. Streator and Marvin Kent. William Reynolds, Esq., was chosen President of the Central Board.

And now, having laid before you all the important transactions of the Directors during the past year, I invite those who wish further details to examine the records of the meetings of the Board and the mortgages and contracts referred to.

In conclusion, I will add, that a large force is now at work between Akron and Dayton, and it is expected that the track will be laid to the latter place before winter. A large quantity of iron has arrived in New York and we have advices that the balance, necessary to complete the road to Cleveland for the North Western, and to Cincinnati for the South Western connections is on its way across the Atlantic. There has not been sufficient time *necessary* to develop the resources and establish the connections of that part of the line now in operation, but the business thus far of the Atlantic and Great Western Railroad has been beyond the expectations of its friends and surprising to those who have heretofore regarded it with no personal interest, or who had formed unfavorable opinions respecting it.

Respectfully submitted,

MARVIN KENT, *President.*

Foreign Trade of the U. S. of Colombia.

We take the following interesting facts in relation to a portion of the Commerce of Colombia, (late New Grenada) from the reports of the American Consuls in that country, made to our Department of State.

In 1861, the foreign tonnage in the trade was as follows:

162 vessels arrived at Panama	120,264 tons.
64 American bottoms	83,665 "
35 British "	31,590 "
Value of American	$39,977,119
" British	$13,056,250

Under the Colombian, Equadorian and Peruvian flags there arrived 63 small vessels of 5,000 tons, doing a coasting and foreign trade valued at $450,000 for the coast and $400,000 for Europe. Imported under the flags of all nations for consumption $1,145,310; in transitu for the United States $50,146,545, all in American bottoms. Of this $36,959,119 were from California.

Cleared and exported in transitu to the

United States	$50,746,345
To Europe	13,056,250
Total	$63,202,595

The Consular reports are at the best however quite incomplete. The Quarterly returns are not fully furnished, but from those we have, we learn, that 158 vessels entered and cleared at Aspinwall, in the aggregate, of 106,136 tons.

At Sabanilla 18 vessels	22,000 tons.
Carthagena 10 "	875 "

This last statement is far below the fact. One house alone in this city dispatches two vessels per month to this, or the neighboring port.

The ports of export, import and warehousing on the Atlantic are Santa Marta, Carthagena, Sabanilla, Rio Hacha, Zespata, Auraca, Meta, Quibdo on the Atrato, Cuenta on the Venezuelan boundary, and Carlosan on the Equadorian.

The free ports are Buena Ventura, Tamaco, Iscuande on the Pacific, Caqueta in Cauca, San Andres in Bolivar, and Aspinwall on the Atlantic.

The chief hindrance to its active trade with this and other countries, is the tariff, which regulates everything by weight, no matter what its value. A piece of silk pays no more duty than a gunny bag, pound for pound. The consequence is, the importations consist of those articles chiefly, which pay the least duty by weight, and of course the variety of imports is limited. The following articles are free. Printed books, printing paper, hard coal, ice, vessels complete or in part, destined for interior navigation, live animals, foreign or legitimate coin. Export duties are charged on quinine and tobacco 2 centauros per kilo.

It is understood that a revision of the tariff is to take place, more in conformity with commercial usages. If this were done the trade would be much larger, and the revenue increased a hundred fold.

Another difficulty is found in the want of an independent line of mail steamers between New York and Carthagena, as it now takes sometimes a month or more to get a letter through to any point on the Magdalena, the time depending entirely on the British Steamers calling at Aspinwall.

A line of steamers is to be put on the Cauca river, as there is already on the Magdalena, and roads are to be opened up the valley of the former. Gold mines of great productiveness exist on the Atlantic coast, and in Antioquia, and cotton is beginning to be planted in large quantities.

Completion of the Atlantic and Great Western Railway to Cleveland.

Last evening—Tuesday, Nov. 3d—was an important era in the history of Cleveland. On that evening the closing link in the broad gauge line of the Atlantic and Great Western Railway was completed; Cleveland and New York were placed in direct and unbroken communication with each other, and for the first time, a train of cars made up on the Long Dock, opposite New York, came through direct to Cleveland. This, we think, is an event of no ordinary importance.

The train consisted of ten freight cars of the A. & G. W., and N. Y. & E. Railways, direct from Jersey City, and the elegant private car of T. W. Kennard, Esq., the general manager of the A. & G. W. Railway. It was drawn by the A. & G. W. locomotive "No. 2, James McHenry," being named after the contractor for the construction of the line. Thus the entire train was broad gauge. The locomotive was one of the first used on the line, and has been in use about three years.

The party who came in on the train comprised several of the leading officers of the road. Mr. T. W. Kennard, the general manager, and the man whose indomitable energy and shrewd management have overcome all obstacles, and succeeded in putting through to success one of the greatest works of the age, in an unprecedentedly short space of time, was on the train, as were Mr. Wm. Reynolds, President of the New York and Pennsylvania Division of the road; Mr. H. F. Sweetser, General Superintendent; Mr. C. W. Bradley, Superintendent of Telegraphs; Mr. J. H. R. Rose, Resident, Engineer; Mr. Frank Cummings, Superintendent of Locomotive and Car Department; Mr. C. Blakeslee, Private Secretary of Mr. Kennard, with Mr. C. L. Rhodes, Superintendent, Cleveland Branch, Mr. J. Dwight Palmer, General Freight Agent, Cleveland Branch, and Mr. R. M. N. Taylor, Manager of the Company's Hotel at Meadville.

The party occupied the private car of Mr. Kennard, a beautiful and convenient car, 48 feet long by 11 feet 3 inches wide, fitted up in the most complete manner. One end is furnished as a parlor, with lounges, centre table, curtained windows, and everything required in a luxurious room. A wide passage way connects this with a bedroom, fitted with four wide beds, marble washstands with waterworks attached, and other conveniences. The other end of the car is occupied by a kitchen, containing a cook stove, table, closets, ice chest, washing arrangements, cooking utensils, &c. In fact, this car is an elegant little dwelling house with everything needful for traveling a week or more if necessary. In this car Mr. Kennard travels on an average more than twelve hundred miles a week, overseeing the great amount of work constantly going on all over the line.

The train ran very smoothly, being as even in running as an old road, although the rails had never before been run on. On arriving at the shops, the train was run down over the new track to the new depot at the junction with the Cleveland and Toledo, and Cleveland, Columbus and Cincinnati Railroads. When the train stopped the locomotive set up a loud and continuous scream, which heralded the completion of the great enterprise.

The ten freight cars will to-day be run over a new freight track to Sholl's Slaughter House, and will there be loaded up. This afternoon they will start, loaded, and will be sent clear through without transhipment or detention, to Jersey City, being the first freight ever sent through without breaking bulk. That will be one of the most important trains that ever left this city.

The road, as we have heretofore noticed, is laid with the broad gauge rails outside or "straddling" the Mahoning track. This makes the running unusually safe, as the extra rails act as "guard rails" preventing either the broad or narrow gauge cars getting off the track. This plan, however, made the matter of frogs and switches a very difficult affair to manage, but the difficulty has been overcome by switches and frogs of ingenious yet simple pattern. In getting over this difficulty Mr. Kennard was greatly assisted by the practical knowledge and ingenuity of Frank W. Cummings, the Superintendent of Locomotive and Car Department.

It is a proof of the admirable arrangements and good calculation in respect to this matter, that the train ran the entire length of the road without the slightest difficulty at any of the switches.

The new depot of the A. & G. W. Railway at the junction with the Southern and Western roads, is nearly completed, and will be ready for opening in a week or two at farthest. The building is tastefully made, and conveniently arranged. The length of the building is 160 feet. It will contain the offices of the company at this place, and a fine refreshment room, where passengers changing to or from the Southern and Western roads will get their meals.

The regular trains between Cleveland and New York will not be run until the 16th inst., when the regular Winter time table goes into effect on all the railroads. Trains will then be made up on the broad gauge line to run direct between Cleveland and New York, starting from here at the same time with the other Eastern lines, and arriving in New York at the same time. Between Cleveland and Leavittsburgh the broad gauge passenger trains will run without stopping, the local business being done by narrow gauge trains.

The road will be formally opened on the 18th inst. A train of A. & G. W. cars will leave New York on the 17th inst., with a party of invited guests, arriving at Meadville in time to lunch on the 18th. At that place they will be met by a broad gauge train from Cleveland, filled with invited guests, who will also lunch at Meadville. The two trains will be united, and will come to Cleveland in the evening, in time for a grand dinner at the Angier House, followed by a ball.—*Cleveland Herald.*

Salvage Services Rendered in Harbors.—Steam Tugs.

VESSELS IN DANGER FROM ICE, DUTY OF STEAM TUGS TOWARDS SUCH VESSELS. THE LAW OF SALVAGE, FOR SERVICES RENDERED TO VESSELS IN DISTRESS AT SEA, INAPPLICABLE TO VESSELS IN HARBORS SO FAR AS CONCERNS TOW BOATS.

This was a libel filed in the United States District Court by the owners of the steam tug C. P. Smith, to recover a salvage compensation for services rendered to a schooner in the Harbor of New York. The libellants alleged that the schooner with a cargo of molasses on board, was lying at anchor in the North River, surrounded by heavy ice, by reason of which she was in great danger, and those on board of her hailed the steam tug, and agreed to give $1000 to be towed to a place of safety, which the tug succeeded in doing, sufferring great damage herself in the service, and they claimed to recover the sum of $1,000.

It was proved that the tug had been employed in towing other vessels which were near the El Dorado, on that morning; that she was engaged in the service only a few hours, and that the captain of the schooner was not on board, but the mate was, who, as the claimants alleged, could not make any binding agreement in the premises; that the customary compensation to tugs for aid of that description was $20 an hour, and no case was shown where more than $350 had been paid.

Upon this state of facts the U. S. Supreme Court now decides that:

Meritorious services rendered by a steam tug in harbors, in saving a vessel beset with ice, cannot be placed on a basis of salvage services in their proper acceptation. A branch of the employment of steam tugs, during the season of ice, is to aid vessels in moving their positions to all parts of the harbor.

A steam tug aiding a vessel thus beset, is not regarded in the character of a volunteer governed by impulses of humanity, leaving her own pursuits and devoting herself to the rescue of another, with no view to compensation, but upon the final success of her efforts. Her services stand essentially on different grounds. They impose no unauthorized or wrongful risks upon their owners. They may have a reward whether needed or not, and will not necessarily loose it because the services undertaken by them fail of being accomplished. They differ from salvors because they pursue and solicit the employment, and hold themselves prepared to fulfil a call to it, whenever made. They act notoriously as tow vessels; as such, bargains made by them to render, for a compensation, services which otherwise might be salvage services, will be upheld, unless the case is clear that the bargain is a means of coercing an exhorbitant price. In such case the court will not permit the fears or weakness or ignorance of a party to be made the occasion inequitable exactions from him.

The following opinion was rendered by the United States District Court at the decision of the case:

BETTS, J.—The recovery in the case cannot be justly placed on the basis of salvage services, in their proper acceptation in law, nor on the footing of a specific bargain by the person in command of the schooner, to pay $1000 for the towage undertaken to be performed on the part of the libellant.

The libellant's tug was employed in the towage business in the harbor, and out to and in return from the sea; and an essential branch of the employment of steam tugs on those grounds, during the season of ice, is to aid vessels in moving their positions to all parts of the Harbor, and from pier to pier along the docks on each face of the city.

The customary rate of compensation to these tugs, for aid of that description, is $20 per hour for the time they are engaged with a vessel and in going to her. The renumeration is enhanced in cases of great peril or extraordinary exertions, but no case was proved on the trial in which more than $350 had been received for this class of services rendered within the harbor.

Boats are built and equipped for this special business, and kept engaged in it at all periods of the year. The use of this kind of craft has grown to be one of the necessities of commerce and navigation in this port, and the demand for their services has brought into use a numerous flotilla of steamtugs, who, like the pilots, are always to be had to give vessels the advantages of their capacities, in every reason and under every circumstance in which they can be employed. The constancy of the demand guarantees also, in the average, a remunerative reward for the services they render, if it is not absolutely assured them in each individual case.

It has not as yet been attempted to measure that reward by an absolute scale of charges, it being probably found that the competition in business and the mutual interest of employers and employees will secure to this branch of industry an adequate compensation, and still restrain its exactions within reasonable limits.

A change so fundamental in inter-territorial and coast navigation, since the foundation of the principles of maratime jurisprudence, renders those rules defining the relation of helping vessels to those relieved by them in distress, in a great degree inapplicable. The new condition of things introduced by this modern agency, created for the convenience and relief of vessels, either found in want of assistance, or in apprehension of needing it, no longer places the relieving vessel in the character of a volunteer, governed by impulses of humanity, leaving her own pursuits, and devoting herself to the rescue of another in peril, with no view to compensation but upon the final success of her efforts, attended with the hazard of sacrificing herself or her voyage in the adventure.

The courts apply their powers earnestly to encourage and stimulate salvage services of that grade, by payments for them, not restricted to the amount of benefit actually conferred, but measured also with a view to the meritorious motive of the acts, and consideration of public policy.

Steam tugs stand essentially on different grounds. They impose no unauthorized or wrongful risks upon their owners. They may have a reward, whether needed or not, and will not necessarily lose it because the services undertaken by them fails of being accomplished; and what differs vitally their aid, from that of vessels casually coming upon one in distress, is, that the steam tugs pursue and solicit the employment, or hold themselves prepared to fulfill a call to it whenever made.

Those considerations no way detract from their claim to an adequate recompense, nor impair the importance of their services to the interests and safety of navigation; but they demonstrate that the new relationship with other vessels, introduced by the establishment of this class of vessels, no longer entitles them to claim the character of salvors in most instances where it might, by maritime courts, be readily attributed to vessels not devoted to this special pursuit, having become a kind of public calling.

They act notoriously as tow vessels. They seek that business, and undertake to assist vessels in that manner. When no other than towage service is performed, there can be no propriety, in respect to that craft, in characterizing and rendering it as a salvage. The courts possess ample authority to adapt the recompense for towage in extraordinary cases, to their exigencies, or it may, when not restrained by positive law, augment the ordinary amount of pilotage to meet the difficulties and merits of the service, without exalting it to a salvage compensation.

Parties, moreover, are free to bargain for themselves, and their agreements will be regarded as fair indicia of what might properly be claimed, when the case is clear of all overreaching or misapprehension, and will, as a common practice, decree in conformity with the agreement.

But they will not allow their powers to be used as a means of coercing the fulfillment of exhorbitant or unconscionable bargains, however they

may have been obtained. The court will be governed by the fact in proof, with a disposition always to uphold the agreement of parties, but with inflexible resolution not to permit the fears or weakness, or ignorance of a party to be made the occasion of inequitable exactions from him.

I do not go over, on this occasion, the evidence in the cause; but I am satisfied from it, that the demand of $1000 for the services rendered, whether placed upon the agreement of the master of the schooner or on the worth of the service, is unreasonably beyond what ought to be awarded the tug.

When the views of the court are fully expressed, it may be proper to notice the particulars of the transaction, and the reasons conducing to the adoption of the sum now decreed the libellant, differing so widely as it does from what the libellant contends he has proved a positive contract to pay him, and that which the claimants suppose they establish to be a full recompense for the service.

The decree will be, that the libellant recover against the schooner, her tackle, &c., (in this cause) $350, and his taxed costs. And it is further ordered, that the arrest and attachment of the cargo, on board the said schooner be discharged, with costs to the claimants to be taxed against the libellant.

Decree accordingly.

Improvement in Railway Cars.

Col. E. Miller, of Janesville, Wisconsin, after several years' study of the subject, has invented a method of saving the lives of railway passengers, in cases where the cars are liable to run into each other owing to the sudden concussion of a train. His invention consists in a new kind of coupling, and a change in the construction of the platforms. As now constructed, the line of draft, the "drawbar," and the line of resistance, "the bumpers," are placed below the line of the sills of the body of the cars, and in cases of collision the breaking of one or both of the platforms causes the elevation of one car above the other, which by its momentum is driven back into the other car with terrible force, crushing everything before it. By his invention new platforms are provided, which also constitute the bumper, entirely dispensing with the present bumper and bumper box, and the line of resistance is in line with the sills of the car body, and the crushing and destructive consequences which follow when the point of resistance is below the line of the sills, is obviated. The difference is aptly illustrated by attempting to drive a bound nail that is bent to an angle of about 15 or 20 degrees—the nail is crushed or broken under the blow of the hammer—whereas the straight nail, struck with the same or immensely greater force, remains perfect.

We have received a note from J. W. Conant, Esq., C. E., of Chicago, which has brought the subject to our attention, and he recommends it to public favor. He says, (after seeing the plans and models,) the platform cannot be broken from the car while the frame work of the car body holds together. The train cannot "telescope," and all the alterations can be readily made without changing any part of a car but the platform and couplings, the latter being as we understand, automatic in principle. Their appearance is also artistic and pleasing.

Railroad Improvement.

The railroads terminating in Philadelphia are exhibiting unusual activity in improving their public works. The Pennsylvania Railroad Company, who are having the old shops at West Philadelphia removed to give place to the Union Depot of the Philadelphia, Wilmington and Baltimore, Reading Railroad and the Pennsylvania Railroad, are now constructing new car shops at the Powelton Fair Grounds which will be second to none in the State. The main shop will be in the form of an L and will comprise, besides the car shop proper, an engine room, boiler room and a blacksmith shop. The dimensions will be 281 feet in length by 246 in width. At the lower end will be the paint shop, 133 feet long and 62 feet wide. These shops face the east, and will front on Bridgewater street. At the rear or west side there will be a long building, 242 feet long and 52 feet wide. This will be used for the office of the superintendent of the shop.

Boston Locomotive Works.

The Boston Locomotive Works were sold at auction on the 5th inst., by order of the Judge of the Court of Insolvency, the real estate fronting 160 feet on Harrison avenue and known as the Boston Locomotive Works. The estate extends back some 1100 feet of the Commissioners' line, and covers an area of about 162,000 feet, of which about 72,000 feet is solid made land, and the remainder flats. The buildings, included in the estate comprise a two story brick machine shop 302x65 feet, attached to which is a two story slated shop 100x44 feet. At the easterly end of this range, and connected therewith, are a two story brick building 38 feet square, a wooden building 88x32 feet, with slated roof, and a commodious two story brick counting house with two large fire proof vaults, together with a wooden stable and other wooden buildings for storage &c. The whole property was sold together to Edward Mott Robinson, Esq., for $71,000.

A Splendid Railroad Bridge.

The railroad bridge which is to be erected over the Ohio at Steubenville will be one of the most substantial structures in the country. The bridge will be entirely of iron. It will consist of eight spans—four of 225 feet, three of 210 feet, and one of 320 feet, making a total length of 1,890 feet. The channel span, which is the longest, will have an elevation of 90 feet above the water. The width of the bridge from edge to edge will be 16 feet 6 inches, while the height from the masonry to the top will be 23 feet. It is estimated that the weight of the bridge will be one ton and a half per foot, making an aggregate weight of 2,835 tons, or 5,670,000 pounds. The contractors are Messrs. Piper & Shiffler of Pittsburg, who are pushing the work forward as rapidly as possible. The work of erection will be commenced about the last of this month, and it is expected that the first span will be completed during the present season.

Troy Union Railroad.

At an election for directors of the Troy Union Railroad Company, recently held, the following gentlemen were chosen:

Directors—D. Thomas Vail, John L. Thomspon, Jonas C. Heartt. C. L. Tracy, Elias Plum, J. M. Warren, Geo. B. Warren, John A. Griswold, Geo. H. Cramer, Daniel Robinson, Jared S. Weed, J. H. Willard, W. L. Van Alstyne, Mayor, *ex-officio*.

Pittsburg, Maysville and Cincinnati R. R.

This company recently made application to the Cincinnati Common Council for the privilege of entrance for their track into the city and passage through to Central avenue and the river. We learn that they are now engaged in surveying a line from Hunt street across the mouth of the old tunnel through a gorge in Longworth's Garden of Eden; thence in nearly a straight line across the Madisonville turnpike to Duck Creek Valley. The line contemplated strikes through several of the river counties in Piketon, and thence on nearly an air line to Steubenville. The distance, it is claimed, by this route and the Panhandle Road to Pittsburg, is two hundred and eighty two miles. The project derives importance from the connection of the company with the coal trade, and the future supply of coal for the city. The friends of the company claim the necessity of an independent entrance on account of the overcrowded condition of existing routes, and that its passage from Hunt street down through the streets in the heart of the city to the river, will be of sufficient advantage to Cincinnati to warrant the granting of the facilities required.

Marietta and Cincinnati Railroad.

The receipts of this road for the three months ending Sept. 30, 1863, (being the first quarter of the present fiscal year), have been as follows:

From passengers	$92,597 44
" freight	84,547 94
" mail	5,234 37
" express	2,444 75
" telegraph	3,706 18
	$188,530 68

And the expenditures were:

Locomotive running	$14,775 28	
Locomotive repairs	7,404 94	
Repairs of passenger and baggage cars	1,357 30	
Repairs freight cars	4,209 48	
Repairs construction cars	275 49	
Repairs of roadway	15,170 26	
Stations, rents, repairs	1,107 79	
Traffic expenses	25,793 72	
Telegraph expenses	2,451 27	
General expenses	5,974 89	
		78,520 18
Balance, being net earnings		$110,010 50

Atlantic and Great Western Gas Works.

The Atlantic and Great Western Railway Company are about erecting a new gas works for the purpose of supplying their new depot and grounds at Cleveland with gas. The excavation for the gasometer has already commenced. The building will occupy a plot of ground of 150 feet, lying in the S. W. angle formed by the crossing of the C., C. & C., and C. & M. tracks. The work will be pushed through with the energy that characterizes all of Mr. Kennard's enterprises. The works are under the management of Mr. S. Stein.

☞ It is expected that the track will be laid and the cars running by the middle of this month on the road connecting the Indianapolis and Jeffersonville and the Louisville, New-Albany and Chicago Railroads. The work on the connection between the Louisville and Frankfort and the Louisville and Nashville Railroads is nearly completed, and it is expected that the cars will be running upon the road this week. The project of connecting the Louisville and Nashville and the Louisville, New Albany and Chicago Railroads, by a branch from Louisville to Portland, has, we learn, been abandoned.—*Cincinnati Gazette.*

The Public Debt.

The following is the latest statement made of the public debt. The average rate of interest on the whole debt is less than that paid by the British or French Governments, and shows clearly the estimation in which our public securities are held.

Public Debt of the United States, and Annual Rate and Amount of Interest thereon.

	September, 1863. Principal.	Rate of Interest.	Amount of Interest.
Old public debt	$67,281,591	5½	$3,700,487
Three year 7 3-10 bonds	139,996,950	7.30	10,219,777
Two year bonds	276,200	6	16,572
Twenty year bonds (1881)	50,000,000	6	3,000,000
Five twenty bonds	256,089,231	6	15,365,535
Certificates of indebtedness	158,436,437	6	9,506,186
Oregon war debt	450,870	6	27,052
Temporary loans	100,000,000	5	5,000,000
	$772,531,285		$46,835,610
United States notes	595,924,360		
Fractional currency	18,652,856		
Treasury notes past due	41,600		
Suspended requisit'ns, etc.	41,682,670		
Aggregate	$1,228,832,771		$46,835,610

Average rate of interest 3.81 per cent. on the whole debt.

Average rate of interest on funded debt alone 6.06 per cent.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Oct. 30, 1863, was as follows:

Passengers	$22,302 90
Freight and live stock	39,705 68
Mails and sundries	2,250 33
Total	$64,258 91
Corresponding week of 1862	63,222 71
Increase	$1,036 20

The earnings of the Grand Trunk Railway for the week ending October 24, 1863, were:

Passengers	$30,102 68
Freight and live stock	57,918 82
Mails and sundries	2,800 00
Total	$90,821 50
Corresponding week, 1862	96,655 50
Decrease	$5,834 00

The earnings of the Chicago and Rock Island Railroad for the 1st week of November, 1863, were $45,755 00

Do., 1862	41,584 00
Increase	$4,171 00

The earnings of the Cleveland and Toledo Railroad for the 1st week of November, 1863, were $32,829 00

Same week, 1862	25,779 00
Increase	$7,050 00

The earnings of the Dubuque and Sioux City City Railroad Company for the 4th week in Oct., 1863, have been $9,524 48

Same week, 1862	7,016 01
Increase	$2,508 47

The approximate earnings of the Marietta and Cincinnati Railroad, in the 4th week of October, 1863, were $30,478 68

Do., 1862	25,062 68
Increase	$5,416 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 4th week in Oct. have been $63,003 63

Same week, 1862	51,350 87
Increase	$11,652 76

American Railroad Journal.

Saturday, November 14, 1863.

Stock Exchange and Money Market.

There has been an extraordinary state of things in the New York Money Market the last week. It is stated in a daily paper, whose money articles are inspired by a powerful interest in the street and are written somewhat in hostility to the Government, that some of our City Banks were a few days since unable to honor the checks of their customers drawn against actual balances. In other words, the institutions referred to have made a double stoppage, first on specie, and next on legal tenders. One would think in this day of paper money, there could be but little difficulty in paying a check in some sort of funds. A sale of some of the specie on hand at 46, would have been the policy of conscientious debtors, but as Corporations are understood to have no souls, of course they cannot have much conscience.

The cause of this predicament in which they

found themselves, is said to be easy of explanation. If any individual holds the money of another, and when called on for payment is unable to respond, it is usually considered a failure. If the money called for was left for safe keeping, the refusal to return it is considered a breach of trust. If these institutions have any excuse it must in the admission of over trading, viz., lending not only their own money but that of their customers, on securities not instantly available. And this has undoubtedly been done to a class of persons in particular on a large scale; those who are engaged in stock speculations, and whose operations are founded on the feeling of the moment, on rumors of battles, foreign complications, domestic difficulties and private understandings with the managers of companies.

Fortunes of mushroom growth are particularly sought for at the present day. To be a fool for luck, is thought better than to earn bread by the sweat of the brow. Of this class of adventurers the Banks have been special friends. A small business note with them is an impertinence; but a loan on Harlem or Erie, or Southern is irresistible. We therefore impute the late and present scarcity of currency to illegitimate banking, and this is sure to break in the end, all those institutions who lend money on property that may depreciate in an hour 20 or 30 per cent. from a momentary advance. If this condition of things continues for a week or two longer, it must carry down many houses if not the Banks themselves. When such a stock as the Harlem is held as good security, which pays no dividends, and is intrinsically worth not half of what it is selling for, and the price is kept up by combinations of a purely speculative character, it is evident the advance is wholly unjustifiable, loans upon it with almost any margin are unsafe, and it would be contrary to reason and experience, if it could long maintain its inflated reputation. This instance is cited, because it has been of previous occurrence, years ago, with disastrous results to those who then played with its fire.

We do not consider the Government in any way responsible for the condition of the money market at this moment. Its disbursements are large and frequent. The amount of currency is on the increase, and must be while the war lasts. Money ought to be easy, and it is so with all who have anything substantial or valuable to dispose of. The community at large do not care a jot whether a railroad security sells at 100 or 150, for they have nothing to gain or to lose by the fluctuation. But they have an immediate and direct interest in the stability of the public funds, for these are the strength of the Government, and we see they stand firmly amidst all these derangements. We look upon the present flurry, therefore, as being but a transient disturbance, which may upset the light ballasted craft that have ventured too far from shore, but is powerless against the ship of state. We hope the Banks will take a more conservative course hereafter, and we warn them against engaging through their friends or officers in any operations which endanger their capital, change the character of their business, or cause them to suspend on their engagements.

Gold stands where it did about this period the last year. There has been no doubt a real demand for it, owing to the extent of our importations. These keep up enormously. Any one who was at the late fete in honor of the Russians, must have perceived the extravagance of costume and ornament which are now the rage. It would be the part of prudence to curtail expenditure in these directions. We are dealing with nations who practically clog our commerce with hindrances, and will have gold rather than our products. If any one will look over the accounts of sales which are rendered to American shippers to the port of Liverpool, they will see that beyond the real duties, there are nearly a dozen other charges made up of Town dues, dock dues, carriage, examinations and charges of a similar nature on which all such British ports thrive to our loss. A barrel of flour whose price is fixed in the market there, has not only to pay the revenue charge or duty, but eight or ten more, such as we are not known in the port of New York. Nothing but an actual scarcity abroad, can enable our shippers to realise any decent profit on our cereals or our other products and staples.

We perceive that supplies of cotton are on the increase at New Orleans, and should Alabama through the occupation of Mobile, and a feeling of security, send its cotton abroad, it is the only staple on which we might count upon a profit, and a fall of exchange. It is a curious circumstance not to be overlooked in any notice of the money market, that legal tender notes bore during last week ¼ per cent. premium. It is the opinion of many persons that the three hundred and fifty millions now issued, are entirely inadequate to the business wants of the country. It is thought that a large amount of these is hoarded, and thus withdrawn from from circulation, and that this has happened to a considerable extent even in the confederacy. If so, the necessity of a further issue of treasury notes will be unavoidable. The City Banks however, are represented to hold about twenty four millions of this tender currency, and twenty eight millions of gold, the latter being of no possible use to them at present, but in fact assisting the high price of it in the street.

It is in agitation to establish a system of Home leagues throughout the loyal states, for the purpose of discouraging the purchase of all foreign articles of *luxe* until the war is over. Some very influential parties are seriously entertaining the idea, believing that it is absolutely necessary to secure a safe return to specie payments, and to check the price of gold. It is said it is favorably received by a large body of capitalists, ship owners and manufacturers. It is certain we could do with much less of foreign finery, and costly goods, than are now sought for and disposed of in the loyal states. Every article of real necessity can be had of American manufacture. On the other hand, this system would deprive the Government of much of its customs revenue, unless it was made up in the income from increased sales of our domestic manufactures under the Internal revenue act.

In conclusion we have to remark that the opinions of the commercial press of this city seem to be harmonious as to the cause of the recent scarcity of money, attributing it chiefly to the mismanagement of the Banks in the way we have already stated.

J. H. Taylor, Esq., late with Messrs. Francis T. Walker & Bro., has established himself in the Stock Exchange business at 34 Pine street.

Messrs. Edward Taylor and Q. C. DeGrove have commenced business as Stock and Exchange Brokers at No. 53 Beaver street, under the firm of Tayor & De Grove.

Mr. L. G. Quigley, of the Stock Exchange, and late with Messrs. Lockwood & Co., and Mr. J. O. Quigley, late with Messrs. A. W. Greenleaf & Co., have formed a Stock Commission firm at No. 19 Broad street, under the style of Quigley Brothers.

Mr. John Bonner, for five years past in charge of the commercial and financial column of the New York *Herald*, has resigned his position on the Press for Stock Exchange business, in which he has established himself at No. 53 Exchange place.

By telegraph from San Francisco, to Ross, Dempster & Co., dated the 10th inst., silver mining stocks were quoted: Ophir, $1,500 per foot last sales; Gould & Curry, $4,650 per foot last sales; Savage, $2,800 per foot last sales; Potosi, $1,500 per foot last sales; Yellow Jacket, $940 per foot last sales; Overman, $480 asked, $310 offered; Sierra Nevada, $90 asked; Crown Point, $1,000 asked, $800 offered; California, $1,200 asked, $900 offered; Central $2,100 asked; Best & Belcher, $660 asked, $500 offered; Grass Valley, $75. In consequence of Ophir declaring a dividend of $24 per foot for October, instead of $48, and Gould & Curry $100, instead of $150, as heretofore, and lenders increasing their margins, has caused large amounts of mining stocks to change hands.

The Grand street and Newtown Railroad Company will pay, 14th instant, a semi-annual dividend of 4 per cent.

The Pennsylvania Railroad Company have declared a semi-annual dividend of five per cent. on the capital stock of the company, clear of National and State taxes, payable on and after November 16, 1863.

The Pacific Mail Steamship Company have declared a dividend of five per cent. out of the net earnings of the last three months, payable at the office of the company on the 11th inst.

R., 18½@18¾.

Cleveland and Mahoning Railroad.

The Cleveland and Mahoning Railroad has passed into the hands of the Atlantic and Great Western Railroad Company, and will hereafter be controlled by it, and run as a branch of that road. The name has been shortened, and it is now known as the Mahoning Railroad, thus preserving a distinctive designation and character. The management will still be in the hands of Mr. C. L. Rhodes, the former superintendent, who takes the title of general manager, and the conductors and working force of the road will remain without change. Under the new arrangement, a train of both broad and narrow cars will be made up at Cleveland and drawn by one engine to Leavittsburg, where the broad cars will be switched off on the Atlantic and Great Western road, to go on to New York, and the remainder of the train run on to Youngstown. This will be done with both passenger and freight cars, going both ways. The new passenger depot of the road at Cleveland is nearly completed. It is located just below where the Mahoning road now crosses the Cleveland Columbus and Cincinnati and Cleveland and Toledo tracks, and direct connection will be made with both these roads, their tracks running on one side of the new building and the Mahoning on the other. The Atlantic and Great Western managers expect to complete their line to Cincinnati in January, and thus to perfect the broad gauge connection by way of the Erie, Atlantic and Great Western, and Ohio and Mississippi railroads between New York and St. Louis.

Atlantic and Great Western Railway.

The first through train from New York reached Cleveland on the 3d inst., via the Erie, Atlantic and Great Western and Cleveland and Mahoning roads. We learn from the Cleveland *Herald* that extensive preparations are being made by the citizens of that place for the formal opening of the line on the 18th inst. For this purpose a large meeting of business men was recently held at the Angier House, in that city. The meeting was organized by appointing J. F. Warner, Esq., Chairman and A. Townsend, Esq., and C. Blakesley, Esq., Secretaries. The immense influence the opening of the broad gauge line to Cleveland is destined to have on the prosperity of that city was commented on, and it was agreed that the opening of the road should not be passed over without the citizens making their sense of the importance of the occasion.

The Chairman was directed to appoint a Committee of twenty-five, whose duty it should be to make arrangements for a suitable reception to be given to the first excursion train which will arrive there on the 18th inst., with the invited guests on board. It was also directed that invitations be issued to the Governors of Ohio, New York, New Jersey, Pennsylvania, Indiana, Michigan, Illinois and Missouri—those being the States directly interested in the broad gauge line—and that they be requested to attend the celebration in that city.

Important to Railway Travelers.

A decision upon the law of common carriers has just been decided in the United States Circuit Court, before Judge Nelson, in the suit of William Grosvenor *vs.* the New Jersey Railroad and Transportation Co. The suit was brought to recover $10,000 damages. The case has been tried twice before the same court, the jury disagreeing. Plaintiff with a party of friends, left in defendants' cars for Newark, in September, 1860, in the ten P. M. train. He, with one friend, got out of the car at Centre street station, when he was informed by his friends in the car that he was to go to the next station. His friends succeeded in getting on the train; but plaintiff, in attempting the same while the car was in motion, was thrown to the ground, and his ankle injured, probably for life. The evidence was conflicting, plaintiff's witnesses swearing that the cars did not stop at all at Centre street station, while defendants' witnesses all testify the cars did stop and that some fifty to seventy-five passengers there got out. The former also swore that only "Newark" station was called out, the latter that "Centre street" station was announced by the conductor.

Plaintiff's counsel maintained, first, that the company is chargeable with extreme care; second, that the passengers are chargeable only with ordinary care, and drew from the evidence the conclusion that the company was liable.

The counsel for the defendants insisted, first, that if the plaintiff contributed in any way to the accident he could not recover, even if the company was careless; second, that the evidence showed that the company was not careless, but that the plaintiff was, in attempting to get on the car after it was in motion.

The Judge, in charging the jury, repeated the points of defendants' counsel, and left to the jury the question of fact—did plaintiff attempt to get on while the car was in motion?

After a few minutes' deliberation the jury brought in a verdict for defendants.

Hannibal and St. Joseph Railroad.

Statement of Earnings for 1862 and 1863 of the Hannibal and St. Joseph Railroad Company:

	1862.	1863.
January	$32,831 13	$74,126 38
February	45,950 85	45,167 40
March	49,724 51	88,096 89
April	51,773 92	125,853 01
May	54,465 35	113,291 54
June	54,897 04	104,173 82
July	54,408 09	89,045 65
August	67,005 68	98,392 92
September	70,702 18	133,728 38
Total	$481,758 75	$870,875 99
Increase		$389,117 24

The largely increased earnings insure the prompt payment, at maturity, of the coupons on the new bonds of the Company, issued in exchange for the old bonds retired, and warrant the expectation of a dividend on the preferred stock at an early day.

North Pennsylvania Railroad.

The following is an extract from the minutes of a meeting of the Board of Managers of the Delaware, Lackawanna and Western Railroad Company, held Oct. 30:

Resolved, That this Board regard the proposed extension of the North Pennsylvania Railroad by the Lehigh and Delaware Water Gap Railroad Company to Easton, and thence (which in their judgment would soon follow) to a connection with the railroad of this Company, as a valuable public improvement, opening as it would the most direct communication between the City of Philadelphia and the Lackawanna and Wyoming Valleys, and Northern and Western New York and the Canadas.

West Philadelphia Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: John S. Morton, John F. Gross, Daniel Stone, Herman J. Lombaert, John C. Davis, Samuel Baugh, Joseph Warner Johnson, Benjamin Griffith, William M. Wright. John S. Morton was subsequently elected president of the board.

Total Assets, June 2nd, 1863, less Losses adjusted and paid, $2,008,651 03.

LOSSES PAID IN GOLD
Upon RISKS on which the PREMIUM is paid in like Currency

DEALERS with this Company will be allowed the option (to be signified at the time of application for insurance) of receiving in lieu of scrip, at the end of each year, Returns in Cash, of premiums paid and earned during the year, upon all new risks under the New York form of policy, as follows:

1st. Upon every OPEN policy (CARGO RISKS) upon which there shall have been earned and paid $300 and upwards, a return of TWENTY PER CENT.
2d. Upon other voyage risks upon CARGO and FREIGHT, a return of FIFTEEN PER CENT.
3d. Upon TIME risks upon HULLS and FREIGHT, a return of TEN PER CENT.

Such privilege, however, being confined to persons and firms, the aggregate of whose premiums upon such policies earned and paid during the year shall amount to the sum of One Hundred Dollars.

B. C. MORRIS, President.
THOS. LORD, Vice-President.
WM. M. WHITNEY, 2d Vice-Pres't & Sec'y.

ALEXANDER'S
ROOFING CEMENT-PAINT
FOR
Railway & Steamboat Co's,
BUILDERS and BUILDINGS generally.

THIS PAINT is warranted not to **Crack** or **Scale** either on **Wood, Iron, Tin,** or **Canvass.**
The ingredients in its composition are **all** of a preserving and protective nature. This Paint is now extensively used by Railway Companies and pronounced much **cheaper,** more **durable** and satisfactory than what was previously used. It is 2.5ths heavier in body than any other Paint.
Give this Paint a trial, and if not found as represented no charge will be made for it.
Send for descriptive circular and references.

NEW YORK.

BOURNE'S CATECHISM OF THE
STEAM ENGINE.

D. APPLETON & CO., Nos. 443 and 445 Broadway,
PUBLISH THIS DAY

A CATECHISM OF THE
STEAM ENGINE,
ITS VARIOUS APPLICATIONS TO
MINES, MILLS, STEAM NAVIGATION, RAILWAYS AND AGRICULTURE,
WITH PRACTICAL INSTRUCTIONS
FOR THE
MANUFACTURE AND MANAGEMENT OF ENGINES OF EVERY CLASS.
By JOHN BOURNE, C. E.
New and Revised Edition.
1 vol. 12mo., Illustrated. Cloth, **$2.00.**

In offering to the American public a reprint of a work on the Steam Engine so deservedly successful, and so long considered standard, the Publishers have not thought it necessary that it should be an exact copy of the English edition. There were some details in which they thought it could be improved and better adapted to the use of American Engineers. On this account the size of the page has been increased to a full 12mo, to admit of larger illustrations, which, in the English edition, are often on too small a scale, and some of the illustrations themselves have been supplied by others equally applicable, more recent and to us more familiar examples. The first part of Chapter XI., devoted in the English edition to English portable and fixed agricultural engines, in this edition gives place entirely to illustrations from American practice, of steam engines as applied to different purposes, and of appliances and machines necessary to them. But with the exception of some of the illustrations and the description of them, and the correction of a few typographical errors, this edition is a faithful transcript of the latest English edition.

D. A. & CO. HAVE JUST PUBLISHED:

APPLETON'S UNITED STATES POSTAL GUIDE.—Containing the Chief Regulations of the Post-office, and a Complete List of Post-offices throughout the United States. Price, 25 cents.

THE NEW CLASS-BOOK OF CHEMISTRY.—By EDWARD L. YOUMANS, M. D. 460 pages, 12mo, with 320 illustrations. Price $1 25.

HEAT CONSIDERED AS A MODE OF MOTION.—Being a Course of Twelve Lectures, delivered at the Royal Institution of Great Britain. By JOHN TYNDALL, F. R. S. 1 thick vol., 12mo. 101 Illustrations. $2.

A SUPPLEMENT TO URE'S DICTIONARY OF ARTS, MANUFACTURES AND MINES. Containing a Clear Exposition of their Principles and Practice. Edited by ROBERT HUNT, F. R. S., F. L. S., etc. 1 very large 8vo vol., 1,096 pages. Illustrated with 700 Engravings. Cloth, $6; Sheep binding, $7.

WHAT TO EAT AND HOW TO COOK IT Containing 1,000 Receipts. By PIERCE BLOT. 1 vol. 12mo. $1.

THE NATURAL LAWS OF HUSBANDRY. By JUSTUS VON LIEBIG. Edited by JOHN BLYTH. 1 vol. 12mo. $1.50.

☞ Either of the above sent by mail, free of postage, on receipt of price.

KRUPP'S PATENT CAST STEEL

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enameled Iron Water Pipe, Steel Tubes, etc., etc.

They have received the highest approval from all RAILWAY COMPANIES that have them in service

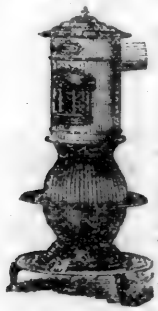
THOMAS PROSSER & SON,

28 PLATT ST., NEW YORK.

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one half the fuel in winter. For Circular, with references address the PATENT METALLIC WEATHER STRIP CO. 312 Broadway, corner of Fulton st.

Local Agents wanted everywhere. 6m41



RAILROAD, SHIP, BOAT AND BRIDGE SPIKES,

MANUFACTURED BY THE

NEWARK SPIKE CO.,

Newark Avenue,

NEWARK, N. J.

SANFORD'S

MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York.

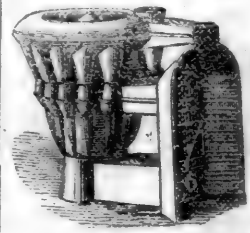
OFFICE OF THE NEW YORK CENTRAL RAILROAD CO., ALBANY, November 2, 1863.

THE annual election for Directors of this Company, and for three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the second Wednesday (the ninth,) of December next. The poll will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter. By order of the Board of Directors.

ROBERT L. BANKS,

5t45 Secretary.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the LEADING STOVE for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials,

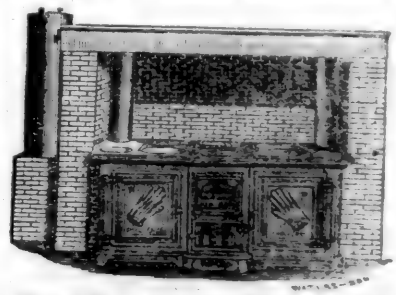
SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

WARNCKE & BROWNELL,

RENOVATORS AND DYERS OF PLUSHES ON CAR SEATS, STEAMBOATS, AND FURNITURE.

WE restore the color to plushes on car seats, steamboats and furniture, without removing the plush from the seat. Colors when put on, as bright and durable as new goods. Time of detention of car two days, or less. Orders for work solicited.



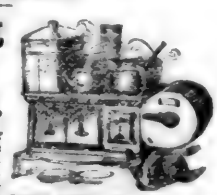
The process being patented, the public are hereby cautioned against infringement.

Territory and shop right for sale. Address

JOHN WARNCKE,

Or M. BROWNELL,

3m33 Box 1157. Buffalo, N. Y.



Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the LARGEST OVENS of any in the market; BAKES PERFECTLY, never failing to brown at the bottom: BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary ECONOMY OF FUEL, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,

239 and 241 Water st., N. Y.

BROWN'S ENGLISH
ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 279 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

PATENT
SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery bones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 51 Beekman st., (up-stairs,) New York.

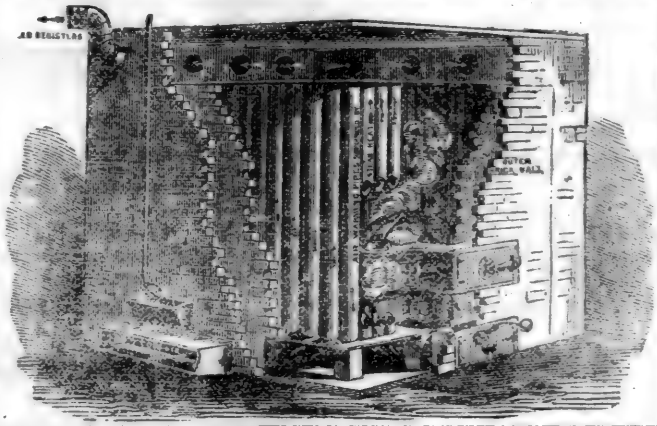
WILLIAMS & PAGE'S PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors, and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

MUNN & CO'S
PATENT OFFICE.
ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,
No. 37 Park Row, New York,
Or corner F and 7th sts., opposite Patent Office, Washington, D. C.
3m35

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown st., PHILADELPHIA**, will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—[Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—[Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—[Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price **$3.** Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

SUBSTITUTE FOR
CAR DUCK.

Kingman's Car Covering.

THIS is a heavy Canvass imbedded in a coat of Elastic Mastic or Paste which is applied directly to the boarding of the top of the car, and then thoroughly painted with three or four coats of paint, thus making a covering VERY MUCH LIKE **CAR DUCK**, but at this time at half the cost. It is now successfully used by many Railroads and Car Builders. Directions and particulars sent when requested. This Mastic and Canvass for sale by

WILLIAMS & PAGE,
67 Water street,
March 1863. **Boston.**

HAMILTON E. TOWLE,
CIVIL AND MECHANICAL ENGINEER
156 BROADWAY, NEW YORK,

AGENT for the SALE and APPLICATION of the celebrated **JAPAN PAINTS** specially adapted to resisting HEAT and the action of the WEATHER on IRON, BRICK and WOOD WORK. Metal ROOFS, etc., painted by contract and guarantied to be tight.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS**, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **31 Nassau st.**, or by addressing

CHAS. W. WELSH,
Secretary.

The Future Population of the United States.

The situation of our country at the period of its settlement was such as to secure for it an energetic population. It was separated by three thousand miles of ocean from the civilization of Europe, and although offering many inducements to emigration, it yielded them, only at the price great perils and hardships. A voyage across the then comparatively unknown waters of the Atlantic, required much enterprise and perseverance as well as courage, on the part of those who would undertake its hazards. Nor was the voyage the only obstacle. The wilderness itself required to be explored, its dangers met and overcome, before an object worthy of the venture could be realized. There was no metropolis to receive adventurers, no state or government to protect them. There was nothing but solitude, wild beasts and Indians. Yet these were the very conditions which have secured for our country many advantages in the character of its inhabitants and its civilization.

Still other and important facts have tended to the same result. In Western Europe were settled the races of mankind who by their Governments and their institutions, by their power and success in the accumulation and production of material wealth, had already proved their immense superiority over the effete nationalites of the East. By these races our hills and valleys have been peopled; and from them we have gleaned those who by their powers of physical endurance, energy and intelligence, have been especially fitted to encounter successfully the dangers and hardships always attendant upon a settlement in a new and undeveloped country. The early settlement of every portion of America furnishes examples of powers of endurance, of mental ability, and of heroism, unsurpassed in the history of any nationality or race of men.

According to the Preliminary Report of the Eighth Census, the aggregate population of the United States is 31,749,281. This includes foreigners, slaves, free colored persons, and Indians. The number of slaves at the taking of the census was 3,953,760; the number of free colored persons was 487,996; the number of Indians was 336,662; the total white population was 29,966,662. To arrive at a just estimate of our present American population, we must deduct from this latter number our foreign population. The Preliminary Census Report gives no definite figures of the number of foreigners residing within the jurisdiction of the United States. It has, however, a complete table of emigration to this country, and from this we may form an approximate estimate of the number and the nationalities of our foreign citizens. The emigration to this country has been as follows:

In the 10	years ending	Sept. 30, 1829..	128,502
In the 10¼	years ending	Dec. 31, 1839..	538,381
In the 9¼	do.	Sept. 30, 1849..	1,427,337
In the 11¼	do.	Dec. 31, 1860..	2,968,194
During the whole forty-one years			5,062,414

The total number arriving from the United Kingdom of Great Britain and Ireland, is stated to be 2,750,874. But a recent statement from British official sources gives the number emigrating to the United States in the years 1815–'60, as 3,048,206. This difference will be explained partly, by hose who emigrated in the interval 1815–'19, before our registry commenced, being about 55,000; and chiefly by the more numerous class who entered the United States by way of Canada. In the same period of forty-six years, it is also stated, that 1,196,521 persons emigrated from the United Kingdom to the British Colonies in North America. A large portion of these are known to have eventually settled in the United States. Thus it is safe to assume that since 1814, about three and a quarter millions of the natives of Great Britain and Ireland, have emigrated to this country.

The migration from Germany is the next in magnitude, amounting to 1,196,521 persons; the next is that of France, amounting to 208,063 persons. Supposing our present foreign population to be five million, or a number just equal to the whole number of emigrants, we would have a white American population of twenty-two million of souls.

It is this American population to which we must look for the development of the resources of our country. An American citizen is an individual as really distinct in personal characteristics as an Englishman, Frenchman, or Russian. Both our nationality and individuality is new and unlike anything in the old world. It is for Americans to work out their own destiny. They constitute two-thirds of the population of the United States. They furnish the brains and the energy which culminates in substantial progress. Foreign emigrants come to our shores to be helped along in the current of our own success. In a few years they all become Americanized; and the dying emigrant leaves to his children but the memory of a fatherland, too far beyond the sea to be anything but faintly remembered.

One of the favorable peculiarities of our popnlation, is the preponderance of males over females. While in the United States there is an excess of about 730,000 males, in more than 31,000,000 of people, the females of the United Kingdom of Great Britain and Ireland outnumber the males some 877,000, in a population of little more than 29,000,000. This is the result of causes already enumerated; and to the large demand of men in the prime of life, for military and naval service, from which our country heretofore has happily been freed. The proportion of our self-sustaining

or producing classes, is thus much larger than that of England.

With regard to the Indians, their story is soon told. There are now but about 300,000 Indians within the limits of the United States. The light of civilization is pressing them closer and closer, and not many years will have elapsed e'er the last Indian will have ceased to exist.

With the African, the census show that free colored persons do not maintain their own numbers; and while colored persons held in slavery increase in numbers, still it is at a rate by no means in proportion with the whites. While the whites from 1850 to 1860 gained 38 per cent., the slaves and free colored increased somewhat less than 22 per cent., and the total increase of the free colored and slaves for 70 years, was but 485 per cent., against 757 per cent. for the whites. The following tables, together with the observations immediately following them, are from the census of 1860; and they exhibit the numbers of the colored race and their rates of increase during the last seventy years, together with the probable future population of the United States:

Census of Slaves and Free Colored.

	Free colored.	Increase per cent.	Slaves.	Increase per cent.	Free colored and slaves.	Increase per cent.
1790	59,466	....	697,897	....	757,363	....
1800	108,395	82.28	893,041	27.97	1,001,436	32.23
1810	186,466	72.00	1,191,364	33.40	1,337,810	37.58
1820	233,524	25.23	1,538,038	28.79	1,771,562	28.58
1830	319,599	36.87	2,009,043	30.61	2,328,642	31.44
1840	386,303	20.87	2,487,455	23.81	2,873,758	23.41
1850	434,449	12.46	3,204,313	28.82	3,638,762	26.62
1860	482,122	10.97	3,953,587	23.38	4,435,709	21.90

"Here the rate of increase will be seen at a glance to have been gradually diminishing, especially during the last thirty years. The greater apparent increase among slaves from 1840 to 1850, is connected with the admission of Texas in 1845. For the future the rate will probably continue to diminish; and to apply unchanged the rate of the last ten years, must give results exceeding rather than falling short of the truth. The following estimates therefore, have been computed on the assumption that the rate of the last ten years 21.9 shall continue twenty years longer, or until 1880, after which the rate is diminished to 20.0 until the close of the present century for the colored population. And to facilitate comparison, the next column exhibits the aggregate of whites, free colored and slaves, based on the well-known and very correct assumption of a mean annual increase of three per cent.:"

Probable Future Population of the United States.

Years.	Free colored and slaves.	Aggregate of whites & color'd.	Per cent. of color'd.
1870	5,407,130	42,328,432	12.77
1880	6,591,292	56,450,241	11.68
1890	7,909,550	77,266,989	10.24
1900	9,491,459	100,355,802	9.46

"Thus according to the best estimates, the total population of the United States, at the close of the present century will be about a hundred millions. All observing persons will perceive that the relative increase of the whites exceeds that of the colored, and that the disparity is gradually becoming more and more favorable to this part of our population. Leaving the issue of the present civil war for a time to determine, it should be observed, if large numbers of slaves shall be hereafter emancipated, so many will be transferred from a faster to a slower rate of increase. In this case, nine millions of the colored, in the year 1900, appears a large estimate. Of these a great portion will be of mixed descent; since in 1850 one-ninth part of the whole colored class were returned as mulatoes. In regard to emigration, the number colonized by the American Colonization Society and its auxiliaries during the past ten years, has averaged about 400 per annum, besides the Africans captured on several slave ships. The total number of colored emigrants sent to Liberia from 1820 to 1856, inclusive, is stated at 9,502, of whom 3,676 were free born."

It is thus evident that the future population of the United States will be homogeneous and American. The weak emigrants, whether merely individuals, or including classes, or nationalities, as in times past, will continue to die out and give place to men of stronger constitution and greater energy. This is a universal law applicable to all forms of existence. In its utterance we are governed by no selfish or interested motive. We acknowledge it as a fact, and ourselves bow to its sway, for it is applicable to ourselves as well as to all others. The badges of peculiar nationalities will all disappear. St. Patrick's day will be forgotten, its very date will have to be fixed by a recurrence to some ancient almanac. German singing clubs will have a brief existence; their lives will be shorter than their chorals.

In the places of all these remnants of institutions which have their origin in the old world, there will be one American nationality, filled with American aspirations, and glorifying in American deeds of valor and renown.

In conclusion, it is hardly necessary for us to draw the attention of the reader to the bearing which these facts have upon the future financial resources of this country. Prosperity is always the reward of intelligence, vigor and industry. And where every one is prosperous, where there are few weak and incompetent individuals, the Treasury of the nation which is but a combination of the individual treasuries of the people, must be proportionably strong.

North Pennsylvania Railroad.

The Town Council of Easton, Penn., at a recent meeting, took up the subject of the extension of the North Pennsylvania Railroad to that place. The following resolutions were passed:

Resolved, 1. That the citizens of Easton earnestly desire that the proposed railroad from Easton to Freemansburg, connecting with the North Pennsylvania Railroad, may be speedily constructed, and an easy and convenient communication be thus opened to Philadelphia.

2. That we regard the proposed connection by this route as a matter of great public interest to the entire community, and that in our opinion the opening of this road will be of great pecuniary advantage not merely to our own citizens, but also to the North Pennsylvania Railroad in largely increased earnings, from passengers and freight, and to the merchants and citizens of Philadelphia by the additional trade which will thus be established with that city.

3. That our present route of travel to and from Philadelphia by way of the Lehigh Valley Road to Bethlehem, is extremely inconvenient, and attended with much delay and annoyance, and the route by way of the Belvidere Delaware Railroad greatly circuitous and more distant and expensive than would be the case upon the completion of the proposed route by way of Freemansburg.

4. That owing to the greatly superior facilities of travel and transportation to and from New York, a large and valuable traffic is now directed to that city which would in our opinion be restored to Philadelphia upon the establishment of a direct communication by way of Freemansburg.

National Mining Company.

We have received the report of the Directors of this company, including reports of Wm. Webb, Agent, and John Chynoweth, Captain of the mine, and abstracts of the books of the treasurer. They embrace the ascertained results of the business of the year ending November 1, 1862, and the subsequent approximate state of the affairs of the company to September 1, 1863. The directors regret that the year 1862 should exhibit so important a decline in the yield of the mine, as compared with the two preceding years; and that the average results of the current year thus far afford no evidence of substantial improvement in this respect, but on the contrary, show a still further decrease. The product in copper prepared for shipment for the first nine months, or say from 1st November, 1862, to 1st August 1863, was 549,798 lbs., or about 30½ tons per month, against an average monthly product for the preceding year of 49½ tons. The mines, however, appear to be improving, the product for the last month exceeding, by 25 per cent., the average yield of the eight preceding months of the year.

The product of the mine in rough copper, prepared for shipment, for the year 1862, was 1,192,100 lbs., or 596 tons, composed of the following descriptions, viz:

	Per cent.	Lbs.
474 masses	40.40	481,638
423 bbls. kiln or barrel work	31.06	370,218
317 " stamp and covert work	28.54	340,244
Total		1,192,100

making an average monthly product of 49½ tons. It will strike attention at once, that the decline in the product of the mine is principally in mass copper, which shows a falling off, compared with 1861, of 364 tons, while the kiln or barrel work is about 60 tons less. The stamp work, on the contrary, for 1862, exceeds that of 1861 about 33 tons.

The comparative per centage of each description of mineral for these two years was as follows, viz:

	Per cent.		Per cent.
Mass copper, 1861	59	1862	40.40
Kiln " "	26¼	"	31.06
Stamp " "	14¼	"	28.54

It will be noticed that the actual shipment for the year exceeds the product for the same time, 9,058 lbs., making the shipment of 1862 amount 600½ tons. This discrepancy arises from the fact that all the mineral obtained from 1st of November to the close of navigation, is sent forward, and enters into the avails of the current year's business.

The whole amount of crude ore shipped was, as stated, 1,201,158 lbs., which, being smelted, yielded in refined copper 865,752 lbs., or 72.09 per cent. This was sold, and produced after deducting freight and charges from Cleveland to New York, $209,280 56, being a fraction over 24.17 cents per lb. This does not include smelting or any antecedent charges.

The expenses before shipment from Ontonagon, as shown by monthly returns, and which may fairly be deemed the cost of production, including all labor, fuel, transportation, timber and salaries

of officers, amounted for the year to $139,926 13, an average of $11,660 51 per month, or 194 02 per ton of mineral obtained.

The whole expenditure for the year 1862, exclusive of supplies, which are always absorbed in wages, is as follows, viz:

Mine expenses, as before stated	$139,926 13
Smelting charges on product, 1862	11,511 61
Machinery	9,456 69
General expenses	6,191 10
Taxes to State	691 88
Freight and insurance	8,236 58
	$176,013 99

The profits of 1862, estimated upon this data, will amount to $33,216 57. By the same estimate it appears that the cost of mineral for the year is 14.63 cents per lb., and of refined copper 20.33 cents per lb.

The item of machinery has probably increased the cost of refined copper 1 cent per lb., and should be considered as not all fairly chargeable to a single year's operations.

The following table exhibits the entire receipts of the National Mining Company for capital stock paid in, and sales of silver and copper to date of the balance sheet annexed:

Capital stock paid in	$110,025 00
Aggregate sales of copper and silver to November 1st, 1861	789,794 57
Sales of copper from November 1st, 1861, to November 1st, 1862	285,121 63
Sales of silver, product of 1861	547 82
Sales of silver, product of 1862, sold in December	1,020 38
Total	$1,186,509 40

showing sales of copper and silver, $1,076,484 40.

The expenses of every description, including purchase of supplies, actually incurred and paid during the year, were as per balance sheet, $169,210 53, or $14,100 88 per month.

Of the product of the mine for the current year, or say since the close of navigation in 1862, there has been sold to the date of this report, 343,435 lbs. refined copper, for the sum of $101,710 04, being an average net price of 29.62 cents per lb.

The assets, Nov. 1, 1862, amounted to $145,965 89; and the liabilities to $80,787 81. The receipts and expenditures to that date have been as follows:

RECEIPTS.

Capital stock paid in	$110,025 00
Aggregate sales of copper to 1st Nov. 1861	678,992 61
Aggregate sales of silver to do.	776 96
Sales of copper from Nov. 1st, 1861, to Nov. 1st, 1862	285,121 63
Sales of silver for same period	547 82
Accounts payable	11,042 75
	$1,086,506 77

EXPENDITURES.

Aggregate expenditures for all purposes to November 1st, 1861	$724,572 82
Expenditures from Nov. 1st, 1861, to Nov. 1, 1862	169,210 53
Dividends	158,915 88
Accounts receivable	11,176 21
Cash on hand	22,631 33
	$1,086,506 77

The management of the company's works appear to be of the best kind, and to be carefully and scientifically conducted. The general business office of the company is at Pittsburgh, Pennsylvania, and the transfer office in Boston, with J. W. Clark & Co., Milk street.

Directors.—Thomas M. Howe, C. G. Hussey, John D. M'Cord, James M. Cooper, Pittsburgh, Pa.; Charles Richmond, Detroit, Michigan.

President.—THOMAS M. HOWE.

Secretary and Treasurer.—JAMES M. COOPER.

Baltimore and Ohio Railroad.

PROPOSITION TO AID THE PITTSBURG AND CONNELLSVILLE RAILROAD.

The regular monthly meeting of the directors of the Baltimore and Ohio Railroad Company was held in Baltimore on the 11th inst., J. W. Garrett, Esq., President in the chair. The Committee of Transportation recommended the adoption of a resolution ordering the construction of two hundred three-pot iron hopper coal cars, as additional equipment to meet the demands of the coal trade. After explanations by the President, that for a long period past the demand for coal has been uniformly in excess of the Company's ability to supply, and as the prospect was favorable for a permanently increased demand, the Board unanimously adopted the resolution. The cost of this additional equipment is estimated at $120,000.

The President submitted for the action of the Board documents connected with proceedings to maintain the rights of the Baltimore and Ohio Railroad Company in connection with its interests in the Pittsburg and Connellsville Railroad Company, and also the following communication, which had been addressed by him to the President of that Company, presenting his views regarding the proper policy to be pursued for the interests of the State of Maryland and the city of Baltimore, and to insure satisfactory relations with and the early completion of that road, viz:

BALTIMORE AND OHIO RAILROAD.
President's Office, Balt., Nov. 10, 1863.

Dear Sir,—I much regret that many important engagements of the most urgent character, connected with the affairs of the Company and the operations of the Road at this particular period, prevent me from attending the called meeting of the Stockholders of your Company on the 12th instant. I would make it a point to be present on that occasion were it in my power, not only as the representative of the Baltimore and Ohio Company, but for the purpose of removing impressions in regard to the course and policy of this Company which you inform me exist, and which are, as far as I understand them, most unjust.

I regard the completion of the Pittsburg and Connellsville Road to Cumberland not only as a local but as a national work of the first magnitude. I am prepared as soon as a suitable contract for its construction can be made, to recommend to the Baltimore and Ohio Railroad Company to aid it to the extent of one million of dollars; and I am altogether satisfied that the regulations of the two Companies, looking to their successful workings as a through route, can be placed upon such a basis as will produce the most beneficial results, and which must prove mutually satisfactory.

The committees of Pittsburg, Cumberland and Baltimore, as well as the populations of the large portion of the territories of Pennsylvania and Maryland with which the line is identified, cannot fail to be greatly and permanently benefitted by its construction. With the aid the Baltimore and Ohio Company can extend, and the legislation that the city of Baltimore will in all probability grant, or which may be obtained under the operations of its existing ordinances, and with the practical co-operation of the great interests connected with the route, there should be no question that the through connection between Baltimore and Pittsburg can be established within a brief period, or indeed as rapidly as the labor can be procured for its construction.

I should have been happy to have had an opportunity of presenting these views to the stockholders of your Company in person, but shall certainly take an early occasion to confer with them.

In the meantime the proxy of this Company will be presented by Colonel J. Spear Nicholas, who is accompanied by Messrs. Abbott and Beall, Directors of our Company, who will, I am sure, confirm the assurances now made.

I am with great respect, your obedient servant,
J. W. GARRETT, President.

B. H. Latrobe, Esq., President Pittsburg and Connellsville Railroad Company.

This interesting subject was very fully discussed, and the great importance of cordial and earnest co-operation with the parties interested in the line to accomplish the desired result was generally urged. After full presentation of views by different members of the Board, the proceedings referred to, and the communication as stated, were approved and adopted by a nearly unanimous vote.

The President stated that the adjustment of the accounts of the Company had sufficiently progressed to enable the Board to present the annual report for 1861, which was then submitted and unanimously approved.

After the transaction of some further routine business, the Board adjourned.

Utica and Black River Railroad.

At the Annual Meeting of this company held in Utica on the 11th inst., the following gentlemen were chosen directors for the ensuing year: John Thorn, Robert L. Kennedy, Josiah W. Baker, John Butterfield, Martin Hart, James Sayre, Charles Miller, Edmund A. Graham, Russel Wheeler, Abijah J. Williams, Thomas Foster, Isaac Maynard, Silas D. Childs.

At a subsequent meeting of the directors, John Thorn was elected President, James Sayre, Vice President; Isaac Maynard, Treasurer; and Martin Hart, Secretary.

The earnings of the road for the year ending September 30, 1863, were:

From passengers	$45,341 89
From freight	36,896 30
From mail transportation	1,750 00
From all other sources	1,507 85
	$85,496 04

And the expenses were:

Operating the road	$40,760 58	
Improvements, etc.	34,670 84	
		75,431 42
Net profits		$10,064 62

Reading and Columbia Railroad.

This road, which is now in course of construction, is fast growing towards completion. The Columbia *Spy* says: "Breese and Merrill's section, No. 24, is about completed. Section 25 will in a few days be ready for the rails, which will open the road some ten miles beyond Ephrata where the heaviest and only grading is yet to be done, which we are told will be finished by the latter part of November. The grand opening of the road is set down for the first of January, 1864."

This road fills the gap between New York and Washington, outside of Philadelphia, and is designed to form a through route between these cities, *via* Easton, Reading, Columbia and Baltimore.

Minneapolis, Faribault & Cedar Valley R. R.

This Company—sometimes known as the Minnesota Central Railroad Company—has recently been reorganized, and a large amount of new capital contributed for the construction of the road, chiefly by the present owners of the Milwaukee and St. Paul Railroad, of which latter road the former is an extension. The road is now under contract from Minneapolis to Onatoria, about sixty-five miles, at which point it will connect with the Winona and St. Peters Railroad, now in process of construction from Winona to Onatoria, about eighty miles. There are at this time from two to three hundred workmen actively employed in its construction; the road bed is nearly prepared for the iron, which has all been purchased, partly in England, and is to be delivered at the opening of navigation next spring. The locomotives, cars and full equipments are all under contract, to be delivered early in the spring. It is the intention of the present owners of the road to have the whole line in operation by midsummer of 1864, at which time it is expected that travellers can go and return all the way by rail from New York to St. Paul and the Falls of St. Anthony.—*New York Herald.*

St. Croix and Superior Railroad.

The Hudson *Times* thinks the prospects of the completion of the Hudson and Superior Railroad are very flattering. It has the most substantial assurances that the road will be built at an early day. Leading railroad men from the East have secured possession of the land grant, and organized a company known as the "St. Croix and Superior Railroad Company." It says:

Most of those interested in the road live in the East, but it is necessary that the company should organize in this State, and a meeting of the stockholders was held in this city a few days ago, for the election of directors, when the following gentlemen were chosen:

Ezra Clark, of the City of New York.
W. W. Marsh, of Schooley's Mountain, N. J.
D. A. Baldwin, of New York City.
Edwin McNeil, of Kingston, Pa.
Levi Hubbell, of Milwaukee.
John Comstock, Solon H. Clough, H. S. Clapp, and Lucian P. Weatherby, of Hudson, Wisconsin.
A. P. Berthued, of Washington, D. C.
Henry M. Rice, of St. Paul, Minn.

Mr. Berthued is President of the company.

It is contemplated by the stockholders to immediately begin work on the road. Mr. Berthued, President, has now gone East on business for the company, but will return in a few days and spend the winter here, in conducting a more detailed survey, getting out ties, timber for bridges, &c. The indications are unmistakable that the important work of connecting the Mississippi with the great lakes, by railroad, is to be pushed vigorously forward.

Ashtabula and New Lisbon Railroad.

A continued and persistent effort is being made to put things in a proper shape for a completion of this road. One thing must be borne in mind, and that is, it cannot be built without the aid of foreign capitalists. If the owners of the coal veins along the route will grant leases to the capitalists, the road will be built, and at the prices offered them they will realize fortunes. If, however, they choose to act the policy of "the dog in the manger," and neither contribute toward the enterprise themselves, nor grant leases of their coal veins to those that will, the prospect of finishing the road is gone. Their coal, without the road, is nothing to them; with the road, and the prices they are offered per ton to lease, they will realize from three to four hundred dollars per acre. They must be prompt in making their decision, or the parties who would make the road will abandon the enterprise and turn their attention to the coal veins of Mercer County, Pennsylvania.—*New Lisbon, Ohio, Register.*

Pennsylvania Railroad Car Shops.

The statement made by us last week concerning the new car shops now constructing at West Philadelphia for the Pennsylvania Railroad Company, was incorrect in many particulars. The company desire the ground occupied as the present site of the car shops for the erection of the new Union Depot of the Pennsylvania, Philadelphia and Baltimore, and the Reading Railroads. The new shops are now being built upon the Powelton Fair Grounds. They will be in the form of a U, not of an L, as before stated, and will face on Race street, with one wing facing Bridgewater and the other the Pennsylvania Railroad.

The main building will be 346 feet long, and the two wings 200 feet each. Between these wings will be an engine house and boiler room, and a shop for wood machinery. In one wing will be a paint shop, and in the other the machine shop. These will be 62 feet wide. In the wood machinery shop will be huge planers for planing timbers one hundred feet in length.

A transfer table will be placed in the middle of Race street. It will extend the whole length of the structure, and will be provided with tracks, upon which the table is placed to move cars from one track to the other. At the north side of Race street there will be a two-story office, and a large locomotive round house, and locomotive machine shops will be built on the north side of Race street, immediately above the car shops.

The car shops at Altoona are the largest in the State. The greater portion of the cars used upon the Pennsylvania Railroad are constructed there. When the new shops are erected they will be second only to those in Altoona.

United States Mail vs. Express Companies.

The new postal regulations, which went into operation on the 30th of June last, materially affect the business of Express companies, so far as the transportation of small packages is concerned. All the articles specified below may be sent in the mails, in packages not weighing over four pounds for any distance in the United States, at the rate of two cents for each additional four ounces or fraction thereof, meaning that seven and seven eights ounces may be sent for four cents, &c., that is to say:—Pamphlets, occasional publications, book manuscript and proof sheets, whether corrected or not, maps, prints, engravings, blanks, flexible patterns, sample cards, photographic paper, letter envelopes, postal envelopes or wrappers, cards, paper, plain or ornamental, photographic representations of all typse, cuttings, bulbs, roots, and scions, and all other matter which may by law be hereafter declared mailable. Bound books are taken at double the above specified rate. Any book weighing less than four ounces may be sent for four cents, the postage to be prepaid by stamps. Thus, a package considered mailable weighing a single grain less than a pound may be sent any distance in the United States for sixteen cents, while the express companies would probably charge a dollar for the same service, according to the distance. One great matter to be taken into consideration, however, is whether a valuable package is not safer in the hands of an express company than when entrusted to the mail. So far as trifling packages are concerned the latter is safe enough, and is a great saving to the parties.

New York and Harlem Railroad.

The directors of this company have issued the following notice to the stockholders:

The increasing business of the Company and anticipated connections with other Railroads render it expedient forthwith to extend the double track from its present terminus at Williams Bridge to Chatham Four Corners, and to complete the road from that place through to Albany.

For the purpose of meeting the necessary outlays attending such constructions, and to defray the expenses incident to the extensions of the City Railroad already authorized, the Board of Directors have resolved that it is expedient to increase the Capital Stock to such amount, not exceeding the limitation of the Charters, as may be sanctioned by the requisite vote of the Stockholders, and to issue the increased stock from time to time as may be required for the purposes of completing such double track and extensions and procuring the necessary additional rolling stock.

The amount of the Capital Stock, as limited by the charter and amendatory acts, and including both the Common and Preferred Stock, is eight millions of dollars, of which $2,139,950 remains unissued.

The Board of Directors propose that the Capital Stock be increased to its full amount.

A meeting of the Stockholders for the purpose of acting upon such resolution of the Board of Directors and of concurring in the increase of the Capital Stock to the full amount, authorized by the Charter and the several acts of the Legislature, amendatory, thereof, will be held at the Office of the Company, at the corner of 27th street, and 4th avenue, on the first day of December next, at 12 o'clock noon of that day.

Passenger Railway Securities.

Passenger railway securities are dull in consequence of the greatly increased expense in running them. But horses and horses feed have greatly increased in price; as has also, indeed, the pay of drivers and conductors, while the fare remains stationary. All these causes tell against the profits of *horse*-railways; but there is said to be no evil without some return of good, and so we hope it may prove in this case. There is a remedy in the substitution of the quiet, cheap, smoke-consuming dummy engines for horse power, by which the public will be greatly convenienced, and the expenses of the Companies materially lessened. Dummy engines, or an increase of fares, is a certain consequence of the present steady advance of all prices. For convenience, cheapness and safety to persons and property, we say dummy engines. —*Philad. Ledger.*

The Bradford Railroad.

We have the satisfaction of announcing that the railroad which is now finished to Bradford Township in this county, has been purchased by gentlemen who are largely connected with the New York and Erie Railroad, and is to be completed, without delay, to the coal beds in Lafayette and Keating townships. One object the company has, who have purchased this road, is to procure coal for use on the New York and Erie Railroad, and another is to make a connection with the Philadelphia and Erie road. This is done by reaching the summit, at the head waters of the Kenzua creek, about five miles west of the borough of Smethport. From that point to Kane's Summit on the Philadelphia and Erie, the distance is less than fifteen miles. By following the dividing ridge between the Marvin creek and Kenzua waters, a road can be built to the P. & E. at a slight grade and consequently at a low figure.—*McKean Miner.*

Railroad Earnings—Weekly.

The traffic of the Great Western Railroad for the week ending Nov. 6, 1863, was as follows:

Passengers	$23,149 15
Freight and live stock	38,836 58
Mails and sundries	1,532 91
Total	$63,518 64
Corresponding week of 1862	63,411 50
Increase	$107 14

The earnings of the Grand Trunk Railway for the week ending October 31, 1863, were:

Passengers	$28,995 08
Freight and live stock	59,020 71
Mails and sundries	2,800 00
Total	$90,815 74
Corresponding week, 1862	96,216 56
Decrease	$5,400 82

The earnings of the Galena and Chicago Union Railroad for the 1st week of Nov., 1863, were:

Freight	$35,416 72
Passengers	13,601 40
Mails	1,300 00
Total	$50,318 12
Same week, 1862	47,784 06
Increase	$2,534 06

The earnings of the Chicago and Alton Railroad for the 1st week of November, 1863, were:

Passengers	$13,968 89
Freight	20,074 93
Sundries	1,459 23
Total	$35,502 85
Same week last year	31,454 73
Increase	$4,048 12

The earnings of the Chicago and Northwestern Railway for the 1st week in November, 1863, were $41,545 00
Do., 1862 29,368 00
Increase $12,177 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in Nov. have been $31,617 35
Same week, 1862 35,332 85
Decrease $3,715 50
Total from January 1, 1863 $1,027,610 36
" " 1862 1,015,959 80
Increase $11,650 56

The earnings of the Toledo and Wabash Railroad Company for the 1st week of November, 1863, were $35,866 13
Same week, 1862 37,691 97
Decrease $1,825 54

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of Nov., 1863, were $81,210 96
Do., 1862 71,315 66
Increase $9,895 30

The earnings of the Michigan Central Railroad for the 1st week of Nov., 1863, were $81,653 80
Same period, 1862 71,677 59
Increase $9,976 21

New Castle and Beaver Valley Railroad.

The New Castle and Beaver Valley Railroad, which connects with the Pittsburg, Fort Wayne and Chicago Railway, at Homewood Station, and runs to New Castle, in Lawrence county, Pa., was opened on the 28th ult.

Commerce of New York.

Value of imports at New York from foreign ports for the month of October:

	1861.	1863	1862.
Entered for consumption	$3,638,580	$11,886,566	$8,462,554
Withdrawn from warehouse	2,518,060	4,868,512	3,109,388

Ottawa Canal.

There is no project at present entertained in the Canadas, which better deserves the good will of the Northern and Western States, than that of the Ottawa Canal. We have before us a Report of a Montreal Committee, (consisting of Messrs. H. L. Routh, Chairman, Hon. Geo. Moffatt, John Esdaile, Ira Gould, W. P. McLaren, Walter Shanly, J. H. Joseph, John Grant, A. Cowan, and Thos. Ryan,) nominated on 19th March, 1863, to the Committee of the Montreal Board of Trade appointed for the reception of the Delegates from Illinois and Wisconsin.

This report considers the question of an improved navigable communication between Lakes Michigan and Huron, and the St. Lawrence river as an outlet to the Ocean and recommends as the most eligible route to be adopted, that surveyed in 1856–'7 by Walter Shanly, Civil Engineer, and in 1858–'9 by T. C. Clarke, Civil Engineer; namely, from the mouths of the French River, on the Georgian Bay, by way of Lake Nippisingue and the Matawan and Ottawa Rivers to Montreal.

The relative distances between the furthest west Lake-port, Chicago, and Montreal, by the existing (Welland Canal) route, and by the proposed new line of communication by the Ottawa, are thus stated:

1st. *Welland Route.*

	Miles.
Lake Navigation	1,145
River "	132
Canal "	71
Total distance to Montreal	1,348

2nd. *Ottawa Route.*

	Miles.
Lake Navigation (including Nippisingue)	575
River "	347
Canal "	58
Total distance Chicago to Montreal	980
Difference in favor of Ottawa Route	368

And carrying our comparisons a step further we have, from Chicago to New York.

3rd. *The Erie Canal Route.*

		Miles.
Lake navigation	Chicago to Buffalo	1000
Canal "	Buffalo to Troy	350
River "	Troy to New York	150
Total distance Chicago to New York		1500
" Chicago to Montreal by the Ottawa		980
Difference of distance in favor of Montreal		520

Trans-Atlantic distances also compare favorably for us:

	Miles.
New York to Liverpool	2980
Montreal to Liverpool	2740
Quebec to Liverpool	2580
Difference in favor of Montreal	240
and in favor of Quebec	400
Chicago to Liverpool by Lake Erie and New York	4480
Chicago to Liverpool by Ottawa and Gulf of St. Lawrence	3720
Difference in favor of Ottawa and Gulf Route	760

The leading advantages to be secured by such a line of interior navigation as it is proposed to open, are classed under the following heads:

1st. *Time Saved.*—Because by this route grain could be taken from all ports on Lake Michigan and delivered to sea-going vessels in Montreal two days sooner than by the Welland route, or than by any other route that can be constructed: and in full eight days less time than is required to lay down in the harbor of New York a cargo loaded in Chicago or Milwaukee. Also the better condition for final transfer to ocean vessels in which the grain will come to hand after the shorter, as compared with the longer inland voyage, and more circuitous routes between Lake Michigan and tide-water.

2nd. *Expenses saved.*—In the item of Freight-charges alone, the Montreal or Quebec merchant purchasing grain in Chicago or Milwaukee, can effect an average saving of fully four cents, after allowing a liberal estimate for tolls, on each bushel as compared with what it now costs him to bring it round by way of the Welland Canal; while that which now goes from the same points to New York, by way of Lake Erie and the Hudson, at a cost, taking the average of the last eight years, of twenty-seven cents per bushel, can be delivered at the ship's side in Montreal for 15 cents, or in Quebec for eighteen cents per bushel, in superior shipping order, not only on account of the shorter time it has been afloat, but also owing to the more favorable atmospheric conditions to which it has been subjected, in its passage through the cooling waters of the Ottawa.

As an index to what the saving in freight would amount to, even now, at the above differences in rates we subjoin the following statement of grain, and flour reduced to grain, forwarded last year from Chicago, and received, by water only, at Montreal in 1862 and at New York in 1861.

Forwarded from Chicago by Lake and Railroad, 56,477,104 bushels.

Total Receipts at Montreal by Canal only, 15,227,878 bush.

Total Receipts at New York from Canals only, 55,905,344 bush.

Mr Shanly recommends a navigation of the size represented by Locks of 250 feet in length by 50 feet in width,—capable of passing vessels drawing 10 feet of water.

Mr. Clarke proposes Locks of similar length, but considers 45 feet as sufficient width, while he would provide for 12 feet draught of water.

Experience in the Grain-carrying trade goes to show that transhipment at the foot of Lake navigation from large steam and sailing vessels into river-craft, is not only not found to be an inconvenience, but is adopted by choice as the cheapest, most facile, and safest mode of delivering the grain in our harbor. Vessels loading on the Upper Lakes now rarely come below Kingston, there transfering their cargoes to barges; the largest class of which now used in the trade measure 150 feet in length by 30 in width, draw nine feet of water, and carry some 22,000 bushels of wheat. Increasing their length to 160 feet and their beam to 33 feet, their draught could be lightened to eight feet and their load capacity still preserved; and by further increase in length and beam, within the limits of the largest sized lock proposed, their capacity could be increased to 35,000 bushels without adding to the reduced (8 feet) draught of water.

Mr. Shanly estimated the cost of completing his scheme of navigation at $24,000,000.

Mr. Clarke, not however taking into account the enlarging of the Lachine canal, or the removal in Lake St. Louis of the obstruction to a 12 ft., or even to a 10 feet navigation, makes a very much lower estimate; resorting largely to the plan of damming up the Ottawa and Matawan Rivers to avoid expensive excavations. His estimate is a little over $12,000,000.

It is deemed prudent, for the present, to place the question of cost in its least favorable light by assuming the highest estimate, and having requested Mr. Shanly to ascertain what the probable difference in cost between an eight feet and a ten feet navigation would be, his answer (given in full in appendix C.) may be briefly stated thus:

"Leaving the locks of the dimensions as to length, width, and depth contemplated in his original estimate, but providing throughout, elsewhere, for eight feet draught only, would reduce the cost of the undertaking to $16,000,000.

And if the locks were to be reduced in size to, say, 160 x 33 x 8 feet depth, a further reduction in cost to the extent of about $2,000,000 might be effected, bringing the entire outlay within the limit of $14,000,000.

The deepening of a navigation, even where most practicable, is necessarily an expensive undertaking. To obtain the largest desirable carrying capacity, therefore, for river and canal craft, without recourse being had to great draught of water, the means, of giving them increased length and width, with the increasing demands of trade, should be kept in view. The Sub-Committee are accordingly of opinion, that the size of lock designed by Mr. Shanly, 250 feet long by 50 feet wide, is that best adapted for the "French River and Ottawa navigation," and with a view to the future adaptation of the route to ten feet available depth throughout, it is recommended that in the construction of the locks the full depth of ten feet be also adhered to, and so obviate the necessity for the pulling down and sacrificing the original cost of such expensive structure, when further improvements come, as doubtless they will come, to be developed.

For the general depth between locks, throughout the canal and river portions of the navigation, the Sub-Committee believe that, for the present, it will be amply sufficient to provide for floating vessels of eight feet loaded draught.

They urge that the grain trade of Michigan, the development of immense manufacturing resources along the route, the opening of new lumber markets, especially at Chicago and the reduced cost of supplies to the lumber men, also the great value of the mineral deposits are all considerations of the highest import, and conclusive as to the advantage of opening this route.

The Committee refer to the fact that a select committee of the House of Assembly has recently been struck, expressly to "investigate the subject of a navigable communication between Montreal and Lake Huron by way of the Rivers Ottawa and Matawan, Lake Nippisingue and the French River;" and recommend that the Board of Trade and citizens of Montreal generally should take measures for urging upon their representatives in Parliament, and through them upon the select committee of the House, the importance of the question at issue; a question in which are bound up not alone the interests of certain localities immediately contiguous to the chain of navigation, but, it may be asserted, one in which every patriotic Canadian, from the extreme east to the extreme west, is equally concerned; embracing as it does the momentous problem of whether the teeming products of the western and northwestern States, are to find their safest, shortest and cheapest outlet to the ocean, through Canadian waters, or are for ever "to pass by on the other side"—through channels almost wholly artificial;—owing their very existence to that spirit of enterprise, patriotism and perseverance which must be greivously wanting in us, if we continue to leave unimproved and unused the superb chain of inland waters with which nature has so munificently endowed our country.

It is further urged that the Canadian Government, should emulate the conduct of the Americans in giving aid to projects of this character, in the shape of a low rate of guaranteed interest, if nothing more, and maintain that there would be a large return in revenue. This very reasonable expectation is founded on the following statements.

In 1854 Chicago sent out in grain of all kinds (including flour reduced to grain)	12,863,912 bush.
In 1862 her exports had increased to	56,477,104 "

Showing a steady progression of twenty per cent. per annum.

The other ports on the west coast of Lake Michigan have been increasing their commerce—in other words, the whole country lying between it and the Mississippi has been growing, in equal ratio; and the total shipment of cereals last year from the two largest cities of the Lake, Chicago

and Milwaukee, amounted to over 75,000,000 bushels.

Adopting half the above rate of progression, 10 per cent., for the next eight years (seeing that very large quantities are not to be counted on to increase in as rapid ratio as much lesser ones) the grain trade from these ports should in 1870, amount to upwards of 160,000,000 bus.

It is worthy of note that, notwithstanding the many Railway outlets sea-ward from Lake Michigan, the Grain and Flour is nearly all forwarded by water. Of the 56,477,104 bushels sent from Chicago last year, 51,765,862 bushels took the lake route.

This statement refers to the shipments of grain, by the lake route from two lake ports only. The following gives the quantity received from the West, by way of the Erie Canal, at the principal Atlantic seaport, New York, in the season of 1861. The Committee regret that they have not been able to obtain a return of the Tonnage on the New York Canals for 1862:—

Wheat (including Flour)	33,561,165 bush.
Corn.....	22,344,179 "
Total Wheat and Corn reaching New York by Canal.....	55,905,344 "
And the total tonnage of all Agricultural products from the Western States reaching tide-water by way of Erie Canal in same year amounted to.....	2,158,425 tons.

Yielding to the State a Revenue of $2,682,969.

In estimating the revenue derivable from the Ottawa and Lake Huron navigation, the time within which, not it alone, but also the connection with the Hudson by Lake Champlain can be completed, should be taken into account, a period of eight years being calculated as sufficient for that purpose; by which time, as calculated above, the grain trade of Chicago and Milwaukee alone, will have reached the annual amount of 160,000,000 of bushels, our interest in which will not be confined only to what we can ship in Ocean vessels at Montreal and Quebec, but our canal forwarders will also be busily occupied in carrying for Boston and New York. To assume then, that in 1870, we can send out 50,000,000 bushels by the Gulf of St. Lawrence and forward 30,000,000 bushels more, (about half what N. York alone now takes of wheat and Indian corn,) southward, to Lake Champlain, would not seem to be an extravagant estimate in view of the irrepressible expansion of western commerce.

The toll on a bushel of wheat passing through the Erie Canal in 1861, amounted to a little over 5 cents; at half which rate our revenue from western grown grain only, predicated on the quantities estimated above would be.

On 50,000,000 bushels, going out by the Gulf, 2½ cents.....	$1,250,000
On 30,000,000 bush., sent South, at 2½ cents	750,000
Total revenue from Western grain.....	$2,000,000

Thus showing, that after deducting all expenses incident to collection and maintenance, a revenue of 5 per cent per annum, could be fairly expected on an outlay of $20,000,000.

The committee viewing the subject from the stand-point of the relations with the old world, find that from Quebec to Liverpool is 400 miles less distance than from New York to Liverpool. From Chicago to Liverpool by way of the Ottawa and the gulf is 740 miles less, than by way of Lake Erie and the Hudson; thus bringing Great Britain so much nearer to the granaries whence she draws her chief supplies of breadstuffs. The manufacturing opportunities already referred to would in time provide employment for thousands of her operatives and mechanics, and the lands, homes for her surplus agricultural population. Finally, in creating this new highway, *from* the west we would also be opening the way to that vast western British territory, stretching from Lake Superior to the Pacific, and the problem of annexing parts of which to Canada, the Ottawa navigation project would go far to solve. Fort William on British waters at the head of Lake Superior, is equi-distant from Montreal, with Chicago, at the foot of Lake Michigan:—each about 980 miles by way of the Ottawa. At the former point we attain the foot of another chain of waters, leading to the settlement of Red River, at the foot of Lake Winnipeg, into which at its western extremity, 300 miles beyond Red River, the Great Saskatchewan, after a nearly due east course of fully 1,000 miles, through boundless plains and prairies, pours her fertilizing waters. A continuous navigation from tide-water in the Gulf of St. Lawrence, to the foot of the Rocky Mountains, is not an impossibility in the future of British America.

Nor need New York or the Eastern States view the project under discussion with jealousy or disfavor. Its completion would force into existence the long talked of connection with Lake Champlain, simultaneously with the construction of which, New York would enlarge her Champlain Canal to proportions corresponding to it, and to the Ottawa (proportions to which her Erie Canal can never attain,) thereby reducing the navigable water distance between the mouth of the Hudson River and Lake Michigan, 150 miles below what it now is, or ever can be, by any other route. The good will of Boston, too, should be secured to our enterprise by the fact, that through it the breadstuffs of the west, of which she is so large a buyer, can be laid down in Lake Champlain at less cost, more speedily, and in better condition, than they can by any other way be brought to touch the borders of New England.

This enlightened and well prepared report finds able support in England. The *London Daily News* of September 17, advocates the project in the following large and liberal way:

In the year 1861 we imported nearly seven million quarters of wheat, and upwards of six million hundred weights of wheat meal. Of this immense supply, the United States (that is those of them which are corn-producing —Michigan, Wisconsin, Illinois, Indiana, and Ohio,) furnished two and a half million quarters of wheat, and three and three-quarter million hundredweights of wheat meal. Thus one-third of the wheat, and more than one half of the wheat meal, imported by us from all parts, came from the Western States of America. It is true that 1861, on account of the failure of previous harvests, was an exceptional year. Yet, on average of the last nine years, we have imported four million quarters of wheat, and nearly four million hundredweights of wheat meal from all parts every year. Nor did this enormous importation overtask the producing power of the States named. We learn that only one-tenth of the arable surface of those States is under cultivation. Their entire area is larger than that of France and more than double that of the British Isles. Their fertility is unrivalled; their development has been rapid beyond all precedent; and all that is wanting to ensure their permanent prosperity, and to secure us from all fear of famine, is a direct water communication with Liverpool. The route now traveled by the corn in its transit is so circuitous, so impeded by obstacles necessitating transhipment, that the freight amounts to 150 per cent. of the cost of the corn at its point of departure. In other words, every hundred pounds' worth of corn, shipped at Chicago costs 150*l.* to bring it to Liverpool. In this way, of the twelve and a half millions paid in 1861 by England for American corn and meal, seven and a half millions were paid for carriage. Nor is this wonderful when we consider the present route. The vessel starts from Chicago (Illinois) which is situated almost at the lowest extremity of Lake Michigan, and is twelve degrees below the parallel of Liverpool. It first ascends due north, through five degrees of latitude, the entire length of Lake Michigan; then describing a circuit of one hundred miles, it descends due south through the same five degrees of latitude. Afterwards running in a north-easterly direction for 200 miles, it passes through the Erie Canal to the River Hudson, and then turning south for the last time, it descends to New York. During this circuitous journey of 1,300 miles it has twice traveled north, twice south, twice east, and has been twice transhipped. The corn is intended for British consumption, and for 900 miles it has passed along British coasts; it then turns off into the territory of the United States, and is shipped for England in the port of New York. It is from these causes that the freight of wheat amounts to one-half its price; of flour to one-third; and of Indian corn to seven eighths. Such are the difficulties of the present route.

The advantages of the Ottawa route are thus clearly estimated:

"A cursory glance at the map will show that if a passage could be found from the upper part of Lake Huron into the St. Lawrence near Montreal we should get rid of the tedious and dangerous voyage through Lakes Huron, Erie, and Ontario. In fact, a straight line from the north of Lake Huron to Montreal would form the chord of the arc which runs through the lakes; the chord being about six hundred miles in length, and the arc one thousand miles. This chord represents the line of the proposed canal. But it is by no means necessary to excavate all this distance. The hand of man is required on a very small portion of it; nature has prepared the rest. If, leaving Montreal, we attempt to reach Lake Huron by the proposed route, we find that the River Ottawa is navigable for full four hundred miles. Quitting the Ottawa by the River Mattawan, we are brought to the Lake Nipissing, and thence by French River to the Georgian Bay in Lake Huron. It is estimated that not more than 23 miles of "close" canal will be required throughout the whole distance. The estimated cost of digging such a canal, 10 feet deep, and also deepening the rivers where it may be necessary, is four millions sterling. The district through which the canal would pass is said to be covered with an enormous pine forest, which would yield immense amounts of lumber for export. A great check on the lake traffic arises from the inability of vessels from the upper lake ports to procure a return cargo. But if the proposed route were opened, the demand for lumber in the Chicago market alone would ensure a return cargo. There is abundance of water-power along the line of navigation; and manufactories, expanding into towns and cities, would quickly occupy the district now abandoned to the wild beast and the hunter. The engineering difficulties are said to be very trifling. We are assured that the cost of transportation would be reduced 10s. per quarter. Instead of our paying seven and a half millions for freight in 1861, we should only have had to pay two millions if this canal had been constructed; the difference during that one year would have paid all the expenses."

The article quoted from the *News* is from the pen of Alfred Smith, and states the interesting fact that the town of Sheffield has made a movement in favor of the project. We earnestly hope that our Canadian friends will persevere in their efforts to carry out their views. The Erie Canal met at the first, more indifference, and subsequently more opposition than this generation have any idea of, and the friends of the Ottawa Canal must expect to surmount the same obstacles. But the day is not far distant when both the Ottawa and the Champlain Canals will be crowded with stately steamers and barges, filled with the precious freights of our Western granaries. The joint interests of the Canadas and the Northern United States cannot be long overlooked, and the conviction is already forced on the public mind, that both these admirable works will be undertaken and completed within an early period.

Legal Tender Notes.--Another Decision Declaring the Law Constitutional.

THE TREASURY NOTE BILL OF FEBRUARY 25TH, 1862, DECLARED CONSTITUTIONAL BY THE COURT OF COMMON PLEAS OF BUTLER COUNTY, PENNSYLVANIA.

The Court of Appeals of the State of New York, recently decided the act passed by Congress on the 25th of February, 1862, legalizing the issue of the present legal tender currency, to be constitutional. If this decision was final, we should not incumber our pages with a further reference to the matter; but the case is yet to be argued before, and to be decided by, the Supreme Court of the United States; and this court may reverse all the affirmative decisions of inferior tribunals. It follows, then, that in the present state of the controversy, decisions which are merely cumulative in their character, possess great interest, as bearing upon the final decision of a great and important question.

The defendant in this case tendered to the plaintiff the amount of a judgment in legal tender notes of the United States. The plaintiff refused the tender, and issued execution, with instruction to the sheriff to collect the same in coin. The defendant then moved to set aside this execution; and the Court now grants the motion; holding the tender to have been sufficient.

The following is the opinion of the court, which we have abbreviated as much as possible; while at the same time we have endeavored to retain the substance of the learned judge's argument:

AGNEW, P. J.—I am not disposed to waste time in this controversy, and though not yielding the point, will concede, for argument sake, that a general power to declare what shall be a legal tender payment of debts, beyond specie or coined metal, cannot be traced directly, by mere logical inference, to any of the specific powers. The justification of the act must therefore be found in the nature of the thing itself, and its relation, in this specific case, as a means to carry into execution some one or more of the expressed powers of the constitution.

If the nature of the act and its relation to any expressed power bring it within the range of measures fairly necessary and proper for its exercise, it then falls within the express power to "make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all the powers vested by this constitution in the Government of the United States, or in any department or officer thereof."

I pass by also the question whether the last mentioned grant of power extends the authority of Congress beyond that which a fair implication from the powers expressed would give.

But waiving this question, the point simply is, whether the act in question be necessary and proper to carry out any of the expressed powers of the constitution. The subject of examination is, therefore, the nature and relation of the provision that these Treasury bills shall be deemed money, and receivable in payment of public and private debts.

Bearing on this point is the range within which constitutional necessity and propriety are found, as gathered from the uniform and undisputed practice of the Government, and from judicial decisions; or, in other words, the range within which the relation of the thing authorized to be done, as a constitutional means of exercising some power of the Government, is to be found.

Let us select a few examples for the practical illustration of this point.

By Act of Congress, public ministers, charges, consuls, &c., shall not correspond with public newspapers, nor recommend persons to office, nor accept presents; the President shall prescribe regulations, orders and instruction for business, including the "procurement and transmission of the products of the arts, sciences, manufactures, agriculture and commerce." "Passports" shall be granted "under such rules as the President shall designate and prescribe."

These acts of legislation rest solely on the power "to regulate commerce with foreign nations," and "to appoint ambassadors, other public ministers and consuls." The power to regulate their conduct does not necessarily or logically flow from the power to appoint ambassadors, but is only inferred as fit and proper. The power to regulate does not necessarily imply that ministers shall not express their views through the press, nor recommend persons to office or procure foreign specimens of art, &c.; yet the fitness of the thing has appeared to Congress as a fact growing out of the nature of the business to be performed, and no one has ever doubted these powers of Congress, thus exercised, as "necessary and proper." Under the power "to promote the progress of science and the useful arts by securing for a limited time to authors and inventors the exclusive right of their respective writings and discoveries," Congress has regulated the assignment of the patent after its issue, by recording laws; and even the sales of the article patented, by requiring it to be stamped with the date. One would think the patent itself secured his invention to the patentee without legislation upon his subsequent acts.

Under the clause of the constitution that fugitives from labor "shall be delivered upon claim of the party to whom such service or labor may be due," Congress has not only provided for their arrest and surrender, but has regulated the power of attorney given by the claimant, the officers to take jurisdiction, prescribe that *ex parte* evidence sufficient, provided penalties for obstructions and hindrances, and even given a civil action for the sum of $1,000 to the party injured. These provisions have all been decided to be constitutional.

Congress has impressed upon debts due the United States a legal efficacy, which secures to them priority of payment, in case of the insolvency of the debtor or of his estate; and has extended this protection even to the surety for the debt.

This legislation has been repeatedly before the Supreme Court of the United States, and always sustained. It might be asked, with greater force than in the present case, on what principle does the United States come in upon the estates of deceased persons, (mere private individuals,) and claim a priority for its own debts, setting aside all the gradations of payments made by State laws over a subject which seems purely to belong to State legislation; and after payment convey over this preference to the surety. It can be traced to no specific power, but was sustained by the court expressly under the clause giving power to make all laws necessary and proper for carrying into execution the other powers.

Congress has authorized the President to furnish friendly Indians with useful domestic animals and implements of husbandry, and with goods such as he thinks proper. Also to employ capable persons, of good moral character, to instruct them in the mode of agriculture suited to their situation, and for teaching their children in reading, writing, arithmetic, &c. The only powers to which these acts are referred are "to regulate commerce with the Indian tribes," and "to make all needful rules and regulations respecting the territory or other property of the United States." The distance seems to be remote between furnishing implements of agriculture and goods, and teaching the Indians; and regulation of commerce or the making of rules and regulations for the territory, which the courts have said means lands.

Under the power to regulate commerce, Congress has legislated upon the shipment of seamen, their articles of shipping, form and effect, wages, time of coming on board, neglects, desertions, discharge in foreign ports, sending home destitute seamen, &c., also providing for medicine chests, water and provisions on board, short allowance, &c.

Here we must first infer, as we are told by Ch. J. Marshall, the power to regulate navigation from the power to regulate commerce. Then secondly, we must infer the fitness of these various provisions to the interests of navigation and shipping. The relation between the power to be exercised, viz., to regulate commerce, and the nature or fitness of the means, such as the regulation of seamen, their rights, defaults, &c., seems to be very remote, yet these powers have never been doubted, and indeed should not be.

Under the power "to establish post-offices and post roads," Congress has not confined itself to our own soil, but has gone abroad and authorized mails to be carried over the ocean, established routes across the isthmus, purchased steamships and regulated their running, and authorized the appointment of agents abroad, &c.

Congress has also established an agricultural department and a public printing office, not by reason of any express authority, but only because of their fitness to facilitate the execution of other powers.

Congress has exercised many powers purely attendant, and not essential, in numerous cases, by prescribing modes and forms of procedure, oaths of office and oaths of procedure, bonds for security of individual as well as public duties, declared offences, and provided penalties. In hundreds of instances these powers are not essential, but simply conducive to the execution of other powers, and render their exercise merely more safe or convenient. Let any one examine the minutiæ of legislation under any one great branch of power, and he will find many so much further removed from their source than the value and effect of Treasury notes from the authority to issue them, he will think that, in comparison, they are but parasites clinging by attachment only to the true stock.

Thus the practice of Government has established a rule of construction for the exercise of incidental powers arising from mere fitness and convenience, and not from necessary sequence or relation so clear, so frequent, and so overwhelming, that no sane man would now attempt to overthrow it. It is so interwoven with the whole fabric of the constitution, that to do so would be to destroy the Government itself.

In the case of M'Culloch *vs.* the State of Maryland. C. J. Marshall shows conclusively that the word "necessary," in the clause authorizing the use of powers proper to carry out other powers, "imports no more than that one thing is convenient, or useful, or essential to another;" and concludes thus: "We admit, as all must admit, that the powers of the Government are limited, and that its limits are not to be transcended. But we think the sound construction of the constitution must allow the National Legislature that discretion with respect to the means by which the powers it confers are to be carried into execution, which will enable that body to perform the high duties assigned to it in the manner most beneficial to the people. Let the end be legitimate—let it be within the scope of the constitution—and all means which are appropriate, which plainly are adapted to that end, which are not prohibited, but consist with the letter and spirit of the constitution, are constitutional." See also the language of C. J. Marshall in U. S. *vs.* Fisher *et al.*, assignees of Blight (2 Cranch, 358) which we shall hereafter quote.

Thus much we have seen as to the character or fitness of the means to be used, and the extent of their range in the execution of a power expressly conferred. Next let us look a moment to the nature and use of bills of credit or Treasury notes.

These bills of credit were well known as money in Colonial history, including the legal tender feature. The first issue of them under the present Constitution was in 1812, for the purpose of raising money to carry on the war with Great Britain. The Act of June 30, 1812, not only provided for their issue, but for their legal incidents. They were to be payable to the order of the person who should become the owner, should be transferable by his indorsement and by delivery, should be

payable in one year, at the places designated on their face should be used at par to pay debts and borrow money, be receivable in payment of public dues and taxes, and be paid out of a sinking fund, and should be protected against counterfeiting.

The power has been repeatedly exercised, and in nearly the same terms. The provisions of the laws clearly denoted the intention of Congress that these issues should supply the place of money, while their history shows that in fact they were so used.

The use of bills and notes as money when issued by the banks of the Government is one sanctioned not only by the customs of trade, but by judicial decision. Such Government bills are even higher as a security, and better as a representative of money, than those of banks, resting as they do on the basis of the whole taxable property of the nation for their credit. The use of bank notes as money is the subject of frequent judicial decision. In Miller *vs.* Rose (1 Burrows, 457), Lord Mansfield said, "Now, they are not goods, nor securities, nor documents nor debts, nor are so esteemed; but are treated as money, as cash, in the ordinary course and transaction of business, by the general consent of mankind; which gives them the credit and currency of money, to all intents and purposes. They are as much money as guineas themselves are, or any other current coin that is used in common payment as money or cash."

The same doctrine is held by Ch. J. Gibson in his masterly opinion in Bayard *vs.* Shunk (1 W. & S., 95), referring to the case of Miller *vs.* Rose. Hobson *vs.* Fountain (5 Humphrey, 140) maintains that money is a general term, embracing every description of coin or bank note recognized by common consent as a representative value in exchange of property and payment of debts. The Supreme Court of the United States recognizes the same doctrine. In the Bank of the United States *vs.* Bank of Georgia (10 Wheaton, 333), Justice Story says: "Bank notes constitute a part of the common currency of the country, and ordinarily pass as money. When they are received as payment, the receipt is always given for them as money. They are a good tender as money, unless specially objected to; and as Lord Mansfield observed in Miller *vs.* Rose (1 Burrow's Rep., 457), they are not, like bills of exchange, considered as mere securities or documents for debts."

But the facts of our own observation speak louder to us than the declarations of others. We know that these Treasury Notes fill the channels of trade and business to the very brim, and have become a vital part of our currency as money, to a vast extent, supplanting largely the volume of bank notes.

The right of Congress to authorize the issue of these bills of credit or promissory notes of the Government, in the form and with the legal capacity always heretofore adopted, as the means of raising money to carry on the operations of the Government, both civil and military, in time of peace or in time of war, has been settled, and is not now disputed, and cannot be. The fact that they have been accepted and received as money is also beyond dispute. This, then, is the settled character of these bills in point of fact, and in the estimation of the law.

The only question, then, which remains, is, can Congress add to this, their customary and convential character, a legal sanction which declares them to be money, and receivable in payment of public and private debts? This is all the Treasury note bill of Feburary 25, 1862, has undertaken to do; to stamp upon these bills a legal character as money, in addition to the conventional; to the end that they shall be better adapted, and more serviceable to the Government as an effective means of obtaining money "to raise and support armies," and "provide and maintain a navy," and "provide for calling out the militia to execute the laws of the Union, suppress insurrections and repel invasions;" as well as to provide the ways and means of carrying on the Government generally.

Why should not Congress add this legal character as money, to their acknowledged character as money by usage? Why should it not stamp on the bill this legal effect as a means of making it effective to the designed end of raising money? True, the Constitution may not give a general power to declare this or that a legal tender in payment of debts; but what clause of the Constitution, or portion of its spirit, forbids to Congress the use of this as a means to accomplish the end in this particular case and emergency? What part of the Constitution prohibits Congress, when authorizing an instrument within the scope of its acknowledged power, from affixing to it certain legal incidents and effects? If the purpose and intent of the instrument is that it is to be used as money, what reason will prevent Congress from saying that it shall be so accepted and received [for this is all that a tender effects], if this be necessary, under the circumstances of legislation, to obtain the money it is intended to raise?

The instrument itself is the creature of law, and this involves its incidents and legal effect. The power to create involves the power to affix its legal character, while the extent of the legal incidents are limited only by their fitness as the means to be used to the legislative end. The end is to raise money for lawful purposes. If the legal incident, as money, is necessary as a means to this end, the means is justified, and falls within the authority to pass laws necessary and proper to the execution of this power.

A tender is merely an offer, and it is a legal tender only, because of the obligation to receive. The true point of the controversy therefore lies in the value and effect of the bill. It is because Congress has given to the bill a legal value at its face as so much money, and a legal effect as a medium for the payment of debts, that it becomes a subject of legal tender. It is because the debtor offers to his creditor a thing having a certain legal value and effect, that the offer becomes binding on the creditor. Hence, when Congress said these bills should be money and a legal tender for payment of debts, it merely legislated upon the value and effect of the bill itself, the creature of its admitted creative power.

The only point left, therefore, is, was this legal impress necessary as a means to make these bills available under the circumstances of legislation to raise the needed money?

Currency, or transmission from hand to hand, is essential to the effectiveness of the bill for its intended purpose; but this currency depends upon its character and use as money. Hence the necessity it should be declared to be money, and to have the legal effect of money in payment of debts, provided the circumstances seemed to demand it; of which Congress must judge.

The argument of the Supreme Court in the City of New York, that a power to raise money does not necessarily imply a power to make the bill a tender in payment of private debts is conceded. It is very true that the Government may issue its bills of credit in payment of loans, and raise money upon them, and that it does not necessarily, or even often, follow that they should be a legal tender for private debts. There is no logical conclusion from one to the other. But it is also true, that a state of facts may exist rendering it not only proper, but absolutely necessary that the bill should have the value and effect of money as a legal tender, in order to make it effective for the purpose of its issue. This is simply a matter of fact, not one of necessary sequence or logic. If, at the time of legislation, it was necessary to give the bill the character and effect of money, to accomplish its purpose, it then *pro hac vice* became a part of the means, and fell within the constitutional grant of power to make laws necessary and proper to execute the main power; and of this necessity Congress must judge.

* * * * * *

It remains now only to consider the propriety of the legal character given to these bills as money, in order to determine its appropriateness as a means to make them efficacious in raising money. Though we cannot overrule the judgment of Congress in a question of means to the end, we have the right to see that it has a reasonable adaptation as a means to the end proposed.

The state of the country at the time of the passage of the law fully exhibits the adaptation here. The United States were contending against the most gigantic rebellion the world ever saw. The armies and navies, armaments and operations by land and sea were greater than the continent ever witnessed, and indeed were seldom if ever, paralleled by the old world. The expenditures of the Government were millions daily, and the source of money confined to our own people. We could not borrow abroad. Confidence abroad in our ability was shaken by the agents of the rebellion. The London *Times*, the great index of English opinion, had endeavored to write down our ability to pay.

At home our banks poured out large sums to supply the treasury, and their whole capital, could it have been withdrawn from the channels of trade, was scarcely sufficient to furnish the sums needed. Wisdom required that the industry of the country should be fostered instead of being prostrated by the absorption of the capital essential to its existence. The Government had already drawn so largely upon these sources of supply, that further drafts would have been ruinous. The whole specie of the whole country, if within reach, would have been inadequate. The issue of bills of credit to an extraordinary amount seemed to be a neces sity. But the very scale upon which the issue had to be made was itself a cause of extraordinary depreciation. Who would lend money at par, or at any reasonable rate of discount, upon a security which necessarily must depreciate, without some attribute or legal effect to make it available in his hands? What justice was there in throwing upon the hands of our soldiers in the field a currency robbed of half of its nominal value, and useless as money? Circulation was the life blood of it. Without the character and effect of money it must fall flat upon the market, and the Government fail to get money at all, or get it at a ruinous sacrifice.

It will not do to answer that the mode of raising money by Treasury Notes was unwise. It is an admitted mode, and being within the choice of Congress, the question is simply as to the means necessary to give it efficiency. It therefore became necessary to stamp the issue with a legal character and effect which would pass it into the channels of trade, make it current in the ordinary business of men, carry it from hand to hand with a belief in its power to pass as money and would inspire confidence. Otherwise, he who took it today would be uncertain how far it would serve his purpose to-morrow, and it would be rejected.

In ordinary times of peace, or a time of war unlikely to impair the credit of the Government, the mere bills of the Government, without any other currency as money than that conceded to it by custom, might serve to obtain loans. But here, the result of the war, if ending in dissolution, must necessarily extinguish a large basis of their credit by the loss of the States which had seceded, and the uncertainty of the future of those remaining. One hundred and fifty millions of Treasury Notes, with a prospect of a much larger increase of the National Debt, could not but appal the sensitive nerves of credit. The necessity, therefore, of giving these bills the character of money, and making them a legal means of paying debts in order to make them effective, was so strongly apparent that Congress could not help but use this power as auxiliary to the main purpose.

The Pacific Railroad.

Some 300 tons of iron for the Pacific Railroad arrived at San Francisco per ship Herald of the Morning, from New York. This installment consists of rails and chairs for the track, and one locomotive and tender. The S. C. Grant is also due, and may be expected daily, with 500 tons more. But a few days will probably elapse before the work of laying the track will be commenced. It is expected that the iron will arrive so rapidly that no delay will be experienced for want of it.—*Sacramento Union.*

American Railroad Journal.

Saturday, November 21, 1863.

Stock Exchange and Money Market.

We publish in another part of this week's JOURNAL, the opinion of Chief Justice Agnew, of the Court of Common Pleas, of Butler Co., Pennsylvania, on the question raised before him of the character of the legal tender currency of the United States. Its perfect harmony with the decisions of the highest Court in our own commercial State is worthy of notice. In the State of Maine, one judge has been found to have held a different view, as one also of similar calibre in this city. The argument of Judge Agnew is a masterly one, showing conclusively that the constitution did not descend to the details necessary to carry all its powers into effect, and he cites numerous examples, the very naming of which is in his favor. Some people have a strange idea of the Constitution. It defined all the powers necessary to establish, maintain and continue our re-

publican Government in the most clear and precise manner. But as to the method by which those powers were to be exercised it left to the future Congresses of the country to specify. If the convention which framed that document had attempted to have codified each principle asserted through its ramifications, they would not have finished their work in a hundred years. We have had National and State Courts for more than eighty years settling the rules of law under the constitution and the practice under these rules, and they are not yet settled. All they can do with the lights of more than half a century is to interpret fairly and in accordance with justice and equity, what the constitution intended. So that the original framers of the constitution could not possibly have done more than they did, for else we should not have settled down into any form of Government at all. If there is any sovereign power in the people under the constitution, they can as well determine what shall be considered money, as well as what is not. This power they especially reserved to themselves as a nation, and refused it to the States. None but the enemies of the Union can have any object in carrying into the courts a question so plain, or interfere with the powers of the Government in this act of finance, except to embarrass it.

The National currency we now have, is the best we ever had; it circulates freely and without challenge, over one of the largest commercial territories on the globe; it has been selling at a premium; it is hoarded by the most timid, and is a favorite with the people at large.

We may be proud of the great ability of the Cabinet Minister who has made our Treasury so strong, and yet has benefitted every individual interest to such an extent. No system ever worked better than his, so that in the midst of a most expensive and destructive contest, in which we were compelled to engage to preserve our National life and unity, the loyal States have in their own territory scarcely realized its existence. The whole financial arrangement has been an unparallelled success, a splendid combination of financial skill, of National wealth and resources, and individual co-operation.

Our local Money Market has been pressed for money the last week, and interest has ruled at 7 per cent.; operators in stocks, however, being compelled to pay whatever was asked, in most instances. The banks have called in pretty generally whatever they were sure of getting from their customers. This is partly owing to the evident policy of Mr. Chase to keep down the issue of legal tender notes to the lowest practicable figure, and to exhibit a good statement to Congress at its approaching session. And for two reasons; one to secure his present popularity with the people, for whose suffrages it is still asserted he means to be a candidate, and also to show the world how prudently and economically, all the circumstances considered, a great war can be carried on. We therefore incline to the opinion that we need not expect an easy Money Market until January next. We are also of the opinion that our local banks will gradually fall into the National banking system, as the best and most profitable for them. They would seem to be blind to their own interests, if they do not seek to place their notes on a footing with the best, so as to secure their universal circulation, instead of issuing a limited one, and in some cases none at all. The following is the condition of the 54 City banks operating under the old system as it appeared on the 14th of November:

Total capital			$60,000,000
Loans & disc'ts.	$182,944,530	Specie.	$29,177,049
Circulation	6,095,932	D'p'sits.	151,770,498
Clearings for week ending Nov. 7.			$459,433,709 49
Clearings for week ending Nov. 14.			441,451,540 34
Balances for week ending Nov. 7.			22,388,402 89
Balances for week ending Nov. 14.			16,472,479 07

In the week ending that day the loans had decreased $11,892,311, and their specie had increased by the sum of $393,768.

A new National Bank is about being formed in this city with a capital of five millions, and in the meantime, the first National here is about to become an agent of the Treasury, as a deposit and disbursing institution.

The exports of specie from New York to foreign ports for the week ending Nov. 14, and since the beginning of the year, have been as follows:

Total for the week	$395,796
Previously reported	$39,690,402
Total since Jan. 1, 1863	$40,086,198

Same time in—		Same time in—	
1862.	$52,503,520	1856.	$33,806,144
1861.	3,332,287	1855.	26,555,801
1860.	41,947,443	1854.	36,544,281
1859.	67,077,691	1853.	22,313,137
1858.	23,848,946	1852.	23,307,561
1857.	34,803,926		

It would thus appear that there has been a large falling off in the export, for the last year, as compared with 1862, as there has been for the last week. It will be perceived that in 1859 was the largest export for many years, to wit., $67,079,691, and the country bore it with perfect ease. This striking fact speaks volumes for our immense resources in the precious metals, not to grow less if we may believe the half of what we are hearing every day, from our gold and silver mining territories. The truth is, there is no amount of these which the country may require, which is not attainable and near at hand. Those financiers who do not consider this, but act as if we were to haue no more gold and silver than what is now coined, will find themselves at fault in their present calculations.

The recent arrivals from Europe bring the intelligence, that the Bank of England has raised the rate of interest to 6 per cent, a previuos demand of 5 per cent in the same week, not having had the effect of stopping the drain of specie from its vaults. The first advance was on the 3d and the next on the 5th instant. The Bank of France was expected to follow suite. It appears that large exportations of the precious metals are being made to the East, and as the London *Times* asserts to purchase cotton. It is remarkable that so enormous a drain to the East Indies is perpetually going on. Nothing in the shape of gold or silver ever comes back to the Western world from the barbarians. There seems to be a gulf in that part of the globe without bottom, into which all the gold of Europe and America is swallowed up, and yet the vast amounts engulfed there never seem to benefit the people or the country. They neither advance in the Arts, Commerce or Christianity, thus demonstrating that gold *per se* does not make nations prosperous or happy. This is certain, however, that when Europe wants gold to send to Asia, she has to seek for it in the United States, a country for which she affects so much contempt. And we part with it freely, as no other nation parts with it, and yet continue to flourish almost without a check, either in war or peace. The probability is that a war is to break out on the continent, in the course of a few months. The Emperor of France proposes a new loan, and specie must be had before he can move his armies. The Rothchilds his agents, are doubtless in the market here to a large extent, and they sell their own bills to obtain it, and when these come due they will sell again. So that as long as their own credit stands good, and our supplies of the precious metals seem inexhaustible, they can command what amounts they need. If such a thing was commercially possible, as to stop the exports of specie from the United States, the Banks of France and England would break in ninety days.

It is understood that the Secretary of the Treasury, has no intention of issuing any more legal tender notes at present, thus checking any further tendency to expansion in commercial circles.

The condition of the Railway market will appear from our usual weekly reports. The rise and fall in prices appear to be nearly equal during the past week, while the Government securities remain firm and popular, large investments in them, been having made from abroad. This will continue, as a probable war with Russia, the occupation of Rome by the Sardinians, and the threatening attitude of Denmark in regard to the Duchies, are sufficient reasons for foreign capitalists to dispose of some portion of their means in other parts of the world than their own.

A vigorous effort is being made to obtain a change in the direction of the N. Y. Central Railroad, against which serious charges are made in some of the leading journals of this city. It will doubtless be a very active canvass on both sides.

The shipping merchants have addressed a serious remonstrance to the Secretary of the Navy, for permitting the rebel cruisers to annihilate our commerce. Mr. Welles replied by telling them he had dispatched thirty vessels after the Tacony which threatened Portland. But it happens the pirate was captured by the individual and private operations of the people of Portland themselves, so that Mr. Welles' defence amounts to nothing. Why does he not send thirty vessels after the Florida and Alabama with equal alacrity. It is not our business to enter into political discussions, but where the subjects of finance, navigation and commerce come up for consideration, we do not mean to keep silence.

It is reported that an extra dividend is to be made by the Galena and Chicago Union Railroad Company, in the form of shares to represent cancelled bonds in the sinking fund; also that the Illinois Central Railroad Company will pay in January a half yearly dividend of four per cent in cash upon all classes of stock, including the dividend scrip issued some years ago in place of the cancelled bonds of the company. The dividend will therefore be upon the following:

Full Paid Shares	$9,782,100
Scrip Shares, $90 each	7,566,210
Dividend Scrip	1,772,270
Total paid-up Capital	$19,120,580

The division on this sum for the whole year at the rate of 8 per cent. is $1,529,646. The net profit of the year will be, from present appearances,

at least, two millions. The Construction mortgage upon the Landed Estate of the Company not yet paid off is

In 7 per cent. Bonds	$11,466,000
In 6 per cent. Bonds	2,959,000
Total	$14,425,000
Interest charge of year	979,160

The cash collected for the interest fund alone from the Land Department this year will reach $750,000, or within $229,100 of the interest charge upon the Land Mortgage. The whole business of the Company for ten months of the year is as follows, showing an increase of 70 per cent. on 1862:

	1863. Jan. 1 to Oct. 31.	1862. Jan. 1 to Oct. 31.
Traffic	$3,671,149 77	$2,713,771 24
Cash collected	1,090,646 68	400,600 79
Sales	1,864,366 18	753,557 00
Total	$6,626,162 63	$3,867,929 03

The Utica and Black River Railroad Company have declared a dividend of two per cent, free of government tax, payable December 1.

The Baltimore and Ohio Railroad Company has decided to aid the Pittsburg and Connellsville road to the extent of one million of dollars.

By telegraph to Ross Dempster & Co., No. 24 Liberty street, dated San Francisco, 13th inst., Mining Stocks were quoted as follows, viz: Ophir, $1,625 per foot; Gould and Curry, $4,650 per foot; Potosi, $1,500 per foot; Savage, $2,825 per foot; Yellow Jacket, $950 per foot; Overman, $400 per foot; Sierra Nevada, $90 per foot; Crown Point, $1,000 per foot; Best and Belcher, $600 asked, $500 offered; Grass Valley, $70 per foot. Market for some stocks active, with considerable sales.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 17½@18¾.

Baltimore and Cuba Smelting and Mining Company.

This company has recently purchased the works of the Baltimore Copper Smelting Co. at Canton, in Baltimore Harbor, and now work both their own works at Locust Point and the works at Canton, turning out large quantities of superior Ingot Copper. The capital was increased in May, 1863, from $300,000 to $400,000, and is now to be further increased to $500,000, in shares of $100 each. The new stock is to be distributed pro rata among the present stockholders, and is worth 30@40 per ct. premium. A dividend of 25 per ct. in cash was paid in May last, and now 12½ per cent. in cash has just been declared for the 6 months ending 1st November, 1863. Under the able management of the President, Clinton Levering, Esq., the affairs of this company have assumed great prosperity, and its prospects are bright for the future. The company is entirely free from debt.

River Route Railroad into the Oil Region.

Samuel M. Lawrence, Chief Engineer of the Warren and Tidioute Railroad Company, has made a report on his survey of a route down the valley of the Alleghany river, from Irvine to Franklin, a distance of fifty-eight miles. The report says:

"The line of survey, starting from a point on the Philadelphia and Erie Railroad, about 600 feet west of Irvine (six miles west of Warren, in Warren Co., Pa.,) traverses the extensive Irvine flats for a distance of about two miles, then following the Alleghany river, on the west side, occasionally encountering bluffs—which are by no means serious; but the line generally remains on the river flats—on which the construction of the road, *in ordinary times*, would be comparatively trifling."

McGregor Western Railway.

The track of this railway is now laid five miles out from McGregor, and further operations will be suspended for two or three weeks until the rock cut at that point is opened, when track laying will be resumed with vigor. It is expected to open the road to Monona about the 15th of December.

Cross Town Railroad.

Cars have commenced running on the "Cross Town" Railroad. The principal streets through which they pass from the west side of the city are as follows: Along Thirty-fourth street to Broadway; down that thoroughfare to Twenty-third street; through Twenty-third to Fourth avenue; then to Fourteenth street, and through it to the east side of the city. In Fourth avenue

there are now four railroads. The cars of the "Cross Town" line are painted green, and attract much attention.

$2,000,000 LOAN
OF THE COUNTY OF NEW YORK.

SUBSCRIPTIONS are hereby invited to a Loan of Two Million Dollars, authorized by an ordinance of the Board of Supervisors, approved by the Mayor October 31, 1863, entitled "An ordinance for the procurement of Substitutes for drafted soldiers for the armies of the Union, provided the same can be counted and allowed on the quota of the City and County of New York in any future draft."

The proper books for such subscriptions will be opened at the Comptroller's office, on and after TUESDAY, the 17th day of November instant, and remain open until the whole sum shall be taken.

Subscribers will be required to deposit with the County Treasurer, at the Broadway Bank, within five days after entering their subscriptions, the amounts subscribed for by them respectively, and on presenting his receipts for the money to the Comptroller, they will be entitled to receive Bonds of the County for equal amounts, redeemable on or before June 1, 1864, with interest from the date of payment at the rate of six per cent. per annum.

MATTHEW T. BRENNAN, Comptroller.

CITY OF NEW YORK, DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, Nov. 16, 1863.

CITY OF NEW YORK, DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, Nov. 18, 1863.

PROPOSALS FOR $300,000 OF "THE NEW York County Court House Stock."—Sealed proposals will be received at the Comptroller's Office until SATURDAY, Nov. 28, 1863, until 2 o'clock P. M., when the same will be publicly opened, for the whole or any part of the sum of three hundred thousand dollars of "The New York County Court House Stock," authorized by chap. 167, of the Laws of 1862, and by an ordinance of the Board of Supervisors approved by the Mayor, April 18, 1862.

The said stock is to provide means to continue the construction of the new Court House on Chambers street. It will bear interest at the rate of six per cent. per annum, payable half yearly on the first days of May and November, and the principal will be redeemable in successive annual instalments of one hundred thousand dollars each, commencing with the first day of November, A. D., 1875.

The proposals will state the amount of stock desired, and the price per one hundred dollars thereof; and the persons whose proposals are accepted will be required to deposit with the Country Treasurer, within five days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Country Treasurer for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the stock, bearing interest from the dates of payment.

Each proposition should be sealed, and indorsed. "Proposals for New-York County Court-House Stock." and inclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if considered necessary to protect or promote the interests of the county. MATTHEW T. BRENNAN.
Comptroller.

ALEXANDER'S
ROOFING
CEMENT-PAINT
FOR
Railway & Steamboat Co's,
BUILDERS and BUILDINGS generally.

THIS PAINT is warranted not to Crack or Scale either on Wood, Iron, Tin, or Canvass.
The ingredients in its composition are all of a preserving and protective nature. This Paint is now extensively used by Railway Companies and pronounced much cheaper, more durable and satisfactory than what was previously used. It is 2-5ths heavier in body than any other Paint.
Give this Paint a trial, and if not found as represented no charge will be made for it.
Send for descriptive circular and references.

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

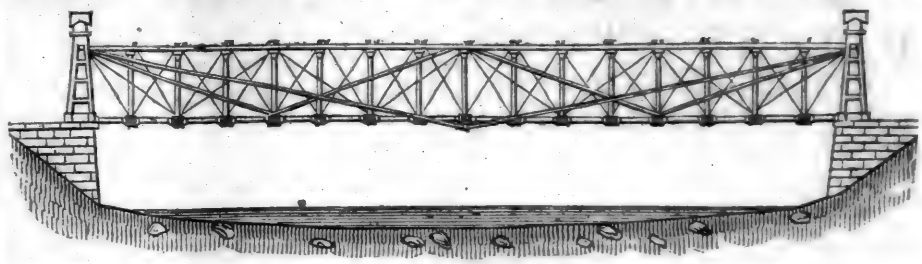
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 23 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$16 75
One-sixth waste of gas	3 11
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, **FINK'S PATENT IRON BRIDGE** in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

CHARLES D. GIBSON. RICHARD S. PALMER.

BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 979 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'

AND OTHER PATENTS FOR

SEATS AND COUCHES IN SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown st., PHILADELPHIA,** will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

KING'S NOTES ON STEAM LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—(Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—(Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—(Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $3. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

MUNN & CO'S PATENT OFFICE.

ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,

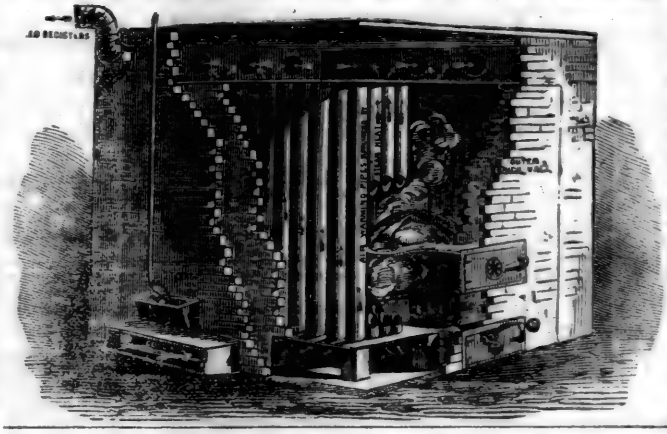
WILLIAMS & PAGE'S PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors, and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

American Railroad Journal.

New York, Saturday, November 28, 1863.

Report of the Commissioner of Agriculture.

By an act of Congress, passed May 15, 1862, a Department of Agriculture was established in Washington, "the general designs and duties of which" were to diffuse among the people of the United States, "useful information connected with Agriculture in the most general and comprehensive sense of that word, and to procure, propagate and distribute among the people new and valuable seeds and plants." It was made the duty of the head of the department, styled the Commissioner of Agriculture, to acquire and preserve all information concerning agriculture to be acquired by means of books and correspondence, and by practical and scientific experiments, of which he was to keep records; by the collection of statistics; to collect and distribute new and valuable seeds and plants, to test their value by actual propagation, and to distribute them gratuitously among agriculturists. These duties have been faithfully performed by Isaac Newton, Esq., the Commissioner, and many important results have attended his efforts. We have before us his official report for the year 1862, of which in all, one hundred and twenty thousand copies have been printed for distribution, through members of Congress, and directly from his own office.

There is no country in the world where its Government has done as much as ours for the diffusion of useful knowledge; we excel any of them in the number of our Exploring Expeditions; and we have also in the Smithsonian Institution a most valuable auxiliary of our system of improvement. And though we owe this last to the generosity of a foreigner, the fact that he endowed it in a princely manner is proof that he preferred entrusting his funds to secure the great interests of humanity, to the Government of the United States rather than to his own, and that he appreciated the spirit and intentions of our Republican system.

The report of Mr. Newton introductory to the volume is full of interesting historical facts. He recalls to our notice the circumstance that as late as 1784, our countrymen had been unable to make much progress in tilling the soil, and that General Washington was extremely anxious that a radical change should take place in our agricultural system, if we can be said to have had any.

The cast iron plough, first constructed in New Jersey, in 1797, did much to break up our long neglected fields, and from that time to the present, the improvement has been constant in the construction of the implements of husbandry. The American spade, axe, hoe, hay fork, reapers, drills, threshing machines and other such contrivances are superior to any others known or in use. The inventive genius of our people in this as in most other practical improvements, is without rivalry, and the consequences are seen and felt in the rapid culture of our new states and territories, and the almost fabulous productions of our roots and cereals. The United States furnished Great Britain in 1861 with 38,361,671 bushels of wheat or 40 per cent of all it imported, and of Indian Corn 11,705,034 bushels or 57 per cent of all it imported. The report recalls to public attention the opinions of the late Jesse Buel of this State, on the subject of a great national department of agriculture, which coming from such a source will always be entitled to the consideration of our National Legislatures. It appears that up to January 1863 the Commissioner had distributed throughout the Union 306,304 packages of seeds and cereals, besides a large quantity of choice cotton and tobacco seeds, cuttings, bulbs and plants. Of the former, a considerable number were especially sent to California through the medium of the Journal office, and to the United States of Colombia by its Consul in this city. We hear from both these places, that an experiment has been made in the culture of the articles, which promises success. Particular attention has been paid to the extension of the Alanthus, as a source of food to the silk worm; to the cottonizing of flax, the introduction of the Alpacca, as offering a superior article of wool, and of the opium poppy, always a valuable article of commerce, the cultivation of which was strongly recommended in the JOURNAL the last year, for the Pacific coast as a new article of export thence to China.

The volume before us contains many valuable articles, which relate intimately to our commerce, foreign and domestic.

That on the wheat plant from the pen of Mr. Lewis Bollman of Indiana is a valuable contribution to agriculture, and should be read by every grower of this cereal; so those from the same author on cotton and tobacco, which are being largely raised in States new to the culture; and on sorghum, a most valuable product of the West.

An article on American Wild Flowers, by Mr. Thomas Gardner, is exceedingly interesting both to scientific men and amateurs. It is not generally known that these are much sought for abroad, and are carefully cultivated in the finest British Conservatories, nor that until within a few years back, there were continually sent from Europe professional Botanists for the purpose of obtaining them, who made large sums by the sale of our seeds, bulbs and cuttings.

We also find in this volume, very accurate and useful descriptions, embellished with drawings of the most noted and excellent varieties of the apple and pear, worthy of the particular attention of our nurserymen and farmers.

Mr. G. W. Campbell furnishes an article of great importance on the grape, and its improvement by hybridizing, cross breeding and seedlings. It is now a conceded fact that ours is to be a great vine producing country, and will, in not many years

compete successfully in this respect with France and Germany. The manufacture of wine and brandy is going on in California, on a large scale; and Ohio, through the example of the late Mr. Longworth, has also extensively engaged in the culture of the vine and the preparing of its products as a beverage. From both these States, the samples are of extraordinary richness and flavor.

The articles on sheep husbandry, (illustrated) stall fed cattle, the horse, and poultry are all of importance ;and that on Entomology, in its relations to the vegetable productions of the soil by Mr. S. L. Bathyon, of Lancester, Penn., shows how useful science when practically applied, is in preserving them from decay and destruction. There are drawings of the most curious of these insects, which accompany the text.

Farm implements, the health of farmers' families, Coal oil, the Vermont marbles, the preservation of food, a scientific report of Mr. C. M. Wetherill, Chemist of the department; also that of Mr. W. Sanders, the Superintendent of the Experimental Garden, and some reports and tables of agricultural statistics of the States, and California in particular, conclude the volume, which is of very great value, not only for its facts, but the lucid treatment which they receive at the hands of the contributors.

As the JOURNAL, though its speciality is that of Railways, nevertheless devotes much of its space to subjects of finance and navigation, we deem this subject of agriculture in its various ramifications so closely connected with them, that we need make no apology for the insertion of this article. In the words of Mr. Newton, "agriculture furnishes the food of the nation, the raw materials of manufactures, and the cargoes of foreign and domestic commerce. When agriculture prospers, all other interests prosper, when this fails, depression, panic and ruin ensue."

And we may add that but for our agricultural products our great Railway system could neither have been inaugurated, or carried to its present enormous extent, have been in such constant activity, or realised such profits to the enterprising men that have constructed them.

Rutland and Burlington Railroad.

We learn from the Montpelier *Freeman* that Chancellor Barrett has refused the petition of the trustees of the first mortgage bondholders of the Rutland and Burlington Railroad to take the road out of the hands of the trustees of the second mortgage bondholders and give it to them, or to appoint receivers until the suit for the foreclosure of the first mortgage is decided.

Trains from New York to Washington Direct.

For the first time, on Monday, 23d inst., a train of passenger cars from New York passed through Philadelphia direct to Washington, and also a train from Washington to New York. The trains from New York pass over the Philadelphia and Trenton Railroad until they connect with the Richmond branch of the Reading Railroad, and and thence across and down the banks of the Schuylkill to the Junction Railroad, and over that until it connects with the Pennsylvania Railroad, and by this means reaches the Baltimore road. This is the ronte which the property owners along the line of the proposed connecting road desire the Philadelphia and Trenton road to adopt. For the present, there will be two through trains daily passing over this route. Before the first of January all the trains, both freight and passenger, are expected to run between New York and Washington without any change whatever, using locomotive power, by the Junction railroad.

Oswego and Rome Railroad.

This enterprise is progressing favorably. Those having the work in charge are laboring energetically, and we understand that four miles of the grading at the terminus will be completed in a few days, while within two miles of our city four hundred men are busily engaged in "casting up a *rail*-way." The road will be finished on time, judging from the progress already made.—*Oswego Times.*

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 16th inst. Hon. John P. Kennedy was called to preside, and Mr. J. I. Atkinson was appointed Secretary.

On the organization of the meeting, John W. Garrett, Esq., the President of the company, explained briefly the causes which had led to the delays in furnishing the Annual Reports. The Report for 1861 (being the Thirty-fifth Annual Report,) was then presented by the President. It is as follows:

OFFICE OF THE BALTIMORE AND OHIO RAILROAD COMPANY, Oct. 1st, 1863.

At the annual meeting of the stockholders of the Baltimore and Ohio Railroad Company, held in Baltimore on the 18th of November, 1861, the President and Directors submitted the following statement:

"OFFICE OF THE BALTIMORE AND OHIO R. R. Co., Baltimore, Oct. 1, 1861.

"The charter of the Baltimore and Ohio Railroad Company makes it the duty of the President and Directors to exhibit to the Regular Annual Meetings of the stockholders a clear and distinct statement of its affairs for the preceding year.

"In accordance with this requirement, annual reports have, heretofore, been uniformly submitted. On this occasion, however, the President and Directors find it impossible to accomplish the usual course; and—in view of the condition of the road, and the circumstances affecting the entire business of the company, which are too well-known to require recapitulation—are obliged to postpone the accustomed statement. Whilst the delay has become a necessity, from the destruction of the bridges and much other property of the company, especially from Harper's Ferry to Cumberland, and the consequent cessation of the use of the Main Stem between those points, it is hoped that, at an early period, the entire line can be reopened. So soon as this highly important result can be achieved, the masters of transportation of road, and of machinery, will proceed to obtain the requisite data, to ascertain accurately the extent of damages, the state of the supplies of the road, and of the machinery, in order to prepare the reports of their respective departments.

"To meet promptly the unprecedented crisis, and the difficulties by which it has been surrounded, vigorous and continued efforts have been made by the most careful and economical system, in every branch of its affairs, to protect and promote the interests of the company.

"Full preparation is also being made to restore our great artery for effective service at the earliest practicable moment.

"It is gratifying and proper to inform the stockholders that the first six months of the fiscal year presented a large and profitable traffic, and that, notwithstanding the interruption of its business, the immense destruction of its property, and the grave and varied embarrassments complicating the management, the Board have been able to meet all the engagements of the company, and expect to continue to maintain its credit and financial position at that high and reliable standard, so important to all the great interests involved. The full report of the affairs of the company, for the fiscal year, will be furnished as early as the requisite statistics shall be obtained——"

The hope then expressed that at an early period the entire line would be re-opened was not realized. General possession was taken by the confederate forces on May 28th, 1861, of more than one hundred miles of the Main Stem, embracing chiefly the region between the Point of Rocks and Cumberland. Occasional movements were also made, accompanied by considerable destruction upon the roads between Cumberland and Wheeling, and Grafton and Parkersburg, during this fiscal year.

The protection of the Government was not restored throughout the line until March, 1862, when the reconstruction was pressed with great energy, and the road re-opened on the 29th of that month.

During this period the destruction of the property, bridges, and tracks of the company was of the most extensive and serious character.

The large and costly machine shops and engine houses at Martinsburg were greatly damaged, fourteen locomotives and tenders, and a large number of cars, much machinery from the shops, and portions of nine additional engines were taken from the road and transported by animal power over turnpikes to Southern railways, and thus entirely lost to the company.

Forty-two locomotives and tenders, 386 cars, chiefly coal, twenty-three bridges, (including three between Cumberland and Wheeling, three on the Northwestern Virginia road, and the great bridge at Harper's Ferry,) embracing one hundred and twenty-seven spans, and a total length of 4,713 feet, were also destroyed or damaged to a great extent, by fire, and numerous engines and cars were thrown into the Potomac, the Opequon and other streams. Thirty-six and a half miles of track were torn up, and the iron and track fixtures removed for use on Southern roads. The lines of telegraph for one hundred and two miles, two water stations, and much other valuable property, were also destroyed.

When this information was ultimately obtained, the unadjusted condition of the accounts of the company with the Government further postponed the preparation of the annual reports. During the past month the terms of settlement for the general services of the company have been decided upon, and the President and Directors are therefore enabled to present the requisite statements and to prepare the reports for the past fiscal years.

Under the extremely difficult and adverse circumstances connected with the management, the system of economy and thorough supervision of the expenditures of the company have again produced results fully as favorable as could have been anticipated.

The Board, therefore, present the accompanying reports from the Treasury, Transportation, Road and Machinery Departments, with satisfaction.

I.—OF THE MAIN STEM.

The liabilities and assets of the company are shown in the Treasurer's Statement A. The Revenue and Working Expenses are exhibited in Statement B.

The gross earnings of the Main Stem have been $3,211,425 70, showing a decrease of $710,777 24, compared with the preceding year, and of $407,192 75, with the fiscal year of 1859.

The expenses of keeping the road and machinery in repair have amounted to $1,891,094 91, being 48.31 per cent. upon the earnings, exhibiting an increase of 2.10 per cent., compared with the previous year, and a decrease of 8.25 per cent., compared with the fiscat year of 1859.

The following analytic statement is presented, in order to furnish particulars of earnings and expenses, in comparison with the two preceding years:

Main Stem.—Comparative statement of the earnings and expenses for the fiscal years 1859, 1860, and 1861:

	1859.	1860.	1861.
Earnings	$3,618,618 45	$3,922,202 94	$3,211,425 70
General expenses	28,481 65	32,730 08	20,743 49
Losses by accidents, &c.	7,644 71	4,766 81	6,790 99
Expenses of Transp'n.	533,487 03	480,467 26	416,837 97
Repairs of railway	346,206 58	418,520 19	465,074 19
Repairs of water stat'n.	7,249 99	5,087 64	3,918 16
Repairs of depots	18 547 08	26,431 69	26,964 86
Repairs of bridges	18,588 38	30,522 19	42,612 53
Repairs of telegraph	2,377 70	2,798 75	2,595 73
Repairs of stationary machinery	24,543 84	25,809 37	17,456 01
Watching cuts	30,765 59	29,421 80	22,819 90
Watching tunnels	1,443 15	1,632 60	1,225 80
Watching bridges	6,168 95	6,393 65	7,948 85
Pumping water	9,917 53	6,782 70	7,601 92
Repairs of locomotives	281,458 16	230,794 72	138,005 79
Repairs of dump cars	1,959 16	1,314 63	1,407 90
Repairs of pass'g'r cars	49,308 50	38,088 71	25,691 14
Repairs of burden cars	170,798 64	151,843 31	77,496 38
Cleaning engines & cars	39,661 95	32,805 25	23,238 00
Contingent expenses of machinery departm't.	3,149 25	3,437 83	1,306 96
Fuel	73,517 36	73,873 17	71,519 26
Preparing fuel and filling tenders	20,802 54	13,087 76	9,929 17
	$1,684,997 84	1,616,615 61	1,391,094 91

It is shown that the earnings, in comparison with the preceding fiscal year, have decreased $710,777 24; and that the working expenses have been reduced $225,520 70, exhibiting a comparative decrease of net profits of the Main Stem of $485,256 54. As compared with the fiscal year 1859—the decrease of earnings being $407,192 75, and of the working expenses $293,902 93—the decrease of net profits amounts to $113,289 82.

Notwithstanding the serious embarrassments of its business and the reduced earnings, the company continued to make its purchases for cash, and maintained itself entirely free from floating debt.

By comparing the financial condition of the company presented at the close of the preceding fiscal year, it will be seen that the following payments were made:

For increase of the sinking funds, exclusively by investments of the current net earnings, viz: The sinking fund for the redemption of the City loan to $763,084 45, being an increase of	$50,238 00
For the redemption of the mortgage debts to $686,055 06, being an increase of	117,500 00
For the redemption of the ground rents at Camden Station, $81,469 93, being an increase of	6,500 00
Aggregate increase of sinking funds	$174,238 09
For rolling power—payment to Ross Winans for locomotives, under contract assumed from the Northwestern Virginia Railroad Company	17,024 00
For additional advances under the agreement, after crediting all earnings received to the Northwestern Virginia Railroad Company for payment of interest, (including $45,000 on the bonds of that company, guaranteed by the City of Baltimore,) and for expenditures in improving the condition of the road, &c.	259,061 61
For semi-annual cash dividend of 3 per cent. on the capital stock, on October 27th	303,387 00
For semi-annual cash dividend of 3 per cent. on the capital stock, on the 16th April last	303,396 00
Exhibiting a total of	$1,057,106 70

The balance of cash in the Treasury on the 30th of September, 1861, was $30,565 20, after deducting $165,000 for payment of interest on the city loan and the bonds of the company, which matured on that date.

The uncollected earnings amounted to $885,176 26, a large portion of which was due from the United States.

Statement C of the Treasurer presents the account of profit and loss.

After charging interest and ground rents for the twelve months, $895,513 09, and crediting the dividends and the rent received for six months from the Washington Branch, the increments of the sinking funds, house rents paid into the treasury, the difference in the amount of materials on hand in the machinery department, and the earnings, less all expenses—the net gain is shown for the fiscal year of $1,178,614 07, being upwards of eleven and a half per cent. on the capital stock.

After all deductions, including semi-annual dividends, paid October 27, 1860, and April 16th, 1861, which amounted to $606,783, the profit and loss account presented a surplus of $4,312,977 43.

In connection with these results, it was requisite that a sufficient amount should be reserved for the restoration of the equipment and property of the company lost and destroyed during the year.

II.—Of the Washington Branch.

The financial condition of the Washington Branch is shown by the statements of the Treasurer, D, E and F.

It will be seen by statement E that the earnings for the year amounted to $438,139 69, exhibiting a decrease of $24,740 75 compared with the previous year.

The partial expenditures charged were $116,415 34, being $56,626 99 less than in 1860, which produced the net sum of $321,724 35, and presented an increased comparative gain of $31,886 24.

The ratio of expenses to earnings, for 1859, was 39.28; for 1860, 37.38; and for 1861, 26.57 per cent.

A semi-annual dividend of 4½ per cent. was paid in October, 1860, and the same in April, 1861.

During the first six months of the fiscal year the accounts of the earnings and expenses were kept upon the same principles as for previous years.

Upon the commencement of the war in April, 1861, the character of the business of the road materially changed. In order to meet the requirements of the Government for prompt and heavy transportation it became necessary to use a large portion of the engines and general equipment of the Main Stem, and the services of its officers and employees.

Under these circumstances a system has been adopted by the Board by which the earnings are equitably divided, upon a basis requiring all the expenses connected with transportation, the use and repair of machinery, and of the shops and stations of the company in Baltimore, to be paid and furnished by the Main Stem, the expenses of the road department alone being charged to this road.

Of the expenditures upon the road, charged during that year, a large sum was for the construction of additional track and sidings, thus adding to the permanent improvement and facilities of the road.

It is satisfactory that, under such serious interruptions, derangement of its business, and the peculiar difficulties to which it was subjected, the Washington Branch has realized this improved net result.

III.—Of the Northwestern Virginia Railroad.

Statement G, of the Treasurer shows that the earnings of this road, for the fiscal year, amounted to $350,531 93, and the working expenses to $309,922 14.

The exhibit is accompanied by the remark that "in consequence of the incomplete condition of this road, considerable sums which, from the difficulty of accurate adjustment, appear in the statement charged as repairs, properly belong to construction," thus explaining the large ratio of working expenses.

The earnings were $81,328 61 greater than for the previous year, whilst the expenses were increased $115,335 49.

The ratio of working expenses to the earnings for 1858, was 102.12; for 1859, 82.55; for 1860, 72 28; and for 1861, 88.41 per cent.

General Remarks.

The aggregate earnings, working expenses and net results of the Main Stem, Washington Branch, and Northwestern Virginia Road for the fiscal year have been, viz:

	Gross Earnings.	Expenses.	Net Earn'gs.
Main Stem	$3,211,425.70	1,391,094 91	1,820,330 79
Washington Br.	438,139.69	116,415.34	321.724.35
N. W. Va. R. R.	350,531.73	309,922.14	40,609.59
Total	$4,000,097.12	$1,817,432.39	$2,182,664.73

During the year five thousand eight hundred and one tons of rail were used, relaying sixty-one and three quarter miles of the Main Stem with new iron. One hundred and fifty-one thousand three hundred and thirty-seven new cross-ties were placed in the track. The condition of all portions of the road in possession of the Company was fully maintained.

The receipts for passengers on the Main Stem, which included the transportation of troops, were $887,159 04, presenting an excess over the preceding year of $189,423 60.

It is remarkable and peculiarly gratifying that although the Company was environed with most unprecedented dangers and difficulties, yet this large and increased transportation was conducted without an accident involving the life of a single passenger.

In closing this report, the Board cannot withhold a special tribute of admiration and regard for the singular courage, skill and fidelity exhibited by the officers and employees of the entire service. Their effective devotion to their duties in the midst of unparalleled losses and perils has enabled the Company to realize relatively satisfactory results, and has elicited universal remark and appreciation. By order of the Board.

John W. Garrett, President.

No other business being presented, the Stockholder meeting adjourned for the purpose of electing Directors to serve for the ensuing twelve months.

Messrs. John P. Kennedy, Wm. J. Albert and Miles White officiated as Judges, and on counting the votes it was found that the following gentlemen were unanimously re-elected by a vote of 27,503 shares:

Johns Hopkins, Samuel W. Smith, Francis Burns, William A. Hack, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, James Harvey, William Heald, Galloway Cheston, William W. Taylor, Samuel Kirby.

At a subsequent meeting of the board of directors, John W. Garrett, Esq., was re-elected President of the company for the ensuing year by an almost unanimous vote.

Michigan Southern and Northern Indiana Railroad.

By the following circular, issued on the 12th inst., it will be seen that important changes have been made in the management of the M. S. & N. I. R. R.:

Toledo, O., Nov. 12, 1863.

Mr. Henry H. Porter is appointed General Superintendent of this Company to enter upon his duties immediately. His office will be in Toledo.

Mr. Charles Paine is appointed Chief Engineer of this Company, to co-operate with the Department of the General Superintendent, and is charged with the duty of maintaining the Works of the Road. He will enter on his duties on December 1st prox., or as soon as he can be relieved from his present position.

The office of the Chief Engineer will be at Toledo.

M. L. Sykes, Jr.,
Vice-President.

Mr. Porter has for several years past occupied the position of General Freight Agent of the Road at Chicago.

Safety Platforms.—Bumpers and Couplings.

We recently called the attention of our readers to an invention of Col. Miller, a practical railroad Engineer of Wisconsin, by which it would appear absolute safety can be secured to passengers in railway trains. In other words, that in case of collisons, running off the track, &c., the trains would neither telescope nor drag each other off. If there be any possible contrivance to provide against these disasters, it should receive the immediate attention of our Eastern Companies. Col. Miller has obligingly sent us the following description of his inventions. They consist of a peculiarly constructed *platform* and *bumper*, and a *coupling* adapted to the platform, and also applicable to ordinary freight cars. The platform is strengthened by a strong iron beam which acts also as the coupler, and has a "stop" or "gate," to prevent accidental uncoupling, the whole so contrived and arranged as to constitute a *neat*, tasty and *artistic*, coupling while its composition and construction are as simple and cheap as the "bumper link and pin" now in use. The following are some of its results:

1st. The cars couple themselves upon coming together.

2nd. They are coupled as close together as desired.

3rd. The train is shortened, bringing the resistance nearer the power.

4th. The cars can be pushed or moved on the yard without coupling, if desired.

5th. They can be attached to cars as now in use, and *coupled with other couplings.*

6th. The couplings are not rights and lefts, but are all exactly alike, and consist of a "*coupling beam*" and "*stop.*"

7th. They admit all the necessary or desirable "Shuck" or motion of the cars, longitudinal, lateral or vertical.

8th. They will not uncouple by jarring or "Schucking," on a rough road provided the cars keep on the track.

9th. They can be uncoupled at full speed, without "slacking" the train, to make a "running switch."

10th. They can be uncoupled easier and quicker standing or running, than any contrivance now in use.

11th. If desired almost all the "Shucking" of the cars may be prevented.

12th. They will support the car body, in case a truck, axle or wheel shall break, and carry the same to the next or any other station or depot.

13th. By a simple and cheap modification, they will uncouple when the car runs off the track, the uncoupling to occur at any stated distance from the track.

14th. They strengthen the platform, and together with its peculiar construction, render the breaking off of the platform almost impossible.

15th. The platform is so constructed as to act also as the "Bumper," and, as the platform cannot be broken off, and the coupling prevent the platform from getting *upon* or *under* each other. "Telescoping" must be impossible.

16th. As the adoption of this invention involves, in some instances, the construction of new platforms, the difficulties caused by the variation in the height of platforms may be remedied.

17th. Passenger car platforms may vary in height from 1 to 5 inches without any inconvenience in bumping or coupling.

18th. Freight cars may vary from 5 to 10 inches in height of bumpers without any inconvenience in coupling or bumping.

RESULTS.

The 1st result is valuable in adverse proportion to the losses in human life and limbs, by going between the cars to couple them.

The 2nd is valuable to passenger trains, as it brings the cars close together, shutting out a large portion of the dust from the track, and rain and cinders from above, and prevents persons from falling between the platforms.

The 3rd is valuable to freight and all other heavy trains, as it enables the engine to draw them with less power, or a greater number of cars with the same power. And particularly a road having steep grades and sharp curves. It will also prevent men upon freight trains from falling between the cars when in motion.

The 4th, 5th, 6th, 7th and 8th are, at least, equal to that of any other coupling now in use.

The 9th, 10th and 11th are great improvements upon the coupling now in use.

The 12th is a valuable improvement, as it prevents long detention by "*breakdowns*" on the track.

The 13th is valuable, as the car that runs off the track may draw others after it unless it is detached.

The 14th is very valuable. In time of imminent peril the safety of the company's property, and the lives entrusted to their care may depend upon the coolness and courage of the Brakemen. "Coolness and courage" are promoted by a sense of safety. The post of the Brakeman is upon the Platform. Make *that* the safest place and you will find him *there* in time of danger.

The 15th is most valuable to Passenger coaches, for, as the bumpers, couplings and platforms are now constructed and used upon all the roads that we have seen, "*Telescoping*," which is the running of one car into another like the joints of a telescope, is almost a sure consequence of a collision or a "run off the track" even at a low rate of speed.

The 16th is calculated to bring all railroad platforms to the same height. This is desirable, for although these couplings will work better than any other on cars or platforms of different heights, yet, it is better to make the platforms all of the same height.

The 17th is in reference to old cars, too old to warrant *further expense.*

The 18th relates to freight cars, they are frequently altered in height by changing the trucks, substituting sound for broken ones, as the trucks are not always all of the same height, the change alters the height of the car and bumper. These differences range from 1 to 6 inches on all cars, (old and new) but in new cars alone from 1 to 3 inches. These bumpers will accommodate themselves to any changes and differences, and all cars having them on, will couple when they come together.

These ideas of Col. Miller, appear to us to be original and fully sustained by his comments. We learn that several Engineers in the West to whom the drawings and models have been shown, approve of the invention; but as the capital and the management of the Western Companies are mostly in New York, it is here the first applications of the improvements should be considered.

It is due to the traveling public that these new platforms and couplings should be immediately tried on some of the roads terminating in this city, where we have had our full share of accidents. And we presume there is in the management of these roads, scientific knowledge enough to appreciate the principles on which Col. Miller proposes to put an end to an unnecessary destruction of life.

New York Central Railroad.

At a meeting of the directors of the New York Central Railroad Company, held at the office of the company, at the Exchange, in the city of Albany, on the 19th and 20th days of November, 1863:—

Present—Erastus Corning, Albany; Dean Richmond, Buffalo; John H. Cheilell, Auburn; Alonzo C. Paigh, Schenectady; John V. L. Pruyn, Albany; Nathaniel Thayer, Boston; Livingston Spraker, Pal Bridge; Jacob Gould, Rochester; Cornelius D. Tracy, Troy; Charles H. Russell, New York; Richard M. Blatchford, New York; Hamilton White, Syracuse; H. H. Martin, Albany.

Messrs. Blatchford, White and Tracy laid before the Board a circular to the stockholders of the company, issued by them on the 16th inst., in reference to certain charges publicly made against the administration of the road, which was read, and the subject to which it related considered. Whereupon it was unanimously—

Resolved, That this Board approve the course thus adopted, and both officially and personally assure the stockholders of the company that its affairs have been managed without reference to the advancement of any particular party, but with the view in good faith of promoting the business of the company and its financial prosperity, in which the members of the Board as stockholders have a large interest.

Resolved, Unanimously, that the Board point with great satisfaction to the act that nearly all the large permanent improvements made since 1854 on the line of the road, and its business accommodations and facilities, which have added largely to its value and efficiency, have been paid for out of income, and the debt of the company at the same time largely reduced by the operation of its established sinking funds.

On motion this further minute was also adopted:—

The Board might perhaps rest here, but as the usage of the company has been to present the annual report of its condition and affairs required to be made by law at the stockholders' meeting in December, they do not consider it improper at this time, when the company is assailed, and the conduct of its directors misrepresented, to anticipate somewhat that which would otherwise have been delayed till that meeting.

On the occasion of the dividend declared in July last, the very favorable results of the business of the road had not been fully developed; nor, in the opinion of a majority of the Board, sufficiently so in the receipts down to June to sanction a dividend beyond three and a half per cent then made. Now, however, the experience of the successful operations of the company, and their realization of largely increased income, determine them to divide to the shareholders the result of this increased prosperity of their company, and next month to declare a semi-annual dividend for the current six months ending the 31st of January, 1864, of five per cent, with the confident hope that this rate can be hereafter maintained.

A copy from the minues.

ROBERT L. BANKS, Secretary.

Wallkill Valley Railroad.

A new railroad is to be constructed in this State under the corporate name of the Wallkill Valley Railroad. Its location and prospective advantages are thus described:

It will diverge from the Newburg branch of the Erie Railway at Washingtonville, and pass through the northern portion of Orange county, and, touching at the village of Walden, will enter Ulster county, and termin te for the present at Shawangunk village, on the Wallkill river, thirteen miles from the starting point, and seventy-three miles from New York via the Erie Raiway. The survey of the route has been made, and the cost estimated at $16,320 per mile, or a little over $212,000 for the entire construction.

The country through and into which it penetrates cannot be surpassed for healthfulness, productiveness and beauty of natural scenery, and is without a rival in its capacity for dairy products, besides abounding with fine water power, very little of which is yet made use of.

The produce of this magnificent valley is now carted by the farmers across the grain of ridges and valleys to Newburg, from ten to twenty-five miles, the difficulties of which transit debar them from selling many articles, such as fruits, vegetables, milk, etc., and also from the advantages of having large numbers of boarders from New York during the summer. With this road constructed, cheap and easy access would be secured into that country, and a new field opened for milk and other supplies to the citizens of New York, and a new region furnished them to retire to by rail during the hot and sickly summer months. The road will eventually be extended on north, down the valley of the Wallkill to Kingston, the county seat of Ulster, and so on to Catskill and Albany, making a west side road, so much needed by the people west of the Hudson river.

Union Pacific Railroad.

The appointment by the President of Springer Harbaugh of this city, and J. T. Carter of Illinois, as the two Government Directors of the Pacific Railroad, was announced yesterday by telegraph. No selection could have been more judicious, and none could have given greater satisfaction in this community, where he has been so long and so favorably known, than that of Mr. Harbaugh. If the President has found in his Illinois colleague a man of equal intelligence, honor, probity, and well matured business capacity, as he has found in Mr. Harbaugh, he has indeed been fortunate. It is a position of vast responsibility, requiring the exercise of great firmness, clear and comprehensive judgment, and farseeing sagacity.—*Pittsburg Gaz.*

Dummy Engines.

The Philadelphia and Frankford Railroad Company have, for some time past, agitated the subject of employing dummies for the road, instead of the little horse cars now in use. The track of the new road, which has been recently constructed in the middle of the plank road leading to Frankford, prevented the employment of these engines sooner. The road was built strongly and substantially, and a line of cubical stone blocks braced against the rails, to prevent them from slipping, extended along the entire track. When the dummies were placed upon the road, the stones were found to be elevated too much for the engines, and workmen were employed to break them down.

Last week the dummies ran between this city and Frankford, more as a matter of experiment than for a permanent thing. They succeeded admirably. Up hill and down hill, they ran with the same ease as on a direct track. The shortest curves were turned without difficulty, and when stopped on the curve no trouble was experienced in starting. The usual time between the city and Frankford is forty-five minutes. The dummies did it in nineteen. They have the front platform enclosed, and are a little longer and higher than the present cars, and are heated by pipes set in the floor, under the feet of the passengers. An alarm bell is stationed on top of the engine. The company at present employs three, and more are building.—*Philadelphia Inquirer.*

Frankford and Holmesburg Railroad.

This company has published its prospectus, containing briefly a statement of the necessities and advantages which have impelled it to undertake the construction of a railroad from Frankford to Holmesburg and Bustleton. The citizens of that vicinity were not sufficiently accommodated with facilities for traveling to and from the city by the only railroad line in that vicinity. This part of the country is one which is believed to be as attractive and inviting a residence as Germantown and Chestnut Hill, and if similar traveling accommodations are extended, will soon rapidly increase its population, as there is a continually growing demand from the city, for desirable places of residence in the country. The advantages that will accrue from the construction of the road seem to be two-fold, viz., first, to property holders themselves, in the enhanced value of their estates and the increased facilities of transportation; and second, to the whole population, in having a more convenient and easy way of communication with the city. Bustleton, and its neighborhood, especially, will then have what is now so much needed, an outlet to the city for both people and products, and the advantages of business men and retired citizens locating in that beautiful and attractive region of country. Trade will be stimulated by the necessary increase of travel and transportation in the city itself, and thus the new road will be of mutual advantage to town and country. The road is to be worked with "dummy" engines at fares as low as the city rates, and the cars run hourly or half hourly as the wants of the people may require. From Holmesburg to Frankford will be run in fifteen minutes, and thence to the city depot of the Frankford road, by steam, in twenty minutes, making thirty-five minutes in all. The prospects of the road are so favorable that the company believe it will be dividend paying very soon after it commences running.—*Philadelphia Ledger.*

Union Pacific Railroad.

"We had the pleasure yesterday of making the acquaintance of B. B. Brayton, Esq., Civil Engineer, who arrived by Sunday evening's coach from the East, upon a reconnoisance for the Pacific Railroad route. He is in the employment of the Union Pacific Railroad Company. His errand, more particularly, is to examine the Cheyenne Pass of the Black Hills and Bridger Pass of the Rocky Mountains, for which purpose he starts north in a day or two. Mr. Brayton comes with the highest recommendations as an Engineer—in fact, his reputation is too well established in the West to admit of question.

"Mr. B. and Mr. Dye of the M. & M. Road, have already begun the Pacific Survey at the Missouri river, the former beginning at the mouth of the Platte and following up the margin of that stream, while the latter runs directly west from Omaha. The two lines intersect near Fremont, to which point they are completed before this time. Both were well along before Mr. B. left. From that point, a single trail line will be continued onward to the mountains.

"We hope that before his return to the East Mr. Brayton will devote a little time to the examination of the passes west of this city at the head of Clear Creek and the South Platte. By one or the other, we confidently believe will be found the shortest and most feasible route to the Pacific.—*Denver News, Oct. 27.*

Railways in India.

The railways in India now opened are; on the Great Peninsula, 495 miles; East Indian, 750¼ miles; on the Madras, 448 miles; Bombay, Baroda and Central India, 187½ miles; on the Scinde, 105 miles; Punjaub, 32 miles; Eastern Bengal, 110 miles; Calcutta and Southeastern, 28½ miles; Great Southern, 79 miles, in all, 2,235½ miles.

☞ We understand that the directors of the Old Colony and Newport railroad Co., passed over their line on the 23 inst., direct from Boston to Newport by rail; the grading and bridges being so far completed as to admit of that performance.

☞ The Montreal *Gazette* says that the people of New Brunswick, failing to get a railway to Canada, are preparing to build one to Maine, thus "binding themselves by another commercial link to the United States."

New York Canals.

It is understood that the Canals will be kept open, until the 5th of December next.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Nov. 13, 1863, was as follows:

Passengers	$22,273 56
Freight and live stock	37,334 49
Mails and sundries	1,668 92
Total	$61,276 97
Corresponding week of 1862	69,443 11
Decrease	$8,166 13

The earnings of the Grand Trunk Railway for the week ending November 7, 1863, were:

Passengers	$28,019 45
Freight and live stock	64,446 67
Mails and sundries	2,800 00
Total	$95,266 12
Corresponding week, 1862	99,522 53
Decrease	$4,256 41

The earnings of the Chicago and Northwestern Railway for the 2d week in November, 1863, were $37,655 42
Do., 1862 26,596 55

Increase $11,058 88

The approximate earnings of the Marietta and Cincinnati Railroad, in the 2d week of November, 1863, were $18,179 75
Do., 1862 13,766 18

Increase $4,413 57

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2d week in Nov. have been $33,524 88
Same week, 1862 32,741 28

Increase $783 60

Total from January 1, 1863	$1,061,144 19
" " 1862	1,047,701 03
Increase	$13,443 16

The earnings of the Chicago and Alton Railroad for the 2d week of November, 1863, were:

Passengers	$12,172 82
Freight	28,727 97
Sundries	1,661 84
Total	$42,562 63
Same week last year	34,937 85
Increase	$7,624 78

The earnings of the Galena and Chicago Union Railroad for the 2d week of Nov., 1863, were:

Freight	$42,266 26
Passengers	10,371 19
Mails	1,300 00
Total	$53,937 45
Same week, 1862	40,871 51
Increase	$13,065 94

Receipts from Jan. to Oct. 30, 1863	$3,671,149 77
Do. do. do. 1862	2,713,771 24
Increase	$957,378 53

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of October ult., compared with the same period of last year, were as follows, viz:

	1863.	1862.
From freights	$323,063 55	$245,520 16
" passengers	166,304 54	137,485 84
" express matter	2,700 00	2,600 00
" mails	7,825 00	7,825 00
" rent of railway	7,083 34	7,083 34
" miscellaneous	1,169 24	784 96
Total	$508,145 67	$401,299 30
Increase		$106,846 37
Earnings from Jan. 1 to October 31	$4,185,135 73	$3,010,092 30
Increase for 10 months		$1,075,043 43

Increase for October, 26.6 per cent.; increase to October 31, 35.7 per cent.

The receipts of the New York and Harlem Railroad for October, 1863, were	$129,120 68
October, 1862	107,092 76
Increase	$22,027 92

The earnings of the Chicago and Alton Railroad for October, were:

	1863.	1862.
Passengers	$69,189 34	$42,096 15
Freight	109,723 50	87,020 90
Miscellaneous	6,678 14	4,745 18
Total	$185,590 98	$138,862 23
Increase	$51,728 75	

The following is a comparative statement of the earnings of the Chicago and Milwaukee Railway for October:

	1862.	1863.
Passengers	$22,417 50	$31,309 29
Freight	11,683 61	16,040 80
Miscellaneous	1,505 82	2,846 39
Total	$35,606 93	$50,196 48
Increase		$14,589 55

The gross earnings of the Dubuque and Sioux City Railroad Company, for October, and for the first 10 months, were:

	For October.	Jan. to Oct., inclusive.
1863	$39,157 29	$207,368 74
1862	31,274 98	168,594 85
Increase	$7,882 31	$38,773 89

The earnings of the Erie Railway for October, 1863, were	$955,370 63
October, 1862	885,136 24
Increase	$70,234 39
The earnings of the Michigan Southern and Northern Indiana Railroad for October, 1863, were	$371,861 00
Do., 1862	325,818 00
Increase	$45,443 00
The earnings of the Hudson River Railroad for October, 1863, were	$302,173 96
" 1862	239,910 86
Increase	$62,263 10
The earnings of the Michigan Central Railroad for October, 1863, were	$375,487 00
Do., 1862	322,369 00
Increase	$53,118 00
The earnings of the Toledo and Wabash Railway for October, 1863, were	$151,052 00
Do., 1862	172,869 00
Decrease	$21,817 00
The earnings of the Galena and Chicago Union Railroad for October, 1863, were	$281,814 00
September, 1862	203,575 00
Increase	$78,239 00
The earnings of the Cleveland and Toledo Railroad in October, 1863, were	$140,013 00
Do., 1862	113,730 00
Increase	$26,283 00
The Chicago and Rock Island Railroad earned in October, 1863	$208,559 00
Do., 1862	153,927 00
Increase	$54,632 00
The earnings of the Housatonic Railroad for October, 1863, were	$32,822 64
Do., 1862	29,721 36
Increase	$3,101 28

The earnings of the Chicago and Northwestern Railroad for October, 1863, were as follows:

Passengers	$65,087 49
Freight	141,885 20
Mail	2,033 33
Express	1,411 67
Miscellaneous	58 33
Total	$210,476 02
September, 1862	124,786 76
Increase	$85,689 26

The earnings of the Rome, Watertown and Ogdensburg Railroad for October, 1862 and 1863, was as follows:

	1862.	1863.
From Passengers	$33,725 97	$23,580 48
" Freight	40,586 78	33,691 78
" Other sources	1,667 02	2,687 87
Total	$75,979 72	$59,960 13
Increase		$16,019 59

The earnings of the European and North American Railway for October, 1862 and 1863, have been as follows:

	1863.	1862.
Passengers	$6,077 62	$4,932 37
Freight	6,976 27	5,319 42
Mails & sundries	452 90	833 42
Total	$13,506 79	$11,085 21
Increase, 1863		$2,421 58

The earnings of the Cleveland and Pittsburg Railroad for October, 1863, were	$176,918 00
Do., 1862	162,349 00
Increase	$14,569 00
The earnings of the Milwaukee and Prairie du Chien Railroad for Oct., 1863, were	$205,054 00
Do., 1862	154,368 00
Increase	$50,686 00
From January 1, to October 31, 1863	$996,002 00
" " " 1862	979,626 00
Increase	$16,376 00
The earnings of the Catawissa Railroad Company for October, 1863, were	$36,306 90
Do., 1862	29,243 35
Increase	$7,063 55
The earnings of the St. Louis, Alton and Terre Haute Railroad for Oct., 1863, were	$144,736 12
Do., 1862	118,887 26
Increase	$25,848 86

The business of the Philadelphia and Reading Railroad Company for the month of October, 1862 and 1863, has been as follows:

	1863.	1862.
Received from coal	$668,891 56	$356,168 92
Do. merchandise	73,074 37	52,395 98
Do. travel, etc.	73,986 10	55,307 74
	$815,902 03	$463,872 64
Transportation, roadway, dumpage, renewal fund, and all charges	288,133 22	181,692 84
Net profit for the m'th	$527,768 81	$282,179 80
Do. previous 10 mos.	2,351,173 89	1,529,969 33
Total net profit for 11 months	$2,878,942 70	$1,812,149 13

Here is an increase of $1,066,793 in the net profits of this Company for eleven months of the current fiscal year, over the corresponding time last year, and last year's profits over all expenses and interest were equal to about eleven per cent. on all the Company's stock. The gross earnings of the month is $815,902 03, which is equal to $8,773 14 for each mile of the main line of the road in one month, the main trunk being 93 miles long. The business of the present month, which is the last of the fiscal year, will probably swell the net receipts for the year to about $3,400,000.

☞ The gold region on the Chaudiere river in Upper Canada is attracting considerable attention. Capitalists from New York and Boston are making investments there. A tract of between 60,000 and 70,000 acres of land in the township of Dorset, county of Bruce, has been purchased by a party from New York, who propose to work the mines in a systematic and scientific manner. We learn that a Canadian gentleman has taken an office in this city for the purpose of selling these lands, and raising capital to develop and work the mines.

Petroleum or Rock Oil.

This interesting product of the earth has become an article of great commercial value as well as scientific interest. From an export of five millions gallons last year, it has advanced to more than twenty millions this year; and it is estimated, that the home and foreign consumption combined will exceed forty millions of gallons.

Petroleum is by no means an article peculiar to the United States or to this era of the world's history. It is found in various parts of the different continents of the globe, and was well-known to the ancients. Herodotus refers to a spring in the island of Facynthus, now Zante, (one of the Ionian Isles,) which is at the present time producing petroleum, and which must have been flowing two thousand years. At Agrigentum in Sicily, it was collected and burned in lamps as a substitute for oil. In 1640 it was discovered in a number of places in the north of Italy, and subsequently it was used for lighting the cities of Parma and Geneva. It is also found on the borders of the Caspian Sea, at Rangoon in Burmah. In the Island of Trinidad, there is a lake consisting entirely of petroleum and asphaltum. It is called Tar lake, and is located about three quarters of a mile back from the sea from which it is separated by an elevated strip of land. It is about a mile in circumference, and is underlaid by a bed of coal. The "Tar" is used upon the sides of vessels as a protection and for the purpose of keeping off the *teredo* a kind of worm exceedingly destructive, which exists in that climate. Petroleum is also found floating upon the water around the volcanic islands of Cape Verde; and at the south of Versuvius a spring of it rises up through the sea. At Rangoon, in Burmah there are upwards of 500 wells from which 412,000 hogsheads of oil are annually obtained. It is stated that a large district has recently been discovered in Russia, which yields petroleum oil in great quantities. In this county the Indians were in the habit of collecting it on the shores of Lucca lake, and using it for medicine and for mixing war paint; it was sold under the name of Genesee oil. The oil was found floating upon the water and gathered by blankets thrown upon its surface, which becoming saturated and afterwards wrung, would yield the oil. Sometimes the Indians would fire the floating oil, in order to add to the excitement and grandeur of their midnight war dances. Its presence at Oil Creek Pennsylvania, was also known to the Indians and early settlers. That it was not earlier introduced as an article of merchandise into the commerce of the country is due not so much to the fact that it was not generally known to exist as to the fact that its value was undetermined. The discoveries made by Mr. Young of Scotland in the distillation of naptha from Boghead or Bathgate coal, and the identity of the crude oils with natural petroleum, led to investigations into, and the establishment of its value. A movement was first made in the regions of Pennsylvania in 1854, by Messrs. Eveleth & Bissel of New York; and Prof. Silliman investigated the nature of the oil. Nothing, however, was then accomplished. Subsequently, however, borings were made by other parties, and a large and steady flow of oil was obtained. A recent article published in the Oil City *Register* states that in the month of October, one year ago, the estimated amount of oil on hand there was from 75,000 to 80,000 barrels. Upon Oil Creek the amount of oil in tanks was variously estimated at from 100,000 to 150,000 barrels. At the present time the total amount on hand at that point is about 25,000 barrels; in tanks on the creek, 40,000 barrels. At about the same time last year the amount of crude oil in tanks at Pittsburgh was estimated at from 75,000 to 100,000 barrels. The estimated amount on hand there at the present time is from 15,000 to 20,000 barrels. In New York city, last October, the amount of oil on hand was estimated at from 75,000 to 100,000 barrels. The estimated amount on hand at the present time is estimated at from 140,000 to 151,000 barrels. The difference between the amount on hand at the present time and at the same time last year is from 120,000 to 150,000 barrels. The daily product of the wells on Oil Creek now is about the same as that of last year, viz: about 6,000 barrels; and the price is $6 25, and $6 50 per barrel in Oil City.

There is this peculiar feature connected with Petroleum; while it comes flowing to our feet, it is liable at any moment to cease flowing. Many wells have already given out, and many more probably will. It remains to be seen whether other wells yet to be dug shall continue or swell the supply. Considering the vast extent of our country and its wealth in minerals, we think we hazard nothing in the belief that the supply will continue, and in the main will increase aside from Pennsylvania and New York. Petroleum is found at Mecca, Ohio, and other springs are reported on Yellow Creek, 83 miles from Salt Lake City, and probably they exists at many other places without our knowledge. We think therefore that there can be no danger of the supply being permanently cut off.

Petroleum is of no definite composition; but consists of various oily hydrocarbous, which hold in solution paraffine, and solid bitumen or asphaltum. When of the greatest fluidity it resembles Naptha. As the proportion of asphaltum increases, the mixture becomes thicker and darker, resembling tar in appearance. By distillation at different temperatures various useful products are obtained, and have become articles of commerce. In the specifications of a patent obtained in England by one Du Buisson, no less than eleven distinct substances are described as resulting from its distillation. Enumerated they are as follows. First, a limpid, whitish volatile oil, almost without oder, useful as a solvent, or for illumination, and known as Naptha. Second, a straw colored oil. Third, a heavier oil adapted for lubricating purposes. Fourth, a red coloring matter, Fifth, Paraffine. Sixth, Grease for lubricating machinery, being a mixture of paraffine with oil. Eighth, an alkaline soap. Ninth, sulphate of ammonia. Tenth, a ferlilizing mixture prepared with the ammoniacal liquors; and eleventh, sulphate of alumina. The more volatile portion of Naptha consists of Benzine, familiar to all as an article of commerce, being extensively used as a substitute for turpentine in mixing paints, and for the removal of grease, &c., from light kid gloves, silks and woolen fabrics.

It in interesting in this connection to note the change that has been wrought in the region of Pennsylvania from which the oil has been chiefly obed. Venango county, where the wells are mostly located, in the year 1860, polled but seventeen hundred and thirty votes. At the state election in the year 1862, the aggregate vote polled was 5,060. This year the vote rolls up to 6,265. A few years since this county was one of the wildest and most sparsely settled in Pennsylvania.

But while the benefit received by a particular locality may be more apparent, the benefit derived by the country at large is no less certain or important. Aside from the fact that the export of the oil and its products goes to swell the balance in our favor, these products enter into our domestic commerce, and become useful in a thousand ways, and indirectly exert an influence to our advantage which it is impossible to compute in figures. Any estimate of it would be merely conjectural. We only know that it is great and increasing.

Liability of Carriers for Delay.

That carriers are liable for the damages arising from unjustifiable delay in the transportation of goods entrusted to them, is well settled. That they are not liable for the entire value of the goods in such case, as the measure of damages, is also well settled (Scovill *vs.* Griffith, 12 N. Y. 209). But it is still a mooted point whether they are liable for any depreciation in the market value of the goods during the period of such delay.

In the case of Wibert *vs.* Erie R. R. Co., (19 Barb. 36), the Supreme Court, in the 8th district held that such depreciation could not be taken into account; a decision re-affirmed by the same court in Jones *vs.* Erie R. R. Co. (29 Barb. 633). On the other hand, the same court in the 7th district rendered a decision directly adverse on this point, in the case of Kent *vs.* Hudson River R. R. Co. (22 Barb. 278).

A recent decision in the English court of Exchequer sustains the latter view, and holds the carrier liable for depreciation in the market price, as well as in the inherent value, of an article the delivery of which is wrongfully delayed.

The facts of the case were as follows:

The plaintiff, a hop grower in Kent, has sold to Messrs. Crosier of the Borough Market, London, eight pockets of hops to be delivered at the Bricklayer's Arms Station London, at 18*l.* per cwt. according to sample. The hops were sent to the Pluckley Station on the defendants railway, on the 20th October, consigned to Messrs. Crosier, whose carman applied for them at the Bricklayer's Arms Station on the 23rd of October, but was told that they could not be found. He applied again on the following day and received the same answer. On the 29th of October he called again, and found them in an open van. On examination it appeared that some of the hops were partially stained apparently from lying in a wet truck. On the same day the hops were sent to Messrs. Crosier's, who refused to receive them on account of their damaged condition, and by the custom of the hop market, they had a right to reject them. The plaintiff caused them to be dried, and when saleable which was not until the 19th of November, sent them to a factor who valued them at 8*l.* per cwt. Between the 29th of October, and the 19th of November the market price fell from 18*l.* to 9*l.* per cwt., and the damage to the hops caused a further diminution in value of 3*l.* or 4*l*; but for actual use by a brewer the hops when dried were

as good as ever. Evidence was adduced on the part of the defendant, to prove that the quantity of hops actually damaged by the wet, did not exceed eight pounds a pocket in six pockets, and that taking the value of the hops at 18*l.* per cwt., the damage was covered by the amount paid into Court.

The learned Judge told the Jury that the plaintiff was entitled to damages, for the deterioration in the value of the hops by reason of the wet, and also in respect of the difference in value, which occurred between the time when they ought to have been delivered, and when they were rendered saleable by drying. The jury found a verdict for the plaintiff, with 18*l.* damages beyond the amount paid into court in respect of the depreciation in the quality of the hops, and 65*l.* damages in respect of the depreciation in their value by reason of the fluctuation of the market. A verdict was entered for both these sums, and leave was reserved to the defendants to move to reduce the damages by the sum of 65*l.* This motion was made before the full bench.

MARTIN, Baron, declared it to be the unanimous opinions of the court, that the motion should be denied, saying. "It seems to me that the case is clear. We must assume that the hops were to be delivered in London on a certain day, and that by reason of the defendants' breach of duty, they could not be delivered until another day. It was proved that if they had been brought to market on the proper day, they would have fetched a certain price, but not being brought until a later day the market price in the meantime fell, and the value of the hops was diminished by the amount of 65*l.* If that be not a direct, immediate and necessary consequence of the defendants' breach of duty, it is difficult to understand what would be. It is said that the defendants had no notice of the purpose for which the hops were sent to London, but I think they must have known that they were sent for one of two purposes, either for consumption by the person for whom they were sent, or as was more likely to be the case to be sold for profit. It seems to me that Hadley *vs.* Baxendale, 9 Exch. 341 has no bearing on this case; and I think Smeed *vs.* Ford 1 E. & E. 602, was correctly decided. In my judgment the plaintiff is entitled to recover for this damage, because it is a direct and immediate loss consequent on the defendants' breach of duty. If this case should be taken to the court of error, I hope that court will be able to put the rule on an intelligent footing; but at present we must do the best we can with each particular case and decide it upon principles of reason and good sense."

CHANNELL, B.—I am of the same opinion. I agree with the doctrine laid down by this court in Hadley *vs.* Baxendale, and I also agree with the decision of the Court of Queens Bench in Smeed *vs.* Ford, which seems to me perfectly distinguishable from this case. There the court held that the plaintiff was entitled to recover for all the heads of damage, which were the direct result of the non-delivery of the thrashing machine; but an attempt was made to recover for damage not the necessary consequence of the non-delivery of the machine nor reasonably in the contemplation of the parties. Here the hops were delivered in a damaged condition, and it seems to me that there is no difference between their being delivered in that condition, and being kept upon defendants premises until dried because in the interval they were unsaleable. It must be ascertained what they were worth at the time they became available to the plaintiff as marketable goods, contrasted with what they would have been worth if the defendants had performed their contract. I do not know what other test can be applied for ascertaining the damage.

The plaintiff was therefore allowed to retain his verdict.

Celebration of the Opening of the Atlantic and Great Western Broad Gauge Railway to Cleveland.

The formal opening of the Atlantic and Great Western Railway to Cleveland, was duly celebrated in that city on the 19th inst. The train with invited guests which left New York on the 17th, was joined on the following day at Meadville by a delegation train from Cleveland, where both lunched together at the McHenry House. From this place the two trains moved on together to Cleveland, where a grand dinner was given the guests, to which succeeded a ball.

Wm. Reynolds, President of the Pennsylvania and Ohio divisions, presided at the dinner. Speeches were made by Mr. Reynolds, chairman, by Gen. Rosecrans, by George Willey, of Cleveland, Wm. Evans, Esq., of London, James Mason, Esq., and T. W. Kennard, General Manager, and by Gov. Yates, of Illinois.

The speech of Mr. Wm. Evans, one of the Directors, and an English gentleman, was remarkable for its being a discussion of American finance. He regarded the present prosperity of the North, as genuine and substantial—hardly without a parallel in history. He entertained no doubt that the national debt would be readily paid. So great was his faith that such would be the case, that he cheerfully invested the property of himself and children in the securities of the United States.

The citizens of New York as well as those of the great cities of the West may congratulate themselves on the fact that in ninety days, a broad and continuous railway track six feet wide will be open for business between St. Louis and New York. It has merely stopped on its way for a short time and branched off into Cleveland. The route which the Atlantic and Great Western has selected to reach the Mississippi, as will be seen by reference to the map, is one of the very best in this country. It subsidizes the interior interests of New York, Pennsylvania and Ohio, and makes Missouri one of its most important allies. It seizes on the agricultural and mineral products of these States, which before were without an outlet, except a most circuitous and embarrassing one, and it is the moving of their whole fields and mines, and oil wells to within forty-eight hours of the ocean. It makes St. Louis and Cleveland outerwards of our city with which business may as readily be transacted as with Central New York.

The history of this company is a remarkable and instructive one. It was a project of 1857, and from the start a failure, until it was taken in hands by a Western banker, who in the expectation of success and ample remuneration, threw himself into the breach and with it his fortune. He went abroad, visited the capitals where the largest and most enterprising bankers resided, laid before them his maps, plans, estimates and conclusions, and after several years hard work succeeded in procuring iron and money. Several of the high contracting parties who entered into engagements with him broke down before it fell into the hands of those who are now the principal owners and creditors. These gentlemen, among whom the house of J. McHenry & Co., of Liverpool, were conspicuous, advanced the funds for its construction, taking so large a margin in the rate of discounted capital, that at the present market value of shares and bonds they have nearly doubled their money. So that while the cost of the road, including discounts, interest and loss on sale of first bonds issued, is now tabulated at about $64,000, per mile, it is well-known that the actual cash cost per mile, for construction is not one-third of that amount, and yet it is now one of the best investments in this country; and its shares and bonds are of the firmest and most desirable character. It has had the good fortune to have had its construction and management placed in the hands of one of the most skilful and celebrated engineers of the day, T. W. Kennard, Esq., a graduate of King's College, London, and who had by his success in various great works in England and on the continent, obtained the entire confidence of the capitalists who employed him. On his recommendation, a number of these gentlemen advanced the requisite funds, some of them French, others Spanish, and the residue English. No American capital to any extent was obtained.

The construction of the road was like a miracle. Sixty miles were made during the year 1860. The war then interrupted its progress for a time, as the laborers enlisted in preference to remaining on the line. This deficiency was remedied by the importation of large numbers of foreign operatives and *navvies*, to the extent of 15,000 men. The work was resumed with spirit. Two hundred miles were put in operation in seven months, and now it is finished to Cleveland, 626 miles from New York by this route. Several other feeding branches are in part or wholly completed. When the main stem is finished to St. Louis, which will be on the first of January next, there will be a continuous broad gauge between that city and New York, of 1,200 miles. This will be traveled with ease and security in about 40 hours. Sleeping cars of the latest and most improved construction, for which the broad gauge gives great advantages, will be placed on the route, and restaurant cars in which meals will be served up with as much regularity as at a hotel. We shall in this way arrive at the perfection of railroad traveling, and but one more improvement is at present wanting; this is, springs to the seats in the cars.

The depot and hotel at Meadville, the main dining station between St. Louis and New York, are said to be the finest in this country.

The depot building is three hundred and twenty-seven feet in length, and about eighty in height. Through its centre run three tracks for the passenger trains. Wide platforms extend along both sides. Upon one side are the ticket office, telegraph office, reception rooms, and all the main offices of the company, elegantly and fully arranged for the transaction of business. On the opposite side is the new hotel, which is to be kept by Taylor, formerly of the Angier, Cleveland. The great feature of this hotel is the immense railroad dining hall, two hundred feet long, about

thirty feet wide, and thirty-five feet high, to the ceiling. It is profusely lighted upon both sides. The finish and adorning of the rooms are superb, being all in black walnut. Overhead, the rafters and stringers are in full view, after the style of Episcopal churches; while at the eastern end a great and stained glass window increases the resemblance. In range with the dining hall are the offices, &c., of the hotel, while the hotel proper extends as an L from the western end of the depot two hundred and ten feet. This is furnished and supplied with all the conveniences and luxuries of any metropolitan house. The grounds about the hotel are being graded and laid out artistically. Five acres immediately about the hotel will be laid out as a pleasure garden, with walks, arbors, fountains, &c. In short, the McHenry House, as it is called, will be one of the best to be found in all the States. The railroad company are in possession of a large quantity of land adjacent to the depot, which has heretofore been farm and meadow land, and are erecting very extensive works, which will be models of their kind.

Meadville has now about 7,000 inhabitants and is rapidly improving. It is situated on French Creek, a tributary of the Allegheny. Is 513 miles from New York by rail. Its population in 1860 was 5,000, and is now from 6,000 to 7,000. The building of the A. & G. W. has given a great impetus to business, and its opening will continue to increase trade and population. Meadville is the business centre of one of the finest sections of Pennsylvania, embracing Crawford, and portions of Venango and Mercer Counties, with a population not exceeding 100,000. A large direct trade is carried on here with the oil regions of the State. A branch of the A. & G. W. Railway extends to Franklin, on the Alleghany river, and is being pushed forward to Oil City. The French Creek extension of the Erie (Pa.) Canal affords water communication with Lake Erie and the Ohio River.

On the way home, at Meadville, the New York party organized a meeting, and passed resolutions complimentary to T. W. Kennard, General Manager and Chief Engineer; to Henry Sweetser, General Superintendent, and to Wm. Reynolds, President; to Messrs. McAndrew and Wann, General Financial agents of the company; and to the citizens of Meadville and Cleveland for their kindness and generous hospitality.

Regular trains are now running from New York to Cleveland, and the United States Telegraph Company has opened an office in the latter city. In short, the Atlantic and Great Western is a splendid success; it is doubling the value of property along its route, causing great improvements in all the towns it traverses, and is destined to be a favorite route from the Atlantic to the Mississippi. We consider it altogether a model road, and its directors, engineers and stockholders will be well repaid for their outlay, made without any noise or pretension, by an immense and lucrative traffic.

Among the improvements introduced on this road, is that of the Smith Air Light, of which we have on a former occasion spoken most favorably. An engine No. 28, the Marvin Kent bore this brilliant light during the night, and on entering Cleveland created almost a street illumination by its brilliancy. We learn that it is to be used on all the locomotives on this road, and if so the night trips will be made with as much safety as those in the day time. Mr. Kennard is a man of great professional accomplishments, and he has in all his arrangements seized on the latest improvements, not only to benefit the traveling public, but ensure the efficiency of his system of management.

Baltimore and Ohio Railroad.

This road has been subjected to the greatest difficulties during the present war. It has been cut, injured and destroyed in many portions of the line exposed to the rebel raids, and damaged to the extent of millions of dollars. Yet its indefatigable Direction and able Superintendents have never faltered in their management but have promptly repaired the line, often almost under the fire of the enemy. It affords a remarkable example of American skill, persistence, and courage.

At its depot at Mount Clare, near Baltimore, one of the most complete in this country, under the direction of Mr. Perkins, are to be seen some splendid new locomotive engines mounted on ten wheels. These are the counterparts of five which are running on the Washington Branch. By this new arrangement, the weight is more divided on the rails, and the tractive adhesion increased.

In the construction of these, numerous improvements have been added, one of which consists in an application connected with the furnace, fire-box and smoke-stack, which consumes the smoke and thereby removes that intolerable nuisance of dense clouds of smoke being wafted along the trains, and great care has been taken in order to equalize the weight upon the trucks and wheels.

These engines are about thirty feet in length with cylinders eighteen inches in diameter and twenty-six in length, and driving wheels five feet in diameter. The experience of such as have already been placed on the road is that of a complete triumph, and this, too, in the opinion of Northern builders. They are very easy upon the track, and always maintain the punctuality of the time-tables. The work of building five eight-wheel passenger engines has been commenced, and they will have the same improvements as those of the first class. All are constructed under the personal supervision of the Master of Machinery.

Some idea of the extent of work done at Mount Clare may be formed when it is learned that since the commencement of the present war there have been built there five hundred and twenty cars, and now arrangements are making for the construction of two hundred additional coal cars, and all these are to have iron trucks, instead of wood, which are much more durable. Of the passenger cars which have been made, sixteen are of the finest workmanship and most beautiful finish we have ever seen. All these are running on the Washington Branch, and they combine many conveniencies for travellers, and the interior presents the taste and elegance of the parlor and dining room.

The inside panellings are filled with a species of gold cloth, and those of wood, on the outside, have been polished and rubbed down until they present the gloss and brilliancy of the finest coach bodies. The corner panels are elaborately ornamented with gilded scroll work of rich design, which give an artistic finish to the whole. There is no unmeaning ornamentation about this work. There are now in the car finishing shops five more such railway carriages, all of which are receiving the finishing touch. One of these contains two apartments filled with berths such as are enjoyed on steamers, which will be used as a through car from New York to Washington.

Among the curiosities at the Mount Clare depot are the debris of the rails, locomotives, etc., which were destroyed by the rebels. There are successive piles of twisted rails, sections and rods of bridges, bolts, screws, car wheels, and boilers of excellent locomotives, fragments of coal cars, axles and demolished tenders.

These articles having unluckily fallen into the possession of the Rebels, they seem to have adopted the most effectual mode of destroying them. The rails, some of which are of the finest quality of English iron, after having been torn from the road-bed, were laid upon piles of cross-ties and fire applied to the latter. Whilst in a heated state they were dragged off by tongs and twisted and turned in almost every conceivable manner; and so did they treat other iron work of the Company, thereby developing a most demoniacal spirit of hostility to the road.

There are millions of pounds of this damaged iron, but it is not lost to the Company, for no matter how small the piece, it is collected, placed into the melting furnaces and again wrought into such parts of engines and cars as are required. This process, instead of deteriorating the quality of the metal, is said to improve it, and thus an immense saving to the company will be effected.

Cars for Narrow and Broad Ganged R. R's.

The difficulties and objections arising from the broad and narrow gauges upon railroads, where a connection is desirable without change of cars, like the Grand Trunk Railway for instance, and roads connecting it at Portland with Boston, seem to have been almost wholly overcome by a patented invention of Mr. C. D. Tisdale of this city. The advantages obtained by his invention are such as to render the changing of freight from one car to another unnecessary when brought upon a road of a different gauge, there being an arrangement of the tracks by which the same cars can be run over roads of various gauges. This arrangement is unlike others that have been designed to secure the same result, and inasmuch as a car has been built upon this new plan, and tried with success, there are reasons to believe that it will be generally adopted. The change for a wide from a narrow gauge, or *vice versa*, when coming upon a different road, is effected in a very short time, and when completed the train is as free from accident as upon the old style of tracks. The improvement is very simple and confined chiefly to the wheels and axle, which are so constructed as to be shortened or lengthened at pleasure, as the gauge of the track may demand. The adoption of these cars upon roads of different gauges, where there is a great amount of through traffic, would be a great saving in time and expense, both for the railroads and their patrons, doing away entirely as they will with the labor and time occupied in re-loading freight from one car to another. The cars in use at present can receive this improvement, and, it is claimed, at an expense comparatively trifling with the advantages obtained. One of these cars, built upon Mr. Tisdale's plan, is now at East Boston, having lately returned from a trial trip of five hundred miles, being loaded with one hundred barrels of flour, (eleven tons) and passing alternately over the narrow and broad gauges of the Grand Trunk Railway, and the intervening roads between there and Boston. The trial was in the highest degree satisfactory, and many railroad men have expressed their approbation of the result.—*Boston Journal.*

American Railroad Journal.

Saturday, November 28, 1863.

Stock Exchange and Money Market.

It is very evident that during the past week, the operations on the New York Exchange have been conducted as much at hap-hazard as usual. One large house which has always been managed on close business principles, at least in former times, succumbed under contracts to deliver gold in fabulous amounts far exceeding their means and credit. This may be legitimate according to the present understanding of the word in Wall street, but we doubt it. It is by the repetition of these wild and baseless operations that the Money Market is continually and unnecessarily disturbed. And we feel no sympathy whatever for those operators, who, deserting the paths of prudence in their haste to grow rich, overleap their bounds and fall on the other side.

Large amounts of gold have left the country the last week for Mexico, to replenish the military

chest of General Bazaine. We have often noticed in our remarks on the precious metals, that the United States, much as the despotic Governments of Europe profess to hold ours in contempt, is the only country to which when they want money they come for it. Our institutions, our liberal and prompt methods of business, our auction and cash system, all favor the rapid conversion of goods into money, and with an ease and certainty not to be found in any other part of the globe. It is the easiest thing possible to obtain gold and silver, therefore, when it is wanted abroad, by sending to this country; and if more is wanted than the balance of trade can command, there is a large body of foreign bankers and agents who sell time bills on their principals in Europe, and get as much more as required. When these bills come due, they redraw and remit, and so on as long as convenient. We repeat the opinion, that but for the enormous amounts thus obtained, the bank of England and that of France would suspend specie payments in ninety days.

So large is the drain from both those institutions at the present time, that the rate of interest is expected to be put up to 7 per cent. in Threadneedle St. before the month of November closes.

With regard to the movements in our domestic securities we have only to report great steadiness in those of the Government, and continued animation in railway shares. The recent rise in most of the latter brought out a good many sellers to realize profits, and a slight reduction followed as is always the case, to be almost immediately succeeded by another advance, and new strength in the market for the time being. This was the condition of the street in the early part of the week, and as Thanksgiving day came in to break up the continuity of operations, but little variation could be expected. Speculation is rife as to what Mr. Chase will do; whether he will operate with the means he has already at his disposal, or ask Congress for leave to increase the quantities of his legal tender issues. A large party desire him to adopt the latter course, for in no other way do they expect to realize their contemplated profits. On the contrary, there is equally a large number who believe we have paper money enough in circulation to conduct the business of the country, and supply the necessities of the war. We are so assured of Mr. Chase's financial skill as well as his conservative opinions, that we dare venture the prediction, he will not inflate the currency one single dollar more, if he can avoid it. There is one form of expenditure which we think should be immediately put an end to; and that is the further extension of our navy. We have nearly five hundred ships of war to oppose an enemy that have but four. There is not a port of the rebels which is not successfully and efficiently blockaded. What do we want a hundred new vessels for? It is a waste of money to build them, and we hope Congress will interfere and stop these unnecessary jobs. The war cannot last much longer, our foreign relations are more peaceful than ever, and what in the name of common sense are we to do with six hundred vessels of war?

We notice that Mr. Peabody, the great Anglo-American banker of London, with forty associates has resolved to put on a line of large steamers between London and New York without delay, three having already been temporarily secured to begin with.

It is to be hoped that our Government, as soon as the war is over, will place our fastest wooden steam sloops at the disposal of the post office department, and make mail packets of them to run between New York, and Liverpool, Havre, Cadiz, Havana, St. Thomas, Carthagena, Rio, Buenos Ayres, and also establish a line between San Francisco, and Japan and China. We have forty or fifty of these vessels which will be of no future use in war, which, commanded by United States officers, with partial equipments and half crews would re-establish and revive our commercial correspondence with all those places. If we wait for private companies, and subventions to each, our commerce will not revive in twenty years.

The American merchant flag has disappeared from the ocean, although the navy department has five hundred vessels at its disposal. In abler hands and by the policy we foreshadow, it may do something to restore our maritime prosperity.

We refer our readers to our tables this week for those details which are usually given in connection with our subject.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Union Pacific Railway, Eastern Division.

The general interest recently attaching to the Pacific Railway system, and the active efforts now being made to build its different lines, seem to render information on the subject, timely and desirable.

The system, as created by the act of Congress approved July 1st 1862, authorized the formation of a Company, to be called the "Union Pacific Railroad Company," empowered "to construct a Railroad and Telegraph from a point on the 100th meridian of longitude west from Greenwich, between the South margin of the valley of the Republican River, and the North margin of the valley of the Platte River, in the Territory of Nebraska, to the western boundary of Nevada Territory." To this company, is granted the privilege of right of way, with large donations of Government lands, and heavy loans of United States securities, to be furnished from time to time as the different sections of the road shall be completed.

It will be noticed that this road—intended to be the "main line" of the Union Pacific Railway—has both *termini* at arbitrary points in the great wilderness between the Missouri River and California. In order to complete the connections, west and east, the same privileges granted to this company are extended to the "Central Pacific Railroad Company," of California, and the "Leavenworth, Pawnee and Western Railroad Company" of Kansas, now known as the "Union Pacific Railway, Eastern Division;" thus providing for a continuous line from the Missouri River—where the Atlantic systems of Railway are supposed to end—to the Pacific Ocean.

But we find that one eastern termination was not sufficient to satisfy the interests of the Northwest, whose frontier extends through a reach of latitude sufficient in itself to embrace an empire; and as the Atlantic systems have already pushed forward their several connecting roads west of the Mississippi, further provisions were added to the bill, under which the "Union Pacific Railroad Company" was "authorized and required" to construct a branch railroad from the western boundary of Iowa to the point aforesaid on the 100th meridian of longitude; and also "whenever there shall be a line of railroad completed through Minnesota or Iowa to Sioux City," to build another road from said Sioux City to connect with said branch. And in order to satisfy the demands of rival eastern roads, it was even further provided "that the Hannibal and St. Joseph Railroad Company of Missouri, may extend its road from St. Joseph *via* Atchison, to connect and unite with the road through Kansas," with an endowment equal to that provided for the other branch, for one hundred miles of its length.

None of the companies named, have yet commenced active operations except the Central of California and the Union Pacific of Kansas. The latter, organized under the laws of that State, was, previous to this endowment by Congress, greatly enriched by Indian lands secured by treaty at nominal prices; and early in the summer of the present year, the franchise was purchased by parties resident in New York, and a new organization effected, with Gen. J. C. FREMONT as President. The contract of construction for the whole line, some four hundred miles in length, was let to Messrs. SAMUEL HALLETT & Co.; and the head of that firm at once went upon the ground and actively commenced the work of building the road.

Perhaps greater difficulties in the way of rapid progress, never were presented to a contractor. Another firm had, nearly a year previous, taken a contract from the old Company to do the same work; and though so little had been accomplished under it, that the company held it to be forfeited and had notified the parties to that effect, still they had a sufficient case upon which to institute suits at law, and to make statements very damaging to the progress of the road. Mr. Hallett was met in the outset by law-suits which threatened to paralyze all his powers; besides which the great scarcity of labor on the frontier, made it seemingly impossible to organize a force for efficient duty. Under these discouraging circumstances, Mr. HALLETT displayed an executive ability which surprised even his best friends, familiar with his powers as a financier and negotiator, but unprepared to see him, with irresistible vigor, grapple these difficulties of execution, and break so triumphantly through machinations woven for his entanglement. A stranger to the region in which his labor lay—going there at a period of unequalled summer heat, when the stoutest laborers shrunk from their daily tasks—commencing operations on the shores of the Missouri river, across which rebel bushwhackers would fire with impunity upon his men, he never for a moment hesitated in his resolve to complete forty miles of his road before the New Year. In the face of such resolution, and a tireless energy, all obstacles seemed to disappear. Drawing his laborers from Canada and the western states, and from the servile population of Missouri with a skill and tact that soon peopled his line with workmen, he also seized upon the latest mechanical contrivances to multiply the results of their efforts. It is the best description of these results, to say that he has now the first section of forty miles of the main line graded, commencing at Wyandot, at the mouth of the Kansas river, and half as much more on a branch beginning at Leavenworth; and that the iron and rolling stock for this section are all purchased and on the way, and the bridges well advanced and ties prepared for laying down. Unless some unexpected obstacle should now be presented, the cars will be regularly running over the first section of forty miles, before New Years. During the time already spent, also, a troublesome lawsuit for an injunction, has been tried and decided in favor of the company and Mr. HALLETT; and the military authorities have provided ample protection against any future disturbance of the North from rebel bushwhackers.

By this rapid advance, the vested rights of the company and the advantages of position have been greatly increased. The Eastern Division must of necessity reach the starting point of the main line—the 100th meridian—much sooner than any branch can do so; and thus will hold the key to the construction of that work. And being located in a central and commanding latitude, with the absolute control of all the vast New Mexican trade, (which alone would annually pay the interest on a road to Santa Fe,) and the power to throw its trade either toward the North or the South as may be desirable, it is unquestionable that the control of this road must soon become an object for which all connecting eastern lines will inevitably struggle.

Meantime, the capitalists of the country have become awakened to the importance of the enterprise, and have, at a very late period, subscribed the amount of stock required to organize the main company, and elected a board of officers. Grave questions of legality meet them at the beginning; not only the lapse of time to which we adverted in a previous article, and by many deemed fatal, but the doubt as to *the power of Congress* to charter a company for construction in the new territories. It is a fact that the powers among which this is perhaps the most important, were, in the Organic Acts of these territories, *transferred by Congress to their Legislatures*; and good lawyers are positive that that body can now no more bestow charters for railroads in Nebraska than in New York.

Of this, however, as a net result, we may be certain: that the interest of the country and of our railroad men, is at last fairly awakened to the idea of the Pacific Railway; and that the work, in one way or another, will now be prosecuted with energy and dispatch.

SPECIAL CAUTION TO

Railroad Companies & Car Spring Manufacturers.

Notice is hereby given that the Metallic Car Spring Co. of New York are the sole assignees of the Patent granted to Richard Vose of New York, March 11, 1862 (re-issued Feb. 24, 1863) for an *improvement in Steel Spiral Springs*; that they thereby own the *entire and exclusive right* of making, using, and vending to others to be used, any form whatever, of Steel Spiral Spring which is protected from entire exhaustion and from contact of Steel against Steel by mean of the *interposition* of *India-rubber, wool, or other elastic gummy, or fibrous substance between* its coils; and that they will hold responsible and prosecute for damages, all persons who may either make, use or vend Spiral Spring packed as described.

RICHARD VOSE,
Sec'y Metallic Car Spring Co.,
No. 54 William st., N. Y.

Tunnel under Lake Michigan.

The construction of the Lake Michigan tunnel is to be commenced immediately. The Board of Public Works of the City of Chicago have assigned the contract to Messrs. Dall & Gower of Harrisburg, Pa., at $315,139, the work to be completed in two years, according to the plan and specifications already published. The contract was signed, and it is understood the contractors will at once enter upon the work.

The Gems of Colorado.

The Colorado Mining *Register*, says that among the rocks in that territory, are found beautiful translucent quartz crystal, tinged with crimson and purple and often classed as amethysts, amazon stones, beryls, opals in varieties, ganets and turquoise. On the plains, are found the most beautiful and curious of agates, birdseye, catseye, moss and fortification. Sardonyx, jasper and malachite also abroad. Here too are obtained fossils in great abundance. We understood that these precious stones are beginning to be kept for sale at all the jewellers' shops in the territory, and we wonder they have not yet found their way to New York.

Edinburgh and Westminster Reviews.

We have received from Messrs. Leonard Scott & Co., No. 38 Walker st. their reprints of the last two above-named Quarterlies. The former, the October number contains an article, which strictly comes within the purview of this JOURNAL, the subject being the trigonometrical surveys, or as they are termed in the article, the Cadastral survey of Great Britain. It is a clear and intelligible description of the process, its history and its results, and is worthy of the study of our Engineers, affording them valuable hints for conducting their surveys. Those who may be engaged on the Pacific Union Railway should give it their particular attention.

Railroads in California.

Four lines of railroads will be in operation in California next month—one running from San Francisco to San Jose, another from Marysville to Oroville, a third from Goslinville to Brighton, and a section of the Pacific Railroad from Sacramento. In addition to these the work is progressing on the railroad from San Jose to Stockton and on the Folsom and Placerville road.

The California and Oregon Railroad Company have completed their surveys and arrangements, and will lay their reports and maps before Congress during the winter.

Pacific Mail Steamship Company.

The following gentlemen have been elected Directors of the Pacific Mail Steamship Company for the ensuing year, from Nov. 11, 1863: Allan McLane, Howard Potter, Francis Skiddy, Charles A. Davis, William Dennistoun, Leonard W. Jerome, Elisha Riggs, Charles H. Russell, and William Skiddy. Messrs. Jerome, Riggs, Russell, and William Skiddy are new members.

Fort Edward, Sandy Hill and Glen's Falls Railroad.

At a meeting of the Directors of the Fort Edward, Sandy Hill and Glen's Falls Railroad Company, held at Sandy Hill, Oct. 10th, a communication from parties interested in the Hudson River and Lake Ontario Railroad was received, stating that the work on their road is soon to be commenced; that the route is to be changed so as to run through Glen's Falls and intersect the Whitehall and Saratoga Railroad at Fort Edward, and the Directors were directed to construct their road in view of that fact. Therefore, the Board adjourned to December 19th.—*Whitehall Chronicle.*

☞ The new track of the Central road, between Clyde and Lyons, which makes a double track from this city to that point, was put into use for the first time yesterday. Very heavy freight trains were run over it, which aided by the heavy rains, sank it a short distance in several places; but not enough to prevent its further use. It will be immediately put into perfect condition. The track between this city and Rochester is now double, except between Lyons and Palmyra—sixteen miles.—*Syracuse Standard 17th.*

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS**, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

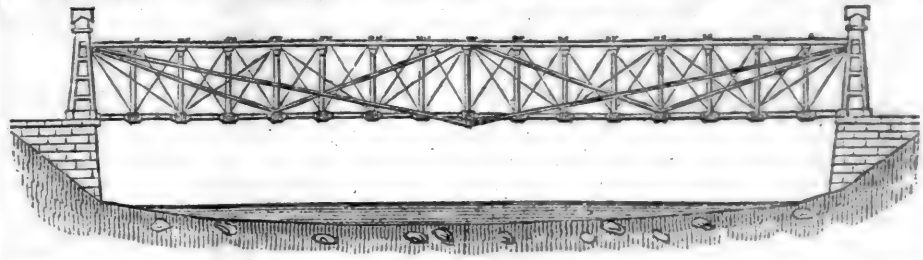
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing

CHAS. W. WELSH,
Secretary.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, **FINK'S PATENT IRON BRIDGE** in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 279 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'

AND OTHER PATENTS FOR

SEATS AND COUCHES IN SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown st., PHILADELPHIA**, will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that intringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—[Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—[Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—[Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $3. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

MUNN & CO'S PATENT OFFICE.

ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS!

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,

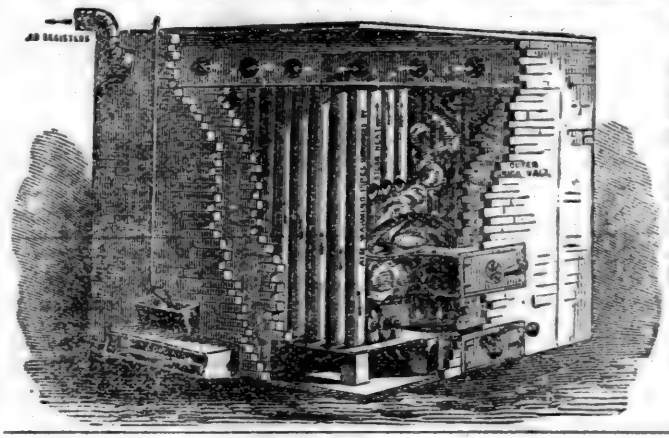
WILLIAMS & PAGE'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors, and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

SIMONDS' PATENT STEAM HEATER.

NEW YORK.

STATIONERS' WAREHOUSE.

The following Materials for the use of ARCHITECTS, DRAFTSMEN and ENGINEERS, for sale by

AMES & BARNES,

No. 41 JOHN STREET, NEW YORK.

E. BROWN & SON'S

PROFILE PAPER, Plate No. 1.
CROSS SECTION PAPER, Plate No. 2, five spaces to the half inch, in Red.
do. do. do. do. do. do. do. do. in Blue.
CROSS SECTION PAPER, five spaces to the inch.
PROTRACTOR or PLOTTING PAPER.
FIELD BOOKS, No. 6.
TRANSIT BOOKS, No. 6.

Whatman's English Hand-made Drawing Paper,

MADE FROM PURE LINEN STOCK.

CAP	14×17	SUPER-ROYAL	19×27	COLUMBIA	24×36
DEMY	15×20	IMPERIAL	21×29	DOUBLE ELEPHANT	27×40
MEDIUM	18×24	ELEPHANT	23×28	ANTIQUARIAN	31×53
ROYAL	19×24	ATLAS	26×33		

☞ Either of the above sizes mounted upon Muslin.

WHITE DRAWING PAPER, IN ROLLS, from 40 inches to 56 inches wide.
Do. do. do. do. mounted upon Muslin.
BROWN ROLL DRAWING of various widths
ENGLISH TRACING CLOTH, 30 and 36 inches wide.
Do. CLARIFIED AND CLEARED TRACING CLOTH, 30 and 36 inches wide.
FRENCH "VEGETAL" TRACING PAPER of Royal, Super-Royal, Imperial, Columbia, and Double Elephant size.
PROTRACTORS in Boxwood and Ivory. SCALES in Boxwood and Ivory. SECTORS in Boxwood and Ivory.
ENGINEERS' AND ARCHITECTS' BOXWOOD PLOTTING SCALES, 6, 12, and 24 inches long, of assorted divisions.
BOXWOOD TRIANGULAR PLOTTING SCALES, 6, 12, and 24 inches long, of assorted divisions.
ORDINARY DRAWING SCALES, Series A, ½, ¼, ⅛, ¹⁄₁₆, and 3 inches to the foot.
Do. do. do. do. B, 3-32, ⅛, 3-16, 5-16, ¼, and ½ inches to the foot.
Do. do. do. do. C, 10, 20, 30, 40, 50, and 60 parts to the inch.
SOLID TRIANGLES. OPEN TRIANGLES. T SQUARES.

SCROLLS OF VARIOUS PATTERNS AND SIZES

GUNTER'S BOXWOOD SCALES, 12 and 24 inches long.
GUNTER'S BOXWOOD SLIDING SCALES, 24 inches long.
ENGLISH EBONY PARALLEL RULES, 6, 9, 12, 15, 18, 21, and 24 inches long
THUMB TACKS in Brass and German Silver, different sizes and qualities.
RULING PENS, in Brass, Steel and German Silver.
DIVIDERS, 4, 5, and 6 inches, in Steel and German Silver, of various qualities.
FRENCH PROPORTIONAL DIVIDERS.
ENGLISH MATHEMATICAL INSTRUMENTS, in Fish Skin, and Mahogany Cases
FRENCH MATHEMATICAL INSTRUMENTS in Brass, Double Gilt, and German Silver, from $2 to $75 per Case
CHESTERMAN'S ENGLISH TAPE LINES 50, 60, 70, 80, and 100 feet, in tenths and links.

KRUPP'S PATENT CAST STEEL

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Nangatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enamled Iron Water Pipe, Steel Tubes, etc., etc.

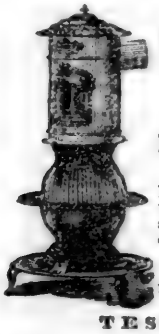
They have received the highest approval from all RAILWAY COMPANIES that have them in service.

THOMAS PROSSER & SON,

28 PLATT ST., NEW YORK.

PATENT SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting, grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 51 Beekman st., (up-stairs,) New York.



RAILROAD, SHIP, BOAT AND BRIDGE SPIKES,

MANUFACTURED BY THE

NEWARK SPIKE CO.,

Newark Avenue,

NEWARK, N. J.

SANFORD'S

MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N.Y.

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. BEGARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any here tofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York.

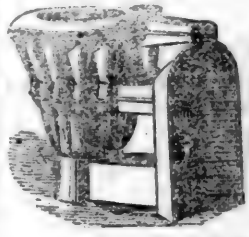
OFFICE OF THE NEW YORK CENTRAL RAILROAD CO.,
ALBANY, November 2, 1863.

THE annual election for Directors of this Company, and for three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the second Wednesday (the ninth,) of December next. The poll will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter. By order of the Board of Directors.

ROBERT L. BANKS,
Secretary.

5t45

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the LEADING STOVE for PARLORS, SITTING ROOMS, and all places where a cheerful pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

Sanford's CHALLENGE HEATERS SET IN BRICK, PORTABLE OR AS FIRE PLACE HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR

Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

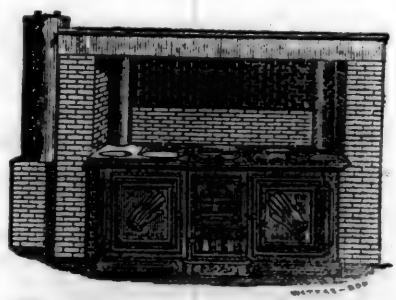
WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE

Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.



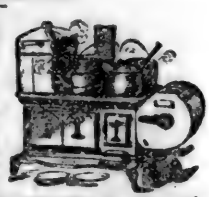
SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., 412 Broadway, corner of Fulton st.

Local Agents wanted everywhere. 6m11



Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the LARGEST OVENS of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary ECONOMY OF FUEL, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,

239 and 241 Water st., N. Y.

Weights and Measures.—The Metrical System.

A bill is pending in the British House of Commons for the adoption of the French system of weights and measures, known as the metrical system. The controversy naturally arising out of a proposed charge as great as this, has been ably carried on among the learned, and how it will end it is impossible to foresee. After a careful examination of the arguments we have come to the conclusion, that the English system suits the English better than the metrical; and what is very singular is the fact that the French people themselves do not conform to their own laws on the subject.

For more than a hundred years the subject of a uniform standard of weights and measures has interested the world. Our own country has also engaged in its consideration, and one of our most interesting public documents was that prepared by the late John Quincy Adams, appointed a commissioner to make a report upon it. The first idea of obtaining a true standard of length was taken from the vibrations of the pendulum, and to deduce therefrom an invariable model for all weights and measures. And this the English savans preferred, because the movement of a pendulum is ascertained to be made through equal areas in equal times, and because when of a certain length it beats seconds, or vibrates in equal times. It is easy to see therefore, that this being the case, its length to produce this being known, the result would be invariable. But it was found that in different latitudes, the oscillations were not the same, the figure of the earth not being spherical, and the force of gravitation at different parts of its surface not being equal. The 45th degree was therefore chosen as a mean, being the half of 90; the distance between the poles and the equator. This was believed as accurate as it was possible to be. The French themselves for a time inclined to this view of the subject, and the National assembly in the close of the reign of Louis XVI, adopted a decree, requesting the English Government to unite with their own in obtaining that standard. It did not come to anything, either through the obstinacy of George III, or the disturbed condition of public affairs. The French had not up to that time contemplated the adoption of the metrical system. On the contrary, they originated a number of scientific expeditions to ascertain what the beats of a pendulum of a given length would be in different parts of the earth's circumference. And this was effected by taking watches that were known to beat seconds regularly at Paris, to other parts of the world, as at the equator and at Lapland, and comparing their beats with those of a second pendulum. From these observations it was clearly ascertained that the second beating pendulum had to be increased in length by a regular series in going from the equator to the poles. After long and labored discussions among their principal astronomers and mathematicians, a report in favor of adopting the meridian as the best standard of linear measure, was made to the Academy in 1791, by Laplace, Condorcet, Borda and Monge, all eminent men. If we had space it would be a pleasing task to refer to the ingenious arguments they offered against the adoption of the pendulum standard, and in favor of the arc of a meridian, and also the reasons why an arc of the *equator* should not be adopted. Means were then taken to procure accurate measurements of a meridian in various parts of the globe, and it is an interesting fact not known to all who have heard time out of mind of Mason and Dixon's line in this country, that these persons measured two degrees in the State of Pennsylvania, probably being the most accurate of them all, which was referred to in the settlement of the question. Finally the meridian which had been measured in Peru was adopted as a standard by the French commission, and the ten millionth part of this meridian was declared a *metre*, by the law of the 10th of December, 1799. This is equal to about 39⅓ inches English. Notwithstanding very considerable errors have latterly been detected in the original meridianal measurement, the French system has been retained, and it is as follows. From the metre thus obtained it will be perceived by multiplication decimally, the following results are arrived at. Thus:—

The ten millionth of the quadrant, or distance from the equator to the poles is 39⅓ inches, or 1 metre—length.

The cube of the 100th of a metre of water at its greatest density weighs, 1 gramme—weight.

The cube of the 10th of a metre holds 1 litre—capacity.

The cube of 1 metre is 1 stere—solidity.

The square of 10 metres is 1 are, square measure.

These starting points being settled, the division of them for practical purposes is made as follows, by adding the decimal increase to the above terms:

LENGTHS.

Milli metre or 1,000th of a metre.....		.001
Centi metre or 100th	"	.01
Deci metre or 10th	"	.1
1 metre		1.
Deca metre or 10 metres		10.
Hecto metre or 100	"	100.
Kilo metre or 1,000	"	1000.
Myria metre or 10,000	"	10000.

Weights.—The unit of weight under the French system is the gramme, which is ascertained by weighing that quantity of distilled water which is contained in a cube of a centi metre or 100 metres. This is found equal to 15,433 grains Troy, and

16,924 grains avoirdupois. These are multiplied in tenths by the affixing of the Greek terms Deca, Hecto, Kilo, Myria, or divided, by the Latin Deci, Centi, Milli. Kilogramme therefore means 1,000 grammes, and is equivalent to 2 lbs., 3 oz., 4 drachms, and 16 grains avoirdupois, English, and this weight is common in commercial transactions.

Capacity.—The litre is the measure of capacity, and is obtained by ascertaining the weight of a deci metre, equal to 16,028 cubic inches, or 1¾ pint imperial of water, or 1,000 grammes exactly, or one kilogramme.

It is multiplied or divided by the same prefixes we have already given. The Bordeaux ton well-known to importers of wine in this country is 931,318 litres, or 1,640 pints English.

Land Measure.—The French unit of land measure is a square of ten metres each side, and called an are. This is multiplied or divided in the same way as before by the use of the Greek and Latin prefixes.

Solid Measure.—The unit of this measure is a cubic metre, and it is also multiplied or divided as before stated.

The French system obtains in many parts of Europe and South America. Our merchants, who for example ship to Colombia, are obliged to make out their invoices in kilogrammes, as the duties in that country are very absurdly regulated by the weight and not the value of the articles, with very few exceptions.

The English on the contrary, up to this moment are regulated by the pendulum. The act of parliament of January, 1826, called the *act of uniformity* establishing the Imperial system, required the following to be the standard, viz: A pendulum which should vibrate seconds in London, on a level with the sea *in a vacuum*. All that portion of the pendulum lying between the axis of suspension and the centre of oscillation, (for these are different,) is then to be divided into 391,393 equal parts, 10,000 of these parts make an inch imperial, twelve a foot and thirty-six a yard.

Weight.—The unit of weight is a cube of one inch of distilled water at 62° Fahrenheit. This is weighed by any weight, and such weight is then to be divided into 252.458 equal parts. A thousand of these parts make a grain Troy, 5,760 grains a pound Troy, and 7,000 a pound avoirdupois, the operation being performed in the air. Ten pounds of these make a gallon, containing 277 cubic inches, and 274-1000 parts of another cubic inch.

It is a curious circumstance, that both in France and England notwithstanding legislation has absolutely fixed the standards of weights and measures, they are not fully observed.

The French astronomers, geographers and seamen, calculate by degrees and minutes. The market women sell eggs at so many liards each, equivalent to the 4th part of a sou. Potatoes, beans, peas, charcoal and wood, are not sold by the metrical or decimal system, nor wine, nor grain, nor is small change current on this principle.

The stone weight in England varies in ten different numbers of lbs., according to locality and custom. So of the quarter, which may be 28 or 30 lbs. So of the ton which may be 20 cwt. of 112 lbs., or 120 lbs. There are English, Scotch and Irish miles; in cloth measure, nails, quarters, ells; in surveyors' work, links, chains, rods, poles, perches; in navigation, fathoms, knots, leagues, and geographical miles; and then there are the palm, the pace, the step, span, cubit, and the screw and iron gauges.

So in our own country we hear of cords of ore in the mining districts instead of tons, a most curious, yet found to be a practical, useful, and easy method of measurement.

Many of our most learned and philanthropic countrymen have turned their attention to this subject, in hopes of procuring a uniformity of system throughout the world; and foreign scientific Congresses have sympathized with them in the attempt.

We have no faith in their success as long as humanity is what it is, any more than we have in the plan of a universal language, long ago suggested by Bishop Wilkins.

When the lion lies down with the lamb, when men shall learn war no more, when all shall think alike and act alike; in short, when the millenium arrives, when weights and measures shall go out of use by losing their necessity, and when all men shall believe in all men, and work for love and not for money, then and not till then shall we be able to attain uniformity in weights and measures, and not till then.

Louisville and Nashville Railroad.

The annual meeting of the stockholders of this company was held in Louisville on the 5th of October last. The Annual Reports of the President and Directors, Secretary, Superintendent of Transportation, and Superintendent of Machinery and Road Department, were read, adopted and ordered to be printed. We have been favored with a copy of this report, from which we learn that the receipts from transportation, etc., during the fiscal year ending June 30, 1863, were:

	Memphis Branch.	Lebanon Branch.	Main Stem.
From pass'gers.	$20,643 76	$55,503 68	$773,240 22
" freight ..	16,274 41	35,109 03	642,595 03
" express .	3,264 87	6,210 21	56,993 03
" rent	.....	140 00	.....
" mail, etc.	.....	.....	30,328 89

Total Main Stem	$1,503,156 67
" Lebanon Branch	96,962 92
" Memphis Branch	40,183 03
Amount charged U. S.—being difference between Government and local tariff on freight from April 1, 1862 to Jan. 1, 1863	137,680 93

Total main line and branches, viz:

From passengers	$849,387 66	
" freight	831,659 40	
" express	66,468 11	
" mail, etc.	30,468 39	
		1,777,983 56

And the expenses have been:

Repairs of road	$163,436 41	
" bridges	10,330 49	
" buildings, etc.	10,553 61	
" cars	36,408 66	
" engines	29,471 59	
Motive power	42,431 55	
Fuel	49,211 14	
Oil and waste	7,211 87	
Watchmen	7,870 11	
Loss and damage	5,979 32	
Salaries	15,099 80	
Transportation	80,083 65	
Miscellaneous	28,260 20	
Reconstruction	229,470 07	
		715,818 47
Net earnings (59.74 per cent.)		$1,062,165 09

In March last application was made by this company to the Secretary of War for a restoration of the tariff of freights existing before the war. This was allowed, upon condition that the company pay for the Cumberland River Bridge at Nashville, and other bridge repairs and work done by the government. These terms were acceeded to, and the earnings of the fiscal year made up according to the company's tariff rates of freight, and not that of the government. The above amount of $137,680 93 is the difference between the local tariff and the amount charged at the government rates on all government freight carried from April 1, 1862, to Jan. 1, 1863.

The road was in operation through to Nashville for a period of 7 months and 12 days—during the balance of the year it was only partially operated. The time during which it may be considered to have been operated for its entire length is equivalent to 9½ months.

The following table shows the comparative cost of repairs of road per mile during the past four years:

	Ordinary Repairs.	Renewal of iron and ties.	Total per mile of road.	Per revenue train mile.
1859-'60.	$470 73	$135 00	$605 73	26.03 cents
1860-'61.	339 54	48 93	388 47	14.84 "
1861-'62.	321 28	219 78	541 06	38.18 "
1862-'63.	382 29	389 56	771 85	38.30 "

During the year upwards of 433 tons of new iron were purchased, 95 tons of which were used to replace iron destroyed by the rebels. About 95 tons have been re-rolled, and 333 repaired and used on the 1st division. Besides which the defective ends of 225 tons of the tubular iron on the 2d division have been cut off, and the rails welded solid at the ends. The total amount of new, re-rolled and repaired rails used during the past year is 1122 tons. This amount was not sufficient for the necessities of the road, but it was impossible to obtain more. At least 2,500 tons of new iron will be required during the coming year. The cost of repairing solid rails has been $4 per ton, and that of repairing tubular rails $6.35 per ton. Upwards of 16,000 cross-ties were purchased during the year, all that could be procured by contract. At least 40,000 new ties will be required during the ensuing year.

The business of the Lebanon Branch was seriously hindered by the destruction of bridges. The cost of repairs and renewals during the year was $341 32 per mile, or 50.02 cents per revenue train mile. During the year, 22 tons of iron have been repaired, and 4,367 new cross-ties put in the track; 200 tons of new iron and 10,000 cross-ties will be required during the coming year to keep the track in order.

The Memphis Branch has been obstructed during the greater portion of the year, although the trains were run on a part of it all the time. It may be considered to have been in use its whole length about 9 months. The cost of repairs per mile per year has been $232 26, and per train mile 32.78 cents.

The engines have run in the service of transportation department 519,742 miles at a cost for repairs of $29,471.59; in the service of the road department, and on the Bardstown Branch and Memphis, Clarksville and Louisville Railroad, 75,516 miles, at a cost for repairs of $3,813.73. Total miles run, 595,258. Total cost for repairs,

$33,285.35, or 5.59 cents per mile run. Total cost per mile run by engines, 24.03 cehts, against 23.06 cents in 1861–'62, and 18.49 cents in 1860–'61. Average cost per mile of all trains 28.72 cents.

The Bardstown and Louisville Railroad 18 miles, has been operated as a branch of this road under a contract made Feb. 24, 1860, by which this company were to furnish the motive power and rolling stock, and were to divide the net profits after paying expenses. The accounts were settled up to March 31, 1861. The earnings from that time to June 30, 1863, were $20,469.46, and the expenditures for running, repairs and reconstruction, $19,011.71. The operation has not been profitable, but is a great convenience in procuring material, etc.

The company also agreed to operate the 14 miles of the Memphis, Clarksville and Louisville Railroad, between the State line and Clarksville, and to divide the profits after paying cost of operating. The rebel raids and unsafe condition of the country prevented the operation, except for a few months. The gross earnings of the 14 miles for the three months ending with June were $554.23; and the cost of operating including the amount expended in the re-construction of the Red River bridge, $6,811.89. This contract may be terminated on ten days' notice, the Clarksville company refunding the cost of the bridge, and balance due this company.

The equipment of road July 1, 1862, consisted of 37 locomotives; 18 passenger, 6 baggage, 4 express, 166 box, 102 flat, and 5 boarding cars. These have been added during the year, 6 locomotives; 10 passenger, 4 baggage, 4 express, 111 box, 28 flat, and 6 boarding cars. There have been destroyed by raids, 1 passenger, 2 baggage, 45 box, 7 flat and 4 boarding cars.—Leaving on the road July 1, 1863, 43 locomotives; 27 passenger, 8 baggage, 8 express, 232 box, 123 flat and 7 boarding cars.

The office of the company is at Louisville, Ky. The officers and directors are:

President—James Guthrie.

Directors—James Guthrie, Thomas Quigley, U. E. Ewing, H. D. Newcomb, James B. Wilder, James Speed, Jo. C. Guild, Russell Huston.

Secretary—Willis Ranney.

Sup't of Transportation—B. Marshel.

Sup't of Machinery and Road Department—Albert Fink.

Gold's Improved Steam and Water Heating Apparatus.

The component parts of Gold's Improved Steam Heating apparatus, manufactured by the Union Steam and Water Heating Company, 634 Broadway, N. Y., are the Generator and Radiator. The Generator or Boiler is made of cast iron, in separate sections, each section a complete boiler in itself. The steam and water connections between the sections being made by means of pipes, without the use of any packing whatever, and should any defect or flaw be discovered in any one of the castings, the pipes can be disconnected, and plugs being inserted in the holes, the defective section can remain in its place until convenient to replace it, thereby losing only the use of the one section; and subsequently, when the repairs are made, the cost is only that of the fractional part of the whole boiler. In no other construction of boiler can repairs be made without losing for the time being, the use of the entire heating apparatus. An "Automatic Regulator" is connected with the draft and feed doors, which carefully guards against a waste of fuel, and the generation of more steam than is necessary to supply the wants of the Radiators. Should there be a Register closed, preventing the passage of air from one of the air-chambers, there is at once a diminution of condensation in the contained condensing chambers, and, as a matter of course, an excess of steam in the system, which makes itself felt through the automatic regulator, and reduces the consumption of fuel to the requirement of the diminished demand for steam.

The "Condensing Chambers" or Radiators are, like the Generator, made up of any desired number of cast iron sections, each complete in itself, a sufficient number being united to form the required amount of warming surface for any given locality. These are connected with the Generator by means of pipes, and placed directly under the parts of the building to be warmed, and each story supplied from a separate and distinct chamber of radiators, so that there is no possibility of a transfer of the heat designed for one room to another, under any change of wind, or by a stronger draught in the registers conducting to the upper apartment. The construction of these radiators admits of a very low pressure of steam (not more than one-half pound to the inch being used,) from the fact of their being made with large steam chambers, throughout which the lowest pressure is sufficient to cause the steam to circulate.

A complete apparatus, fully illustrating every point of construction, is on exhibition at the office of the Company, where the public are respectfully invited to call and examine this novelty in warming apparatus.

In presenting this valuable improvement in heating apparatus to the public, the Company have no desire that the statements made regarding it shall be received without full investigation. On the contrary, they invite the strictest scrutiny into the construction and operation of the apparatus. And to that end they are ready at all times to substantiate the correctness of everything that is asserted above, and to convince the most skeptical that Gold's Heater stands unrivalled for Economy, Safety and Durability; and, moreover, that *it is the only Heater that warms without vitiating the atmosphere.*

The Wallkill Valley Railroad.

We have received the report of Geo. S. Avery, Esq., engineer, with accompanying estimates and calculations in relation to the Wallkill Valley railroad, which it is proposed to construct from Washingtonville, on the Newburgh branch of the Erie Railway, to Shawangunk village in Ulster Co. The report is also accompanied by an excellent map.

The road is to be 13⅜ miles in length, and its cost is computed at $16,320 17 per mile, and we have no doubt it can be constructed at that rate, if it is to be exempt from the manipulation of bondholders, bankers, and commission agents. The actual cost entire will then be but $218,285 01. The estimates of receipts from passengers, from and between Little Britain and Coldenham, (the

early homes of the Clintons and Coldens,) and Walden and Shawangunk are put at $6,832 per annum; the milk freight from the same places at $21,291 66; the general freight at $12,667 20; and the mails and express $1,000—being a total of $41,791 66. We think the estimate of passengers altogether too low, for besides this way travel between the villages, there will arise a large increase of travel through to New York, not only from these places but from a large distance. It is estimated that the business circle around a railway station, on any great through line is equal to thirty miles if there is no competing line; so that the business of at least fifteen or twenty other thriving villages may be considered as likely to be given in great part to this road, which opens for them a new and short route to the City of New York.

The maximum grade is but 50 feet, and the minimum is 6 feet. The curves are easy and occur but seldom.

The resources of the road besides the one of passenger traffic, are the enormous amounts of milk, butter and cheese, which Orange and Ulster Counties produce. The Wallkill Valley is one of the most productive, healthful, and beautiful in the State of New York. On the Wallkill River are thriving manufacturing villages, such as Montgomery, Walden, Shawangunk, Galeville, Tuthill, Bruynswick, where there is a thriving population with numerous factories, flour mills, and a large unemployed water power. As the route is an easy one for construction, the road can readily be put in operation in one year.

The report offers many considerations to induce the parties most nearly affected in interest to give it their support, all of which are so obvious, so undeniable, and so well sustained in the example of the Warwick road, which has proved a great success, that we need not add any arguments of our own.

The Wallkill road is a necessity, it will be a productive and paying road, it will enhance the value of the farm lands and village plots through which it will pass, afford new markets to many of the agriculturists of Ulster and Orange, and will naturally affect the prices of many descriptions of food in the city of New York, give larger supplies and keep the prices steady. Every such railway as the Wallkill should find friends among our merchants and capitalists, for our working population must be fed and well fed, if industry is to flourish, and our laboring people are to thrive.

An important part of the plan in building this road is to have it extended through Ulster and the other "west side" river counties to Albany, thus giving a through "west side" railroad in connection with the Erie Railway from New York to that city.

☞ The St. Paul *Press* thus enumerates the railways which are about to be constructed, in connection with that place—viz.: first, the St. Paul and Pacific, the main line between the Minnesota and Mississippi rivers; second, the branch line of the St. Paul and Pacific, north of the Mississippi rivers; third, the Superior and Mississippi; fourth, the Cedar Valley; fifth, the Minnesota Valley; sixth, a branch of the Tomah and St. Croix from Prescott; seventh, the Winona and St. Paul; and there is even a considerable probability that an eighth will be built, viz: from St. Paul via Hudson to Bayfield.

Bridge over the Susquehanna.

The following is a description of the new railroad bridge now being constructed over the Susquehanna river at Havre-de-Grace, by the Philadelphia, Wilmington and Baltimore Railroad Company: The bridge will be supported by thirteen piers, erected in the river, at the distance of twenty-four feet apart, the entire length of the bridge being 3,300 feet. It is well known that during the winter season the Susquehanna at this point, where the bridge is being erected, is subject to heavy drifts of ice, that would render a bridge not substantially built liable to be carried away. This matter has received full attention at the hands of Mr. GEORGE A. PARKER, the engineer of the road, and piers for the support of the bridge are being constructed that might well defy the onslaught of all the ice that ever drifted down the river, combined in one grand attack on said piers. But one of these piers is as yet near completion, but another is being rapidly pushed forward.

An idea of the solidity of the foundation of the bridge can be arrived at from a brief description of the manner of constructing the piers. We will take pier Number Three, which is now in a somewhat advanced state, as a sample of the rest. The depth of water at this pier is forty-two feet. Piles have been driven for the support of the pier, and the interstices filled up with stone. These piles have been sawed off by means of an ingenious contrivance, so that they present a flat even surface at the bottom of the river. A wooden platform, four feet thick, rests on these piles, and is securely fastened to the same. A wrought iron caisson, or hollow frame of that material, twenty-four feet in length and eight feet in width, with sharpened ends pointing up and down stream, rests securely on this platform; said caisson forming an outside covering to the masonry, which constitutes the main strength of the pier.

This caisson is lowered to its position in the stream by means of a mechanical contrivance, of the cog-wheel order, which lowers the caisson three-eighths of an inch for every revolution of a wheel about twenty inches in diameter. When the said caisson is securely fastened to the platform that rests on the piles the masonry is built up inside of it, which consists of massive granite blocks, about four feet by two in dimensions. The iron work of these caissons vary from one-eighth to one-third of an inch in diameter, and when the pier is completed it extends upwards eleven feet from the surface of the water at low tide, which is beyond the limit of the height of ice so far. Seven of these piers are being built on pile foundations, and six on rock foundations, the stream having both a sandy and rocky bottom at this point.

The estimated cost of the bridge is $700,000; so far, some $200,000 have been expended, but the total expense may come under the above sum. It has not yet been decided whether the bridge will be constructed of wood or iron. It was originally intended that iron should be used, but the increased price of that article makes it a matter of some doubt whether the original idea will be carried into effect.

The railway on the bridge will consist of a single track, but it will be of sufficient width to place another track on it if occasion should warrant it. The track will be twenty-five feet from the surface of the water, and the entire height of the bridge will be fifty feet. A highway for the use of carriages and foot passengers will surmount this bridge.

A draw will be attached to the bridge for the passage of vessels; it will be of the pivot order, and will have two openings of seventy feet each. The weight of the spans from pier to pier will be one and a quarter tons to the foot. Portable iron piers are being used for the purpose of securing the permanent piers to the rocky foundations. These piers are light, and after being used for this purpose they can be used as permanent piers for the draw, when piles cannot be driven. The water varies in depth where the bridge is being built from five to forty-two feet, and runs with an average velocity of three miles per hour. When completed, the "Susquehanna Bridge" will be the grandest work of the kind in the United States, and a perfect triumph of engineering skill.

Opening of the Pacific Railroad.

The San Francisco papers contain accounts of the opening of a portion of the railroad which is to extend from San Francisco to San Jose. The *Alta California* informs us that this road really composes a part of the great Trans-Continental Road which is to unite the shores of the Atlantic and Pacific. It says:

In California there are three sections and three companies; First, the San Francisco and San Jose Railroad Company, which has a section of fifty miles between these two places. Secondly, the Western Pacific Railroad Company, which has a section of one hundred and fifteen miles from San Jose to Sacramento. Thirdly, the Central Pacific Railroad Company, which has the section from Sacramento to the Eastern boundary, in Truckee Valley, a distance of one hundred miles. The San Jose Railroad was the first to commence work; it is the only one which has any of its road finished; it will be the first to complete its section.

The San Francisco and San Jose Railroad Company was organized in 1860. The capital stock is $2,000,000, of which $300,000 was taken by the city of San Francisco, $200,000 by the county of Santa Clara, $100,000 by the county of San Mateo, $300,000 by the contractors, (A. H. Houston and C. McLaughlan,) and $300,000 by other individual subscribers. All the stock has been taken, and all the assessments have been paid, with some insignificant exceptions. The cost of the road, when complete, will just about absorb the total capital stock. The cost of the road is about $40,000 per mile. When the road shall have been completed, the Company will receive from the National Government the sum of $16,000 per mile in Federal bonds.

The road is not finished as yet, but about thirty-one miles of it are finished, from the Mission to Mayfield. From the latter point to San Jose the road is graded, and men are at work laying down the iron, of which four hundred tons—enough for five miles—are on hand, and a thousand tons or enough for thirty miles, are due. Only eight hundred tons more are required to complete the road. It is expected that the cars will run through from Fourth street to San Jose in December next.

The Western Pacific Railroad Company, organized to build the road from San Jose to Sacramento, a distance of one hundred and fifteen miles, will, in three weeks, make an earnest commencement by grading the road from San Jose to Vallejo's Mill, a distance of eighteen miles. The route is to pass through the Contra Costa ridge of the Coast Mountains, through the canon of Alameda Creek, and after passing through Sunol Amadore and Livermore Valleys, will cross the Diablo ridge of the Coast Mountains by the Corral Hollow Pass, and thence go direct to Stockton. The route has been finally determined upon, and there is scarcely any doubt that it will be so located. The surveying party are now at Carroll Hollow.

Mr. T. Dame is President of both roads, and several of the directors in one are also directors in the other.

Qualified Stockholders.

A question having arisen as to the qualifications necessary in this State, to enable stockholders to vote at the election for directors, and to render stockholders eligible as directors, we produce the law upon the subject:

"In the election of directors, each stockholder shall be entitled to one vote, personally or by proxy, on every share held by him thirty days previous to any such election." "No person shall be a director unless he shall be a stockholder, owning stock absolutely in his own right, and qualified to vote for directors at the election at which he shall be chosen."

The General Railroad Law of Pennsylvania says:

"No share or shares transferred within sixty days next preceding any election, or general meeting of the stockholders, shall entitle the holder or holders thereof to vote at any election or general meeting; nor shall any proxy be received, or entitle the holder to vote, unless the same shall bear date, and have been duly executed within the three months next preceding such election or general meeting."

☞ Daniel Stone, the celebrated bridge builder, died recently in Philadelphia, during a fit of temporary insanity. Mr. Stone has been connected with the business of bridge construction for over twenty-five years. There is scarcely a railroad in the Eastern and Middle States that have not upon their great lines the evidences of his skill. The fine bridge over the Susquehanna at Harrisburg and vicinity, are specimens of his "handy work." The bridge at Market street in Philadelphia is another. In fact, to enumerate and write the history of the works executed by him, would be to write the history of most of the railway enterprises of the country. His name deserves to stand recorded near to and along with "Wernwag, Burr and Ellet."

New Railroad to the Coal Fields of Pennsylvania.

Another project has just been started, having for its object the construction of a branch railroad from West Greenville, Penn., to the coal fields of Mercer, Butler and Armstrong counties in that State. The route most talked of will commence on the line of the Atlantic and Great Western Railroad, near West Greenville, and run thence via Mercer to the coal fields. The *Argus*, alluding to the matter, says: "We learn that work will commence soon, so far at least, as preliminary surveys are concerned, and the character of the parties having charge of the project is a pretty sure indication that it will be carried through. The coal fields which it proposes to open up are very extensive, and the coal is of an excellent quality. The field extends beyond the limits of Butler county to the eastward into Armstrong county. Extensive and favorable leases have been made as far eastward as Brady's Bend, by parties interested in the project."

It has long been known that veins of coal of almost fabulous thickness, and of superior quality underlie the section of country through which it is proposed to construct this road, and we are pleased to know that the treasure is now in a fair way to be developed.

The Columbia *Spy* learns that the Reading and Columbia Railroad Company intend starting a branch road at Salunga, to cross the Susquehanna by a new bridge at Chiques.

Railroad Earnings—Weekly.

The traffic of the Great Western Railroad for the week ending Nov. 27, 1863, was as follows:

Passengers	$19,984 94
Freight and live stock	40,808 94
Mails and sundries	2,515 98
Total	$63,309 86
Corresponding week of 1862	67,723 73
Decrease	$4,413 87

The earnings of the Grand Trunk Railway for the week ending November 21, 1863, were:

Passengers	$27,747 73
Freight and live stock	66,179 15
Mails and sundries	5,647 00
Total	$99,573 88
Corresponding week, 1862	93,294 97
Increase	$6,278 91

The earnings of the Chicago and Alton Railroad for the 3d week of November, 1863, were:

Passengers	$15,923 42
Freight	29,195 27
Sundries	1,474 34
Total	$46,593 03
Same week last year	26,350 14
Increase	$20,242 89

The approximate earnings of the Marietta and Cincinnati Railroad, in the 3d week of November, 1863, were:

Passengers	$4,692 34
Freight	14,131 38
Mail express and telegraph	872 00
Total	$19,695 72
Same week, 1862	11,641 81
Increase	$8,053 91

The earnings of the Galena and Chicago Union Railroad for the 3d week of Nov., 1863, were:

Freight	$42,671 57
Passengers	10,033 57
Mails	1,300 00
Total	$54,005 14
Same week, 1862	36,683 43
Increase	$17,321 71

The earnings of the Chicago and Northwestern Railway for the 3d week in November, 1863, were | $33,877 32
Do., 1862 | 23,851 81
Increase | $10,025 51

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week in Nov. have been | $36,116 01
Same week, 1862 | 28,714 03
Increase | $7,401 98
Total from January 1, 1863 | $1,097,260 20
" " 1862 | 1,076,415 06
Increase | $20,845 14

The earnings of the Chicago and Rock Island Railroad for the 3d week of November, 1863, were | $51,316 00
Do., 1862 | 34,081 00
Increase | $17,235 00

The earnings of the Michigan Central Railroad for the 3d week of Nov., 1863, were | $74,446 09
Same period, 1862 | 72,534 26
Increase | $1,911 83

The earnings of the Toledo and Wabash Railroad Company for the 2d week of November, 1863, were | $34,292 43
Same week, 1862 | 38,695 43
Decrease | $4,405 05

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of Nov., 1863, were | $75,599 00
Do., 1862 | 64,540 00
Increase | $11,059 00

The Junction Railroad.

The Junction Railroad, on the West side of the Schuylkill river, over which the through trains from New York to Washington now pass, diverges from the Reading Railroad at the foot of the old Inclined Plane, and passes along the river shore to Eaglesfield, where it crosses Torr avenue over a bridge, and then under Girard avenue, between Thirty-seventh and Thirty-eighth streets, thence to Westminster street, which is back of Solitude, known as the old Penn Property, where it crosses Thirty-fifth street, and then runs directly alongside of the Pennsylvania Railroad to near Market street. At this point it diverges, and will pass through Mansion street, and under Market, Chesnut and Walnut streets, coming out on the river slope, and thence through the Almshouse and Woodland Cemetery property, so as to connect with the Philadelphia, Wilmington and Baltimore Railroad Company at Gray's Ferry.

The cars of the Philadelphia and Trenton road diverge from the road near Lehigh avenue, and pass over the Richmond branch of the Reading Railroad to the Falls of the Schuylkill, thence on the main line to the Columbia Bridge, where they will meet the Junction road, and pass over it to its intersection with the Pennsylvania Railroad, thence by its Delaware extension to the P., W. & B. R., near the Arsenal. This route will be used until the connecting railroad of the Philadelphia and Trenton Railroad is completed.

The route proposed is as follows: Diverging from the Philadelphia and Trenton Railroad near Frankford, thence on a line half-way between Erie avenue and Venango street to Front, thence turning in a southwesterly direction across the North Pennsylvania Railroad, with bridges over Allegheny avenue, Germantown Pike, Broad street and Germantown Railroad; thence to a line parallel with and immediately in the rear of the Odd Fellows' and Glenwood Cemeteries, and across under Ridge Avenue; thence bridging over Reading Railroad, and running to Point of Rocks, north of the Spring Garden Water Works, and across the Schuylkill by a new bridge. Bridges will also be constructed over Girard avenue, on the west side of the Schuylkill; also, Thirty-sixth and Thirty-seventh streets, and the Junction Railroad, which will enable the connection to be made directly with the Pennsylvania Railroad near Thirty-fifth street.

☞ The Illinois Central Railroad Company has instructed its London agents to give notice that a cash dividend will be declared in January on both classes of its shares, and on the cancelled bonds scrip, payable to the parties in whose names the shares and scrip are registered, and only upon an order for the entire dividend due upon either class.

Labor and Capital.

There is a class of men whose mental vision is always colored by their interests. If their generosity is not overmatched in intensity by selfishness, yet spending most of their time in securing for themselves the comforts of life, they are longer under the influence of those feelings which tend to individual aggrandisement, than they are under those which arise from looking to the wants of others, and assisting in promoting the prosperity of the whole. They consequently see but one-half of the truth, and that half is limited to what happens to be the extent of their individual experiences. Thus we find capitalists who are forever dwelling upon the benefit which the employment of their funds confers upon the individual employee, or laborer, and upon the country at large, and leaving entirely out of view the fact that without the laborers capital itself would be worthless. On the other hand, we find employees who look upon capital as their natural enemy, forgetting that without capital they would be in a still worse condition.

In an important sense, and in a manner more readily apprehended because more immediate in its effect upon the great masses of mankind, capital and labor are antagonistic. But in another, and a far more important sense, capital and labor are mutually beneficial; they are and ought to be fast friends.

Were we to entirely divorce the two, capital could find no employment, it could earn no interest or dividends, but would lie unemployed in the hands of the holder; while labor, thus left without the power of organization could only supply its thousand wants by the wholly inadequate efforts of its individual hands.

It is the legitimate province of capital to earn to itself interest. For this purpose it is the duty of the capitalist to look about and find the safest and the most lucrative business in which to invest his money. If money is plenty, competition will tend to lessen its value, and the result will be shown by a reduction in the rate of interest, or the sum which people are willing to pay for the loan of its use. If, however, it is scarce the contrary result will follow. It is the right also of the capitalist to make the best use of his money which legitimate business operations will afford, and if in doing this he finds it desirable to divert his money from one branch of trade to another, the employees engaged in the comparatively unprofitable trade cannot justly complain. Such employees may be sufferers thereby, but that the community at large will be gainers is proved by the fact, that they are willing to pay more for the money employed in the new or different business. So too the capitalist has the right to make the best possible use of his money, by employing the cheapest labor the market affords. If a man possessing a limited capital is obliged to pay his business employees three dollars per day, instead of one dollar and a half per day, it is quite evident that he would be able to do but one half the amount of business which he could do at the cheaper rate, and of course the return of money for his investment would be proportionately less. It is therefore right for him to come into the labor market and accept the services of the lowest bidders. In this manner labor and capital are antagonistic, and this is the only view which many (we will not include the mass of American workmen because we believe that these are too intelligent) employees take of the subject. But even this antagonism is not without its compensating benefit. If the employer pays his laborer higher wages, he must increase the price of his goods an equal amount, and when this universally takes place all prices increase, and the laborer with his increased wages buys no more of the necessaries of life than he formerly did with his lesser wages. Hence while the employer resists the increase of wages, he is at the same time helping to keep down the prices of all of the commodities which are bought and sold in the community. He may be and usually is governed entirely by selfish motives, but this does not change the beneficial effect of his action.

But the laborer also has the right to demand for himself the best remuneration which he can obtain for his services in the general market. He may leave one employer and go to another, as often as he finds the change beneficial. By this means he makes use of the competition of capitalists to obtain his just dues. The amount of pay he gets is limited by profits which, on the average, accrues in the particular line of business in which he is engaged, and not by the cupidity of the employer or capitalist. Whether laborers or employees have the moral right to band themselves together, and to demand an increase of wages upon condition of resuming work, is questionable if not wholly unjustifiable. Such action can only be defended on the ground that employees are the weaker parties to the contract, and that a union of their strength is necessary in order to make labor equal in the struggle to capital. There may be occasions when such a course is justifiable; as for instance, when a branch of trade is monopolized by a few wealthy men, and the profits earned by the capital invested is proportionately greater than the profits paid to the employees under the name of wages. But as a general rule such organizations are injurious both to the actors and the public; and are no more justifiable than would be a combination of capitalists for the purpose of starving workmen into a willingness to work for lower wages.

The demand for an increase of wages which is now so universal throughout the country is the natural result of the war and the issue of Paper Money. The drain of men to fill the ranks of the union army has rendered laborers more scarce, and consequently the services of those remaining is more valuable. The issue of paper money has made the currency of the country cheaper than formerly; and while an increase of wages is justly due to the laborer in order to make his increase simply equal to what it formerly was, it also tends to absorb the currency and to properly adjust the relative value of all articles of trade in the community.

☞ The Boston and Maine Railway Company has leased the Cocheco Road for a term of years. This arrangement puts an end to the projected road between Dover and Portsmouth, for which a charter was obtained at the last session of the Legislature. The Boston and Maine hires the Dover and Winnipisseogee for fifty years, paying annually $29,000 for its use, and buying all its rolling stock. This will give the bondholders of the latter 6 per cent. The steamer Dover is included in part of this arrangement, the Boston and Maine taking the interest which the Dover and Winnipisseogee Road owned in the boat, which was about $12,000.

Rights of Carriers.—Duties of Consignors.

CONSIGNORS BOUND TO INFORM CARRIERS OF THE NATURE OF DANGEROUS ARTICLES SHIPPED BY THEM.

The law concerning common carriers consists for the most part of rules prescribing the duties and liabilities of the carrier, but there are certain duties imposed upon the consignor, which are of great importance, though not of so frequent application. Among these duties may specially be noticed the obligation resting upon the shipper of a dangerous article to inform the carrier of its nature, so that he may take the proper precautions against accident. The justice of such a rule is manifest, but the rule itself has seldom been so fully set forth as law, and so well illustrated, as in the late case of Farrant against Barnes, in the English Court of Common Pleas.

This was an action brought by the plaintiff to recover damages for an injury sustained by him from the insufficient packing of a carboy of nitric acid which he was employed to carry for the defendant.

The cause was tried before BLACKBURN, J., at the Summer Assizes at Croydon. It appeared from the plaintiff's evidence that he and his father were in the employ of one Russell, a carrier between London and Croydon; that it was part of the plaintiff's duty to collect goods in the city, and to convey them in a van to the Elephant and Castle at Newington, where he transferred the goods he had collected to a cart, in which they were conveyed to Croydon; that on the 1st of May, 1861, whilst going his round, he met in Cannon street, in the city, one Rayner, a carman in the employ of one Pescott, a railway carrier, who asked him if he would take a carboy, (which he told him contained "acid" without more,) and a bottle for, Croydon; and upon his agreeing to do so Russell brought them and placed them in the plaintiff's van, the carboy being a glass bottle encased in wicker work, weighing a little over 1 cwt., and having attached to its *neck* a wooden label, on which was written, "Mr. Wateman, dyer, Croydon. Acid;" that he proceeded with his van containing these and various other goods to the Elephant and Castle, at a foot pace; that on his arrival there the other goods having first been taken out, his father removed the carboy from the front to the tail of the van, and put it upon the plaintiffs shoulder; that as he walked with it towards the Croydon, cart part of the contents (which proved to be nitric acid,) escaped, and flying over the plaintiff burned him so severely that he was unable to resume his employment for more than a month, and was still not perfectly cured; that the carboy appeared to be sound when he received it from Rayner; that it received no injury whilst in the van; that he never saw any label on it except the one containing the direction; and that he did not know the contents to be dangerous, and would not have taken it if he had known the fact.

The plaintiff's evidence was corroborated with respect to what passed, when Rayner delivered the carboy to him, by that of his father, and as to what occurred at the Elephant and Castle, by the evidence of his father and two other witnesses.

Rayner who was called as a witness for the

Labor and Capital.

There is a class of men whose mental vision is always colored by their interests. If their generosity is not overmatched in intensity by selfishness, yet spending most of their time in securing for themselves the comforts of life, they are longer under the influence of those feelings which tend to individual aggrandisement, than they are under those which arise from looking to the wants of others, and assisting in promoting the prosperity of the whole. They consequently see but one-half of the truth, and that half is limited to what happens to be the extent of their individual experiences. Thus we find capitalists who are forever dwelling upon the benefit which the employment of their funds confers upon the individual employee, or laborer, and upon the country at large, and leaving entirely out of view the fact that without the laborers capital itself would be worthless. On the other hand, we find employees who look upon capital as their natural enemy, forgetting that without capital they would be in a still worse condition.

In an important sense, and in a manner more readily apprehended because more immediate in its effect upon the great masses of mankind, capital and labor are antagonistic. But in another, and a far more important sense, capital and labor are mutually beneficial; they are and ought to be fast friends.

Were we to entirely divorce the two, capital could find no employment, it could earn no interest or dividends, but would lie unemployed in the hands of the holder; while labor, thus left without the power of organization could only supply its thousand wants by the wholly inadequate efforts of its individual hands.

It is the legitimate province of capital to earn to itself interest. For this purpose it is the duty of the capitalist to look about and find the safest and the most lucrative business in which to invest his money. If money is plenty, competition will tend to lessen its value, and the result will be shown by a reduction in the rate of interest, or the sum which people are willing to pay for the loan of its use. If, however, it is scarce the contrary result will follow. It is the right also of the capitalist to make the best use of his money which legitimate business operations will afford, and if in doing this he finds it desirable to divert his money from one branch of trade to another, the employees engaged in the comparatively unprofitable trade cannot justly complain. Such employees may be sufferers thereby, but that the community at large will be gainers is proved by the fact, that they are willing to pay more for the money employed in the new or different business. So too the capitalist has the right to make the best possible use of his money, by employing the cheapest labor the market affords. If a man possessing a limited capital is obliged to pay his business employees three dollars per day, instead of one dollar and a half per day, it is quite evident that he would be able to do but one half the amount of business which he could do at the cheaper rate, and of course the return of money for his investment would be proportionately less. It is therefore right for him to come into the labor market and accept the services of the lowest bidders. In this manner labor and capital are antagonistic, and this is the only view which many (we will not include the mass of American workmen because we believe that these are too intelligent) employees take of the subject. But even this antagonism is not without its compensating benefit. If the employer pays his laborer higher wages, he must increase the price of his goods an equal amount, and when this universally takes place all prices increase, and the laborer with his increased wages buys no more of the necessaries of life than he formerly did with his lesser wages. Hence while the employer resists the increase of wages, he is at the same time helping to keep down the prices of all of the commodities which are bought and sold in the community. He may be and usually is governed entirely by selfish motives, but this does not change the beneficial effect of his action.

But the laborer also has the right to demand for himself the best remuneration which he can obtain for his services in the general market. He may leave one employer and go to another, as often as he finds the change beneficial. By this means he makes use of the competition of capitalists to obtain his just dues. The amount of pay he gets is limited by profits which, on the average, accrues in the particular line of business in which he is engaged, and not by the cupidity of the employer or capitalist. Whether laborers or employees have the moral right to band themselves together, and to demand an increase of wages upon condition of resuming work, is questionable if not wholly unjustifiable. Such action can only be defended on the ground that employees are the weaker parties to the contract, and that a union of their strength is necessary in order to make labor equal in the struggle to capital. There may be occasions when such a course is justifiable; as for instance, when a branch of trade is monopolized by a few wealthy men, and the profits earned by the capital invested is proportionately greater than the profits paid to the employees under the name of wages. But as a general rule such organizations are injurious both to the actors and the public; and are no more justifiable than would be a combination of capitalists for the purpose of starving workmen into a willingness to work for lower wages.

The demand for an increase of wages which is now so universal throughout the country is the natural result of the war and the issue of Paper Money. The drain of men to fill the ranks of the union army has rendered laborers more scarce, and consequently the services of those remaining is more valuable. The issue of paper money has made the currency of the country cheaper than formerly; and while an increase of wages is justly due to the laborer in order to make his increase simply equal to what it formerly was, it also tends to absorb the currency and to properly adjust the relative value of all articles of trade in the community.

☞ The Boston and Maine Railway Company has leased the Cocheco Road for a term of years. This arrangement puts an end to the projected road between Dover and Portsmouth, for which a charter was obtained at the last session of the Legislature. The Boston and Maine hires the Dover and Winnipisseogee for fifty years, paying annually $29,000 for its use, and buying all its rolling stock. This will give the bondholders of the latter 6 per cent. The steamer Dover is included in part of this arrangement, the Boston and Maine taking the interest which the Dover and Winnipisseogee Road owned in the boat, which was about $12,000.

Rights of Carriers.---Duties of Consignors.

CONSIGNORS BOUND TO INFORM CARRIERS OF THE NATURE OF DANGEROUS ARTICLES SHIPPED BY THEM.

The law concerning common carriers consists for the most part of rules prescribing the duties and liabilities of the carrier, but there are certain duties imposed upon the consignor, which are of great importance, though not of so frequent application. Among these duties may specially be noticed the obligation resting upon the shipper of a dangerous article to inform the carrier of its nature, so that he may take the proper precautions against accident. The justice of such a rule is manifest, but the rule itself has seldom been so fully set forth as law, and so well illustrated, as in the late case of Farrant against Barnes, in the English Court of Common Pleas.

This was an action brought by the plaintiff to recover damages for an injury sustained by him from the insufficient packing of a carboy of nitric acid which he was employed to carry for the defendant.

The cause was tried before BLACKBURN, J., at the Summer Assizes at Croydon. It appeared from the plaintiff's evidence that he and his father were in the employ of one Russell, a carrier between London and Croydon; that it was part of the plaintiff's duty to collect goods in the city, and to convey them in a van to the Elephant and Castle at Newington, where he transferred the goods he had collected to a cart, in which they were conveyed to Croydon; that on the 1st of May, 1861, whilst going his round, he met in Cannon street, in the city, one Rayner, a carman in the employ of one Pescott, a railway carrier, who asked him if he would take a carboy, (which he told him contained "acid" without more,) and a bottle for, Croydon; and upon his agreeing to do so Russell brought them and placed them in the plaintiff's van, the carboy being a glass bottle encased in wicker work, weighing a little over 1 cwt., and having attached to its *neck* a wooden label, on which was written, "Mr. Wateman, dyer, Croydon. Acid;" that he proceeded with his van containing these and various other goods to the Elephant and Castle, at a foot pace; that on his arrival there the other goods having first been taken out, his father removed the carboy from the front to the tail of the van, and put it upon the plaintiffs shoulder; that as he walked with it towards the Croydon, cart part of the contents (which proved to be nitric acid,) escaped, and flying over the plaintiff burned him so severely that he was unable to resume his employment for more than a month, and was still not perfectly cured; that the carboy appeared to be sound when he received it from Rayner; that it received no injury whilst in the van; that he never saw any label on it except the one containing the direction; and that he did not know the contents to be dangerous, and would not have taken it if he had known the fact.

The plaintiff's evidence was corroborated with respect to what passed, when Rayner delivered the carboy to him, by that of his father, and as to what occurred at the Elephant and Castle, by the evidence of his father and two other witnesses.

Rayner who was called as a witness for the

plaintiff, stated that being at the warehouse of the defendant, who is a dry salter in Lawrence, Pountney Lane, on the day in question, he was asked by the foreman if he could take a carboy and bottle of acid to Croydon; that he told him he could not, as articles of that description were only carried by the railways on Mondays, (when special provision was made for the carriage of dangerous articles;) that the foreman saying he particularly wished it to go, he (Rayner,) asked the plaintiff if he could take it, and on his assenting went back and told the foreman, who then gave him the carboy, which he carried on his back to the plaintiff's van; that he (Rayner,) knew that it was acid and dangerous, but not that it was nitric acid; and that he told the plaintiff to be careful of it.

It was submitted on the part of the defendant, that there was no case to go to the jury, inasmuch as there was no privity between him and the plaintiff. But the learned judge declining to stop the case, the defendant's foreman was called. He stated that the carboy was securely packed by himself in the usual way; that the bottle was sound; and that it had on it besides the address of the consignee another label, (that of the manufacturer,) which stated what the vessel contained, and which was tied to the *handle* of the carboy. The witness was corroborated as to this latter fact, by a man who was with Rayner at the time he received the carboy at the defendant's warehouse. Upon this it was urged on the part of the plaintiff, that there was evidence from which the jury might assume that Rayner as the defendants agent, fraudulently removed the label which intimated that the carboy contained nitric acid. The learned judge, however, thought there was no evidence to justify him in leaving that question to the jury.

The learned judge then left it to the jury to say—first, whether they thought the defendant took precautions to make the carrier's servants aware that the article they were about to carry were dangerous—secondly, whether the plaintiff was in fact ignorant that it was dangerous; and if so, whether that arose from want of reasonable prudence and skill on his part—thirdly, whether it was made out to their satisfaction that the accident occurred from the acid being improperly packed unknown to the plaintiff: telling them that they were not to say that the accident arose from bad packing, unless affirmatively satisfied that it was so—fourthly, what amount of compensation the plaintiff was entitled to for the injury he had sustained.

The jury answered the first question in the negative; as to the second, they found that the plaintiff was in fact ignorant, but not from want of reasonable prudence and skill on his part; and as to the third, that it was not proved that the accident occurred from the acid being improperly packed; and they assessed the damages at 50*l*.

Pursuant to a previous arrangement with the respective counsel, a non-suit was entered; leave being reserved to the plaintiff to move to enter a verdict for 50*l*. on the findings of the jury, if on those and the evidence the court should be of opinion that there was a cause of action for the plaintiff; the court to have all the powers of amendment which the judge had.

Erle, C. J.—The facts of the case are these: The defendant wishing to have a dangerous article, a carboy of nitric acid conveyed to Croydon, his foreman asked one Rayner, a carman in the employ of a railway carrier to forward it. Being unable in consequence of the company's regulations to forward it by railway in time to answer the defendants purpose, Rayner applied to the plaintiff, the servant of one Russell, a Croydon carrier to take it for him. And thus the carboy was in effect delivered by the defendant to the plaintiff to be carried to Croydon according to his accustomed course of business. The application to the plaintiff being an application to take charge of, and to carry and deliver a dangerous article, it was the duty of the defendant who knew the danger to take care that the dangerous character of the article should be made known to all persons who were to be concerned in the carriage of it. The jury have found that he did not do so. There was no evidence as to how the accident occurred; probably it was from the explosive nature of the article. But, be that as it may, if notice had been given of the dangerous character of the article, greater precaution might possibly have been used in the handling of it. I think the plaintiff is brought into such direct contact with the defendant, that the distinction relied on to take the case out of the principle upon which the decision in Langridge *vs.* Levy, (4 M. & W. 337,) proceeded fails. The defendant knowing the dangerous character of the article, and omiting to give notice of it to the plaintiff, so that he might exercise his discretion as to whether he would take it or not, was guilty of a clear breach of duty. The case, however, upon which I rely is Brass *vs.* Maitland, (6 Ellis & B. 470.) There the defendants caused a dangerous substance to be put on board the plaintiff's ship, as bleaching powder, without giving him any notice of its dangerous qualities; and by reason of the insufficiency of the casks in which the article was contained, the contents escaped and damaged the rest of the cargo; and it was held by Lord Campbell and Wightman J., that there is an implied undertaking on the part of shippers of goods on board a general ship, that they will not deliver to be carried on the voyage packages of a dangerous nature, which those employed on behalf of the ship owner may not on inspection be reasonably expected to know to be of a dangerous nature, without giving notice.

The present case, even falls within the principle there laid down by Crompton J., who held the liability to be more limited. Lord Campbell says, in giving the judgment of himself and Wightman J., that "where the owners of a general ship undertake that they will receive goods and safely carry them and deliver them at the destined port, I am of opinion that the shippers undertake that they will not deliver to be carried on the voyage packages of goods of a dangerous nature, which those employed on behalf of the ship owner may not on inspection be reasonably expected to know to be of a dangerous character, without expressly giving notice that they are of a dangerous character." Crompton J., says: "Probably an engagement or duty may be implied, that the shipper will use and take due and proper care and diligence not to deliver goods apparently safe, but really dangerous, without giving notice thereof; and any want of care in the course of the shipment, in not communicating what he ought to communicate, might be negligence for which he would be liable; but where no negligence is alleged, or where the plea negatives any alleged negligence, I doubt extremely whether any right of action can exist." Here it is expressly found by the jury that the defendant took no precaution to inform the plaintiff of the dangerous nature of the article in question when he intrusted it to him to carry. It seems to me that the principle on which the decision of Brass *vs.* Maitland is founded, taking it in the narrowest and most limited way, authorizes us to say that the defendant in this case is responsible for the injury which the plaintiff has sustained, and that consequently the verdict must be entered for the latter, for the amount of damages assessed by the jury.

Willes, J.—I am of the same opinion. I apprehend that as matter of legal duty a person who gives another dangerous goods to carry, goods which require more care and caution than ordinary merchandize, and which are likely in the absence of such caution to injure persons handling them, is bound to give notice of their dangerous character to the party employed to carry them, and is liable for the consequences which are likely to ensue from the omission to give such notice. A simple instance of this, is the case of a merchant putting on board a ship, goods which are liable under certain circumstances to spontaneous combustion, or which in the absence of extraordinary care, are likely by escaping to damage other parts of the cargo. It is clear that such a person would be liable to an action at the suit of any one who might be injured by his wrongful omission. This doctrine though more fully considered in the recent case of Brass *vs.* Maitland, (6 Ellis & B. 470,) is by no means modern. It was considered in Williams *vs.* the East India Company, (3 East, 192.) The plaintiff there failed in the result for want of proof, that the goods were put on board without due notice of their dangerous character; but the court treat the obligation of the shipper as not resting upon contract, but upon the duty to give notice. Lord Ellenborough says: "In order to make the putting on board wrongful, the defendants must be conusant of the dangerous quality of the article put on board; and if being so they yet give no notice, considering the probable danger thereby occasioned to the lives of those on board, it amounts to a species of delinquency in the persons concerned in so putting such dangerous articles on board, for which they are criminally liable and punishable, as for a misdemeanor at least." The court there treat it as a duty which is owed to all persons who may be injured by the neglect to give notice. What is there laid down may not so far as the supposed criminal responsibility goes, be applicable to a case like this; but it clearly shows that there would be a civil responsibility for the non-performance of this duty by the defendant or his agent.

The case of a shipment of dangerous goods may be an extreme case; but it serves to illustrate the general principle, that wherever a person employs another to carry an article which from its dangerous character requires more than ordinary care, he must give him reasonable notice of the nature of the article, and that if he fails to do so he is responsible for the probable consequences

of his neglect. The only remaining question then here is whether the injury of which the plaintiff complains, was the probable result of the want of notice. The plaintiff was injured whilst carrying this carboy of nitric acid in the way in which goods of the like bulk are ordinarily carried, viz., on the shoulder. If he had known the nature of the article it is extremely improbable that he would have carried it in that manner. When, therefore we take into account the fact that the plaintiff was the servant of the carrier, and that the carboy was delivered to him to be carried in the ordinary way, it would seem to be a waste of words to argue that the injury was the result of the defendant's omission to give notice.

KEATING, J.—I am of the same opinion. It is clear that persons sending dangerous articles by a carrier, are bound to give notice of their character. I did not understand Mr. Archibald to contend that there was no duty to give such notice, but that the duty was confined to giving notice to the person employed to carry them, and did not extend to his servants. Without defining the extent to which the duty of the defendant ought to go, I entertain no doubt that it goes to the extent of including the case of the present plaintiff. He was the person to whom the defendant caused the article to be delivered for the purpose of being carried. The defendant knew he was employed to carry and deliver it.

Judgment was accordingly entered for the plaintiff.

Grand Trunk Railway of Canada.—An English View.

The prosperity and progress of a country is so immediately dependent upon the condition of its communications, that we may almost venture to test the condition of a population by the condition of their railways. In this point of view the Report of the Grand Trunk Railway of Canada, recently presented to the bond and shareholders at their general meeting at the London Tavern, would afford a favorable impression of the improvement of Canada. After almost unparalleled depression, the Grand Trunk is beginning to recover itself. Its traffic, though still much below what it ought to be, is steadily increasing, showing, we hope, a corresponding improvement in the condition of the province.

There are few territories to which a railroad promised more advantage. Canada is a new country, and the first want of a new country is a road. Canada is an agricultural country, and the first requirement of an agricultural population is access to a market. Canada, moreover, labors under a peculiar physical disadvantage; for nearly six months in every year the country is 'snowed up.' The broad and rapid river St. Lawrence, which forms the natural mode of communication between all parts of Canada and the seaboard, is congealed throughout its course during half of every year. Before the formation of railroads commerce in Canada was therefore, restricted to the summer months. Between November and April transport was impossible, and even ordinary intercourse was not unattended with difficulty, for a sleighing excursion of 180 miles, between two such cities as Quebec and Montreal, was an achievement not to be accomplished in a Canadian winter without some danger, and at any rate considerable cost. The opening of the Grand Trunk Railway and of the Victoria-bridge across the St. Lawrence may, therefore, almost be said to have added six months in every year to Canadian existence.

Few railways were ever ushered into existence under apparently brighter auspices than the Grand Trunk. It was in April, 1853, that its first prospectus was issued to the British public with the authority of the highest names in Canada, associated with those of the greatest of our London merchants. The line itself was proposed as "a comprehensive system, protected from the possibility of competition as well by natural causes as by legislative enactment." It would, it was said, engross the traffic of a district more than 1,100 miles in length, extending in one direct line from Lake Huron, through the Canadas, to Portland in the State of Maine, and ultimately to St. Johns in New Brunswick, and Halifax in Nova Scotia. Commencing at the debouchure of the three largest lakes in the world, Lake Superior, Lake Michigan, and Lake Huron, it was calculated that the accumulated traffic of the rapidly increasing West would pour itself by the railway, in one unbroken line throughout the length of Canada, into the St. Lawrence at Montreal and Quebec, and into the ocean, at Portland, St. Johns, and Halifax.

Financially the scheme of the Grand Trunk was not less promising. A capital of £9,500,000 was asked for to purchase and construct 1,112 miles, including the largest engineering work in the world, the Great Victoria Bridge at Montreal. Of the total capital, £3,000,000, or nearly one third, was subscribed in the province, partly by the legislature and partly by private capitalists. It was estimated that the line, when completed, would produce above £25 per mile per week; that its working expenses would average 40 per cent., and that there would be "a profit on the share capital of nearly 11½ per cent."

How has it happened that calculations founded on such a basis, supported by such authorities, and entrenched (as it were) by such important influences, have been throughout, so grieviously disappointed? The latest Grand Railway meeting reveals something, but to elucidate the whole facts we have to look further back and to trace the position of the railway from the beginning of the enterprise.

In the first place, it is necessary to dispel misconceptions. The non-success of the Grand Trunk Railway has been attributed to various causes. It has been said that the line was expensively constructed. It does not appear that anything of the sort was the case. If we look at the cost of the various great lines of the world we shall find few instances in which a railroad has been made so cheap. Taking the whole expenditure upon the line, including the permanent way, stations, rolling stock, and all the accessories of a railway, the Grand Trunk appears to have been handed over to its proprietary at a price little exceeding £10,000 per mile, a sum remarkably small considering the cost of constructing a railway which may almost be said to have been made in England and exported to America. This amount is exclusive of the cost of the Victoria Bridge. It has been urged that the cost of that bridge has been the greatest burden on this railway. But without the Victoria Bridge the railway would have been a merely local and most imperfect line. Canada would have been an isolated territory north of the St. Lawrence, without communication with the United States, and consequently cut off from a great market for its produce. The Victoria Bridge, which cost £1,400,000 in its construction, is emphatically the key of the Grand Trunk railway communication; and there can be no doubt that, constructed as it is on the most permanent basis, it will ultimately be found to be the most lucrative portion of the system, as well as the cheapest to maintain. The Grand Trunk was especially devised for the carriage of all the produce of the great Western territory. Here there has been a dreadful disappointment, arising partly from the incompleteness of the line, and partly from the effects of competition. At the time the Grand Trunk was proposed the canal system of Canada was very perfect. The water carriage of heavy commodities by canal and river can always be carried on at very moderate rates of charge, and all experience testifies that it is one of the most difficult classes of traffic to divert. So long as the canals and rivers are open, therefore, the Grand Trunk has always found itself exposed to a competition along its whole route by steamboats, &c.—a competition not limited to corn and merchandise, but even extending itself in summer weather to the passenger traffic of the country.

Nor was this all. The Canadian canals were always opposed to American competition; and, indeed, one great object of the colonists in promoting the Grand Trunk was to defeat that competition. But, pending the period between 1853, when the Grand Trunk was first proposed, and 1859, when the Victoria Bridge across the St. Lawrence was opened for traffic, an immense development took place upon the shores of the Western lakes, and a corresponding railway system was opened up in the United States. The town of Chicago, at the bottom of Lake Michigan, became the great grain depot for the new and rapidly increasing Western States of Wisconsin, Minnesota, Iowa, Illinois, and Michigan. Towards the city of Chicago railways were constructed by the dozen. The most important of them pointed directly across the territory of the United States towards New York. And New York, as everybody knows, is the great market of North America. Now, as a rule, produce will find its way to the market where there are the most purchasers. The produce of these States accordingly found its way direct to New York, instead of along the route of the Grand Trunk; and hence the Grand Trunk of Canada, instead of receiving almost the entire grain traffic of the West at Port Sarnia, as had been anticipated, found itself exposed to a most violent competition at its western extremity with American and other lines, compelling it to make competing rates for the carriage of produce, which proved anything but profitable.

Cut off from access to British seaports at one end, and exposed to American competition at the other, the Grand Trunk became dependent upon the internal trade of Canada. Now, for some years after the formation of the company, Canada, unfortunately, was not in thriving circumstances. In 1854, 1855 and 1856 the war in Europe checked emigration. In 1857, 1858 and 1859 Canada experienced three successively bad harvests. These were accompanied and followed by financial embarrassments, which operated disastrously on the fiscal resources of the railway. The line itself, moreover, was incomplete as a means of transit, until the Victoria Bridge was fairly opened for traffic, which was not until the autumn of 1859. The consequence was that the traffic of the Grand Trunk presented lamentable deficiencies. It had been estimated to produce £25 per mile per week, but in January, 1859, with 880 miles of railway open, the line only produced £8 6s per mile per week; and the working expenses at that period had risen to 80 per cent. of the gross receipts.

The consequence was a great period of disaster. The income of the line was insufficient to defray even the interest on the debenture debt of the company. Great expenditure also had been and was being incurred. In order to meet the competition of the American and other lines it had been found necessary to make arrangements, at very great cost, and to carry the line beyond its original boundary. All this added to capital. The £9,500,000 was increased to £14,000,000, and as there was nothing for the shareholders, great complaints arose. The aspect of affairs attained its worst in 1860. The line was then dreadfully involved in debt, and did not pay its way. Its working stock was threatened with seizure. Its shareholders of various descriptions were quarrelling for their respective rights. Help was sought from a variety of quarters; amongst others, from the Canadian Legislature. None could be obtained. This state of things led to criminations and recriminations of the worst character. The capitalists concerned in the railway were assailed not only by interested parties in the colony, but by the shareholders at home. It was necessary, at last, to bring things to a crisis. In 1862 an act of parliament was obtained, called "The Grand Trunk Arrangements Act," which classified and defined the interests of the various stockholders. It commenced by a terrible admission:

"Whereas the interest of all the bonds of the Grand Trunk Railway of Canada is in arrear, as well as the rent of the railways leased to it; and

the company has become deeply indebted, both in Canada and in England, on simple contract, to various persons and corporations; and several of the creditors have obtained judgment against it, and much litigation is now pending; *and whereas the keeping open of the Railway for traffic, which is of the utmost importance to the Province, is thereby imperilled;* and whereas the terms of a compromise have been settled, but in order to facilitate and give effect to the same the intervention of the Legislature is necessary; therefore her Majesty, by and with the advice, &c., enacts, &c."

The result of the working of this act was shown at the meeting to which we commenced by referring. Differences have been abated, a great effort has been made to put this important railway on a better footing. The result has been by no means unsatisfactory. With the last year a material reduction has been made in working expenses, and a largely increased revenue has been earned at a diminished cost. The line is now put upon a footing which enables it to pay its way. All its creditors have been arranged with, every judgment debt removed, and the permanent working of the line placed beyond peril. Since the opening of the Victoria Bridge, the traffic also has shown a satisfactory increase. The net revenue of the line has risen as follows;—

	First Half-year.	Second Half-year.	Total.
1859	£20,868	£52,490	73,358
1860	46,001	56,684	102,685
1861	46,786	95,708	142,494
1862	63,436	106,798	170,234
1863	124,173.		

This increase shows the extent to which this line is capable of development, if proper means are applied to effect that object. A great work, however, still remains to be done. The Grand Trunk Railway is, even at this day, far from being what it was designed to be. Its communications with the colonies of Great Britain in the East are still incomplete, and its relations with other railways in the West are still by no means satisfactory. We regret that space does not allow us to enter more at large into these considerations. But, at present, we must rest satisfied with this imperfect, though impartial, sketch of the history and position of the Grand Trunk, which we hope hereafter to find increasing in prosperity, contributing to the welfare of the great Province with whose destinies it is so intimately associated, and receiving from colonists of all shades and parties the encouragement and support which so great a work deserves.—*London Daily News.*

Telegraph to India.

England has determined upon a most gigantic enterprise, no less than the connection of her soil by telegraph with the most remote corners of her Indian empire. The vessels which convey the last links in the great cable have just sailed from England. The route to be followed by the line of telegraph is thus described by the London *Times*:

"The five stations will be from Kurrachee to Gwadel, a distance of two hundred and fifty miles, from Gwadel across the Gulf to the peninsula of Khasab, from Khasab to Bushire, and from Bushire to a place called Faw, a small eastern township on the estuary at the mouth of the Euphrates, where the submarine wire meets the land lines which carry it to Bagdad, thence to Mosul, (the ancient Nineveh,) thence to Diarbekir, and thence to Scutari, on the Bosphorus, where it joins a dozen European land routes."

The line will probably be laid next February. The *Times* apprehends that there will be trouble on the land part of the line, extending from the Gulf to Scutari, as a part of the country is in the hands of the Arabs, and the line from Bagdad to Scutari is worked by Turkish operators, who work only when they feel like working. To escape the Arabs another land line is nearly or quite completed from Bushire to Teheran, and from Teheran to Bagdad, and to check the Turks, a line will be completed from Teheran via Tiflis, connecting with the Russian lines.

Progress in Wool Growing in Minnesota.

It is calculated that the wool clip of Minnesota the present year will not be less than 500,000 lbs. From 2,000 to 5,000 are shipped below from our levee daily. The progress in wool growing in Minnesota has been so unprecedented and gratifying, that it shows we are approaching a time when the wool trade of our State will be one of its chief sources of wealth. Commencing in 1850, our progress toward this is as follows:

	No. Sheep.	Clipped lbs.
1850	80	800
1859	4,000	7,000
1860	2,595	19,306
1861	25,000	75,000
1863	175,000	500,000

There is no wool growing State in the Union which can show such a sudden increase in its whole clip or flocks as Minnesota, and yet our farmers have scarcely began to get under way in their wool growing operations. By the time our State census is taken in 1863, our flocks will have increased to 500,000, and our wool clip to 2,000,000 lbs.

Three or four years ago, a few grain sacks held the entire wool clip of the State. Now it has become a department of trade, and a large item (at present prices) in our exports.

Vermont grown wool is now the finest in the world, having taken the first prize at the Hamburg Fair, in competition with European Saxony fleeces. It is a gratifying fact that most of our Minnesota blooded sheep are of Vermont Merino stock, and have actually improved by the emigration. Our pure blood sheep can, therefore, safely challenge those of any part of the world to bear finer wool or heavier fleeces.

Charles Hoag, of Diamond Lake, Hennepin County, who has some fine flocks of Southdowns and Merinos, has sent a large quantity of wool to Milton, Indiana, to be manufactured into cloth, and returned to him. He has reason to believe that he can induce the manufacturer to locate himself at the Falls, and start a manufactory of fine woolens.—*St. Paul Press.*

New York City and County Loans.

LOANS OF THE COUNTY OF NEW YORK.

1. *Riot Damages Indemnity Bonds*—For the payment of damages for which the county became liable under the provisions of chapter 428 of the Laws 1855, in consequence of the proceedings of the mob during the riots in July last:

Amount authorized	$1,000,000 00
Amount heretofore issued	426,000 00
Balance to be issued from time to time, as the money is required for the payment of claims for damages	$574,000 00

These bonds are redeemable on the 1st day of August, 1864, and bear interest at the rate of six per cent. per annum.

2. *Soldiers' Substitutes Bounty Fund Bonds.*—For the procurement of substitutes for drafted soldiers, &c.:

Amount authorized	$2,000,090 00
Amount subscribed for	48,300 00
Balance	$1,951,700 00

These bonds are redeemable on the 1st day of June, 1864, and bear interest at 6 per cent. per annum. The loan will, without doubt, be duly legalized at the next session of the Legislature, and provision will be made at the same for funding the amount.

3. *The New York County Court-house Stock.*—This stock was authorized by chapter 167 of the Laws of 1862, and by an ordinance of the Board of Supervisors, passed April 18, 1862. The amount limited by the act is $1,000,000, of which the sum of $700,000 has already been issued. Of the proceeds of the amount issued $450,000 was paid to the Corporation for the benefit of the Sinking Fund for the redemption of the City debt, and $250,000 to the erection of the New Court-house in Chambers-street. The remainder of the amount authorized, say $300,000, is now offered, and will be awarded to the highest bidders (not less than par,) on Saturday, the 28th of November, inst.

This stock bears interest at six per cent., payable half-yearly, (May and November,) and the principal is redeemable in 1875, 1877, 1878 and 1879—the Board of Supervisors being authorized and required to raise the sum of $100,000 by taxation in each year, commencing in 1875, for that purpose.

LOANS OF THE CITY OF NEW YORK.

There are no loans of the Corporation now in the market. It is probable that $230,000 of Water Stock will shortly be authorized by the Common Council, that sum having been called for by the Croton Aqueduct Board, and recommended by the Comptroller, to provide means for finishing up the New Grand Reservoir, and the improvements at High Bridge.

This stock will bear interest at five per cent., payable quarter-yearly, and the principal will be redeemable in 1879.

We notice that a proposition for another loan has been introduced in the Board of Aldermen for building water-works at or near Carmansville, and building storage reservoirs in the Croton Valley.

The Corporation loans for war purposes, that is to say, for aiding the families of soldiers from this City, will be continued during the war at the rate of a million and a half or two million dollars per annum. In order to divide the burden, Comptroller BRENNAN procured the enactment of a law last Winter, which provides that not over $500,000 of said loans shall be made payable in any one year.

A Large Locomotive.

The largest locomotive in the United States, if not in the world, has just been built for the Philadelphia and Reading Railroad Company. It has 12 driving wheels 43 inches in diameter. The cylinder is 20 inches in diameter, and the stroke of piston 26 inches. The fire boxes 10 feet 8 inches long, and 41¾ inches wide. Inside diameter 48 inches. The weight of the locomotive when in running order is 100,820 pounds. This locomotive is intended for a pushing one, to force the heavy coal trains up the grades of the road. It was designed and constructed by Mr. James Milholland, of Reading.

Changing the Current of the Potomac.

Col. Seymour, Engineer-in-Chief of the Aqueduct, has submitted a plan to the Secretary of the Interior for changing the current of the Potomac to the Washington side of the river. It provides for the construction of a breakwater from the lower extremity of Mason's Island, to extend easterly on the flats to the neighborhood of the Long Bridge, midway of the causeway so called. This will give a current of twenty-five to thirty feet along the Washington wharves, which will be of great service to the Government in the matter of transportation.

Building in Philadelphia.

We learn that a very large number of buildings have been erected in Philadelphia the past year, particulaarly in the Northern and Western sections. In West Philadelphia great improvements have been made in the architectural designs; the fronts are of stone instead of brick; the dwelling houses are large and commodious, and spacious side courts are attached to them. This is a commendable variation from the old style, and will be found of great advantage.

American Railroad Journal.

Saturday, December 5, 1863.

Stock Exchange and Money Market.

Our recent arrivals from Europe bring us intelligence of an approaching crisis in the foreign money market. One cause unquestionably is a demand from the East in payment for its cotton, which seems to be unappeasable. But another is equally obvious, the unsettled condition of European affairs arising from the recent speech of Louis Napoleon. The great point he made was, that the treaty of Vienna, in 1815, was no longer practically in force either in regard to the exclusion of the Bonaparte family from the throne of France, or in relation to the territorial integrity of other countries. The mere intimation of reconstruction has therefore caused alarm, and continental speculators look upon war as near at hand. All the first class powers are taking time to consider whether they will enter into this Napoleonic Council, and some of them are inquiring what is

to be its business, and what the programme of the French Emperor. Austrian funds have depreciated 5 per cent since the promulgation of the speech, and the posting of the autograph letters. The shares of the great Frankfort Bank (which is an indicator of the Commercial feeling of the Germans,) also receded to the same extent, and the differences in the Zollverein are melting away into a harmonious agreement in the presence of apprehended danger. The rate of interest has everywhere advanced, and the bullion market is disturbed.

The British Government is obliged to draw on India to stop the export of specie, and rupee bills (paper currency in no particular favor) are also to be substituted for gold. So we see that Europe has its own financial difficulties, enhanced by the avowal that the French Government will shortly have to offer for a heavy loan. In connection with this is another curious circumstance that has probably much to do with the revenue of the Empire. It is known that there has been a large quantity of tobacco belonging to its Government lying in the Richmond warehouses, paid for before the war, but not delivered. It is believed that after much negotiation Mr. Seward has consented to its exportation as an act of grace, and a fleet of French transports is announced as about to proceed up the James river to take it on board and convey it to France, where its arrival will be equivalent to the receipt of a large remittance of money. It is doubtless well known to our readers that tobacco is a monopoly of the French Government, and that its sale produces a large amount to its Treasury, as it evolves a duty from every whiff escaping from French lips. When we get our volume of correspondence from the State department, we shall be able to see how the affair has been managed. We notice among the contents of *le Livre jaune*, which except in the color of its binding, answers to the English Bluebook, there are no less than twelve documents relating to American affairs, from one of which it is ascertained officially *that France does not seek for any acquisition in America for herself or any one else.* Hence the tobacco is allowed to depart, and with this aid to Mr. Fould's budget, Louis Napoleon may feel stronger in his European policy. It will pay interest if it does not discharge the principal of the new debt.

All this foreign difficulty will probably have some effect on our own financial situation. We hope that our importers will not trust to foreign bills to the extent of many millions at a time, for a general war in Europe or a revolution in France might cause some of them to be returned.

We have therefore great reason to be satisfied with our own easy market with this large war on our hands. It demonstrates beyond a question the matchless ability of our countrymen, and the immensity of our national resources, that we are able to carry on our business with so little disturbance, and that if we are not in our normal condition of health, it is not exhaustion which troubles us.

The article of all articles, gold, before which so many are inclined to prostrate themselves if not to worship it, has had its infallibility somewhat disturbed of late in our market. If it falls 10 per cent., in a short time at the intelligence of one victory, what will it be worth when we have conquered the rebellion? We are inclined to the opinion we have frequently expressed, that the high price paid for gold is unnatural and unjustifiable. It is true the export of gold to England at this moment pays a small profit, but it is a very small one. Other articles pay much better. The Secretary of the Treasury, or the associated city banks of New York could break down the rate any day they chose, with the utmost ease and without any loss. Five millions put upon the street would break all the operators in a row, and the sellers after realizing a large profit could take it in again on their own terms. The bare possibility of such an event should produce greater caution than is at present apparent in Wall street. We notice in a late number of the San Francisco *Mining Journal*, that the products of the California mines continue large, and that $5,000 per ton is not an unusual yield. It is easy to see that there is not to be any falling off in this National staple, come what may. And yet it is a singular and suggestive fact, that in California, where paper currency is as yet excluded from circulation, the rate of interest remains where it has long stood, from 1½ to 2 per cent. per month on the best security. This rate, if usual on the Atlantic coast, would break up one half our commercial enterprises. Paper therefore is not to be despised, especially when we are carrying on a contest for our unity and our national existence.

The Share Market has been disturbed of late, and the speculations of the press are as diverse as their interests and ownerships, for it is well understood the money articles in many of them are written with reference to private interests. Thus some predict a large increase of paper money, and call for it; others reject the idea of its necessity or propriety, and warn the public against a fearful crash when the restrictive policy of the Government is more developed. It is understood that legal tender bonds bearing interest are to be used as far as possible, in place of the present legal tenders, and that our soldiers are to be asked to take them in their stead. As it is a notorious fact that very large amounts of soldiers' pay are sent home for investment, and the support of their families, we therefore do not see why they should not receive them at first hands, viz., at the hands of the Government through their paymasters. Contractors also, who are making large sums out of the war, could not with any decency of conduct refuse to receive a portion of their profits, at least in this kind of currency.

The railroad Share Market has also been disturbed. Large sales of Erie have been made to secure the late advance, and a cash movement in Central, to the extent of 7,000 shares and upwards within the last few days, evidently for the purpose of obtaining additional votes at the election for directors now close at hand. The stockholders of the Harlem have agreed to issue the unsold shares of the company two millions and more, by which the capital will be increased to eight millions as it was originally intended to be. If the amount thus raised is judiciously applied to the construction of a double track to Albany, the Harlem will be a first class trunk road, and by its connection with the Central will enjoy an enormous freight and passenger business, which cannot but place it in a dividend paying position. But it remains to be seen at what price the new issue of stock can be put upon the market. The conversions into the 5-20's continue large. On Tuesday $1,498,500 were received. The receipts at the Custom House also continue large. During the last month, the New York office received $5,115,500 against $3,018,000 in November, 1863. The aggregate income from customs this year will, it is confidently expected, reach the sum of $70,000,000, while the interest on the public debt thus far is but about $48,000,000.

The last week's exports of Domestic Produce and Miscellaneous Goods (exclusive of specie) from this port, were to the value of $3,251,634, against $3,903,918 same week last year, and $2,849,445 the corresponding week of 1861.

One hundred and thirty-three national banks have thus far been established, with an aggregate capital of $20,917,500.

There is a good supply of money at 7 per cent., and Government stocks maintain their standing. The public are anxiously waiting for the usual annual reports of the National departments, and we venture to predict that Mr. Chase will produce a budget which will give great satisfaction to the country.

The coupons due December 1 of the Milwaukee city readjustment bonds will be paid on presentation to W. Schall & Co., in this city.

The Lehigh Coal and Navigation Company have declared a dividend of three per cent., payable on demand, less the National tax.

The interest due 1st December on the first mortgage bonds of the Pittsburg Coal and Railroad Company will be paid, at the office of Geo. T. M. Davis, 47 Exchange place.

The principal and accrued interest of the San Francisco Water Works bonds, due April 1, 1864, will be paid at the office of Duncan, Sherman & Co., in this city.

The coupons due December 1, on the first mortgage bonds of the Staten Island Railroad Company will be paid at the office of the company, No. 3 Bowling Green.

The interest due, December 1, on the bonds of the New York and New Haven Railroad will be paid after that day at the Bank of the Republic.

The firm of Read & Lathrop is dissolved by the decease of Mr. Read. The business will be continued by the new firm of Lathrop & Mott, at the office, 40 Wall street.

Messrs. Robert Yelverton, W. Wallace Merriam and Theodore Ames have to-day been received as partners into the well known Stock Exchange firm of Merriam & Bell, 18 William street.

Mr. Robert L. Cutting, an old member of the New York Exchange Board, has formed a partnership with his son, Mr. Robert L. Cutting Jr., under the style of R. L. Cutting & Son.

Messrs. Talcott Brothers and Mr. R. K. Holdane have formed a new stock firm at No. 66 Beaver street, under the style of Holdane & Talcotts.

Messrs. Livermore, Clews & Co. have removed to their new and spacious office No. 32 Wall street. The improvements made by the new firm have converted the premises into one of the finest banking houses on the street.

By telegraph from San Francisco, to Ross, Dempster & Co., dated 26th Nov., Mining Stocks were quoted:

Ophir, $16 25 per foot; Gould & Curry, $46 per foot; Surage, $28 asked; Potosi, $11 per foot; Yellow Jacket, $9 50 per foot; Central $13 per

foot; Overman, $4 80 per foot; Sierra Nevada, 75c. per foot; Burning Moscow, $1 80 per foot; Crown Point, $10 per foot; California, $8 per foot; Best & Belcher, $6 per foot; Grass Valley, 70c. per foot.

The well known Flour Exchange firm of Messrs. A. W. Greenleaf & Co., in Exchange place, temporarily retire from active business, in favor of the new firm, Messrs. Stimson, Fronk & Co., who occupy their old office, No. 44 Exchange place. Mr. Fronk is a member of the Stock Exchange, and for the last two years has represented Messrs. Greenleaf at the Board.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns :—

R., 18@19.

☞ The Philadelphia *Inquirer* says :—"They have commenced shipping coal from the Green Mountain under a royalty of forty cents per ton, and as the Company is free from debt, the whole of the receipts will go to the stockholders."

Penn. Mining Company.

The par value of the stock of the Penn. Mining Co. is $25 per share, on which there has been paid $2½ per share. The whole amount of shares is 20,000. The Company, which was chartered by the Legislature of Michigan in 1859, owns three thousand acres of land in that State, in which are included the old Algonquin Copper Mines. The breaking out of the rebellion diverted attention from the property, but recent examinations indicate the presence of copper in various parts of the tract, which is now being energetically explored by competent engineers with flattering promise. It, of course, has never paid a dividend. The Company, we learn, is entirely free of debt, and has now $12,000 in its treasury.

SPECIAL CAUTION TO
Railroad Companies & Car Spring Manufacturers.

Notice is hereby given that the Metallic Car Spring Co. of New York are the sole assignees of the Patent granted to Richard Vose of New York, March 11, 1862 (re-issued Feb. 24, 1863) for an *improvement in Steel Spiral Springs;* that they thereby own the *entire and exclusive right* of making, using, and vending to others to be used, any form whatever, of Steel Spiral Spring which is protected from entire exhaustion and from contact of Steel against Steel by mean of the *interposition* of *India-rubber, wool, or other elastic gummy, or fibrous substance between* its coils; and that they will hold responsible and prosecute for damages, all persons who may either make, use or vend Spiral Spring packed as described.

RICHARD VOSE,
Sec'y Metallic Car Spring Co.,
No. 54 William st., N. Y.

Big Mountain Coal Co.

The Big Mountain Coal Company's property is situated at Shamokin Coal Township, Northumberland County, Pa., and consists of 2,187 acres of coal lands, 3,400 acres of timber lands, 1½ miles of locomotive road, and another mile in course of construction. One colliery leased and been in operation for years, which would have produced 100,000 tons this year, if cars sufficient could be had to bring it to market. Two new leases have been made this year, one of which will be in operation immediately after Jan. 1, 1864, and the other as soon as a tunnel can be made to approach the coal. When these three are in full operation, 250,000 tons can be got to market per annum, leaving a place for two more collieries for leasing. The coal, which is anthracite, both red and white ash, is brought to market by rail to Sunbury via Elmira, down Northern Central Railroad to Baltimore, and over Minehill Road to Philadelphia. The Company has $31,000 bonded debt, no floating debt; 60,000 shares of stock, par $25, paid $10. Is a full paid stock; no more instalments will be called. The office of the company is at 320 Walnut st., Philadelphia.

☞ The Kennebec and Portland Railway receipts last year were $279,734, against $205,841 for the preceding year. The Williams' debt, $91,460, has been paid off; the Cumberland and Oxford Canal from Portland Depot to Vaughn's Bridge and a lot of contiguous ground purchased, securing right of way and connection with Western roads. It is proposed to expend $70,000 on the Portland terminus, and $10,000 at Bath.

Railroads in Missouri.

We see it stated that efforts are being made in Missouri to transfer the obligation of meeting the interest upon the bonds directly to the Railway Corporations to whom they were originally issued, and upon whose lines of road they are a first mortgage lien. Several of their lines, besides the Hannibal and St. Joseph, which has always provided the interest on the $3,000,0000 issued for its construction, are now in profitable operation. Others are partially earning the State interest. In his message of the 10th ult., to the Legislature, Gov. Gamble says:

"In relation to the railroads I have only to say, that I have so recently received any of their reports that I am unable to give any statement of their condition and prospects. There is one singular fact in relation to the Iron Mountain Railroad to which I would call your attention. It is, that the Company, having a surplus of the earnings over the expenses of their road, have thought that they were under obligations to pay into the State Treasury a portion of that surplus, to be applied to the interest upon their bonds. Although the sum thus paid is small, yet it indicates a willingness to do something for the restoration of the credit of the State, and in that respect differs from the course pursued by other roads, which have been in default.

"As all the roads have their officers regularly in attendance upon each session of the General Assembly, no doubt their condition will be represented by persons so in attendance, and while I have no plan to suggest to you in relation to the roads, I earnestly recommend that the speedy restoration of the credit of the State may be steadily kept in view in any measures that may be adopted."

ALEXANDER'S
ROOFING CEMENT-PAINT
FOR
Railway & Steamboat Co's,
BUILDERS and BUILDINGS generally.
THIS PAINT is warranted not to Crack or Scale either on Wood, Iron, Tin, or Canvass.
The ingredients in its composition are all of a preserving and protective nature. This Paint is now extensively used by Railway Companies and pronounced much cheaper, more durable and satisfactory than what was previously used. It is 2-5ths heavier in body than any other Paint.
Give this Paint a trial, and if not found as represented no charge will be made for it.
Send for descriptive circular and references.

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 20, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

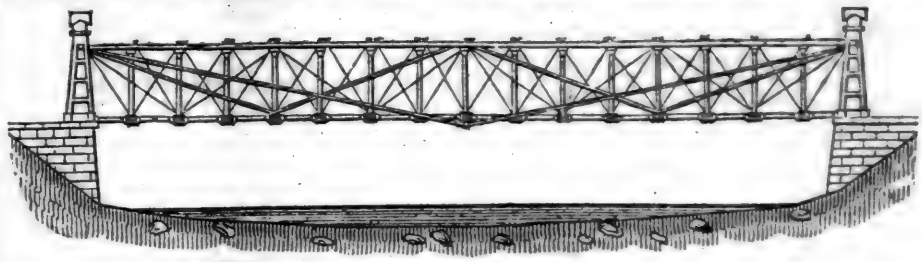
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing

CHAS. W. WELSH,
Secretary.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, FINK'S PATENT IRON BRIDGE in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 279 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN
SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, No. 1347 Brown st., PHILADELPHIA, will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—[Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—[Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—[Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $2. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

MUNN & CO'S PATENT OFFICE.

ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,
No. 37 Park Row, New York,

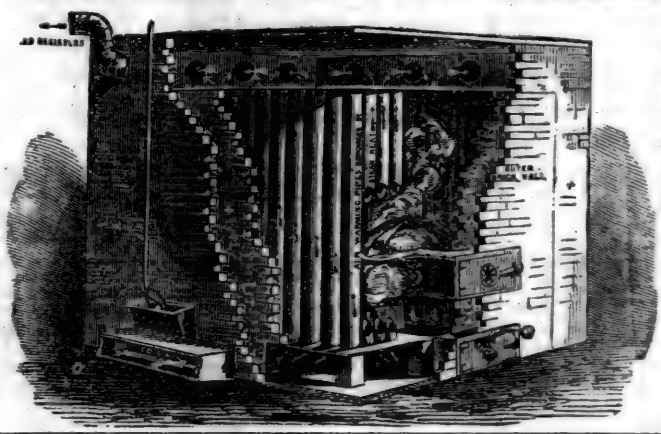
WILLIAMS & PAGE'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors, and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

SIMONDS' PATENT STEAM HEATER.

FOR Warming and Ventilating Buildings of all descriptions, Graperies, Greenhouses, etc.

THIS HEATER HAVING BEEN THOROUGHLY TESTED, has proved to be the MOST PERFECT WARMING APPARATUS IN USE. Parties having them in use, and to whom reference can be given, give them the highest recommendations.

Those requiring a SAFE AND PERFECTLY EFFICIENT APPARATUS FOR WARMING PURPOSES, are invited to call and examine before purchasing elsewhere.

Personal attention given to erecting the same, and a guarantee given for their successful operation.

KRUPP'S PATENT CAST STEEL

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brasil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enameled Iron Water Pipe, Steel Tubes, etc., etc.

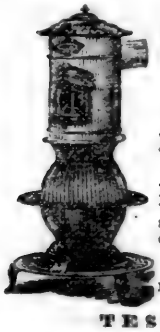
They have received the highest approval from all RAILWAY COMPANIES that have them in service.

THOMAS PROSSER & SON,

28 PLATT ST., NEW YORK.

PATENT SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 51 Beekman st., (up-stairs,) New York.



RAILROAD, SHIP, BOAT AND BRIDGE SPIKES,

MANUFACTURED BY THE

NEWARK SPIKE CO.,

Newark Avenue,

NEWARK, N. J.

SANFORD'S

MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any here before used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York.

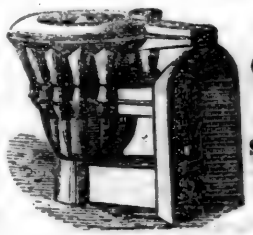
OFFICE OF THE NEW YORK CENTRAL RAILROAD CO., ALBANY, November 2, 1863.

THE annual election for Directors of this Company, and for three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the second Wednesday (the ninth.) of December next. The poll will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter. By order of the Board of Directors.

ROBERT L. BANKS, Secretary.

5t45

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the LEADING STOVE for PARLORS, SITTING ROOMS, and all places where a pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., 412 Broadway, corner of Fulton st.

Local Agents wanted everywhere. 6m11

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the LARGEST OVENS of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary ECONOMY OF FUEL, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

Coal.—The Reciprocity Treaty.

Some of our cotemporaries propose that Congress shall take off the duties on Liverpool and Nova Scotia coal. Now the fact is that the latter is free of duty already, under the existing reciprocity treaty. The Pictou, which is as good as the ordinary Liverpool, is selling in Halifax at from $3.50 to 4.50 per chaldron, and could be laid down here for $6 per chaldron.

The Australian Steam Service via Panama.

This enterprise appears so far to have been a success. The report of the Directors of the company shows a net profit of 16 per cent. per annum, with a reserve of about $31,000, after all expenses are paid. It appears also that a monthly mail service is to be established between Sydney, New Zealand and Panama. The nature of the contract is thus described in the report:—

"In consideration of a subsidy of £76,000 per annum for five years, the company is to provide four vessels, of not less than 1,250 tons each, and 250 horse-power, for the performance of a monthly service, each way, between Sydney, New Zealand and Panama; three of such ships to be on the station ready to commence the line not later than the 1st of March, 1865, and the fourth within twelve months from that date. The voyage between Sydney and Panama, and *vice versa*, is to be completed in thirty seven days, including a stoppage of not more than forty-eight hours at Wellington, the proposed port of call in New Zealand. The distance between Panama and Sydney, *via* Wellington, is 7,600 nautical miles. The penalties are light being at the same rate per diem as the premium which is to be paid for under-time."

This route will shorten the distance between England and Sydney two thousand miles and save one month in time, which at present is five months by the old route.

It is a melancholy reflection that while the United States have an active Navy of five hundred vessels, likely to be increased to six hundred, that our commerce under our own flag has been driven from the ocean by four or five small rebel steamers, and also that fifteen vessels can run the blockade of Wilmington on a single night, our look out squadron, eight of them, lying at the time, in Beaufort. On board of one of these Admiral Lee recently found all hands asleep. We have long heard that the discipline of our Navy has been running down, but remonstrance is in vain.

Philadelphia and Erie Railroad.

The entire grading of this road from east to west, except five miles, is completed, and by the first of the coming month the rail will be laid on all but twenty-five miles. This gap is in the forest, where there is now some two feet of snow on the ground, and it is therefore impossible to complete the work during the winter. By the 1st of June, however, we are assured the trains will be run through from Philadelphia to the lake.

Outlets to Western Production.—The Canadian Projects.

We have taken all proper occasions to favor the material interests of our Canadian friends, and cheer them on in every undertaking which might advance their commercial relations with the United States, growing more important every day. For in many respects we are one people, and though they prefer a different Government from such as we have selected and are resolved to maintain, yet we have a common ancestry, (at least the majority of both populations have,) with very similar foundations for the polity and prosperity of both. The Canadas are especially one with us in their relations to our great West, for from that region they as well as ourselves draw most of their cereals and other exportable products. They have been running a race with us in securing the Western trade, much to the advantage of all parties, and their railways and rivers derive the best part of their traffic from American sources. It is not surprising therefore, we hear with satisfaction every proposition which has for its object, new outlets to the sea from our fertile regions of the West, believing there is enough business for both, and that our own producers will be gainers by an extended and liberal competion.

The Ottawa Canal is the latest one of the great schemes we have especially favored, and we take occasion to say that a very elegant map of his proposed route, the work of Sir William Logan, an original, apparently from the hands of his engineers themselves, has been sent us by the Hon. John Young of Montreal, which gives a perfect idea of the work to be executed, and would seem to confirm our pre-possessions.

On examining it carefully, however, we perceive the difficulties are by no means as slight as we supposed.

Beginning at Lake Huron, which is 595 feet above the level of the sea, we ascend the French river 77 feet by the aid of 6 locks to Lake Nippising, which is 665 feet above the sea level, thence through Upper and Lower Trout Lakes and the Talon Lake, the latter level requiring one lock of descent. From thence through the Mattawan river to the Ottawa, with which it connects, are fourteen more locks. Thence to the Lake

Chaudiere there are twenty-nine more, and from thence to the head of the Lachine rapids 11 more, the whole descent through these locks being 580 feet, and this added to the natural incline of the currents of the rivers included in the route, probably equals the elevation of Lake Huron as already stated.

We have published in a recent number of the JOURNAL, the report of the engineers as to the method of constructing this magnificent work, its length, and its probable (estimated) cost. It is not necessary to repeat them here.

It has in its favor some of the most influential of the Canadians tatesmen and merchants; but if it is attempted, it will be a work of time and probably not be finished in this generation. When done it will at the best be a long ship canal, and attended with the disadvantages which belong to such works.

In view of all this, a counter project has been suggested by wise and experienced heads, which presents itself as a more immediate and economical method of attaining the benefit of a convenient water communication with the West. This is so ably and clearly suggested in the following letter that we prefer adopting its language to our own. It is from a source that commands attention.

"I do not look with as much favor on this work as you do, and I may say with a majority of the people of Montreal. Some day and soon it will be up for discussion in our board of trade, when the various opinions will be expressed in regard to it. The objection to it is, that its cost will be nearly double any estimate yet made of it; perhaps $40,000,000. This may be reduced, but it will only be at the expense of the permanency of the work, by substituting wood for stone in dams, &c.

My next objection is there will be 154 feet extra lockage on the route compared with that *via* the Welland Canal; viz., the ascent by the French river 77 feet, and with the descent to be made again before you can get down to the level of Lake Huron. Again it is more than half a degree north of the straits of Mackinaw, and it is these straits which determine the opening in spring and the closing in fall of the navigation. Half a degree north, will to that extent lessen the duration of the navigable season.

If you look at the map you will see that after a sailing vessel leaves the straits of Mackinaw with her head to Buffalo, or down the lake, at a point where she would have to diverge to make an intricate channel into French river, she is in comparatively an open sea, where she can sail day and night for some 750 or 800 miles, (with only the interruption of the Welland Canal,) to Oswego or Kingston; say 28 miles of canal. If a propeller, she can pass down to Montreal without using the St. Lawrence Canals. Now there is no navigator who will not say that either of these vessels will be sooner at Montreal, although the distance is 380 miles greater, than it is possible for them to be, navigating such a route as the proposed Ottawa Canal.

Besides taking McAlpine's mode of calculating cost of transportation, the longer way round will be found to be the cheapest; for on such a river as the Mattawan and many parts of the Ottawa, the channel is narrow, and such rivers with the exception of the long reaches must be calculated as canals.

No! the true policy is to make a new Welland Canal below Thorald, lengthen the St. Lawrence locks to 800 feet; make the navigation 10½ feet deep; open up the canal *into Lake Champlain*, and thus bring Boston with her railways into connection with the lake vessels, or propellers of 750 tons burthen, from Superior, Michigan, Erie, &c.

Enlarge your Champlain Canal to a size which will admit the passage of these craft *into the Hudson River*. You then have these vessels of 750 tons at your wharves at New York, reducing the cost of transport between those points to a minimum rate, and by so doing enhancing the value of every bushel of wheat to the Western producer, to all eternity.

While our Canadian Canals would thereby become vastly productive, Montreal with its illimitable water power and its facilities for shipping, would annually become a larger depot for all exportable commodities.

The time may come when the Ottawa Canal will be constructed, but $40,000,000 may be the cost of the one improvement, while $8,000,000 will complete those I have suggested."

Our readers will perceive from the foregoing remarks, that the objections to the Ottawa project are not only well taken, but are conclusive against the idea of immediate construction. On the other hand the enlargement or reconstruction of the canal between Lakes Erie and Ontario, the enlargement of the locks of the St. Lawrence Canals, the construction of a ship canal between the St. Lawrence and Lake Champlain, either by the route of the Chambly, or a new line from Caughnawaga, and finally by the enlargement of the Champlain Canal between the lake and the Hudson river, will open up one of the most magnificent inland water communications known in the whole world. The greatest parts of the distance will be exempt from tolls, so that the Western producer will obtain a much better price for his grain, than he possibly can when transported over long lines of railways or canals.

Our esteemed correspondent does not allude to one fact of great importance which strengthens his general proposition. It is this, that an energetic movement is to be made at the present session of Congress to secure the construction of a ship canal around the Falls of Niagara on the American side. This will undoubtedly be designed on the largest scale, and will render the enlargement of the Welland unnecessary, or the construction of any similar work on the Canadian side.

What the Canadians therefore should do is this: to open their ship canal between the St. Lawrence and Lake Champlain, so as to admit the lake craft at their present size, or even larger.

When a Chicago vessel makes its appearance at Burlington or Whitehall with a full load of Western produce, all the other canals required to complete our lake navigation will be made without a particle of opposition. Not another word will it be necessary to say on the subject. Will not our Canadian friends then go to work as the first step, and make this little ship canal of 11 or 12 miles. After that it will be plain sailing.

In the meantime, the friends of the Champlain Canal on this side the St. Lawrence mean to relax no exertions on their part to carry their project through. The State of New York is able to build it alone. The revenues of the Erie Canal for a single year will defray the cost. The very questionable project of turning the Erie Canal into a ship canal must stand aside for the present. The lake route is the obvious one to be first taken in hand.

The inevitable conclusion then is this. Further outlets to the sea from the lakes are indispensable to the agricultural interests of the West. If a ship canal around Niagara Falls is made; (surveys are now being conducted with reference to renewed efforts in that direction,) if the Canadians increase the capacity of the St. Lawrence Canal, and open the Chamblee Canal so as to pass propellers of 750 tons, that route will be the cheapest and best of all others, attainable, and *the proposed enlargement of the Erie Canal* would be a failure, with millions on millions foolishly sacrificed in vain. On the other hand, if the Canadians open Lake Champlain to the lake trade, which they can do at a small expense, we shall see the best part of it for the present diverted to Boston over their railways. Is New York to stand still under these charges, or ought she not to open the Champlain Canal to the Hudson, and bring all this trade to New York? We commend this view of the subject to the immediate attention of the Executive of the Empire State.

Finances of Ohio.

The receipts of the State of Ohio for the fiscal year ending November 15, 1863, were $6,313,614; the disbursements, $5,361,687; leaving a cash balance in the Treasury of $951,927. The receipts and disbursements during each of the past four years have been as follows:

	Receipts.	Disbursements.
1860	$4,031,147	$8,950,701
1861	5,657,727	5,524,564
1862	6,512,807	6,027,566
1863	6,313,614	5,341,637
Total	$22,515,295	$20,844,468

This shows a decrease in receipts during the past year of $198,693 14, and in expenditures of $667,879 98. The State debt, in round numbers, is a little less than thirteen and one-half million dollars, having been reduced during the past six months one hundred and twenty thousand dollars. Twelve millions of the debt are classed as foreign, and one million as domestic.

Philadelphia and Reading Railroad.

On Wednesday, December 2, the directors of the Philadelphia and Reading Railroad Company declared a dividend of seven per cent., clear of State tax, on the common stock, payable in common stock on and after the 31st December inst., to the holders thereof, as they shall stand registered on the books at the close of business on the 17th instant.

The net profit to the treasury, on the business of the road for eleven months, was $2,878,942 70, and for the twelve months of the official year the net profit will exceed $3,300,000.

For the official year ending November 30, 1862, the whole interest account amounted to only $742,381 00. And "after deducting all expenses, including Renewal Fund and interest on the bonds, the net profits were $1,353,393 81, equal to 11.72 per cent. on all the outstanding stock, common and preferred." For 1863 the net profit will be more than a million and a quarter of dollars in excess of the net profit of 1862, and will be equal, after payment of interest on all debts and divi-

dend on preferred shares, to more than twenty per cent. on the common stock.

In lieu, however, of distributing the dividend fund among the share-owners, the policy of providing for the cancellation of the mortgage loans, as they mature, has been adhered to. And hence the purchase of bonds for the Sinking Fund diminish the outstanding funded debt, whilst dividends payable in stock increase the number and amount of capital shares. But as the Dividend Fund is only in part divided, the bonds are retired faster than the shares are issued.

A steadfast adhesion to this policy will enable the company to pay off, one by one, all its unconvertible loans; and as the holders of the convertible loans—which mature six years subsequent to the unconvertible loans—will take care, on the cancellation of the prior liens on the road, to convert their bonds into shares, the policy adopted has an encouraging show of success, and the shareholders of the Philadelphia and Reading Railroad have a prospect of enjoying in time not remote, an annual distribution of the whole dividend fund of each year.

On the 12th of January, 1863, the capital and debt of the Company was in these amounts, to wit:

Stock			
Preferred stock			$9,997,129 61
Loans:			
5 per ct.	L. Bonds,	1836-'37, unconvert.	1,551,800 00—$11,548,929 51
6 "	"	1836-'80, "	$103,000 00
6 "	"	1842-'80, "	192,000 00
6 "	"	1849-'70, "	3,084,600 00
6 "	"	1861-'71, "	273,000 00
6 "	"	1843-'80,	$976,800 00
			554,500 00
			1,531,300 00
6 "	"	1844-'80, unconvert.	863,000 00
6 "	"	1848-'80, "	124,000 00
6 "	"	1819-'60, "	83,000 00
6 "	"	1857-'86, convertible,	3,417,000 00
7 "	"	1856-'86, "	1,470,000 00
			$11,445,900 00
Bonds and Mortgages on Real Estate.			590,200 00— 12,036,100 00
Total amount of Stock and Debt			$23,685,029 51
Net profit for 1863 will exceed			$3,300,000 00
Int. for 1 year on $12,036,100 00 at 6 per ct.			$722,166
Do. do. $11,548,929 51 at 22 per ct.			2,530,764—3,252,930 00
Surplus over interest and 22 per cent on shares			$47,010 00

As to the construction account, that will only be enlarged so long as the growth of business requires additional equipments and appurtenances. No purchase is charged more than once to construction account. And every item properly chargeable to construction account, that is paid out of income and charged to expenses, swells and strengthens and gives greater value to the assets or property of a corporation.

A re-distribution of Philadelphia and Reading Railroad shares from present holders who deal in them for speculation, to investers who would hold them for income from dividends, would give them greater stability of price in the market.

For the official years ending, respectively, Nov. 30, 1863, 1862 and 1861, the quantity of coal carried over the Philadelphia and Reading Railroad was in these quantities, to wit:

For year ending—	Tons. Cwt.	Increase. Tons. Cwt.
Nov. 30, 1861	1,639,535 00	
" " 1862	2,305,428 01	605.893 01
" " 1863	3,064,644 18	759,216 17
Increase in last two official years (87 per cent.)	1,425,109 18	

The coal equipment of the road at the end of the official year was equal to the movement of over three and a half millions tons in a year; for, in the three months or thirteen weeks between Thursday August 27 and Thursday November 26, there were carried over the road 912,602 tons of coal, equal to a weekly average of 70,430 tons.

Meantime, a large additional coal equipment is being provided for the road; so that, in the busy and heavy months of the present official year, which commenced the first instant, the road will average 80,000 tons of coal per week. Well we know, it may be said that, the market may be overstocked, whereupon the demand will diminish and the tonnage perhaps decrease; but in answer to this we may say that, the production of the Mahanoy coal field is sure to increase, and, if the market will not bear increase of production, why, then, the collieries which enjoy fewer advantages and facilities than the collieries in the Mahanoy basin, will be constrained to diminish their product.

But annual consumption is in larger quantity of tons from year to year; and as the Philadelphia and Reading Railroad is in position to increase its tonnage to the capacity of its coal equipment, the reader must not be surprised if the coal tonnage of the Philadelphia and Reading Railroad for 1864 exceed three and a-half millions tons, and in 1865 four millions tons!

The Philadelphia and Reading R. R. has in fact increased its coal tonnage in the last two years in measure surpassing the aggregate tons carried in a year on any other coal route to the general market.—*U. S. R. R. and Mining Register.*

Military Railway Engineering.

One of the most extraordinary examples of the skill of our American Railway Engineers, was given recently in the reconstruction of the Orange and Alexandria Railroad. When Gen. Lee made his last advance, it was evidently for the purpose of destroying this line of communication, and to secure his winter quarters from disturbance. The cuts were filled with cedar trees, rocks, dirt, bent iron rails, and every other thing which could constitute a tangled mass of materials most difficult to remove; embankments were found thrown down, every culvert blown up, every bridge burned, and all else accomplished which could ensure destruction intended to be irreparable. And yet following right on their heels—as it were—the Construction Corps moved onward after them, almost making sport of labor, as everything was brought back to more than its former good condition. In the short space of seven days they built eleven and a quarter miles of road, cutting from the woods, twenty-nine thousand seven hundred cross-ties for the purpose, and they constructed in the same time six hundred and fifty-three feet of trestle bridges, varying from twenty to sixty feet in height. The remainder of the destroyed road has been repaired in almost a similar spirit.

For this splendid achievement the Government was indebted to Colonel D. C. McCallum, the Chief of Military Railroads in the United States, and his able Chief of the Construction Corps, and "Chief Engineer of Railroads in Virginia"—Adnah Anderson, Esq.

The Atlantic and Great Western Engineers who constructed 200 miles of road in seven months, and those of the Union Pacific Eastern Division, who will have completed 40 miles in three months, must acknowledge themselves second to Col. McCallum and Mr. Anderson.

☞ A meeting was held in Boston on Wednesday last, in the rooms of the Board of Trade, preliminary to a larger one, which indicates the intention of the capitalists of that city to establish a line of steamers of their own to run to Liverpool. An act of incorporation for that purpose was obtained from the Legislature last winter, incorporating Messrs. E. S. Tobey, Amos A. Lawrence, James M. Beale, and others.

New York Canals.

The quantity of flour, wheat, corn and barley, left at tide water, from the commencement of navigation to the 30th of Nov., inclusive, during the years 1862 and 1863, was as follows:

	Flour, bbls.	Wheat, bush.	Corn, bush.	Barley, bush.
1862	1,596,400	31,152,500	21,876,600	2,019,600
1863	1,410,000	21,078,200	20,553,400	2,798,700
Dec	186,400	10,074,300	1,323,200	*779,100

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a deficiency equal to 2 201,260 bbls. flour.

The receipts at tide water of the principal articles of produce, from the opening of the canals, to and including the 30th of Nov., in the years indicated were:

Canal opened.	1861. May 1.	1862. May 1.	1863. May 1.
Flour, bbls	1,418.200	1,596,400	1,410,000
Wheat, bu	28,822.000	31,152,500	21,078,300
Corn, bu	22,058,200	21,875,600	20.553.400
Barley, bu	1,985,500	2,019,600	2,798,700
Oats, bu	5,449,900	5,817.400	11,289,400
Rye, bu	841.300	730,400	400,900
Beef, bbls	19,700	54.000	57,200
Pork, bbls	9,700	176.700	229,800
Bacon, lbs	606,200	5,936,000	3,624,900
Butter, lbs	3,552,600	5,455,300	4,939,600
Lard, lbs	1,029,200	9,315,100	20,082,800
Cheese, lbs	9,622,200	8,215,200	9,006,600
Wool, lbs	1,705,300	1,740,300	388,800

Interest on the Public Debt of Indiana.

It will be seen from the following card from Gov. Morton of Indiana that the over-due July and maturing January interest on the public debt of that State is to be paid in this city—the July interest in a few days and the January as soon as due:

To the Public.—Messrs. Winslow, Lanier & Co. will pay at their banking-house in the City of New York, the interest on the Indiana five and two and a half per cent stocks, which fell due on July 1 last, and that which will fall due on Jan. 1. next.

The failure to pay the interest in July was not caused by the want of money. The money was in the State treasury for that purpose, and still is; but the State Auditor and Treasurer refused to remit to New York, alleging the absence of a technical appropriation. In June last I concluded an arrangement with Messrs. Winslow, Lanier & Co. for the payment of the July interest. They notified the agent of State in New York, John C. Walker, elected by the late Legislature, that they would pay the interest, and, to enable them to do so, requested a list of the stockholders to be taken from the books of the agency.

This he refused to furnish. They then notified him that they would pay his checks issued to stockholders for their interest, in the manner in which the payments have always been made, and exonerate him from all personal liability whatever. He refused to avail himself of the offer, and suffered the interest to go unpaid. They could not safely go forward and pay it in the absence of the required list.

I have taken steps to prepare what is believed to be a correct list from other sources, which will be completed in a few days, when the payment of the July interest will be proceeded with at once. Notice of the day when payment commences will be given by Messrs. Winslow, Lanier & Co. I have appointed J. H. Gapen, Esq., who was clerk in the office of the State Agent, under Col. Hudson, to assist them in making the payments.

The State of Indiana has made ample provision for the payment of the interest on all her stocks, and the money is in the treasury for that purpose,

but is withheld as above stated, and this arrangement has been made, and the money advanced by Messrs. Winslow, Lanier & Co., for the credit of the State.

O. P. Morton, Governor of Indiana.

Indianapolis, Dec. 6, 1863.

Duties of Carriers in Relation to Delivery of Goods.

Carriers are sometimes placed in an embarrassing position by the conflicting instructions of the consignor and the consignee. They have no means of knowing which is the real owner of the goods, and unless the dispute could be settled on some other basis than that of ownership, serious injustice would be done in many cases.

The question having come before the Court of Exchequer in England, it has decided that the carrier must obey the directions of the consignee in preference to any others.

This decision was rendered in the case of Bartlett *vs.* The London and North Western Railway Company, argued before a full bench.

The plaintiff was a farmer at Whitfield near Brackley; the defendants, carriers along their railway from Brackley to Birmingham. On the 29th of December 1860, the plaintiff verbally sold to Badger, a miller at Birmingham, twenty eight quarters of wheat at 54s. 8d. per quarter according to sample, to be delivered to Badger at his mill at Birmingham, carriage paid on; and sent the wheat to the defendants' station at Brackley for that purpose.

Badger's mill is situated at a distance of about two miles from the defendants' station at Birmingham, and the plaintiff on delivering the wheat to the defendants, paid to them the "station to station rate," as it is termed, of 8¾d. for the carriage to Birmingham, and an additional charge of 1s. 6d. for the carriage of it by van to the consignees' mill.

The wheat was delivered to the defendants at Brackley on the 31st day of December. It was dispatched on the following day, and arrived at Birmingham in due course on the same day.

Badger was in the habit of having large quantities of grain sent to the Birmingham station, consigned to him, and in consequence of his large business and deficiency of warehouse room at his own mill, he gave instructions from time to time to the railway company at Birmingham, that no wheat arriving for him at the Birmingham station was to be sent up to his mill, until he had been advised of it, and had given written orders for it to be forwarded.

The last of such notices was delivered by Badger to the company on or about the 24th day of May, 1859. It was signed by Badger's clerk, and was posted up in the office of the clerk of the department at the railway station at Birmingham and was as follows:

May 24, 1859.

"London & North Western Railway Company.

"We have sent you instructions several times not to deliver any grain to our mill, unless you have received our written order for the same; no matter whether paid delivered or not. You have again this morning delivered the lot of Biddles' contrary to these orders. We beg to inform you that we shall in all cases return to the station any wheat delivered in this way from this time.

"For John & Thomas Badger.

"Geo. E. Doughty."

In consequence of these instructions, the usage and course of business, between Badger and the defendants, was for defendants to advise Badger of the arrival for him of any grain at their station, and not to deliver the same at Badger's mill until they had received instructions from him to do so.

On the arrival of the wheat at the Birmingham station as above mentioned, the defendants' clerk, whose duty it was, advised Badger by post on the same evening, that the wheat in question consigned to him had arrived at the station and remained there at his risk.

On the 2nd or 3rd of January a person in the employment of Badger called at the station in consequence of this advice, and examined the wheat. He took a sample from each of the sacks, and remarked to the company's servant: "This is rather a roughish lot, John," but he gave no orders or instructions with regard to it. The defendants did not make to Badger any charge for demurrage or warehousing. The defendants heard nothing further respecting the wheat, until the 4th March, and it remained with the defendants at their station from its arrival until that day.

The plaintiff finding that Badger refused to take the wheat, a correspondence ensued between the plaintiff and the company in which plaintiff required compensation from the company, which they refused, and in reference to such claim the company on the 19th February, wrote to plaintiff's solicitor reminding the plaintiff that the wheat was still at Birmingham waiting the order of the plaintiff, and adding that, if not removed without further delay, rent would be charged for warehousing.

On the 4th March, a person in the employment of the plaintiff came and looked at the wheat, and found it had detereorated from having remained so long in the sacks without having been dried. He took samples of it and offered it for sale in the Birmingham market, but he could get no higher price offered for it than 40s. per quarter, and he consequently gave the defendants an order to return it to the plaintiff at Brackley, and he paid the carriage of it from Birmingham back to Brackley when the plaintiff again received it, dried it, and worked it up with other wheat, the plaintiff said that the wheat when it came back to him was not worth more than 40s. per quarter.

Upon these facts the Judge directed the Jury that the defendants were the agents of the plaintiff paid by him to carry his goods to Badger's mill at Birmingham, and that the defendants were liable to the plaintiff for their omission to deliver it, and for the damage arising from the detereoration of the wheat while in their custody. That as between the plaintiff and the defendants there had been no delivery of the wheat by the defendants to the consignee, so as to terminate their liability, and that the difference between the value of the wheat when it was sold by the plaintiff, and the price it would fetch in the market at the time when it was again returned into his hands, was the proper measure of damage that the plaintiff had sustained by the neglect of the defendants to deliver the wheat at the mill, upon its arrival at their station in Birmingham. The Jury found a verdict for the plaintiff for the full amount claimed.

The defendants being dissatisfied with the determination and direction of the county court Judge in point of law, appealed therefrom to this court.

Pollock C. B.—Said the subject has been ably discussed; but it seems to me that the judgment of the court below was wrong, being founded on a notion that the carrier was bound to deliver the wheat at the mill notwithstanding the distinct and positive order of the consignees not to deliver it there. It is clear that a consignee may receive the goods at any stage of the journey, and although the consignor directs the carrier to deliver them at a particular place, there is no contract by the carrier to deliver at that place and not elsewhere. The contract is to deliver there unless the consignee shall require the goods to be delivered at another place. Here the wheat was delivered at the place where the consignee desired it to be delivered and therefore the carrier is not liable.

Bramwell B.—I am of the same opinion; I cannot think that the contract between the parties, is not only an affirmative contract to deliver at the mill, but also a negative contract not to deliver elsewhere. It would probably create a smile anywhere but in a court of law if it were said that a carrier could not deliver to the consignee at any place except that specified by the consignor. The goods are intended to reach the consignee, and provided he receives them it is immaterial at what place they are delivered. The contract is to deliver the goods to the consignee, at the place named by the consignor, unless the consignee directs them to be delivered at a different place. That being so, all difficulty arising from the Statute of Frauds is at an end. If indeed it could be shown that the consignor would be prejudiced by a delivery at any other place than that named, there might be some reason for implying a contract to deliver at that precise place and no other. But still I should think that immaterial, for how can a carrier's liability be affected by the consideration whether or no there was a written contract between the consignor and the consignee? It seems to me that in no point of view is it material to inquire whether the consignor can maintain an action against the consignee. But I cannot help thinking that the consignor is not worse off than he would have been if the contract had been strictly performed, because whatever right of rejection the consignee had, or within whatever time he was bound to reject, he has neither more nor less than he would have had if the wheat had been delivered at his mill. For these reasons I think the appeal should be allowed.

Channell, B.—I am also of opinion that the appeal should be allowed. The contract is in terms, to deliver at the mill of the consignee; but I think for the reasons already given, that it did not bind the carrier to deliver at that place and no other, or prevent him from holding the wheat in his warehouse for the consignee. The contract on the part of the carrier is, not that the consignee shall accept, but that the carrier shall deliver. I do not mean to express a decided opinion, but I confess that at present I do not understand how the right of the consignor to maintain this action can be affected by the fact of the goods being above the value of 10.2., and the absence of a written contract; although the consignor may possibly have some difficulty in maintaining an action against the consignee by reason of the Statute of Frauds.

Wilde, B.—I am of the same opinion. I think that a consignee may at any time dispense with the delivery which the consignor has contracted

for with the carrier at a particular place by receiving the goods which are the subject of the contract, at some other place. That indeed was scarcely deemed as a general proposition, and much absurdity would follow if it were not so. Suppose that instead of the goods being delivered at the mill, the consignee as in this case desired the carrier to retain them at the station, and that they remained there six months, but aftewards at the desire of the consignee were delivered to him.

If during the six months the goods were injured would it not be monstrous to hold that the carrier who had kept them at the request of the consignee, should be responsible to him or the consignor. It would be contrary to common sense and justice if any such doctrine prevailed.

I therefore think that the consignee has the power of ordering the goods to be delivered to him at any place. Then it is said that though he may have that power, if he exercises it before the goods arrive, that is different from exercising it afterwards. I confess I cannot see the distinction. Then it is said that the rights of the consignor are affected by the non-delivery of the wheat at the place where he directed it to be delivered. I do not think they are. If the consignee accepts the goods, his rights and liabilities as regards the consignor are precisely the same whether he accepts them at his mill or at the station. I think that the consignor is under no such difficulty as that suggested, and even if he were, it would not affect the question whether the carriers' contract was performed.

Judgment of non-suit.

Railroads of Missouri.

The St. Louis *Republican*, speaking of the Railroads of Missouri says:

They are now doing an unusual amount of business, and it is to be regretted that they have not rolling stock sufficient to accommodate it as it is offered. We learn that at Dresden, on the Pacific road, there are two hundred car-loads of stock awaiting transportation. The rolling stock of this company is taxed to its utmost capacity, but is found, at this season of the year, not to be equal to the demands upon it. On the North Missouri road there is business for one hundred additional cars, if the company had them. The company built cars and ordered locomotives to the extent of its ability the past summer, but has not yet rolling stock enough for its business at this season of the year. It has just received from the East a splendid freight engine, which bears the name of our respected fellow-citizen, Col. John O'Fallon. Three other locomotives of the first quality will soon be here for the use of this company. Although the earnings of our railroad companies this year exceed greatly those of the last, yet owing to the increased price of labor and materials in operating the roads, their net earnings are not in the proportion of the increase of business. It will be interesting just now to show the comparative earnings of the North Missouri road for the past three months with the same months in 1862:

	1862.	1863.
September	$23,618	$49,112
October	30,185	53,506
November	35,084	61,395
Total	$88,887	$164,013

Increase, 85 per cent. over 1862.

The increase would be considerably greater than it is if the company had sufficient rolling stock to do the work. With this road extended up the Missouri Valley and to Iowa, who can doubt that it would at once become an interest-paying road.

Lehigh Valley Railroad.

The extension into the Wyoming Valley. The corps of Lehigh Valley engineers, under the direction of Mr. Mercur, are busily employed in prospecting the mountain for a feasible route by which to get into the valley. It is said they have pretty much decided upon occupying a notch that comes in favorably in Newport.

Our readers may therefore confidently expect within a reasonably short time to have a direct line for their coal and other products, down the Lehigh, without change of cars or transhipment to Philadelphia. It is now announced that the Penn. Haven and White Haven branch will be completed by the first of April.—*Luzerne Union Nov.* 25.

Warren and Tidioute Railroad.

J. Y. James, Esq., President of this road, has just returned from Philadelphia, and informs us that the portion of the road between this place and Tidioute has been contracted to responsible parties, and that the work will be commenced as early as New Years, and be completed to Tidioute, and the cars running, early in the Spring.—*Warren Ledger.*

Wilmington and Weldon Railroad.

The Richmond *Enquirer* of 24th of November says that "the report of the Wilmington and Weldon Railroad, for the year ending the 30th of September, shows the receipts to have been $1,402,834 and the expenditures $493,178, leaving $809,452 as the net earings. The whole foreign debt of the company is $83,000, for the payment of which provision has been made in Confederate bonds and cotton. One thousand tons of iron will be required for the repairs of the road during the current year."

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Dec. 4, 1863, was as follows:

Passengers	$21,536 54
Freight and live stock	40,366 60
Mails and sundries	1,243 17
Total	$63,146 31
Corresponding week of 1862	62,650 85
Increase	$495 46

The earnings of the Grand Trunk Railway for the week ending November 28, 1863, were:

Passengers	$26,743 60
Freight and live stock	75,330 18
Mails and sundries	5,518 00
Total	$107,591 78
Corresponding week, 1862	112,735 19
Increase	$5,143 41

The earnings of the St. Louis, Alton and Terre Haute Railroad the first three weeks of November have been as follows:

	1862.	1863.
1st week of November	$28,856	$20,463
2d " "	27,727	34,019
3d " "	29,638	32,192
Total	$86,221	$86,674

The approximate earnings of the Marietta and Cincinnati Railroad, in the 4th week of November, 1863, were:

Passengers	$5,223 70
Freight	14,057 70
Mail express and telegraph	868 71
Total	$20,150 11
Same week, 1862	15,353 07
Increase	$4,797 04
Total November, 1863	$76,783 85
" " 1862	55,257 12

The earnings of the Chicago and Alton Railroad for the 4th week of November, 1863, were:

	1863.	1862.
Passengers	$12,391 75	$8,310 14
Freight	28,523 64	18,543 81
Sundries	1,482 02	1,197 80
Total	$42,397 41	$28,051 71
Increase	14,345 66	

From Jan. 1st, to Nov. 30th—

	1863.	1862.
Passengers	$597,736 63	$382,499 92
Freight	962,639 31	660,528 66
Sundries	69,484 08	45,648 07
	$1,629,860 02	$1,088,676 65
Military to Oct. 31.	53,747 13	149,320 58
Total	$1,683,607 15	$1,237,997 23
Increase	$445,609 92	

The earnings of the Galena and Chicago Union Railroad for the 4th week of Nov., 1863, were:

Freight	$49,086 58
Passengers	11,234 41
Mails	1,300 00
Total	$61 624 99
Same week, 1862	34,191 35
Increase	$27,433 64

The earnings of the Milwaukee and Prairie du Chien Railroad for the 4th week in Nov., 1863, have been:

From Freights	$25 564 58
" Passengers	10,579 86
" Mails and rents	939 77
Total	$37,084 21
Same week, 1862	25,483 50
Increase	$11,600 71
Total from January 1, 1863	$1,134,314 41
" " 1862	1,101,898 56
Increase	$32,445 85

☞ A proposition is on foot to construct a railroad from the city of Cairo through the Western counties of the "Egyptian" section of Illinois, and to connect with the Belleville and St. Louis Railroad at the first named place. This road would stretch through a section rich in Agricultural resources and coal veins, which require an enterprise of this description to develope.

Dighton and Somerset Railroad.

The Dighton and Somerset Railroad Company, recently held a meeting, elected persons to fill vacancies existing in their board of direction, and intimated their purpose to petition the General Court for authority to build a bridge across Taunton river at Somerset, the new line to intersect the Old Colony at that point, and also for permission to extend their road from its proposed northerly terminus at Taunton, through that town, Raynham, Easton, Stoughton and Randolph, intersecting the Old Colony and Newport road again at or near South Braintree station. By the realization of this project the distance by rail between Boston and Fall River will be lessened about five and one-half miles, and between Boston and Taunton about four miles.—*Boston Journal.*

Lackawanna and Bloomsburg Railroad.

A Third Rail from Scranton down the Susquehanna Valley.—The third rail on the Lackawanna and Bloomsburg Railroad will be laid over the entire length of the road in a week or two, so that cars loaded either at Northumberland or Scranton can traverse the whole distance without transhipment. A train can be loaded at any point on the road, and go direct to Philadelphia. The great increase of business and the demand of the coal trade has rendered this change necessary.—*Luzerne Union.*

Mineral Hauling Locomotives.

The difficulties to be encountered in the designing and construction of mineral locomotives, are, after all, more ideal than actual. Although the tramway is very defective indeed as compared with our great railway lines, still it is far superior to any of the highways, either here or in the colonies, on which traction engines convey very heavy loads with ease and certainty. Although the track on which the wheels of the engine run is uneven, it is, at all events, hard; and provided the weight on each is not too great for the capabilities of the rails, locomotion is materially facilitated, while the machinery is spared many of the shocks and jars which it would encounter in traversing an ordinary turnpike road, however good. The colliery locomotive is, however, a very different affair, when properly designed, from either the traction engine or the gigantic machines which work our great lines of intercommunication. Partaking in a great degree of the qualities of both, properly it should be a copy of neither; possessing only so much of the one as will suit it for proceeding over bad roads, and so much of the other as will adapt it to their specialities; particular regard being had to the question of adhesion and the distribution of weight, on which success depends almost absolutely.

The gauges of the mineral lines of Great Britain vary considerably, not only in different districts, but even on properties in the hands of the same owners. As a rule, they are very narrow, two feet nine inches being, perhaps, the average, although many lines are laid with only a two feet six inch gauge, while others have a distance of three feet or three feet eight inches between the rails. The wider roads are usually far better laid and kept than narrow ones, though neither have much to boast of in this respect. The substitution of locomotives for horses would tend materially to their improvement, as the feet of the latter cut up and poach the ballast, and splinter the sleepers, which absorb water and are destroyed very speedily, as well by the trampling of iron-shods hoofs as by the effects of the weather and the passing loads. It is very difficult to secure an equal distribution of weight in engines of the ordinary locomotive type intended for such gauges as two feet six inches and three feet. It is impossible to get the fire boxes between the wheels in such cases, as the grates would be unavoidably reduced to a width of only twelve inches or fourteen inches. In consequence, the fire boxes must overhang the hind pair of wheels, and their weight, coupled with that of the foot-plate and its appurtenances, is quite enough to overbalance the smoke-box end of the boiler. The hind wheels are thus overloaded, while the leading wheels may barely have weight enough on them to keep them to the rails. Yet, if we seek to make up the equipoise by extending the engine forward over the leading wheels, it at once becomes unwieldly and exposed to a violent pitching motion when traveling. The curves are in general so sharp that a greater distance than five feet between the centres is inadmissible, and a length of five feet or six feet overhanging at each end neither adds to the good qualities of a locomotive nor improves its appearance. All things considered, we are disposed to recommend the upright tubular boiler for all lines below three feet gauge. A weight of eight tons is sufficient for locomotives intended to work such lines, as heavier loads are more than the imperfect track can sustain. Of course, in exceptional cases, this rule may be departed from, although we doubt if much advantage will be gained by doing so, as trains loaded with more than seventy or eighty tons are seldom needed; and if more power is required, this may be better obtained by the use of two small engines than one large one. It is merely a question of the powers of endurance of the permanent way. With the upright boiler placed between the wheels, weight may be distributed with the greatest nicety; while the machinery being all outside the frames, can be attended to and repaired with the utmost facility. It is true that the centre of gravity will be raised by such an arrangement; but this is no real evil, as a speed of four or five miles an hour need seldom be exceeded; and no matter how rough the road, there is little danger to be apprehended of an overturn at such a velocity. The upright tubular boiler has received so much attention, and consequent improvement, of late, and the conditions of successful construction are so well understood and so easily secured, that it now ranks very highly as a safe and economical generator for moderate powers. The gauge would have little influence on the diameter of such a boiler, suspended as it would be between the axles. The foot-plate at one end of the framing being counterbalanced by the water tank at the other, the cylinder would be affixed in a horizontal or slightly inclined position to the framing at the sides of the water-tank, into which the waste steam might be wholly or partially turned from time to time.

For wider gauges than three feet, the use of the ordinary locomotive type of boiler is not only admissible but judicious. Lines laid to this width are usually much better than those which are narrower, and a heavier class of engine may occasionally be employed on them with advantage. A moderately roomy fire box can easily be got between the wheels by making up the deficiency in breadth by additional length. Some trouble often results with the hind springs in such cases, best overcome by using those of the volute, or elliptical construction. We need scarcely say that outside cylinders are indispensable; the valve chests being best placed above the cylinders, perhaps, and worked by a rocking shaft. Some difficulty is often experience in affixing the cylinders to the frames, as it requires very careful fitting to make such a permanent job, that they cannot work loose. American builders almost invariably cast an "apron" on the cylinders of all their locomotives, which is bolted directly to the boiler; the steam and waste ports being formed in the body of the apron in holes cut for the purpose, into which the steam and blast pipes are directly fixed. The cylinders, in this case, have no connection with the frames except through the guide rods and boiler. The arrangement is very simple, easily fitted up, and scarcely ever works loose; while the frames may be made much lighter, as they are spared the strain of the cylinder. By placing the valve-chests outside, much inconvenient crowding of the machinery may be avoided. Boilers two feet nine inches or three feet in diameter, placed low, on frames not more than twenty-four inches or thirty inches asunder, effectually prevent access to every thing not outside the wheels from above, and render it necessary to provide a pit, over which the engines must be run, to oil or inspect the machinery. It is needless to point out the evils attending this system. They are sufficiently obvious.

The use of very high pressures in mineral locomotives is never to be recommended, as a rule, to which there are few exceptions. Economy of fuel is no object in most cases. Expansion is seldom resorted to, and, therefore, there is nothing to be gained from such pressures as 120 lbs. to the square inch. From 60 lbs. to 70 lbs. is ample, provided sufficient piston area is supplied; and it is far better practice to give an increased diameter of a couple of inches to the cylinder than to strain the boiler by heavy pressures. There is no reason that the ports or passages should be proportionately increased in size, as only the same weight of steam has to be worked through them, and the extra weight of cylinders is of advantage in increasing the adhesion of the leading wheels. The constant succession of shocks occasioned by a bad road strain the rivets which attach the boiler to the frame, causing leaks, which are not easily remedied when very high pressures are resorted to. Tubes leak from the same reason; and much difficulty is often experienced in keeping them tight. With moderate pressures, much of this is avoided, and the durability of the fire-box and boiler generally is materially promoted—a matter of greater importance to proprietors than the saving of a few tons of coal per annum. In all situations where it is intended that the locomotive should do all, or nearly all, the hauling, it is extremely desirable that enough of power be provided to permit each of the engines to have at least one day in each week in the shed, in order that repairs may be effected, and the machinery cleaned and adjusted. A neglect of this precaution frequently entails serious losses, and as an instance of false economy, is very much to be deprecated.—*London Mechanics Magazine.*

The Military Strength of the Nation.

The following is an extract from the forthcoming volume of the Commissioner of the U. S. Census, showing the natural yearly increase of fighting men:

When a population has reached nearly its permanent condition, as in Europe and in the old States of America, one-fifth of the total population is still found to represent nearly the number of males between the ages 18 and 45. But the emigrating ages are nearly allied to the military ages; and in the newly-settled States of the West the proportion of fighting men is accordingly greater than in the Atlantic States. Beginning at the East and proceeding westward, the proportion of white males from 18 to 45 to the white population in Maine is 19.5 per cent.; New York, 20.8; Illinois, 22.1; Minnesota, 23.8; California 47.1; Virginia, 18.7; South Carolina, 18.9; Arkansas, 20.1; Texas, 21.9.

The total of white males between the ages of 18 and 45 in all the States (seceded included) and in the Territories and District of Columbia appears, by the census tables of 1860, to be 5,624,065. During the year 1861 about 277,500 white males reached and passed the age of 18, and 128,600 arrived at and passed the age of 45, leaving a difference of 148,900. This latter number, when diminished by the natural deaths and increased by the accessions from immigration, will evidently express the total increase of the military population (whites) during 1861. About 140,000 is estimated as the clear increase of fighting population in 1861. The number of such of course increases with augmented population in the aggregate, but that of this country has not been increased by immigration since the war began to the extent that existed before. From these data it seems pretty clear that more persons are annually put *hors du combat* (killed or permanently disabled) by the war than the military forces are augmented by the natural increase of fighting population.

The Railroad Interests of Pittsburg.

During the past season a good deal of work has been done on the old Steubenville road, under the auspices of a new company. The bridge piers have been almost built, and work all along the route on the heavier sections of the road. We hope another year may complete this important work. The Chartiers Valley, a branch of this one, will certainly at no distant day be built. The local coal trade along these two roads ought to insure their completion—independent of their connections with other railroads.

Mr. Latrobe's letter says that arrangements can now be made for the extension of the Connellsville road to Cumberland. If this be so, there should be no hesitation about acceding to any reasonable terms on the subject. An average generation of life has passed since this connection was projected. If any means within the power of that Company can be secured to complete this original design, let them be used at once and the extension of this road be completed with the Baltimore and Ohio. If it be possible to secure an eastern terminus direct to Washington City, through Pennsylvania, and Maryland, very well. We hope it may be secured; but let it not delay the realization of the old project, the connection of Pittsburg and Cumberland. The other should be pushed on its own merits.

The extension of the Allegheny Valley to the oil region is an even more pressing necessity than any other just now. A branch of the wide gauge New York road has reached Franklin. If the Allegheny was extended to meet this road, it would give us a connection with the oil region,

and also an independent line to New York. In fact, we think all the interests in the oil region might be merged in the same road. The narrow gauge track to connect with the Allegheny Valley might also lay down a third rail so as to accomodate the broad gauge cars on the same track. This arrangement might be extended on the Allegheny Valley road, and thus give a New York connection with Pittsburgh of the six-foot gauge. —*Pittsburgh Commercial.*

Oil Creek Railroad.

At a meeting of the Philadelphia Board of Trade, on Monday, a communication was received from the Superintendent of the Oil Creek Railroad Co., giving some interesting facts in reference to the amount of business done on that road. From January to October the whole quantity of petroleum carried over the road was 361,246 barrels, or 14,449,840 gallons. The quantity during the months of June, July and September averaged more than 55,000 barrels.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS.

The receipts on capital account during the half year amounted to £4,441 9s. 3d., and the total receipts to the 31st July, 1863, were £5,216,836 5s. 2d. The aggregate expenditure to the same date amounted to £5,036,790 0s. 5d., leaving a balance to the credit of capital account of £180,046 4s. 9d. The outlay on capital account during the past half year consists of—additional sidings laid down at sundry stations—fish-jointing 18½ miles of rails—the proportion chargeable to capital of the amount expended in the reconstruction of timber bridges over the River Thames in stone and iron—outlay on account of Enniskillen Branch, &c., amounting altogether to £5,062 1s. 5d. The revenue account for the past half year is as follows:—

Gross receipts			£293,067	9 9
Working expenses, including maintenance of way, taxes, insurance, and rent of suspension bridge			136,270	5 0
Balance			£156,797	4 9
From this there has been deducted—				
Interest on Government loan	£17,498	5 0		
Do. on company's bonds, &c	34,246	6 10		
Loss on the conversion of American currency	60,100	9 7		
Renew'l of rails, sleepers, bridges, &c	34,991	7 10		
Flamborough accid't account	5,354	12 7		
			152,191	1 10
Balance from the half year's working			4,606	2 11
To this has to be added the surplus from last half year			3,348	12 4
Leaving a surplus of			£7,954	15 3

The directors regret that this surplus will not permit of a dividend for the past half year, which result, as will be seen from the above statement, is entirely attributable to the loss incurred by the depreciation of American currency. The number of passengers and tons of freight carried and of train miles run as compared with the corresponding half year has been:—

	1862.	1863.	Increase.	Inc. pr. ct.
Passengers	247,776	277,348½	29,572½	11.93
Freight and live stock	272,789	280,909	8,120	2.98
Mileage of pass. trains	263,986	272,070	8,084	3.06
Mileage of freight and live stock trains	432,832	438,982	6,150	1.42

The receipts derived from the carriage of through traffic are £184,311 6s. 2d., or 63 per cent. of the total nominal earnings of the company for the half year, showing an increase of 4½ per cent. on the through traffic receipts of the corresponding period of 1862, and a half per cent. increase on the last half year. The loss sustained by the company in the conversion and remittance of these receipts amounts to £60,100 9s. 7d., or 32.6 per cent. of the gross receipts from through traffic against 21 per cent. for the previous half year. The cost of remittances and of converting American money into gold varied during the half year from 7¾ to 24⅛ premium per cent., the average rate being 48¼ per cent. The working expenses of the last half year are at the rate of 46.50 per cent. as compared with 52.41 per cent. of the corresponding period, showing a reduction of nearly 6 per cent. The permanent way and rolling stock generally is in an improved condition, and the company is well prepared for the increased traffic expected during the ensuing fall and winter from the abundant harvests. The following is a comparison of the receipts and expenses during the last five half years:—

	RECEIPTS.				EXPENSES, including taxes, insurance, and Suspension
Half years.	Passen. mails, and sundries.	Freight and live stock.	Rents.	Total.	Bridge. rent.
	£	£	£	£	£
July, 1861	95,772.	112,800.	744.	209,316.	129,616
Jan. 1862	104,168.	161,070.	714.	265,952.	125,425
July, 1862	93,918.	151,607.	704.	246,229.	129,051
Jan. 1863	122,627.	186,099.	579.	309,305.	136,200
July, 1863	111,671.	180,782.	625.	293,067.	136,270

During the past half year, 29,572½ passengers, and 8,120 tons of goods have been carried in excess of the corresponding period last year, and the train mileage shows an increase of 14,234 miles; but the comparative expenses of the coaching traffic have been diminished 2.82 per cent., and of the goods traffic 3.0 per cent., while the cost of locomotive power, notwithstanding the increased mileage, shows only an aggregate increase of £525 3s. 4d., or a decrease of 2.49 per cent. It will be seen by reference to the engineer's report appended hereto, that a sum of £34,991 7s. 10d. has been expended in renewals. This is within the estimate contained in his report of 1860, acting upon which, 98 miles of line have, since January 1861, been entirely relaid with rerolled rails, and 402,600 new oak sleepers have been placed in the track. By reference to his report for the past half year, it will be seen that the renewals under his estimate alluded to, will be completed by the commencement of the year 1866; and that the expenditure under this item for each of the next five half year's will average about £34,000. The company's relations with the neighboring American railways continue to be of the most friendly character, but it is with regret that the directors have to announce that the Grand Trunk Company, in June last, terminated the agreement existing between that company, the Buffalo and Lake Huron, and the Great Western, to charge equal rates and fares between competitive places, and have entered upon a contest for the traffic to and from the eastern and western States of America, as well as for local Canadian traffic. The directors, however, have pursued a defensive policy throughout, following only where absolutely necessary in order to maintain their position, the reductions made by the above companies, and hitherto without material detriment to the net earnings. It was stated in the last report that steps had been taken to bring the Commercial Bank case before the Court of Error and Appeal for Upper Canada, and that it was expected to be heard in June last; but in consequence of the report of the arbitrator on the account which had been referred to him not being concluded when the court sat in June, the argument has been postponed until the next sitting in December. The directors are still advised, as they have always been, that the claim is not one which the bank can succeed in establishing against this company. It is satisfactory to state that the receipts of the Detroit and Milwaukee line for the past six months of the present year have amounted to £96,407, against £68,447 for the corresponding period of 1862, showing an increase of 40 per cent., while the working expenses have been reduced from 71.82 per cent. in 1862 to 60.82 per cent. in 1863, being a diminution of 11 per cent. The interest now due from this company on the Great Western loan amounts to about £150,000, which the directors are sanguine will eventually be recovered. In the last report it was stated that the company had applied to the Canadian Legislature for powers to construct a branch line to the oil springs of Enniskillen, and that the opportunity had been taken to insert clauses giving a legal character to meetings in England of the board and shareholders. These clauses have now been obtained, and will in future form the rule of the company. The rolling mill at Hamilton, estimated to cost £17,000, has been commenced and is expected to be finished by March or April next.

Signed on behalf of the board of directors,

THOMAS DAKIN, President.

London, Sept. 30, 1863.

AUDITOR'S REPORT.

To the Shareholders of the Great Western Railway of Canada.

Having completed the examination and audit of your company's books and accounts, for the half year ending 31st July last, I beg to report that I find them correct, the expenditure is properly vouched, and the several accounts are duly certified by the heads of the respective departments.

Capital Account.—The expenditure under this head is of the same character as that which the shareholders have hitherto authorized being carried to this account, and amounts to the sum of £5,062 1s. 5d.

Revenue Account.—Notwithstanding the gross traffic returns for the half year exceed those for the corresponding half year in 1862 by the sum of £46,838 12s. 7d., the balance of net revenue for this half year only amounts to £4,606 2s. 11d., as against £13,769 0s. 5d. in the corresponding period of 1862. The difference, £9,162 17s. 6d., I find arises as follows:—

Increase in payments—	£	s.	d.	£	s.	d.
Discount and exchange on conversion of American currency, half year ending 31st July, 1863				60,100	9	7
Ditto 31st July, 1862				6,953	15	10
				£53,146	13	9
Flamboro' accident.						
Am'nt charged half year ending July 31st, '63.	£5,354	12	7			
Ditto 31st July, '62.	260	3	10			
				5,094	8	9
Difference in working expenses which (although 5.91 per cent. less when taken on the gross receipts of the respective half years,) for the present half year exceed those of the corresponding period in 1862 by the sum of				7,219	2	3
				£65,460	4	9
Deduct—	£	s.	d.			
Increase in gross traffic.	46,838	12	7			
Payments appearing in half years' accounts, ending 31st July, '62, in addition to, and in excess of, those for half year ending 31st July, 1863	9,458	14	8			
				56,297	7	3
Decrease in net revenue for the half year, as compared with corresponding period in 1862				9,162	17	6

It will thus be observed, the item so seriously affecting the interests of the shareholders is the

discount and exchange on American currency, which it appears the company are either obliged to accept in payment of "through" traffic at certain rates, or decline to carry the goods. I may remark, under this head, that the allowance to agents employed to secure traffic, amounts as shown in the accounts to £3,132 4s. 7d. for the half year. It may be a question whether the net revenue of the company would suffer to this extent if the agencies were entirely discontinued. The sums paid in respect of liabilities alluded to in my report of last half year in connection with the Flamboro' accident, amount to £5,354 12s. 7d., and I believe some further costs in connection with the case are still outstanding, for which accounts have not yet been received.

JOHN YOUNG, Auditor.

London, September 30, 1863.

DIRECTORS.—President, Alderman Thomas Dakin, 23, Abchurch lane, London; Henry C. R. Becher, Esq., Q. C., London, Canada West; Thomas Faulconer, Esq., 12, Copthall Court, London; Frederick W. Gates, Esq., Hamilton, Canada West; Francis Somerville Head, Esq., Pit Place, Epsom; Alexander Hoyes, Esq., Bitterne Grove, Southampton; Richard Juson, Esq., Hamilton, Canada West; Paul Margetson, Esq., Clapham Common; Thomas Service, Esq., Glasgow; George Smith, Esq., 57, Conduit street, London; John Young, Esq., Hamilton, Canada West. Ex-officio Director—the Mayor of Hamilton, Canada West.

Capital Account, showing the Receipts and Expenditure of the company on Capital Account to July 31st, 1863.

RECEIPTS.	Sterling. £
To original share account—	
For amount received on 121,507 shares (including 29,908 new shares paid up in full and converted into original shares,) viz:—	
On 118,318 shares on English register, at £20 10s. sterling per share	2,425,519
On 3,189 shares on Candian register at 100 dol. per share, converted at 109½ per cent. exchange	65,527
To new share account—	
For amount of 1st, 2nd, 3rd, 4th, 5th and 6th calls on 48,193 new shares (after deducting the 29,908 new shares paid up in full and converted into original shares, viz:—	
On 47,971 shares on English register at £18 sterling per share	£863,478
On 222 shares on Candian register at 87.60 dols. per share, converted at 109½ per cent. exchange	3,996
	867,474
Less amount of arrears on 3rd, 4th, 5th and 6th calls	2,444
	865,030
For amount received in anticipation of future calls on new shares	4,473
	869,502
Total amount received on account on share capital to July 31, 1863	3,360,549
To perpetual 5 per cent. debenture stock—	
For amount received on this account	46,700
To bond account—	
Bonds at 6 per ct. non-convert. due 1864	72,700

" " 1876	127,000
Bonds at 5½ per cent. " 1877	485,000
" " 1878	62,000
Bonds at 5 per cent. " 1881	1,000
To Government loan—balance	573,688
	£5,216,836

Total receipts on capital account during the half year:

	Sterling.
Receipts from arrears of calls and payments in full on new shares	£6,941
Less amount of 1862, 6 per cent. bonds redeemed	2,500
	£4,441

EXPENDITURE.	Sterling.
By total amount expended on capital account to January 31, 1863, as per last report	4,781,728
Expended during the six months ending July 31, 1863:	
By Great Western main line, Hamilton and Toronto line, and Galt branch &c.	
Land, works, bridges, permanent way, and all incidental charges	1,641
Proportion of cost of reconstructing timber bridges in stone and iron	1,549
Stations, warehouses, wharves, &c.	27
Cost of "fish-jointing" 13½ miles of rails	1,589
By Sarnia extension—	
Land account	16
By Enniskillen branch—	
Expense of survey from Wanstead to Oil Wells	56
Parliamentary expenses	184
By Detroit and Milwaukee Railroad Company—	
Loan (including funded interest to October 24th, 1860, £300,000)	250,000
Balance carried to General account	180,046
	£5,216,836

Revenue Account of the Great Western Railway Company of Canada for the half year ending July 31, 1863.

RECEIPTS.	1862. Sterling. £	1863. Sterling. £
For the carriage of 277,348½ passengers	86,513	104,296
Mails and sundries	7,405	7,374
Freight and live stock	151,606	180,772
Rents	704	625
	246,228	293,067

NOTE.—The traffic receipts above stated are exclusive of those of the Gait and Geulph Railway.

EXPENSES.	Half year ended 31st July 1862. Sterling. £	Half year ended 31st July 1863. Sterling. £
Maintenance of way	14,682	16,851
Locomotive power	41,065	41,590

Rich Gold Discoveries in Arizona.

Dr. Charles Leib, of Chicago, who has recently been ordered to Arizona territory as surgeon at a newly appointed military post, writes to a military friend in this city giving a glowing account of new and important gold and silver discoveries in that region, five hundred miles west of Santa Fe, New Mexico. He states that there are a large number of Mexicans and Americans there, who are taking out gold freely. The treasure is coarse and rich, and the principal tools now used are common butcher knives. The surface diggings are very rich, as are also the quartz leads. The gold of these diggings lies from one to four inches below the surface, and those who have explored the country for over a hundred miles say that gold is found in every gulch and creek bed. One party of six took out, with knives, on the top of a high mountain, in a short time, nearly $30,000 worth.

Brig.-Gen. James A. Carlton, commanding that military department, has sent troops to the mines, where he has ordered a military post to be established, Dr. Leib being surgeon in charge.

Dr. L. advises no one to go to the mines this winter, on account of the scarcity of provisions. He says he is fully satisfied that the entire region thereabouts is rich in mineral wealth. The locality is about 300 or 400 miles from Los Angeles, California, and a large immigration from that State is expected.

Gen. Carlton takes a great interest in this country, and is lending all the aid in his power to develop its resources.—*Chicago Journal.*

The Wallkill Railroad.

We have given an abstract of the plan to construct this railroad, in a former issue. The following communication, however, presents the subject in a new light, and we therefore give it place in our columns:

(For the American Railroad Journal.)

THE WALLKILL VALLEY RAILROAD.

A railroad has long been needed in the fertile and beautiful valley of the Wallkill river, a section of our State heretofore but little known to the outer world, although so near to this city.

The route surveyed is found to be a remarkably good one, inviting by its feasability the construction of the road. Since the survey was made, meetings of the citizens along the route have been held, and the public mind seems earnestly engaged in the matter. An important feature of the project is to extend the line through to Albany, by way of Kingston, Catskill and other towns on that side of the Hudson river, thus making a through "west side" road in connection with the Erie road, from New York to the former city. The development of the fine country lying on that side of the river, a few miles back, has been retarded for want of railroad facilities. The effect upon real estate along the route would be highly beneficial, and proprietors could well afford to furnish all the capital required rather than not have the road built. As a tributary to the Erie road it will be highly important, and we doubt not the directors of that company will be ready to make the connection. It is a curious fact that the distance from New York to Albany by actual survey, on this route is only five miles greater than by the Hudson river road, and this can be saved by the construction of a "cut off" of about eight miles long by the Erie Company.

With such a road to Albany upon which travelers could ride without change, in the fine wide cars of the Erie Company, there is no doubt that much travel would pass that way. It would form a good connection with the Albany and Susquehanna road, of the wide gauge also, thus enabling freight from that road in winter to be sent directly through to New York without transhipment at Albany.

In connection with the through business, the road would do a great traffic in way passengers, milk and other farm produce, besides manufactured articles from the numerous factories along its route. And when all the vast water power in that section of country shall have been utilized, the amount of manufacturing business and consequent increase of population will be very great.

It is a subject of interesting speculation as to how long it will be after this road shall have been opened, before the magnificent country along its route will rival Connecticut and Massachusetts in density of population, the number and size of its towns and villages, and the amount of its manufactures. With all the advantages it will possess, our enterprising manufacturers will soon be attracted there to make them available. Our men of wealth will likewise find it all they could desire as a country in which to locate their summer residences.

Let the road be built by all means. New York needs it for additional supplies, and as an addition to its lungs. *

Coal and Iron Product of Pennsylvania.

The Philadelphia *Gazette* says: "The total product of anthracite coal this year will reach 9,800,000 tons. The production of iron it is not so easy to state accurately. The Board of Trade of this city state the product in 1862 to have been 381,448 tons in Eastern Pennsylvania, against 313,000 tons in 1861—an increase of over 20 per cent. At the close of 1862, a large number of new works were started, and old ones were revived. In the Adirondack, in Massachusetts, in Ohio, and in Western Pennsylvania, every dormant establishment has been started in full vigor. Of Eastern Pennsylvania we know more definitely, and can safely estimate the aggregate at near 500,000 tons, and the increase over 1862 at 20 per cent, while in other parts of the loyal States the increase is probably 25 per cent. In 1862, the Lake Superior region sent out $12,000,000 worth of copper and iron; of iron, pig and ore, 150,000 tons; and of copper 9,300 tons. In 1860, the production was double that of 1859, yet less than 120,000 tons of iron and iron ore, and in 1861 but little more than half the aggregate of 1862. The reports already made of the business of 1863, sufficiently show that both copper and iron from this region will be largely in excess of 1862."

Increase of the United States.

From the report presented by S. B. Ruggles, Esq., in behalf of the United States, at the international statistical congress, Berlin, we learn some valuable facts. In 1783 our territorial area was 820,680 square miles; now it is 2,936,166 square miles, and there is now almost a billion acres of land that is awaiting gratuitous occupation. By a comparison of the seven decades, from 1790 to 1860, the average rate of increase in population is found to be 33⅓ per cent. At this rate of increase, the 31,445,080 returned in 1860 will become 41,926,750 at the end of the next decade, and 56,460,241 in 1880. The increase of population in the United States has far exceeded that of any European country. The population of France has increased 37 per cent. in the last sixty years; that of Prussia in the last forty-five years, 79 per cent.; that of England and Wales in the last sixty years, 121 per cent., while the population of America has increased 593 per cent. in the last sixty years. The valuation of the country in 1850 was $961,000,000, and in 1860, $1,936,000,000, making the increase of wealth during the last decade 130 per cent. These estimates include only the property returned for taxation. The increase in the production of cereals during the last decade was 180 per cent., in swine 129 per cent., and in cattle 164 per cent., showing, beyond a peradventure, that America can feed the world if necessary, and that all fears of a general famine may be forever dismissed. Between 1840 and 1860, 31,196 miles of railroad were constructed at an expense of $1,151,560,829, of which sum $850,906,681 was was expended within the last decade. The mining resources of the country are just commencing to be developed, and the hundred millions of dollars that will be realized this year from the precious metals will at least be doubled by the closing year of the present decade. Abstract theorists may quote the fall of Rome and infer the fall of America, but carefully gathered statistics, the only reliance of the thorough statesman, show the American republic is, as yet, only in a vigorous childhood, and that every day marks some progress in population, the increase of material wealth and the development of internal resources. These are sure indications of national progress.

Fuel for Locomotives.

The directors of the Madras Railway announce that they may now look forward with confidence to a considerable reduction in the cost of fuel, through the substitution of wood for coke or coal over a great part of this line. The difficulty that has so long stood in the way of the use of wood in the locomotives appears to have been surmounted, their locomotive superintendent having succeeded in devising a "spark catcher," which, while effectually performing that office, does not interfere with the draught of the chimney, or reduce the power of the engine. Engines so fitted have now for some time been working satisfactorily over part of the line, and the plan will be extended gradually, as it can be done with advantage. The saving in using wood fuel is estimated by the locomotive superintendent at nearly one half of the present cost on a great part of the line.

On the northwest line the permanent way and works of the open portion of this line, which is entirely laid with iron sleepers, are reported as in excellent order.

Lake Superior and Mississippi Railroad.

On Friday evening of last week the City Council of St. Paul, passed a resolution by which the city pledges itself that when the Lake Superior and Mississippi Railroad Company shall have completed a railroad from St. Paul to Superior, on the most direct and practical route within the State, with the cars running thereon, to issue its bonds to said company for $250,000 at six per cent. interest, and redeemable at 20, 25 and 30 years from the date thereof, provided that the said railroad shall be completed, with the cars running thereon in five years, and that twenty miles of said railroad shall be approved by the Legislature, and ratified by a vote of the people of the city, as there is no doubt of its approval and ratification. The action will undoubtedly secure the building of the road to Superior, and at the same time secure the future prosperity of St. Paul. The route proposed is 140 miles in length.

The same company has a grant of swamp lands from the State, and expect to get a grant of Government lands this winter in the place of the former grant for this purpose, which was lost by the fraud of those who engineered it. The suffering of Minnesota from the Indian war, and her promptness and pluck in following the National flag through the bloodiest trials of the war, will commend her claims for bounty to the generosity and justice of Congress.—*Western Railroad Gazette' Nov.* 28.

New York State Taxes.

The total valuation of the state of New York amounts to $1,454,454,817; upon which is imposed for the year 1863 a tax of $7,272,274 08. The proceeds are to be applied as follows: For schools, Laws of 1856, chapter 180, ¾ of a mill; for canals, Laws of 1863, chapter 393, ⅜ of a mill; for bounties, Laws of 1863, chapter 184, 1 11-16 mills; for the Albany and Susquehanna railroad, Laws of 1863, chapter 70, 3-16 of a mill; for general purposes, 1½ mills; for deficiencies in former appropriations, ½ of a mill. Total, 5 mills on the dollar. Last year it was 4¾ mills. Last year the appropriations, exceeded the amount provided about $800,000; and the Legislature of 1863 has also appropriated more than is provided for.

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal.

Saturday, December 12, 1863.

Stock Exchange and Money Market.

Our latest foreign advices give us reason to believe that further financial complications are arising in Europe of a serious nature. We may now see practically how dangerous to the peace of the world is the exercise of a "one man power." Louis Napoleon by a single speech throws the old world into confusion. States fear the loss of territories, monarchs that of their crowns, and the people groan under the terror of more bloodshed for opinions for which they have no sympathy whatever, and no interest. The men who deal in money, also suddenly take alarm at the insecurity of their property, and "the deceitfulness of riches."

These apprehensions pervade the continent. England, which escapes much by her insular position, nevertheless feels all these premonitory symptoms of disorder through the nerves which reach to the fingers' ends of her grasping hands.

Her extended empire makes her vulnerable in all parts of the world. Her commerce is her life blood, and she wishes to keep it in the name of civilization and humanity, for these are the colors she marches under whenever she is about to seize on any foreign and distant possessions. Two things therefore at this moment disturb her equanimity. The idea of a Congress of reconstruction, and the drain of specie to the East. It is believed she will not present herself at the Napoleonic Congress. There is nothing on the continent that she wishes to meddle with, while on the other hand there are such places as Gibraltar, Malta and Heligoland, all outposts and pickets stationed at foreign points, which she might be called on to give up, as the first step to the political millenium. This therefore is anything but an agreeable subject for her immediate consideration.

So too with regard to the drain of specie. This is going on alarmingly. Our advices state that the bank reserves are diminishing, that the Continental bankers are selling out their stocks in the London market to realize in coin, to a large figure. There is such a thing as overdoing business. England prides herself on her spindles, and desires to spin for the world. To do this she has a large portion of her population converted into half-starved operatives, dependent on the Lancashire lords. When this system is interrupted, mobs, prisons, starvation, chartism and revolution stare her in the face. Cotton must therefore be had, either at the risk of a war with the United States, or the loss of her bullion in the East. When this last goes from her, even in sums that we part with every month without a pang, interest goes up, and her merchants, bankers, and shippers go down.

The purchase of cotton in the East is a ruinous operation under any circumstances. It has to be paid for either in coin or poisonous drugs. The barbarians of India do not want, and will not purchase any but a few articles. It is civilization which has new wants, and finds means to gratify them. There is more variety, more utility, more humanity in an assorted cargo which comes from Liverpool to New York, than can be found in all the vessels which sail to Bombay or Calcutta with merchandize intended for native consumption.

When England took cotton from us, she sent back the fabrics of that article, loaded with the charges of the manufacture, hundreds per cent more than it originally cost; but when she buys of India she has to send coin, which is preferred there to the most ingenious, comfortable and useful of her manufactures.

So we may perceive how even the rigid application of the principle of self-interest blindly followed up, may bring trouble and care to nations which have no other policy. England has really arrived at her zenith. She can rise no higher, it will require all her ability to remain where she is.

Our domestic affairs have not changed in their aspect much since our last issue.

The battle, in which Jefferson Davis and his generals were willing to stake the future of the confederacy, having gone against them, has undoubtedly been decisive.

There is no recovery from its effects. We perceive that in the South as well as the North it is being so considered. We have therefore noticed a pause in the local Money Market, and another decline in gold.

The meeting of Congress, the policy of the President, and the report of the Treasury department have been anxiously looked for by our monied men and institutions, as likely to affect very important changes in the future.

The President's message and the usual accompanying departmental documents were received in this city, and given to the public on Wednesday afternoon, with the exception of the report of the Secretary of the Treasury. The rumors which foreshadowed the message for a few hours, had their influence on the market, and affected the price of gold which fell to 147, solely on the ground that its character was favorable to an immediate reconstruction of the Union, on terms and principles likely to be acceptable. It subsequently with the usual vibration went nearly back again before night.

The message is a document very creditable to the nation and the President. As a State paper it is brief, clear, pointed, and intelligible. It reviews the history of the past year, and the record is satisfactory. The reports of the Secretary of the Navy, of War, and of the Interior, are also good state papers, and give the people all the information they can desire. Of these we shall give abstracts as fast as the opportunity is permitted us to place them in our columns.

The receipts during the year from all sources, including loans and the balance in the Treasury at its commencement were $901,125,674 86, and the aggregate disbursements $895,796,630 65, leaving a balance on the 1st of July, 1863, of $5,329,044 21. Of the receipts, there were received from Customs $69,059,642 40; from Internal Revenue, $37,640,787 95; from direct tax, $1,485,103 61; from lands, $167,617 17; from miscellaneous sources, $3,046,615 35, and from loans, $776,682,361 57, making the aggregate $901,125,674 86. Of the disbursements there were for the civil service $23,253,922 08; for pensions and Indians, $4,216,526 59; for interest on public debt, $24,729,846 51; for the War Department, $599,298,600 83; for the Navy Department, $63,211,105 27; for payment of funded and temporary debt, $181,086,635 07, making the aggregate $895,796,630 65, and leaving the balance of $5,329,044 21.

But the payments of the funded and temporary debt, having been made from moneys borrowed during the year, must be regarded as merely nominal payments, and the moneys borrowed to make them as merely nominal receipts; and their amount, $181,086,635 07, should therefore be deducted both from receipts and disbursements. This being done, there remains, as actual receipts, $720,039,039 79, and the actual disbursements $714,709,995 58, leaving the balance as already stated.

The Report of the Secretary of the Interior contains the following interesting statements with regard to the Union Pacific Railroad, and the gold fields of Arizona:

The Union Pacific Railroad Company chartered by the act of Congress entitled "An act to aid in the construction of a Railroad and Telegraph Line from the Mississippi River to the Pacific Ocean, and to secure to the Government the use of the same for postal, military, and other purposes," approved July 1, 1862, has been organized by the election of Directors and other officers, and the subscription of the requisite amount of stock. The character and pecuniary ability of the stockholders afford the the most ample guarantee that this great work will be prosecuted to a successful issue. The work upon the branch lately located by you has already been commenced with a determination to press it to a rapid completion, despite the inclemency of the season and other obstacles.

The southern branch of the road, having its eastern terminus at the mouth of the Kansas River, and now known as that of the "Pacific Railway Company, eastern division," is being constructed with unparalleled energy. Since the 1st of September last, about forty miles of this branch have been graded, the ties made ready, the iron and rolling stock purchased and delivered upon the ground or now *in transitu*. We have assurances, on which a well founded belief may be based, that early next month it will be completed, and during next Summer extended to Fort Riley, a distance of 130 miles.

The principal obstacle to the rapid progress of the work is the scarcity of labor, which may be overcome by the employment of the freedmen, as before indicated in this report.

The California branch of the Pacific Railroad is being constructed with all practicable dispatch, and there is every reason to believe that the work will not be permitted to languish, but that, at an earlier day than could have been reasonably anticipated, the entire line will be completed.

The extent and unsurpassed richness of the gold fields recently discovered in Arizona, together with our previous knowledge of the vast mineral wealth of New Mexico, is well calculated to impress all who reflect upon the subject with the necessity of a branch road from the Union Pacific to Santa Fe, and such other points in the Territory of New Mexico as may be necessary to the development of the mineral wealth and trade of that country; and although Congress may be unwilling to lend pecuniary aid or credit to such an enterprise, it is believed that a liberal grant of land, both arable and mineral, of comparatively little present value to the Government, to the companies now organized, or to one to be chartered by the Territorial Legislature of New Mexico, will insure its speedy construction. There are vast fields of iron ore, and coal suitable for its manufacture, convenient to the line of the proposed branch road, and, though the enterprise may appear stupendous, the income to be derived from it would doubtless soon afford ample compensation to those who might accomplish it.

The above isin the highest degree instructive and encouraging. It is worthy of note that the Message does not contain a word in relation to Mexico. We perceive it is recommended to seek a revenue from our gold producing territories. This we think a suggestion of value. We have on former occasions frequently advocated the policy. The simple method of doing this without disturbing the miners, is to establish Branch mints in all these territories, and convert the gold dust into coin on the spot. This would be worth 10 per cent to the hard working producers who now suffer to a much greater extent by bad assays, exchanges, transportation and various other local charges. We think the Message and the documents will produce a very favorable effect abroad.

By telegraph to Ross, Dempster & Company, dated San Francisco, December 3d, mining stocks were quoted:

Ophir, $1,675 per foot; Gould & Curry, $4,500 do.; Savage, $2,750 do.; Potosi, $900 do.; Yellow Jacket, $940 do.; Overman $430 do.; Sierra Nevada $75 do.; Crown Point, $1,000 do.; California, $800 do.; Central, $1,300 do.; Chollar, $680 do.

Gould & Curry declared dividend $125 per foot for November.

The Oswego and Syracuse Railroad Company has declared a dividend of four per cent, payable on the 20th of February.

The New York Central Railroad Company have declared a semi-annual dividend of five per cent., free of U. S. Tax, payable in New York, Albany and Boston on the 20th of February; and in London on the 20th of March—the usual periods.

The Little Miami Railroad Company have declared a dividend of five per cent, exclusive of tax, payable at the Treasurer's office in Cincinnati on and after the 7th December.

The Philadelphia and Reading Railroad Company announce a dividend of seven per cent. clear of tax, on the common stock, payable in common stock, on and after the 31st of December next, to the holders thereof as they stand registered on the books at the close of business on the 17th inst.; also a dividend of three and a-half per cent. on the preferred stock, payable in cash or common stock, at the option of the holder, on and after the 31st of December next, to the stockholders as they shall stand registered on the books at the close of business on the 17th inst.

The Wyoming Valley Canal Company have declared a quarterly dividend of four per cent., payable, free of tax, on and after the 11th inst.

The Chemung Railroad Company have made a quarterly dividend of two per cent. payable on mand, free of Government tax, at the office of the Park Fire Insurance Company.

The West Cambridge Horse Railroad has declared a dividend of 3 per cent. payable on demand.

The Portland, Saco and Portsmouth Railroad Co. has declared a dividend of 3 per cent. payable December 7th.

SPECIAL CAUTION TO

Railroad Companies & Car Spring Manufacturers.

Notice is hereby given that the Metallic Car Spring Co. of New York are the sole assignees of the Patent granted to Richard Vose of New York, March 11, 1862 (re-issued Feb. 24, 1863) for an *improvement in Steel Spiral Springs;* that they thereby own the *entire and exclusive right* of making, using, and vending to others to be used, any form whatever, of Steel Spiral Spring which is protected from entire exhaustion and from contact of Steel against Steel by mean of the *interposition* of *India-rubber, wool, or other elastic gummy, or fibrous substance between* its coils; and that they will hold responsible and prosecute for damages, all persons who may either make, use or vend Spiral Spring packed as described.

RICHARD VOSE,
Sec'y Metallic Car Spring Co.,
No. 54 William st., N. Y.

The Pacific Railroad.

The formal breaking of the ground on the west side of the Missouri river, for the Union Pacific Railroad, took place 2d inst., at Omaha, with due ceremony. Numerous State and city officials were present, and a grand banquet and general illumination of the city closed the celebration.

Opening of the Through Route between New York and Washington.

We gave in our last issue an account of the new railway route, or rather junction of railways, between New York and Washington, by which the time of transit is shortened to ten hours, and the passengers pass between those cities without change of cars. The auspicious event was duly celebrated by an excursion on Wednesday, Thursday and Friday of last week by a large number of gentlemen connected with the various railroad companies owning the lines, and also a delegation from the Presses of the principal places along the route.

Dinners, suppers, and excellent speeches were a part of the affair, and seemed to have inspired the guests as well as the hosts with general satisfaction at the completion of the great object, so long in view. We regret we have not space at this time to publish the proceedings at length. Ben. Perley Poore, Esq., Mayor Wallach of Washington, Col. Fitzgerald, W. P. Smith, Esq., the great friend, if not originator of the project, Col. McCallum and F. Walcott Jackson, Esq.—all men of mark and merit, delivered excellent addresses.

When the double track is fully completed, the time will be reduced to 8½ hours between the two cities.

Jackson and Lansing Railroad.

We learn that Ingham County has voted by a very large majority in favor of a loan of $40,000 to the above road. In the city of Lansing, where a large vote was polled, all but three, we believe, were cast in favor of the loan. The prospect is now very flattering that the important enterprise will be pushed forward to completion at an early day.—*Detroit Tribune.*

New Rolling Mill at Pottstown.

William Mintzer, President of the Bank of Pottstown, and John E. Wootten, of Port Richmond, Philadelphia, have purchased of J. Dutton Steele, Esq., five acres of land at $500 per acre, near the borough of Pottstown, upon which they intend to erect forthwith a large rolling mill for the manufacture of boiler and plate iron.—*Reading Gazette, November* 28.

Cheshire Railroad.

Total receipts for eleven months ending Nov. 1, 1862, $264,962 94. Total receipts for eleven months ending Nov. 1, 1863, $341,894 97. Gain on eleven months' receipts, 1863, $76,932 03.

Philadelphia City Passenger Railways.

The Philadelphia *Inquirer* says that the long neglected Passenger Railways of that city are beginning to attract attention. Fairmount and Arch, and Race and Vine streets are the most buoyant stocks on the list. The plan of operating these roads and the Hestonville, Mantua and Fairmount Railroad under one management at a great saving of expense, and upon a footing which takes the two latter out of their financial difficulties, has advanced to a point which admits of no doubt of its final consummation, and on this the active inquiry and sudden advance in the stock is based.

☞ A proposition is before the City Council of St. Paul, Minnesota, to loan five hundred thousand dollars, by an issue of bonds to that amount, to the Lake Superior and Mississippi Railroad Company, on condition that it shall construct and put in operation within five years a track from that city to Lake Superior.

☞ The work on the extension of the Indianapolis and Cincinnati Railroad, from Lawrenceburg to Cincinnati, is progressing rapidly, and it is said the new line will be open about the middle of the present month.

The Montreal and Vermont Railway.

This road, which will probably be completed in July next, passes through the beautiful and fertile portion of the Eastern Townships called the Missisquoi Valley, and joins the Farnham railroad at St. Athanase. The Hon. Philip H. Moore, the originator, was unanimously chosen President.

New Route to Washington.

We see it stated that the project for a new air line railroad between Washington and New York is to be revived, and a vigorous effort made to get it through Congress at the approaching session. In connection with this project it is proposed to purchase the Alexandria and Washington Railroad bridge across the Potomac, with a view to the construction of a new road by a direct route to Fredericksburg, Va., to form a new, short and direct route to the South, via the Richmond and Fredericksburg road, as soon as the pacification of the country will admit of a renewal of communication.

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

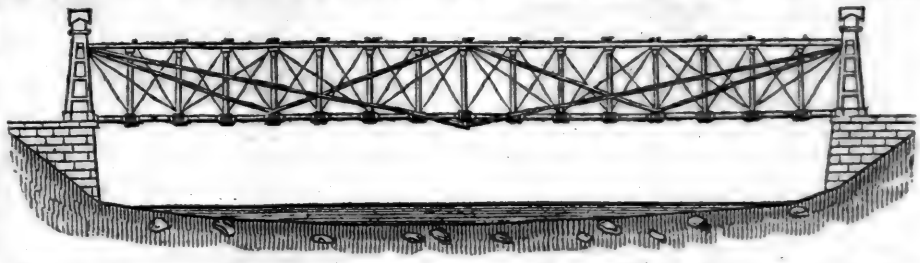
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 9, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing

CHAS. W. WELSH,
Secretary.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, FINK'S PATENT IRON BRIDGE in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 370 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN
SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, No. 1347 Brown st., PHILADELPHIA, will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—(Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—(Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—(Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $2. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

MUNN & CO'S
PATENT OFFICE.
ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS!

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,

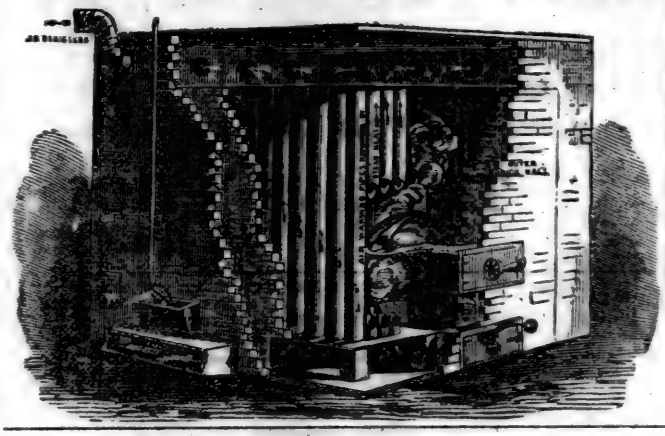
WILLIAMS & PAGE'S



PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**
The Light is very strong and brilliant, requiring no reflectors, and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.
For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.
Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

SIMONDS' PATENT STEAM HEATER.

FOR Warming and Ventilating Buildings of all descriptions, Graperies, Greenhouses, etc.
THIS HEATER HAVING BEEN THOROUGHLY TESTED, has proved to be the MOST PERFECT WARMING APPARATUS IN USE. Parties having them in use, and to whom reference can be given, give them the highest recommendations.
Those requiring a SAFE AND PERFECTLY EFFICIENT APPARATUS FOR WARMING PURPOSES, are invited to call and examine before purchasing elsewhere.
Personal attention given to erecting the same, and a guarantee given for their successful operation.

J. H. SIMONDS,
Sole Proprietor,
52 CLIFF ST.,
NEW YORK.

KRUPP'S PATENT CAST STEEL.

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enameled Iron Water Pipe, Steel Tubes, etc., etc.

They have received the highest approval from all RAILWAY COMPANIES that have them in service.

THOMAS PROSSER & SON,

28 PLATT ST., NEW YORK.

PATENT SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting, grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 61 Beekman st., (up-stairs,) New York.

RAILROAD, SHIP, BOAT AND BRIDGE SPIKES,

MANUFACTURED BY THE

NEWARK SPIKE CO.,

Newark Avenue,

NEWARK, N. J.

SANFORD'S

MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any here tofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York.

OFFICE OF THE NEW YORK CENTRAL RAILROAD CO., ALBANY, November 2, 1863.

THE annual election for Directors of this Company, and for three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the second Wednesday (the ninth,) of December next. The poll will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter. By order of the Board of Directors.

ROBERT L. BANKS, Secretary.

5t45

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,

Introduced one year ago, already ranks as the LEADING STOVE for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

Sanford's CHALLENGE HEATERS SET IN BRICK, PORTABLE OR AS FIRE PLACE HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR

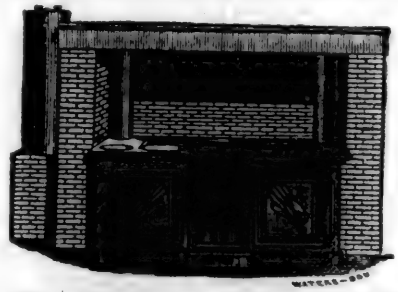
Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE

Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.



Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., 644 Broadway, corner of Bleecker st. Local Agents wanted everywhere.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the LARGEST OVENS of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary ECONOMY OF FUEL, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,

239 and 241 Water st., N. Y.

New York, Saturday, December 19, 1863.

SPECIAL CAUTION TO Railroad Companies & Car Spring Manufacturers.

Notice is hereby given that the Metallic Car Spring Co. of New York are the sole assignees of the Patent granted to Richard Vose of New York, March 11, 1862 (re-issued Feb. 24, 1863) for an *improvement in Steel Spiral Springs;* that they thereby own the *entire and exclusive right* of making, using, and vending to others to be used, any form whatever, of Steel Spiral Spring which is protected from entire exhaustion and from contact of Steel against Steel by mean of the *interposition* of *India-rubber, wool, or other elastic gummy, or fibrous substance between* its coils; and that they will hold responsible and prosecute for damages, all persons who may either make, use or vend Spiral Spring packed as described.

RICHARD VOSE,
Sec'y Metallic Car Spring Co.,
No. 54 William st., N. Y.

New York Central Railroad.

The annual statement of the operations of this company for the fiscal year ending September 30, 1863, was submitted at a meeting of the stockholders held on the 9th inst. The following is an abstract:

The following is a detailed statement of the funded debt:

Debt certificates, or premium bonds, issued to stockholders in 1853, under the consolidation agreement, payable May 1, 1883, with interest at 6 per cent. per annum, payable semi-annually, on 1st May and November		$8,892,000 00
Deduct the amount of the sinking fund provided for their payment under the consolidation agreement, consisting of $1,569,100 00 in said certificates, duly cancelled, and $177,396 02 in U. S. 6 per ct. b'ds		1,746,496 02
		$7,146,103 98
Amount outstanding of the debts of the former companies, assumed under the consolidation agreem't		253,569 23
Bonds of the Buffalo and Niagara Falls Railroad Company, assumed under the lease of that road, payable October 1st, 1864, interest at 7 per cent. per annum, payable semi-annually on 1st Jan. and July		24,000 00
Bonds for funding the principal of the debts assumed for the former companies, at consolidation, payable August 1st, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st February and August	$1,680,000 00	
Less in S. F., cancelled	232,000 00	
		1,448,000 00
Bonds to stockholders in Buffalo and Niagara Falls Railroad Company, under the lease before referred to, payable May 1, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$110,800 00	
Less in sinking fund cancelled	32,800 00	
		78,000 00
Bonds for railroad stock, payable May 1st, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$817,000 00	
Less in sinking fund cancelled	154,000 00	
		663,000 00
Bonds for real estate purchased, payable May 1st, 1883, interest at 6 per cent. per annum, payable semi-annually, on 1st May and November	$235,000 00	
Less in sinking fund cancelled	70,000 00	
		165,000 00
Bonds and mortgages, for real estate purchased, with interest at 7 per cent. per annum, excepting $25,502 50, the interest upon which is at 6 per cent. per annum		235,775 15
Bonds of June, 1854, payable June, 1861, interest at 7 per cent. per annum, payable semi-annually, on 15th June and Dec.	$3,000,000 00	
Less bought and cancelled	50,800 00	
		2,949,200 00
Bonds of August, 1859, payable August, 1876, interest at 7 per cent. per annum, payable semi-annually, on 1st February and August, with convertible privilege, at par, for ten years.	$990,000 00	
Less converted into capital stock	209,000 00	
		781,000 00
Bonds of December, 1862, payable December, 1887, interest at 6 per cent. per annum, payable semi-annually on 15th June and December—issued in part renewal of 7 per cent. bonds, due in 1864.		36,000 00
Total funded debt, Sept. 30th, 1863.		$13,779,648 36

The company has no floating debt.

During the year acceptances have been given as heretofore; the amount of which, outstanding at the close of the fiscal year, was $284,410 64, of which $191,104 75 in amount has been paid before the verification of this report.

The average rate per annum of interest on funded debt, is 6.35 per cent., and all interest, except on mortgages, is payable in the city of New York.

ADDITIONAL STATEMENTS.

During the year the following items have been charged to construction account:

Land for additional freight accommodations, principally at Albany and Buffalo		$163,989 27
On account cost of new grain elevator at Albany, erections and improvements at West Albany, and cattle yards, transfer sheds and repair shops at Buffalo		305,126 44
Part cost of 761 freight cars added to the equipment		389,000 00
Cost of 9.97 miles additional second track laid down on line between Syracuse and Rochester		91,554 51
		$952,670 22

All the other expenditures made during the year, except such as appear in the increased value of fuel and supplies on hand, have been charged to transportation expenses, and include, besides the ordinary items of general repairs, the following:

The addition to the equipment of 10 locomotive engines, 39 passenger and baggage, mail and express cars, and 761 freight cars, except the proportion charged to construction, as above stated.

The addition of new sidings and turnouts at various points along the line, amounting in the aggregate to 8.95 miles.

The erection and enlargement of buildings at various points along the line, for passenger and freight accommodations.

During the year, iron bridging, amounting to 499 feet, reduced to single track, has been substituted for wooden, making, with the amount heretofore reported, an aggregate of 5,159 1-6 feet, now upon the line.

The renewal of iron rails during the year, amounted to 9,245 tons, equal to 94 1/3 miles of single track.

The number of ties renewed during the same period, was 245,684.

The amount of income used for the construction and investment accounts, as shown by the report of last year, independently of the item of fuel and supplies referred to below, was	$1,719,884 89	
The amount so used, was, at the close of the fiscal year just ended, as shown by the following statement	$2,767,488 64	
Construction account		$32,740,068 02
Investment "		791,965 00
		$33,532,033 02
Capital stock	$24,209,000 00	
Funded debt, less debt certificates and bonds to Buffalo and Niagara Falls Railroad Co., for premiums allowed at Consolidation	6,555,544 38	
		30,764,544 38
		$2,767,488 64

To the amount shown at the close of each fiscal year, as above, should be added, for the purpose of showing the full result, the value of fuel and supplies not included in the assets of the company, as will appear from the inventory and balance sheet contained in the report, $1,000,000.

The equipment of the road consists of 239 locomotives; 197 first class passenger cars; 58 second class and emigrant cars; 68 baggage, mail and express cars; 4,006 freight cars; and 350 cars for gravel and other service.

Miles run by passenger trains, 1,992,909; by freight trains, 3,347,244; by other trains, 442,071. Aggregate miles run by passenger cars in passenger trains, 6,378,756; do. by baggage, mail and express cars, do., 2,700,765; aggregate miles run by all cars in passenger trains, 9,260,700.

Number of passengers carried in the cars, 2,723,954. Miles traveled by passengers, 147,237,968. Tons of freight carried, 1,449,604, Total movement of freight, or number of tons carried one mile, 312,195,796,

The rate of speed adopted for ordinary passenger trains is 28 miles per hour; for express trains, 35 miles; for freight trains, 15 miles.

Length of main line from Albany to Buffalo, 297.75 miles; length of side or parallel branch lines, 258.13—total length of first track, 558.88 miles; length of second track on main line and branches, 256.50 miles; length of sidings, turnouts and switches, 141.51 miles—total length of equivalent single track, 953.89 miles.

Length of Niagara Bridge and Canandaigna railroad, (leased) 98.46 miles; Branch line to Elevator at Tonawanda, 1.63 miles; Sidings, turnouts and switches, 342 miles—total length of equivalent single track, 103.51 miles.

Ocean Mail Steamers.--Restoration of our Commerce.--Increase of Revenue.

We consider the suggestion in the report of the Secretary of the Navy, to employ some of our supernumerary war steamers in carrying mails, specie, and some kinds of freight between ports in the United States and those of foreign countries with which we trade, the most important practically of any in that interesting document. It is easy to demonstrate this. From the report of Mr. Chase it is evident the National debt, though not more than half as large as it was stated by the traitor friends of the rebels, yet is large enough to give cause for serious reflection. Unaccustomed as we have been for eighty years to taxation in any form to give us the least anxiety, not habituated as are the people of other countries, to feel the hand of the tax gatherer continually in our pockets, we may be excused for a certain degree of sensitiveness at the prospect of a large National debt to be a burthen on us and our children, notwithstanding the vast resources of the nation, and its constantly increasing production, without a parallel in history.

The present Congress is called on to increase the rates of taxation on many articles already contributing to the Internal revenue, and to select others hitherto untaxed. We therefore perceive that any method which will keep up the receipts of the Treasury to the amount of expenditure, and at the same time relieve us from a large portion of our direct taxes, is a desideratum which cannot be too carefully sought for and appreciated.

This object is attainable easily in one way, by *the extension of our commerce*. Even during this conflict, and while we are engaged in preserving the National life, and though our flag has almost ceased to be seen on the ocean, our foreign commerce is flourishing and productive. Our Custom houses supply the Treasury with twice as much gold as they ever did before, and sustain the National credit with a wondrous facility. One hundred millions in gold or very nearly, can annually be depended on to meet the interest of the National debt, with a surplus for other purposes.

It is clear therefore, if we can double this foreign commerce, we shall have two hundred millions a year in gold, and be enabled to take off an equivalent amount of our annual direct taxation.

The next question then is this. How can this be done? We will express our opinions, long considered and matured, as to the proper method.

On the 6th June, 1862, an elaborate leading article appeared in the *Evening Post* of this city, from which we make the following extract:

"Without the means of regular correspondence, there can be no certain and regular commercial transactions. Where commerce exists there must be correspondence, and it is the triumph of modern civilization, that a letter may traverse the globe in security to herald the arrival of cargoes, and authorize their distribution. If we would trade with Japan and China on equal terms with the nations of Europe, our commercial advices must be as regular and constant as theirs. At present we have no regular mail service with the East; our letters like our moneyed exchanges are retarded to pass through English offices and English hands, and with an arrangement which favors the English post offices by an earlier delivery."

Mr. Phelps, the late M. C., from California, made it clear to the public understanding in one of his excellent speeches, that our present communications between California and China were attended with a loss of twenty per cent, to our merchants.

The same results are seen in our trade with South America and other parts of the world. British steamers carry all our letters and remittances at the present moment, except perhaps those which are taken by our Aspinwall and Pacific lines. But even here the *gold* of California passes out of our hands into those of British carriers, for the want of safe transportation. Our correspondence with Brazil is all done through the British post office. Even our ministers are obliged to pass first to England, before they can reach any of the great cities of South America.

The article from which we have already quoted met these difficulties by a very simple solution, and yet it has taken nearly two years for the Government to comprehend it. "Of our admirable steam sloops of war," says the same article, "built of wood and costing many millions of dollars," "the swiftest and most seaworthy should at once be converted into Government mail packets."

"These should be passed over to the post office department, manned with working crews only, provided with partial armaments, and placed under the command of some of our gallant lieutenants, who have seen service and desire to remain in activity." These should "carry mails, treasure, and even some kinds of freight." Thus we could not only enlarge our commercial intercourse, but protect it, and the navy would retain a valuable portion of its seamen and officers in constant and useful employment.

It is evident that when this rebellion is crushed out, we shall have six hundred vessels of war, and for a large portion of these we cannot possibly find any important occupation. They will be laid up

in Navy Yards to rot, or to be repaired annually at an enormous expense. By placing the best of these on Ocean Mail routes in the manner proposed we shall earn a large amount of the cost of maintenance, and yet keep the Navy in prime condition. We would dispose of these in something of the following manner.

Four or more steamers between Liverpool and Glasgow and New York.

Four more to French ports.

Six between San Francisco and ports in China and Japan.

Two between San Francisco and the Amoor river.

Four between New York and Rio Janeiro.

Two between New York and Carthagena.

Four between New York and Buenos Ayres and Montevideo.

Four between Bremen and New York.

Two between St. Petersburgh and New York.

Four between New York and Genoa and other ports in the Mediterranean.

Two between Cadiz and New York.

And so on, wherever there is an existing trade which it is our interest to renew and increase. If this at the first sight appears too large a scheme, it will not when we consider, that Great Britain has twice as many on most of these very routes, has nearly this number in the East India trade alone, is establishing new lines everywhere else, and now pays eight hundred and fifty thousand pounds sterling per annum in subsidies for this ocean service.

The more vessels we employ without delay the sooner will our commerce revive. What we do should be done on the largest practicable scale, so that wherever there is a British Mail steamer afloat, an American should be alongside of her. Anywhere, where we can have regular mail service, and fair competition there is no doubt, and in practice there never has been any, that we can obtain our full share of any trade or traffic in the world.

Upon the plan suggested then, Government Mail Packets would receive large amounts for postages, passengers, specie and even freight such as chests of tea, bales of silk or other materials easily packed and handled, and thus the expense of maintenance would be greatly lessened to the country.

If we wait till private companies are formed to perform this mail service, and these will not undertake it unless heavily subsidized by Congress, we may have to wait a dozen years or more before they are ready. With the War debt upon us, it is not at all probable that any subsidies will be granted. And at the best, such grants will be monopolies, hateful to the people, and the source of constant dispute and discontent. The plan now proposed will obviate all this, and what is more, can be put into execution in ninety days. If the war continues these steamers will be protectors of our commerce: and if it is speedily ended their sphere of usefulness will be extended beyond any possibility of interference, and with an immediate revival of our trade.

All the Government then has to do is to move in this matter. Our revenue will at once feel the effect of this aid to our commercial pursuits.

If hereafter private Companies should become bold enough to enter into the business, it will be easy enough for the Government to dispose of these vessels, with the benefit of the postal receipts to the highest bidders, and withdraw from the routes in their favor.

We are satisfied the suggestions of the Secretary of the Navy, therefore, are of the highest immediate importance, and should be acted upon without delay.

The person to whom the public are indebted for originating the idea, has brought to the subject personal experience in the ownership of steam vessels, has urged it strongly on Members of Congress, the P. M. General, and frequently advocated it in the New York Chamber of Commerce as well as in the columns of this paper.

A sense of duty has made him persist in discussing the question, though often to ears as closed as the dull cold ears of Death. The Secretary of the Navy has now brought the proposition fairly before the public, and we trust that those merchants of New York, who have been bewailing the ruin of its commerce, will not let the present auspicious recommendation pass, without giving form, substance and effect to it by suitable action on their part.

Let these lines of steamers be set in motion and our foreign commerce will in a few years furnish the Treasury with all the money it wants without further resort to the excessive taxation which is now pressing upon the Country.

We had intended to have exhibited tabular statements of the condition of our foreign commerce as likely to be increased by the proposed Ocean mail service, but want of room for the present makes it impracticable.

The working of the plan in detail either by the Navy department or the General Post Office may be considered at another opportunity. It is the simplest part of the whole project.

Allegheny Valley Railroad Company.

For the information of purchasers of the Mortgage Bonds of the Company, the Managers make the following statement of the history and present condition of the Company.

HISTORY AND LEGISLATION.

The Pittsburgh, Kittanning and Warren Railroad Company was incorporated by the Pennsylvania Legislature, April 4th, 1837, more than twenty-six years ago. As the name indicates, the intention of its projectors was to construct a road along the valley of the Allegheny river, from its mouth nearly to its source. The river was then, as now, one of the most important highways of commerce to and from the city of Pittsburgh, and the abounding wealth of its bordering mines and forests promised a rich reward for more perfect development. Although it was found impracticable at that early day to procure the large amount of funds necessary for the construction of the road, so important a project could not be abandoned, and on March 16th, 1847, a supplement to the charter was procured, extending the time for its completion till June, 1862.

By the act of 15th April, 1851, a further extension of time was granted, and the Company given "full power and authority to locate, make and construct a road, with as many branches as they may deem expedient, from the city of Pittsburgh to Kittanning, and thence by the most eligible route to the New York State line," with all the rights privileges and immunities of the act of 1837.

By a further supplement, approved 14th April, 1852, the corporate name was changed to "The Allegheny Valley Railroad Company," and other privileges granted.

By the act of 14th April, 1853, additional authority was given to make branch roads in the counties of "Clarion, Jefferson, Elk, Forest, M'Kean and Potter," and to connect at the State line with New York roads.

By a further supplement on the 4th of April, 1854, additional authority to issue bonds was conferred; and May 8th of the same year, further privileges asked by the Company were granted, including the right to construct branch roads in the counties of "Armstrong, Venango and Clearfield."

On the 22d of April, 1857, the Company was authorized to issue twelve per cent. preferred stock, "to be applied to the extension of the works of the Company to the mouth of the Mahoning." This privilege is abrogated by the present issue of mortgage bonds for the same purpose.

Further supplements were passed on the 23d March, 1860, and the 2d January 1863, changing the manner of voting and fixing the time for the annual election of managers.

The legislation granted to the Company is of the most favorable character. So much of it as confers authority to issue bonds and create a mortgage to secure them, will be found recited in the copy of the mortgage which accompanies this statement.

Letters patent were issued on the 10th of July, 1852, and the Company organized soon after, electing Hon. William F. Johnston, whose term of office as Governor of Pennsylvania had just expired, to preside over its affairs.

Subscriptions were made by individuals and corporations to the

CAPITAL STOCK

of the Company, and paid in to the amount of $1,657,652. (Report of 1853.) In addition to this, the "Corning and Olean Railroad Company," under the auspices of the New York and Erie Road, contracted to make a cash subscription of $500,000 to the stock, and to construct forty miles of the north end of the road, and lease the same at 8 per cent. interest on the cost thereof. The Company contracted for the grading and bridging of the whole road from Pittsburgh to the New York line.

Unfortunately the tide of prosperity on which so many great enterprises were successfully afloat, had already begun to ebb when these arrangements were made; and it was soon found necessary to abrogate so much of the contract as extended northward of Kittanning. As the financial difficulties of the country increased, the county and city bonds held by the Company depreciated in value, and in addition to the resources which at first seemed so ample, it was compelled to issue $400,000 of mortgage bonds. By the aid of these bonds and the creation of a considerable floating debt, that part of the road now in operation was completed.

The present Managers deem it unnecessary to enter into detail of the financial disasters which befel the Allegheny Valley Road. They were common in many other American Railway enterprises during the same period, some of which have already recovered from them and are now among the most successful and profitable in the country. We proceed to show the

PRESENT PURPOSE, CONDITION AND PROSPECTS OF THE COMPANY.

The Company now offers for sale three hundred seven per cent. thirty year coupon bonds of $1,000 each, the semi-annual interest payable in the city of New York, on the 1st of April and October in each year.

The road is in successful operation from Pittsburgh to Kittanning, in Armstrong county, forty-four miles. The money is required to construct an extension of the road to the mouth of the Mahoning river, a distance of ten miles. At that point a large amount of business will be secured, chiefly from the "iron region" of Clarion county, which cannot reach the road at Kittanning. Every annual report since the road was opened has dwelt more or less on the importance of this work.

In the year 1859, Governor Johnston and the then Managers, urging the stockholders to furnish the necessary means, said, "the extension con-

templated will more than double the present receipts of the Company, while the expenses will be but slightly increased." The stockholders in that year directed the issue of a twelve per cent. preferred stock, to make it, but the existing embarrassments prevented the execution of the plan.

The present Managers anticipate an increase of more than double the interest on the cost of construction, which we omit from the estimate of resources which will be found below, for the reason that it will only be realized when the work is done; there is ample margin without it.

In addition to the local business heretofore centering at Mahoning, a new and important consideration now urges us to reach that point. The road will then be ten miles nearer to the great

PETROLEUM REGION

(with which it must sooner or later be connected), and will, by means of boat lines to Franklin, carry a largely increased quantity of the oil. Much of the growing prosperity of the Company is due to the fact that more than twenty of the most extensive oil refineries have been already established on the line of the road. The number and capacity of these works is constantly increasing, and it is believed that owing to cheapness of fuel, accessibility of the crude material, ready access to market for the product, and the presence of *extensive beds of cannel coal* immediately on the line of the road, there is no other location so favorable for the business.

It has been suggested that if the productiveness of the petroleum wells should greatly diminish, a proportionate diminution would occur in the business of the Allegheny Valley road. Without insisting on the probability that by the opening of new wells the product of the oil region will increase for many years, we are satisfied that any considerable decrease would result in large additions to the business of the road. The demand for refined oil is fairly established in the markets of the world, and will continue to be supplied. Before the discovery of the wells, there were already on the line of the road five of the most extensive coal oil works in the country, and others were projected. The proprietors selected the location on account of the superior quality of the extensive cannel coal beds through which the road passes. These establishments at once substituted petroleum for coal, and continued their operations. If the wells cease to produce they will resume their original process of distillation from coal. The refineries of later construction will add retorts to their existing machinery. The most extensive in this vicinity have arranged their costly buildings and machinery with an express view to this possible contingency; and as many of them are not immediately at the coal beds, the railroad will be required to transport to them a largely increased tonnage of raw material as well as continue to carry off their product. If the road should, in the contingency we speak of, be completed to Franklin, the quantity of cannel coal it will carry to supply the oil manufactories in the present petroleum region, and on the line of other roads, must be enormous. It is not proposed, in this brief paper, to show the value of the general trade which will be commanded by further extensions of the Allegheny Valley road, and the single item of coal oil is mentioned as alone warranting an expenditure which would be fully remunerative without it.

It will be observed that the mortgage now created is for $600,000, whilst but half that sum is to be expended on the part of the line mortgaged. The cost of the fifty-four miles mortgaged is deemed to be ample security for the whole issue, but it is provided in the mortgage that only half the bonds shall now be sold. Should the contingency arise which authorizes the sale of the additional bonds, the security of the present issue will be greatly strengthened by the increased business a further extension will bring to the existing road. The effect will be similar to that which will be produced by the present issue upon the first mortgage bonds.

EARNINGS.

The Allegheny Valley road was opened for business from Pittsburgh to Kittanning, January 1st, 1856. The earnings for each year have been as follows:

1856	$77,581 91	1860	$92,103 72
1857	87,114 92	1861	106,288 08
1858	74,916 95	1862	138,967 51
1859	87,114 92	1863 Approx.	190,000 00

The surplus, over expenses and interest, has been used in paying off the floating debt and making necessary additions to the road and rolling stock.

The monthly earnings for three years are as follows:

	1861.	1862.	1863.
February	$6,147 11	$9,735 83	$11,752 40
March	6,862 61	9,118 13	13,156 97
April	9,819 61	9,533 20	14,026 86
May	7,453 91	10,272 16	15,884 39
June	8,875 64	9,457 82	14,711 69
July	9,890 52	10,392 93	18,254 59
August	8,101 50	12,864 07	16,614 16
September	6,821 53	12,770 37	20,202 95
October	10,428 42	12,875 24	.....
November	8,918 42	11,913 16	.....
December	10,153 80	15,452 74	.....
January	9,665 01	11,421 86	.....
Mail	3,150 00	3,150 00	3,150 00
Total	$106,288 08	$138,967 57	.....

The increase for the first eight months of 1863 over the corresponding months of 1862, is $40,579 24; and over the corresponding months of 1861, $60,641 32.

The increase is owing to the progress of the region tributary to the road, and not to augmented charges. The passenger fares have now been advanced twenty per cent., beginning on the 1st of October.

ABILITY TO PAY INTEREST.

The earnings for the year 1863 will be		$190,000 00
Estimating fifty per cent. for expenses		95,000 00
Net sum		$95,000 00
Int. seven per cent. on $378,000, 1st mortgage bonds		26,460 00
Surplus		$68,540 00

Expended and to be expended in extinguishing the floating debt, for new engines, and perfecting the road.

Estimated earnings for 1864		$235,000 00
" expenses "		117,500 00
" net earn'gs "		$117,500 00
Int. on $378,000 1st mort. bonds	$26,460 00	
Int. on $300,000 2d mort. bonds	21,000 00	
		$47,460 00
Surplus, 1864		$70,040 00

About four per cent. on the capital stock issued.

In the above estimate of the receipts for next year, we have added $15,000 to the earnings of 1863. The twenty per cent. advance in passenger fares to take effect on the 1st proximo, will give us $19,000 of that sum, leaving $26,000 only as the amount to be derived from additional business, a sum $7,679 less than the actual increase of 1862, and not quite one-half of the increase of 1863.

No account is taken of the additional business to be derived from the extension now being made, for the reason that it will only begin when the work is done, nearly a year hence; and it is deemed unnecessary to the object of this paper, to extend the estimates to 1865.

The company has in reserve $22,000 first mortgage bonds; also—$120,000 Armstrong County bonds, and $90,000 Jefferson County bonds.

A subscription of $168,000 to the stock of the company was made by Clarion County, and the bonds executed but never delivered to the company. The Armstrong County bonds are offered for sale at par. If sold, the proceeds will be used in the further extension of the road.

President.—FELIX R. BRUNOT.

Managers.—George Black, James B. Murray, James Park, Jr., Nathaniel Holmes, B. F. Jones, W. Reynolds.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending Dec. 11, 1863, was as follows:

Passengers	$20,515 27
Freight and live stock	38,133 81
Mails and sundries	1,680 22
Total	$60,329 30
Corresponding week of 1862	61,996 48
Decrease	$1,667 18

The earnings of the Grand Trunk Railway for the week ending December 5, 1863, were:

Passengers	$27,198 24
Freight and live stock	73,290 59
Mails and sundries	5,710 00
Total	$106,199 83
Corresponding week, 1862	104,906 47
Increase	$1,296 83

The earnings of the Galena and Chicago Union Railroad for the 1st week of Dec., 1863, were:

Freight	$54,054 41
Passengers	12,023 61
Mails	1,300 00
Total	$67,378 02
Same week, 1862	33,284 73
Increase	$34,093 29

The earnings of the Chicago and Alton Railroad for the 1st week of December, 1863, were:

	1863.	1862.
Passengers	$12,321 00	$9,715 46
Freight	26,835 01	18,785 46
Sundries	1,284 84	1,166 97
Total	$40,440 85	$29,667 89
Increase	10,772 96	

The approximate earnings of the Marietta and Cincinnati Railroad, in the 1st week of December, 1863, were:

Passengers	$4,134 03
Freight	11,154 07
Mail express and telegraph	907 00
Total	$16,195 17
Same week, 1862	11,583 21
Increase	$4,611 94

The earnings of the Michigan Central Railroad for the 1st week of Dec., 1863, were..$72,070 00
Same period, 1862 61,638 00
Increase $10,432 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of Dec., 1863, were $75,693 00
Do., 1862 67,838 00
Increase $27,855 00

The earnings of the Chicago and Rock Island Railroad for the 1st week of December, 1863, were $57,931 00
Do., 1862 34,629 00
Increase $23,902 00

The earnings of the Chicago and Northwestern Railway for the 1st week in December, 1863, were $40,440 85
Do., 1862 29,667 89
Increase $10,772 96

Portland and Halifax Railways.

The numerous difficulties political and pecuniary, which lie in the way of the Canadian Intercolonial Railway seem to have aroused the merchants and capitalists of Maine to secure a route in American interests between Portland and Halifax. In 1850 a convention was held at Portland for the purpose of furthering this object. In 1852 the Grand Trunk was commenced, with the absorption into it of the entire line to Portland by taking up the line of the Atlantic and St. Lawrence road. The parties interested in these works made proposals for the building of the European and North American Railway, taking up the line at Augusta, and thence to Waterville and Bangor, completing the line of communication east, to St. John and Halifax, connecting all interests under the name of the European and North American Railway Company. This line had been started east from Portland on the broad gauge, from the line of the Montreal railroad 28 miles from Portland at Danville Junction to Waterville, while a narrow gauge road was in progress toward Augusta by way of Yarmouth and Brunswick. The plan of the Portland Convention was to use all existing lines, and begin at Augusta, extend the line to a point of connection with the broad gauge line at Waterville, and thence build one line on the broad gauge to Bangor and to St. John and Halifax. But a charter for the line from Waterville to Bangor was under the control of W. B. S. Moor, George W. Pickering and others at Bangor, and they had become parties to a contract for building it.

They refused terms until it was too late, and defeated the bill which proposed to allow the European and North American Railway to commence at Waterville instead of Bangor, and construct their line to Bangor. It was for this reason that the project of this line for the time was defeated.

The Grand Trunk was however completed, and also the Victoria Bridge, but their contract for building the European and North American Railway in New Brunswick, was cancelled, as they were confined to that Province alone, and the time had gone by for raising the means on the plan first proposed in England in 1852, on the idea that in the end the lines in Maine, New Brunswick and Nova Scotia should be worked in conjunction as one line.

The Russian difficulties intervening at this time, crippled most of the enterprises resting on British capital, but New Brunswick and Nova Scotia set themselves severally at work to construct their portion of the line of the European and North American Railway Company as public Provincial works, built at the expense of the government, and managed by them, as in some European countries. The line was built looking to an ultimate connection with the Nova Scotia line and from Halifax north to Truro, 61 miles, with a branch of 80 miles to Windsor. In New Brunswick they built the line east from St. John to Shediac, on the St. Lawrence Gulf, 108 miles, while in Maine the railway was finished through from Waterville to Bangor, and the line extended up the Kennebec river, from Augusta to Waterville, and to Skowhegan.

The whole length of the line from Portland to Halifax is 582 miles, located as follows: in Maine, 243 miles; in New Brunswick, 209 miles; and in Nova Scotia, 130 miles. More than half the distance, or 300 miles, is now completed and in successful operation, viz: in Maine, 138 miles, from Portland to Bangor; in New Brunswick, 101 miles, from St. John east toward the Nova Scotia frontier; and in Nova Scotia, 61 miles, from Truro to Halifax. Leaving to be finished, 274 miles, viz: in Maine, 105 miles, from Bangor to the New Brunswick boundary; in New Brunswick, 108 miles—from the Maine frontier to St. John, 80 miles, and 28 miles between the Bend and Nova Scotia line; in Nova Scotia, 69 miles, between Truro and the head of the Bay of Fundy. From Bangor the line of the European and North American Railway was located in 1860, with the design of absorbing into it the line of the Penobscot Railroad which was partially built from Bangor to Milford, following the west bank of the Penobscot river. The broad gauge lines extending from Danville Junction to Bangor, by the way of Lewiston and Waterville, a distance of 110 miles, were consolidated in 1862, into one company by the name of the Maine Central Railroad Company, and this company now proposes to operate the line of the European and North American Railway Company as far and fast as built. The work of construction is to go forward the present winter, and the rails will be laid to Oldtown by June 9, 1864, and a further extension is to be made to Lincoln during the summer. We learn that arrangements are in progress looking to the full and final completion of the line from Bangor to St. John.

Thus we see how intimate are becoming the relations between the British provinces and the United States, and how proper it is to keep up the most friendly relations between neighbors whose interests are mutual, and whose enterprise is honorable to both. When there shall be a railway connection between New York and Halifax, for the Portland project amounts to this, we do not doubt we shall witness a new phase in the Colonial trade.

The National Finances.

REPORT OF THE SECRETARY OF THE TREASURY.

The Report of the Secretary of the Treasury commences by saying that the operations of his department have been attended the past fiscal year by a greater measure of success than he ventured to anticipate at its beginning. At the beginning of the year all demands on the treasury had been discharged, and there was a balance in the treasury of $13,043,546. But the large disbursements required by the war, the difficulties of negotiating new loans, and the reverses which befel our arms in June, July and August, produced a state of things which resulted in their remaining unpaid on the first day of the last session of Congress, requisitions to the amount of $46,394,875. To provide for these requisitions and current demands, Congress authorized an additional issue of United States notes to the amount of $100,000,000, but did not reach any definite conclusions in regard to loans in time to embody them in an act before adjournment. On that day, March 3, 1863, the act to provide ways and means for the support of the government received the approval of the President and became a law.

In addition to various provisions for loans it contained clauses repealing the restrictions affecting the negotiation of the five-twenties, and thus disengaged that important loan from the embarrassments that had previously rendered it almost unavailable. The salutary effects of this act and the one providing for a national currency through a national bank, were soon conspicuous.

Notwithstanding the aid afforded by the additional issue of United States notes, the undischarged requisitions upon the treasury continued to increase and at the close of the session of Congress they had reached $72,171,189.

The loan act and the national banking act were followed by an immediate revival of public credit. Success quite beyond anticipation crowned the efforts of the Secretary to distribute the five-twenty loan in all parts of the country, as well as every other measure adopted by him for replenishing the treasury. The result was that within two months after the adjournment of Congress the whole mass of suspended requisitions had been satisfied, all current demands promptly met, and full provision made for the pay of the army and navy. During the remainder of the fiscal year no embarrassments attended the administration of the finances except those which are inseparable from vast expenditures.

Notwithstanding these expenditures it is gratifying to be able to state that during the last year the total of disbursements did not greatly exceed, while the increase of the public debt did not equal, the estimates submitted to Congress by the Secretary at the last session. Thus, while it was then estimated that the public debt on the 30th of June, 1863, would reach the sum of $1,122,297,403 24, its actual amount on that day was $1,098,793,181 37; and while the disbursements for the year were estimated at $693,346,321 48, the real total was $714,709,995 58.

The aggregate receipts from all sources, including the balance from the preceding year, as shown by the books of the treasury, were, during the last fiscal year, $901,125,674 86, and the aggregate disbursements $895,796,630 65; leaving a balance on the 30th of June, 1863, of $5,329,044 21. But sums borrowed during the year, and applied during the same time in payment of debts, affect only nominally the total of receipts and of disbursements. The sums thus borrowed and applied during the last fiscal year amounted to $181,086,635 07. This aggregate, therefore, should be deducted from both sides of the statement, making the true amount of receipts, including balance from last year $720,039,039 79, and the true amount of disbursements $714,707,995 58. The balance, of course, remains the same.

It is gratifying, also, to be able to state, that while debts did not reach the amount anticipated, the receipts from all sources of income, except internal revenue, exceeded the estimates. Thus the receipts from customs, estimated at $68,041,736 59, were actually $69,059,642 40; from lands, estimated at $88,724 16, were $167,617 17; and from miscellaneous sources, estimated at $2,244,316 32, were $3,046,615 35. Direct tax receipts were estimated at $11,620,717 99, and this amount, or nearly this amount, has been received in the form of payments for military supplies and services by the States, for which they are entitled to credit beyond their several proportions of the tax. In consequence, however, of incomplete settlements, only the sum of $1,485,103 appears on the books as received into the treasury.

The receipts of internal revenue have alone disappointed expectations. The estimate was $85,456,303, while the receipts were $37,640,787. The law, unless materially amended, will not produce the revenue expected from it.

The receipts, estimated and actual, for the fiscal year, ending on the 30th of June, 1863, were, including balance from the preceding year, as follows:

	Estimated.	Actual.
From customs....	$68,041,736 59	$69,059,642 40
From lands	88,724 16	167,617 17
From miscellane's	2,244,316 32	3,046,615 35
From direct tax .	11,620,717 99	1,485,103 61
From int. revenue	35,456,303 73	37,640,787 95
Bal. from last year	13,043,246 81	13,043,546 81
Total....	$180,495,345 60	$124,443,313 29

The disbursements, estimated and actual, were as follows:

	Estimated.	Actual.
The civil service..	$32,811,543 23	$23,253,922 08
Pens'ns & Indians	5,982,906 48	4,216,520 79
War department.	747,859,828 98	599,298,600 83
Navy department.	82,177,510 77	63,211,105 27
Interest on debt .	25,014,532 07	54,729,846 61
Total gross estimate.....	$893,346,321 48	$714,709,995 58
But this amount, it was suppos'd would remain undrawn at the end of year, and was therefore deducted from the gross estimate	200,000,000 00	
Making actual estimate	$693,346,321 48	

From the actual expenditures, $714,707,995 58, there must be deducted the actual receipts, $124,443,313 29, in order to show the amount derived from loans, $590,266,682 29, which sum, added to the amount of the debt on the 1st of July, 1862, $508,526,499 08 (heretofore erroneously stated at $514,211,371 92,) gives as the true amount of debt on the 1st of July, 1863, $1,098,793,181 37.

The estimates for the current fiscal year 1864 next claim attention. These are founded on actual receipts and disbursements for the first quarter, which ended Sept. 30, 1863, and on opinions formed upon probable events and conditions as to the other quarters.

The following statement exhibits what is actually known, and what, after careful reflection, the Secretary thinks himself warranted in regarding as probable:

For the first quarter ending Sept. 30, 1863, the actual receipts were—

From customs....	$22,562,018 42	
From int'al revenue	17,599,713 59	
From lands.....	136,182 09	
From miscellaneo's sources	641,542 04	
Total actual rec'pts 1st quarter.....	$40,939,456 14	
To which add bal. July 1, 1863....	5,329,044 21	
Making total receipts 1st qr., except loans.....		$46,268,500 35
For three remaining quarters, ending on the 30th of June, 1864, it is estimated there will be received:		
From customs....	$50,000,000 00	
From int'al revenue	60,000,000 00	
From lands.....	300,000 00	
From miscellaneo's sources.....	5,000,000 00	
		115,300,000 00
Making a total of receipts from ordinary sources, actual and estimated, and including bal., of.		161,568,500 35
To which add the actual and estimated receipts from loans.....		594,000,000 00
Making a total of actual and estimated receipts from all sources, for 1864		$755,568,500 35

The expenditures may be stated as follows:

For the first quarter, ending September 30, 1863, the actual disbursements have been:

For the civil service	$7,216,939 31	
For pensions and Indians.....	1,711,271 95	
For War Departm't.	144,387,473 97	
For Navy Depart..	18,511,618 86	
For interest on public debt.....	4,283,628 37	
Actual expenditures for 1st qr...		$176,110,932 46
For the remaining three quarters, the estimates, founded on appropriations and estimated deficiences, are as follows:		
For the civil service.	$27,050,872 21	
For pensions and Indians.....	6,129,042 36	
For War Departm't.	741,092,037 14	
For Novy Depart..	94,467,567 74	
For interest on public debt.....	54,881,508 01	
		923,621,027 96
Making a total aggregate of actual and estimated expenditures of.		$1,099,731,060 42
But as these estimates include all unexpended balances of appropriations from former years they are necessarily much too large, and there may be safely deducted from their aggregate, as likely to remain unexpended at the close of the fiscal year, the sum of.....		350,000,000 00
Leaving the total actual and estimated expenditures for 1864		$749,731,960 42
The total of expenditures being deducted from the total of receipts, there will be an estimated balance on the 30th of June, 1864, of.....		5,836,539 93
From this statement it appears that the total receipts required for the probable disbursements of the year, and including estimated balance at its close, will amount to.....		$755,568,500 35
Of which there have been provided and applied during the first quarter.....		176,110,932 46
Leaving to be provided		$579,457,567 89
Of which it is estimated there will be received from ordinary sources during the three other quarters.....		115,300,000 00
Leaving to be provided by loans		$464,157,567 89

The amount of debt created during the quarter is ascertained by deducting from the total expenditures $176,110,932 46, the aggregate of ordinary receipts and balance from last year, amounting together to $46,268,500 35, which gives as the increase of debt $129,842,432 11. To this sum, if there be added the sum yet to be provided by loans, $464,157,567 89, the result will be $594,000,000, from which if there be deducted the estimated balance on the 1st of July, 1864, $5,886,539 93, the remainder will be $588,163,460 07, and will represent the total increase, on the basis of these estimates, of public debt during the year. The debt on the 1st of July, 1863, was $1,098,793,181 37; to which if this estimated increase be added, the total debt on the 1st of July, 1864, will be $1,686,956,641 44, instead of $1,744,685,586 80, as estimated in the report of last December.

It is not certain, or perhaps probable, that the actual expenditures or actual debt will quite reach the amounts now estimated. Indeed, if the expenditures for the first quarter, $176,110,932 46, and the ordinary receipts, $40,939,456 14 for the same quarter, be taken as the standard, the total expenditures of the year will be $704,443,729 84, and the total receipts $163,757,824 56. To these receipts, if the balance on the 1st of July, 1863, $5,329,044 21, be added, it will make the total ordinary resources $169,086,868 77; and the subtraction of this sum from the total expenditures will give the whole amount to be provided by loans during the year as $535,356,861 07. This sum will therefore be, on this hypothesis, the increase of debt for the year, and, added to the debt existing on the 1st July, 1863, will make the total amount on the 30th of June, 1863, $1,634,150,042 44.

It is not impossible that vigor in the prosecution of the war, and economy in every branch of expenditure, enforced by wise legislation, may reduce actual disbursements and consequent increase of debt even below these figures.

The estimated receipts for the fiscal year ending June 30, 1865, are as follows:

Estimated balance, July 1, 1864.	$5,836,539 93
From customs	70,000,000 90
From internal revenue.....	125,000,000 00
From lands.....	1,000,000 00
From miscellaneons sources....	5,000,000 00
Making estimated aggregate receipts	$206,836,539 93

And he estimates the expenditures as follows:

Estimated balance of former appropriations unexpended July 1, 1864.....	$350,000,000 00
For the civil service.....	27,978,194 81
For Pensions and Indians.....	9,631,304 78
For the War Department.....	536,204,127 77
For the Navy Department.....	142,618,785 40
For interest on public debt.....	85,387,677 15
Making the aggregate of estimated expenditures.....	$1,151,815,083 86
But he estimates as likely to remain undrawn on the 30th June, 1865, and therefore to be deducted from this aggregate	400,000,000 00
Making the real estimate of expenditures for the year.....	$751,815,088 86
From which deduct estimated receipts from ordinary sources, as before stated.....	206,836,539 93
Leaving to be provided by loans.	$544,978,548 93

The sum to be provided by loans represents the increase of debt during the year. Assuming, therefore, the correctness of the estimate which puts the debt on the 1st July, 1864, at $1,686,956,641 44. It will result from these estimates that the whole debt will have reached on the 30th of June, 1865, the sum of $2,231,935,190 37.

The receipt and expenditures during October and November other than on account of principal of debt, amounted each, so far as has been ascertained, to $147,060,781 16 without balances. Of these receipts $35,629,703 18 were from ordinary sources, and $111,931,027 98 from loans, leaving to be obtained during the remaining seven months from ordinary sources $79,670,296 82, and from loans $325,226,539 82. On the basis of these two months the receipts from ordinary sources for the last three-quarters will exceed the expenditures from ordinary sources, $3,501,406 59.

The Secretary admits no apprehension of deficiency in any of the ordinary sources of income except, perhaps, the internal revenue; nor does he anticipate any formidable difficulty in providing the amount to be obtained from loans especially if our arms continue to be successful. A limited additional amount of revenue may be derived from a modification of the laws imposing duties on foreign imports, but the chief reliance for any substantial increase, and even for the prevention of possible decrease, must be on internal duties.

The Commissioner of Internal Revenue recommends an increase of the tax on bank note circulation to two and two-fifths per cent.; an increase of the duty on distilled spirits to sixty cents per gallon; an increase of the duty on tobacco to twenty cents per pound on leaf, and from five to twelve cents, according to quality, on manufactured; a duty of ten cents per gallon on crude petroleum; a duty of two cents per pound on cotton; the repeal of the tobacco and petroleum drawbacks, and various other changes of the internal revenue laws, designed to augment the receipts from this source. In the particular recommendations just mentioned the Secretary fully concurs, and commends all his suggestions to

careful attention. The enactment of such laws as will secure an increase of the internal revenue to the amount originally estimated, of one hundred and fifty millions a year, is required by the strongest considerations of public policy. Hitherto the expense of the war have been defrayed by loans to an extent which nothing but the expectation of its speedy termination could fully warrant.

The total receipts from ordinary sources for the year ending June 30, 1862, were $51,935,720 76, while the disbursements for the civil service, for Pensions and Indians, and for interest, were $37,701,801 11; leaving only $14,233,919 65 for the War and Navy Departments, the expenditures, of which in the last year of peace had not been $27,922,917 24 and nothing at all for extraordinary expenditures or a sinking fund.

For the fiscal year ending June 30, 1863, the total receipts were $124,143,313 29, while the disbursements were $108,046,123 96—leaving as applicable to extraordinary expenditures or a sinking fund, $16,397,189 33.

Assuming as correct the estimates of receipts and expenditures for the current year, 1864, there will remain an unexpended balance of $4,049,403 16, which, had it been possible to suppress the rebellion before July 1, 1863, would have been applicable to the purposes of a sinking fund; and the same estimates for the fiscal year 1865, will give a remainder of $27,998,529 76, which, should the rebellion be suppressed before the 1st of July, 1864, will be applicable to the payment of the debt.

These statements illustrate the importance of an economical and vigorous prosecution of the war, If by such vigor the rebellion can be suppressed, and the war ended before the first of July next, the country will be saved from the vast increase of debt which must necessarily attend its continuance during another year, and the debt itself can at once be placed in a course of steady reduction. And whenever progressive payment shall begin, the value of national securities will rapidly rise, and reduction in rates of interest will gradually diminish the burdens of debt.

The average rate of interest on the whole debt without regard to the varying margin between coin and notes, was on the first of July, 1862, 4.36 per centum; on the first day of January, 1863, 4.02 per centum; on the first day of July, 1863, 3.77 per centum; and on the first day of October, 1863, 3.95 per centum. The rate, it will be seen is increasing, and will continue to do so with the increase of the proportion of the increase of the interest-bearing to the non interest-bearing debt. And as the amount of the latter cannot be materially augmented without evil consequences of the most serious character, the rate of interest must increase with the debt and approach continually the highest average—greater or less in proportion to the duration and cost of the war.

As to the distribution of the public debt, the Secretary, after describing the manner in which it has been put into the market, concludes that he can perceive no better mode, as the debt has been distributed in sums of fifty to one thousand dollars all over the country not under the sway of rebellion.

Such, also, has been the shape in which the public indebtedness has been issued that prompt advantage can be taken at any time to adopt favorable circumstances for diminishing the burden it imposes on industry; and, when the war closes, it will be found completely within the power of Congress to fund the whole at a very moderate rate of interest, and redeemable after brief periods. The controllability of the debt is thus deemed easy.

The system of temporary loans in the form of deposits reimbursable after a few days' notice is spoken of as a very successful measure. Congress, after full consideration, authorized the receipt of such deposits at an interest not exceeding five per cent to the amount of $25,000,000; then raised the limit to $50,000,000, and then to $100,000,000; and provided a reserve of $50,000,000 of United States notes to meet the demands for reimbursements beyond other convenient means of satisfaction. It was not long before tuese deposits reached the highest limit, and before the flow could be well checked, somewhat exceeded it. The amount of this deposit on the first day of December had been reduced to $45,506,120 01, and payments of $10,000,000 had been made from the reserve. The additional payments will be confined within the narrowest possible limits, and can hardly exceed twenty-five milions. The reflow of deposits has already begun, and will probably soon exceed reimbursements, and so arrest payments from the reserve.

The Secretary perceives no solid reason for retaining the restriction on loans, in this form, to one hundred millions. It may, as he thinks, be usefully removed.

Another portion of the additional loan required may be obtained through the sale of the remainder of the bonds known as five-twenties. The amount of these bonds unsubscribed for on the first of December was $101,059,600.

In a former report the Secretary placed the limit, to which the loan in the form of certificates of indebtedness could be carried, at one hundred millions of dollars. Experience has shown that it can be carried to one hundred and fifty millions, and that its natural limit is about that sum. On the first day of December the amount of these certificates was $145,720,000.

The limit prescribed by law to the issue of United States notes has been reached, and the Secretary thinks it clearly inexpedient to increase the amount. The circulation is sufficient for real payments and exchanges, and if increased, the result will be the depreciation which will only find its limit in the utter worthlessness of the whole. Sufficient circulation having been provided the government must now borrow like any other employer of capital temporarily requiring more than income will supply, and rely for the credit which will secure advantageous loans upon good faith, industrial activity, satisfactory and punctual payment of interest and ultimate reimbursements of principal.

To subscriptions for the remaining five-twenties and deposits for temporary loan, therefore, must be directed all reasonable expectation of means for the service of the current year, except from negotiations under the act of last session. The sums to be looked for from these two sources amount to $126,059,600. If this aggregate be deducted from the amount to be provided by loans for the last seven months of the current year, already shown to be $352,226,539, there will remain the sum of $226,166,999 to be provided by negotiations under the act of last session; and, under some like act, must be provided in like manner, it the continuance of the war shall make it necessary, the sum of $544,978,548 93, estimated as likely to be required from loans for the fiscal year 1865.

It will coubtless be thought expedient this session, as last session, to authorize the borrowing, in some form, of three hundred millions for the current, and six hundred millions for the next fiscal year. Indeed, the only modifications of the act of last session necessary to adapt it to the requirements of the current and coming year seem to be (1) the omission of all reference to the United States notes beyond the giving a simple authority to the Secretary to ascertain from time to time the amounts destroyed or lost, and to replace them by new issues; (2) the repeal of the existing limitation of the deposit loan to one hundred millions of dollars, and the substitution of a provision for a reserve equal in amount to half the deposit; (3) the permission of the negotiation of loans redeemable absolutely at pleasure, or at pleasure after a time fixed, not more remote than forty years; and (4) the omission, perhaps, of the clause taxing circulation and deposits, as being more appropriate to an internal revenue bill. It is hoped that the other provisions of the last may be retained in the new loan act.

This legislation will enable the Secretary to obtain whatever funds may be needed through loans at reasonable rates; and he expresses much reliance on the support to be given to the public credit by the national banking system and the nationalizing of the currency. General and equal credit throughout the country, and non-liability in quantity or in value, except under the operation of national legislation and the general laws of trade can only be secured through a specie circulation or government notes of uniform description and value. No circulation not immediately convertible into coin can be better than the government notes.

STATISTICAL TABLES APPENDED TO THE SECRETARY'S REPORT.

No. I.—RECEIPTS AND EXPENDITURES for the fiscal year ending June 30th, 1863.

RECEIPTS.

The total receipts, including a balance on hand July 1, 1862, of $13,043,546 81, were $901,125,674 86, as follows:

From customs	$69,059,642 40	
From lands	167,617 17	
From miscellaneous sources	3,046,515 35	
From direct tax	1,485 103 61	
From internal duties	37,640,787 95	
		$111,399,766 11
From loans:		
For 3 years 7.30 bonds	$17,263,450 00	
For 5-20 years 6 per ct bonds	175,037,259 44	
For 2-years treasury notes, under act March 2, 1861	1,622 00	
For United States notes, under act February 25, 1862	291,260,000 00	
For United States stock, Washington and Oregon war debt	145,050 00	
From temporary loan, under act February 25, 1862	115,226,762 21	
From certificates of indebtedness, under acts March 1 and 17, 1862	157,479,261 92	
For 20-years 6 per cent. bonds, under act July 17, 1861	76,500 00	
From United States fractional currency	20,192,456 00	
		776,682,361 57
Aggregate receipts		$888,082,128 05
Balance in treasury, July 1, 1862		13,043,546 81
Total resources		$901,125,674 86
From which, however, should be deducted receipts from new loans, applied during the year in payment of existing funded or temporary debt, and therefore only nominal receipts		181,086,635 07
Making the actual amount of receipts		$720,039,039 79

EXPENDITURES.

The expenditures were:

For the civil service	$23,253,922 08	
For Pensions and Indians	4,216,529 79	
For interest on public debt	24,729,846 61	
For the War Department	599,298,600 83	
For the Navy Department	63,211,105 27	
Total	$714,709,995 58	
To which add payments on account of public debt as follows:		
Redemption of treasury notes, under acts prior to July 22, 1846	50 00	
Redemption of treasury notes, under acts Dec. 23, 1857, Dec. 17, 1860, & March 2, 1861	2,211,650 00	
Repayment on account of temporary loan, under acts Feb. 25 and March 17, 1862	67,516,993 48	
Redemption of United States stock, loan of 1842	2,580,743 36	
Redemption of 7.30 coupon bonds, under act July 17, 1861	71,500 00	
Redemption of United States stock, Washington and Oregon war debt	69,550 00	
Redemption of United States notes, under act July 17, 1861	56,177,390 00	
Redemption of United States notes, under act Feb. 25, 1862	2,000,000 00	
Redemption of certificates of indebtedness, under acts March 1 and 17, 1862	50,359,758 23	
Making the aggregate of expenditures	$895,796,040 65	
But from this aggregate should be deducted payments of existing funded and temporary debt, all which are made from new loans, and are therefore only nominal payments	181,086,635 07	
Making the total expenditures for the year	714,705,995 58	
Leaving a balance in the Treasury July 1, 1863, of	$5,329,044 21	

No. II.—RECEIPTS AND EXPENDITURES for the fiscal year ending June 30, 1864.

The receipts and expenditures, as submitted for the current year, show the actual transactions for the quarter ending 30th September last, and are estimated for the three remaining quarters. The basis of estimated expenditures is the amount of appropriations already made and of those asked for. From the aggregate amount is deducted the probable balance that will remain undrawn on the first of July next, by which the amount actually required during the year is better shown than it would otherwise be.

RECEIPTS.

From customs:		
First quarter, actual	$22,562,018 42	
Second, third, and fourth quarters, estimated	50,000,000 00	
		$72,562,018 42
From internal duties:		
First quarter, actual	$17,599,713 59	
Three quarters, estimated	60,000,000 00	
		77,599,713 59
From lands:		
First quarter, actual	$136,182 09	
Three quarters, estimated	300,000 00	
		436,182 09
From miscellaneous sources:		
First quarter, actual	$641,542 04	
Three quarters, estimated	5,000,000 00	
		5,641,542 04
Aggregate receipts for the year, actual and estimated, from all sources, other than loans		$156,239,456 14
Balance in Treasury July 1, 1863		5,329,044 21
		$161,568,500 35
Add amount received from loans during the 1st quarter applied to current expenditures	$129,842,432 11	
Also estimated amount derived and to be derived from loans to be disbursed during three other q'rters	$458,321,027 96	
Estimated balance June 30, 1864	5,836,539 93	
	464,157,567 89	
		604,000,000 00
Making the total receipts from all sources		$765,568,500 35

EXPENDITURES.

The estimates based upon actual disbursements, and on appropriations made and asked for the current fiscal year, and including the balances of former appropriations unexpended on the 1st of July last are:

For the civil service:		
First quarter, actual	$7,216,939 31	
Second, third, and fourth quarters, appropriated	25,739,501 08	
Appropriations asked for deficiencies	1,311,371 13	
		$34,267,811 52
For Pensions and Indians:		
First quarter, actual	$1,711,271 95	
Second, third, and fourth quarters, appropriated	6,124,832 80	
Appropriations asked for deficiencies	4,210 00	
		7,840,314 81
For the War Department:		
First quarter, actual	$144,387,473 97	
Second, third, and fourth quarters, appropriated	741,092,037 14	
		885,479,511 11
For the Navy Department:		
First quarter, actual	$18,511,618 86	
Second, third, and fourth quarters, appropriated	91,602,567 74	
Appropriations asked for deficiencies	2,865,000 00	
		112,979,186 60
For interest on public debt:		
First quarter, actual	$4,283,628 37	
Second, third, and fourth quarters, required	54,881,508 01	
		59,165,136 38
Aggregate for all purposes other than the public debt		$1,099,731,960 42
Of this amount it may be safely estimated that there will remain undrawn on the 30th of June next, the sum of		350,000,000 00
Making the aggregate amount actually expended and estimated during the year ending on the 30th of June, 1864, for the support of the Government and the war, the sum of		$749,731,960 42
This sum being deducted from total receipts, as above, there will remain an estimated balance on the 30th of June, 1864, of		$5,836,539 93

NOTE.—There have been received from loans and applied to current expenditures and reimbursements of public debt during the quarter ending on September 30, 1863, the following sums:

From 5-20 years bonds, under act Feb. 25, 1862	$81,639,628 51
From 6 per cent. 20-years bonds, under act July 17, 1861	241,500 00
From United States notes, under act Feb. 25, 1862	15,452,000 00
From 2-years 5 per cent interest-bearing Treasury notes, under act March 3, 1863	13,000,000 00
From certificates of indebtedness, under acts March 1 and 17, 1862	14,865,000 00
From temporary loan, under acts Feb. 25, and March 17, 1862	32,690,013 84
To which add drafts on balances of disbursing officers	11,574,940 36
	$172,463,082 71

Of which amount the following sums have been applied during the quarter in payment of existing funded and temporary debt, namely:

For redemption of stock, loan of 1842	$60,000 00	
For redemption of Oregon war debt	5,300 00	
For redemption of 7.30 coupon bonds, under act July 17, 1861	6,000 00	
For redemption of United States notes, under act July 17, 1861	1,258,500 00	
For redemption of United States notes, under act Feb. 25, 1862	337,279 00	
For redemption of certificates of indebtedness, under acts March 1 and 17, 1862	12,345,804 16	
For redemption of temporary loan, under acts Feb. 25 and March 17, 1862	27,203,017 44	
For redemption of fractional currency, under acts July 17, 1862, and March 3, 1863	1,299,600 00	
For redemption of Treasury notes, under act Dec. 23, 1857	800 00	
For redemption of Treasury notes, under act March 3, 1861	104,350 00	
		42,620,650 60
Showing as the amount from loans actually applied to expenditures of the first quarter of 1864		$129,842,432 11
And there has been, and remains to be, provided for the second, third and fourth quarters, from loans, the sum of		$458,321,027 96
And the estimated balance in the Treasury on the 30th of June, 1864	5,836,539 93	
		464,157,567 89
Making the apparent aggregate by which the public debt will be increased during the year		$594,000,000 00
From which deduct the estimated balance		5,836,539 93
Making the actual increase of the public debt during the fiscal year 1864		$588,163,460 07

RECEIPTS AND EXPENDITURES for the months of October and November, 1863.

RECEIPTS.

From customs	$15,336,416 93
From internal duties	17,435,751 71
From lands	46,003 10
From miscellaneous sources	2,011,529 44
Making total resources, except from loans	$34,829,703 18
These receipts do not include the entire month of November, complete returns for that month not having been received from all points. These returns will probably increase the sum of receipts by about	800,000 00
Making the total receipts for the two months from ordinary sources	$35,629,703 18
Add receipts from loans, except of sums applied in payment of funded or temporary debt	111,131,027 98
Making the total receipts from all sources, except as above	$146,760,731 16

EXPENDITURES.

For the civil service	$4,078,134 88
For interest on the public debt	12,504,886 46
For Pensions and Indians	1,124,123 22
For War Department	110,247,413 96
For Navy Department	18,806,172 64
Making the aggregate amount expended during the months of October and November for the support of the Government and the war	$146,760,731 16

NOTE.—There have been received from loans, and applied to current expenditures and reimbursement of public debt, during the months of October and November, assuming the receipts to have been as above explained, the following sums.

From 5-20 years bonds, under act Feb. 25, 1862	$111,952,057 70
From temporary loan, under acts Feb. 25 and March 17, 1862	11,097,251 23
From two-years 5 per cent. interest-bearing Treasury notes, under act March 3, 1863	35,032,800 00
From United States notes, under act Feb. 25, 1862	15,503,580 00
From fractional currency, under acts July 17, 1862, and March 3, 1863	238,000 00
From certificates of indebtedness, under acts March 1 and 17, 1862	21,113,000 00
To which add drafts on balances of disbursing officers	20,750,201 98
	$215,502,091 00

Of which amount the following sums have been applied during the months of October and November in payment of existing funded and temporary debt, namely:

Redemption of treasury notes, under act July 17, 1861	$788,742 25	
Redemption of treasury notes, under act Feb. 25, 1862	539,913 00	
Redemption of temporary loan, under act February 25, 1862	66,836,223 53	
Redemption of fractional currency, under acts July 17, 1862, and March 3, 1863	1,927,545 85	
Redemption of certificates of indebtedness, under acts March 1 and 17, 1862	33,430,437 49	
Redemption of treasury notes, under act December 23, 1857	200 00	
Redemption of treasury notes, under act March 2, 1861	1,343,700 00	
Redemption of United States stock, loan of 1842	4,300 00	
		104,371,063 02
Showing the amount from loans actually applied to expenditures of the months of October and November, 1863, to be as above stated		$111,131,027 98

No. III.—RECEIPTS AND EXPENDITURES as estimated for the year ending June 30, 1865.

RECEIPTS.

Estimated balance July 1, 1864	$5,836,539 93
From customs	70,000,000 00
From internal duties	125,000,000 00
From lands	1,000,000 00
From miscellaneous sources	5,000,000 00
Total	$206,836,539 93

EXPENDITURES.

Balance of former appropriations estimated to be unexpended on July 1st, 1864	$350,000,000 00
For civil service, foreign intercourse, and miscellaneous	27,973,194 81
Interior Department, Pensions & Indians	9,631,304 73
War Department	536,204,127 77
Navy Department	142,618,785 40
Interest on public debt	85,387,676 15
Total	$1,151,815,088 86
Of this amount it may be estimated that there will remain undrawn on the 30th of June, 1865, the sum of	400,000,000 00
Aggregate for the year	$751,815,088 86
The estimated receipts, as before stated, for that year are placed at	206,836,539 93
Leaving to be provided by loans	$544,978,548 93

No. IV.—STATEMENT OF DUTIES, REVENUES, AND PUBLIC EXPENDITURES during the fiscal year ending June 30, 1863, agreeably to warrants issued, exclusive of trust funds.

The receipts into the Treasury were as follows:

From customs, viz:		
During the quarter ending Sept. 30, 1862		$23,041,736 59
During the quarter ending Dec. 31, 1862		13,354,505 41
During the quarter ending March 31, 1863		15,443,531 37
During the quarter ending June 30, 1863		17,219,869 03
		$69,059,642 40
From sales of public lands, viz:		
During the quarter ending Sept. 30, 1862	$22,181 04	
During the quarter ending Dec. 31, 1862	5,428 38	
During the quarter end'g March 31, 1863	30,431 22	
During the quarter end'g June 30, 1863	109,576 53	
		167,617 17
From direct tax		1,485,103 61
From internal revenue		37,640,787 95
From miscellaneous and incidental sources		3,046,615 35
From United States fractional currency		20,192,456 00
From two-years 6 per cent. Treasury Notes, under act of March 2, 1861		1,622 00
From 6 per cent twenty-years bonds, under act of July 17, 1861		76,500 00
From 7.30 three-years coupon bonds, under acts of July 17 and August 5, 1862		17,263,450 00
From 5-20 years bonds, under act of Feb. 25, 1862		175,037,259 44
From stock for Washington and Oregon war debt		145,050 00
From United States notes, under act of Feb. 25, 1862		291,200,000 00
From certificates of indebtedness, under acts of March 1 and 17, 1862		157,479,261 92
From temporary loans, under acts of Feb. 25, and March 17, 1862		115,226,762 21
Total receipts		$888,082,126 05
Balance in treasury on July 1, 1862		13,043,546 81
Total means		$901,125,674 86

The expenditures for the year were as follows:

For Civil service	$6,250,618 78
For Foreign intercourse	1,231,413 06
For Miscellaneous	15,671,890 24
For Interior (Pensions and Indians)	4,216,520 79

For War department		590,298,600 83
For Navy department		63,211,105 27
For interest on the public debt, including Treasury notes		24,729,846 61
For redemption of stock, loan of 1842		2,580,743 36
For reimbursement of Treasury notes issued under acts prior to July 22, 1846		50 00
For payment of Treasury notes, issued under act Dec. 23, 1857		58,600 00
For payment of Treasury notes, issued under act Dec. 17, 1863		8 700 00
For payment of Treasury notes, issued under act March 2, 1861		2,144,350 00
For redemption of 7.30 coupon bonds, under act July 17, 1861		71,500 00
For redemption of United States notes, under act July 17, 1861		56,177,390 00
For redemption of United States notes, under act of Feb. 25, 1862		2,099,000 00
For redemption of certificates of indebtedness, under acts March 1 and 17, 1862		50,359,758 23
For redemption of United States stock, Washington and Oregon war debt		69,550 00
For reimbursement of temporary loans, under acts Feb. 25 and March 17, 1862		67,516,993 48
Total expenditures		$895,796,630 65
Balance in the Treasury July 1, 1863		$5,329,044 21

RECAPITULATION.

Aggregate receipts for the fiscal year ending June 30, 1863		$888,082,128 05
Balance in the Treasury July 1, 1862		13,043,546 81
Total means		$901,125,674 86
From which deduct amount received from new loans and disbursed during the year on account of funded or temporary debt, and therefore only a nominal receipt or expenditure		181,086,635 07
Amount of receipts other than for new loans to pay existing debt		720,039,039 79
Aggregate expenditures for the year	$895,796,630 65	
Deduct re-imbursement from proceeds of new loans of permanent and temporary debt	181,086,635 07	
Amount of disbursements for the year, exclusive of reimbursements, as above		714,709,995 58
Balance in the Treasury on July 1, 1863, as above		$5,329,044 21

No. V.—STATEMENT OF THE RECEIPTS AND EXPENDITURES of the United States for the quarter ending September 30, exclusive of trust funds.

RECEIPTS.

Customs		$22,562,018 42

☞ The work on the Pittsburg and Steubenville Railroad tunnel is proceeding vigorously. The job is a heavy one, but in view of the number of men at work on it, and the activity manifested by the contractor, it will doubtless be finished by the contract time.

Ballooning for Military Purposes.

The members of the Ordnance Select Committee, with General Sir David Wood, R. A.; Major General Sandham, Governor of the Royal Military Academy; Brigade Major Milward, and other officers assembled at the Royal Arsenal, Woolwich, yesterday afternoon, to witness ascents with Mr. Coxwell's large balloon, the War Department having sanctioned a series of experiments in order to ascertain the value of balloons when used to reconnoitre the movements of an army in the field, or to obtain information as to the position of an enemy's forces. The whole of the available troops in garrison had previously marched out in the divisions—the Royal Marines and infantry, commanded by Colonel Mitchell, to Chislehurst, and the Royal Artillery, commanded by Colonel Travers, to Bexley Heath.

The monster balloon having been inflated with 35,000 cubic feet of gas at the Arsenal works was removed by a detachment of royal engineers to the gun park; and a rope attached to the balloon having been lashed to one of the guns, Mr. Coxwell, with Captain Beaumont and Lieutenant Grover, of the Royal Engineers, took their seats in the car and the balloon was allowed to ascend about three-quarters of a mile. At the expiration of one hour a descent was made, and Mr. Coxwell presented the following report:—Time 2.12; thermometer, 49; barometer, 29.1. View to the coast clear for thirty miles; very hazy inland; the river beautiful; Gravesend and Purfleet clearly overlooked. Time, 2.22; thermometer, 49; barometer, 29.3. Slight oscillation. Time, 2.25; thermometer, 51; barometer, 20.60. Clouds or mist to southwest; splendid view for ariel photography.

Three subsequent ascents were made with Captain Heyman, Secretary of the Ordnance Select Committee and other officers, and the troops were seen whilst returning home, headed by the bands of the two divisions. Ultimately, about five o'clock the balloon was set free from the ropes and conveyed Mr. Coxwell and Mr. Glashier across the river to the Essex shore, where it descended. The experiments are considered highly satisfactory.—*London Post Oct. 7.*

Agriculture in Sweden.

An interesting report from our Consul at Gothenburg, Sweden, has been received at the Department of Agriculture, from which the following facts are gleaned:

The crop of 1863, which at one time promised to be unusually large, was damaged by rainy weather during harvest time and thus reduced to an average amount, of which the figures in table No. 1 may be taken as a fair statement of the amount.

About 1,500,000 Swedish acres, equal to 48,000,000 English acres are devoted to growing grain, and 100,000 Swedish acres, or 3,200,000 English acres to potatoes; yet the yield of potatoes is so large that it stands in the ratio of 3 to 5. The potatoe can be raised in the short summer of these high latitudes when no grain save barley can live, and thus becomes the "staff of life" to the Swedish peasants. Fine crops of potatoes, and occasionally of barley, are raised far within the arctic circle, and even above 70° north latitude, the highest cultivated land in the world.

The Alsike Clover is the most productive clover in Sweden; cuts about 5 tuns to the Swedish acre, can be made to yield two crops in the short Swedish summer, and has been introduced into Scotland to great advantage.

There is a kind of egg plant called "Gula Plummon," which is produced in the middle and southern districts of Sweden in considerable quantities. This plant is of a light straw color, firm, juicy, and of a peachy flavor. It is thought it would flourish in the northern counties of New England and New York.

Below we give some interesting statistics of the products and exports and imports of Sweden:

No. 1.—This table is the average yearly product of Sweden, taking the figures for five years to 1861.

	Amount after deducting seed.	Seed.	Total.
Wheat, ton*	509,148	66,829	576,077
Rye, ton	3,763,766	568,891	4,332,657
Barley, ton	2,668,419	474,722	3,143,141
Oats, ton	4,677,204	979,124	5,656,328
Mixed oats & barley, ton	1,208,944	216,863	1,424,807
Peas & beans, ton.	391,350	.....	.....
Potatoes, ton	7,935,607	1,271,113	9,256,752
Other edible roots, ton	826,301	.....	.....
Flax and hemp, centner†	46,249	.....	.....
Raps, ton	14,537	.....	.....

* One ton equals four bushels English.

† One centner equals 93 lbs. English.

No. 2.—The following table shows the exports and imports of grain for seven years:

Rules for the Government of Passengers.

The right of railroad companies to make such rules as may be reasonable for the government of passengers, having in view their accommodation, and the protection of the companies from imposition, is well settled. But railroad managers sometimes forget to communicate such rules to their passengers. A recent decision, in an action brought by one Pollard against the New York and New Haven Railroad Company, will serve to illustrate the absolute necessity of so doing.

This case came before the court, on an appeal by the defendants from a judgment in favor of the plaintiff, entered on a verdict rendered on a trial had before Mr. Justice Slosson, and a jury, on the 28th of October, 1857.

The action was brought to recover damages for an injury to the plaintiff, caused by the defendants uniting two cars of the morning train from New York to New Haven on the 28th of March, 1854, so negligently and violently that the plaintiff, who was at the time in one of these two cars as a passenger, and standing up, was thrown down and received the injuries complained of.

The plaintiff testified, in describing the cause of the injury, that he was at the rear door of the hindmost of several cars connected together, and to a locomotive standing on the track in the Fourth Avenue, between 26th and 32d streets, and forming part of that morning's train; that "there was no seat in it vacant that he could see, that whilst standing at the rear door looking for a seat he was suddenly flung headlong through the car; but before he entirely fell, his leg caught partly in the end of a seat, and that he was thrown from the rear door of the car to the stove, which was in the middle." "That the accident was occasioned by another car (coming up in the rear,) colliding against the car in which he was with great violence, so that it rebounded eight or ten feet."

Charles G. Sesson gave evidence, "showing that he was in the same car in which the plaintiff had entered at the time of the injury, and corroborated the plaintiff's evidence as to his being thrown from the door to the middle of the car; * * that there were no empty seats; that the car when the plaintiff entered was standing perfectly still upon the track, and was struck so violently by another car being driven up behind, and colliding with the car in which he and the plaintiff were, that he noticed that persons in the car were pitched forward, and that a person standing up must evidently have been thrown down."

John Halliday testified that he was driving for defendants "the car immediately behind that which collided against the car the plaintiff was in; saw the colliding car coming back, and it coupled with his, and it did not approach so fast but that it coupled easily with his."

The defendants gave evidence tending to show from experience and by the laws of motion, that the plaintiff could not have been thrown forward and injured in the manner he claims to have been, by a car being propelled against the rear part of the car in which he was standing. Evidence was given on both sides as to the manner of driving up the car, or coupling or attaching it to the other, as bearing on the fact of the injury, and the question of defendants' negligence, and thereupon the counsel for the defendants asked the judge to charge the jury: That if they believed from the evidence that the injury to the plaintiff was not caused by the car which was coming up, being propelled against the car in which he was standing *as testified by him*, then he was not entitled to recover.

The judge charged: "That if they believed it to be impossible from the evidence, that the injury to Pollard could have been occasioned in the manner stated by him, then he could not recover in this action.

"That if the injury in fact occurred as stated by Pollard, the company would be liable, unless they believed that his negligence contributed to the injury.

"That in order to recover he must prove the negligence alleged.

"That improper driving of the car which came up behind that in which the plaintiff stood, or want of care in connecting the cars, would be negligence such as would render the company responsible if thereby the injury was caused; the plaintiff being free from blame.

"That it was not necessary to entitle the plaintiff to recover, that the injury should have occurred precisely as he alleged in his testimony; if the jury believed from the evidence that it happened without any default on his part, and from negligence on the part of the company."

No exception was taken in terms or form to any part of the charge as made.

The case states that the judge refused under the evidence to charge the proposition contained in said request, to which refusal the defendants' counsel then and there excepted.

The defendants' counsel also gave evidence tending to show, that by the practice and rules of the defendants, which regulations were not printed or communicated to the public, persons who took passage from that depot were always provided with a car or cars at that station, on a side track at that street; and that a porter was always in attendance there, and was so at this time to notify such passengers that they should take passage in such car or cars, and not in those which came up from Canal street, which were usually filled with passengers.

The defendants also requested the judge to charge—*Second*, That if the jury believed from the evidence that the rule of the company was, that the passengers who purchased tickets and took the train at 26th street, should take seats in the car or cars which went from there; and that this was generally known to passengers from there; that there was no room for him in the car which went from there to receive such passengers, and that he might have taken a seat in such car; and that instead of taking such car he went into the car where he says he was standing at the time he was thrown down, then he is not entitled to recover."

The judge refused to charge as thus requested, and the defendants excepted.

The plaintiff had testified without contradiction that, "he found this car to be full and could get no seat, and there was no other car there."

By the Court. Bosworth, Ch. J. No motion was made for a new trial on the ground that the verdict is against evidence. There is no ground for doubting, that while the plaintiff was standing in one of defendants' cars, another of defendants'

cars was driven or propelled against it so violently, that the plaintiff by reason of such collision of the two cars was thrown down and injured. He swears to this general fact. Sesson corroborates it. Halliday corroborates the testimony of the plaintiff as to the fact of the colliding car rebounding, or having a b. ckward motion given to it by reason, of forcible or violent contact of that car with the one in which the plaintiff was. If then the plaintiff was free from any negligence contributing to his injury, and was injured by the violent manner in which the two cars came in contact, and if this violent contact resulted from the negligence of the defendants, the plaintiff's right to recover would seem to be clear.

The charge itself was not excepted to. And unless some instruction which the defendants requested should be given to the jury was erroneously refused, no error was committed which can be reviewed on an appeal from the judgment alone.

What is the theory on which the defendants' first request seems to have been made? The plaintiff had testified, "that the accident was occasioned by another car colliding against the car in which he was with great violence," * * * whereby "he was suddenly flung headlong through the car; * * * he was thrown from the rear door of the car to the stove which was in the middle."

The defendants then "gave evidence tending to show from experience and by the laws of motion, that the plaintiff *could not have been thrown forward* and injured in the manner he claims to have been, by a car being propelled against the rear of the car in which he was standing."

The defendants then made their request for an instruction to the jury, "that if they believed from the evidence that the injury to the plaintiff was not caused by the car which was coming up, being propelled against the car in which he was standing, as testified by him, then he is not entitled to recover."

This request seems to be made upon the theory, that if the evidence satisfied the jury that the colliding car by being propelled against that in which the plaintiff stood, did *not throw the plaintiff from the rear of the car forward*, then he could not recover. That inasmuch as he had testified that effect upon himself to have been caused by such a colliding of another car with the rear part of the one in which he stood; and as this effect (as the defendants insisted,) could not be produced by such a cause, then the cause of the injury was unproved and there could be no recovery.

In answer to this view of the case it may be urged, that although the evidence of the defendants, "from experience and relating to the laws of motion," tended to show that a car by being propelled violently against the rear car in which he stood, would not throw him forward and injure him, yet the plaintiff had sworn that he was so injured; and a passenger in the same car testified to the same fact; and that the persons seated in the same car "were pitched forward."

There was evidence then on the part of the plaintiff that he was thrown forward and injured, and that persons seated in the same car were pitched forward.

On this evidence, there being nothing to impeach the integrity of the plaintiff's witnesses, or the accuracy of their testimony, except so far as it was affected by the defendants' evidence, "from experience," and in relation to "the laws of motion" the judge told the jury "that if they believed it to be impossible from the evidence that the injury to Pollard could have been occasioned in the manner stated by him, then he could not recover."

If it could so occur it is quite clear that there was no evidence (which is contained in the case) tending to show it did not so occur, except that given by the defendants tending to show it was impossible that it could have so occurred.

By the charge as made, the question first presented to the mind of the jury was, could the injury have so occurred?

In this connection the judge further charged, "That if the injury in fact occurred as stated by Pollard, the company would be liable, unless the jury believed that his negligence contributed to the injury; that in order to recover he must prove against the company the negligence alleged." * * * "That it was not necessary to entitle the plaintiff to recover that the injury should have occurred precisely as he alleged in his testimony; if the jury believed from the evidence that it happened without any default on his part, and from negligence on the part of the company."

We understand the sentence last quoted as an instruction, that although the jury may believe that the first and natural effect of propelling a car violently against the rear of that in which the plaintiff stood, would be to give him a backward instead of a forward motion, yet if they believe the actual effect of the collision was to throw him forward and injure him without fault on his part the plaintiff was entitled to recover.

We think it was not and could not have been understood by the jury as an instruction, that they might find for the plaintiff on the theory that his injury may have been produced by some other negligence of the defendants than their negligently and violently propelling a car against the rear of that in which plaintiff stood.

No cause of injury was suggested or could have been considered by the jury except the negligent and forcible concussion of the two cars belonging to the defendants.

In this view of the charge it means, and we think must have been understood to mean, that in order to find for the plaintiff they must be satisfied by the evidence that the plaintiff, without fault or negligence on his part, was thrown down and injured by the defendants negligently and forcibly propelling one of their cars against the rear of that in which the plaintiff was standing. And if satisfied he was so injured he could recover notwithstanding the first motion given to his person by the collision may have been backward instead of forward.

In this connection it may not be immaterial to notice that the case stated that "evidence was given on both sides as to the manner of driving up the car or coupling or attaching it to the other *as bearing on the fact of the injury* and the question of defendants' negligence.

What this evidence was, or what it justly tended to prove, is not stated in the case.

It may have been sufficient of itself to warrant the charge as made, and to uphold the verdict of the jury.

In any view of the case the defendants were not entitled to an instruction in the terms of the first request unaccompanied by the other views submitted to the jury in connection with it. The charge as made submitted that proposition to the jury with the qualifications or explanations accompanying it, and the defendants are not entitled to a new trial by reason of the refusal of the judge to submit the case to the jury in the precise form asked for by the first request to charge.

There is no objection that the cause of the injury stated in the complaint, is in any respect variant from that which the evidence established.

Whether the first and natural effect of the collision was to throw the plaintiff forward or whether according to the laws of motion, it would first throw him backward until the sudden rebounding of the cars from the closer proximity into which they had been forced, overcame the motion in that direction, and then suddenly throw him forward, is not a matter of much practical moment so long as it is free from doubt that the plaintiff without fault on his part was suddenly and violently thrown forward by the collison and injured.

As to the second request to charge it may be said that in the series of facts embraced in it, and which it was thereby asked that the jury might be permitted to determine in favor of the defendants, there is one (viz. that there was room for him in the car which went from there (26th street) to receive such passengers, and that he might have taken a seat in such car") as to which there was no evidence tending to prove that such supposed fact was true. On the contrary the plaintiff swears that he found this car to be full and could ge no seat and there was no other car there."

There is not a particle of evidence in conflict with this testimony of the plaintiff.

All the evidence given by the defendants, bearing upon this matter, was "evidence tending to show that by the practice and rules of the defendants' *which regulations were not printed or communicated to the public*, persons who took passage from that depot were always provided with a car or cars at that station on a side track at that street; and that a person was always in attendance there, and was so at this time to notify such passengers that they should take passage in such car or cars, and not in those which came up from Canal street which were usually filled with passengers from thence."

This evidence has no tendency to rebut the positive testimony of the plaintiff that on the morning in question there was but one car at 26th street, and that this was full and he could get no seat in it.

And the jury would not be warranted in finding that there was more than one car there on the morning of the injury, or that the plaintiff could get a seat in that car; the judge therefore, rightfully refused "under the evidence" to submit such question of fact to the jury.

A rule of the company that "passengers who purchased tickets, and took the train from 26th street, should take seats in the car or cars which went from there," a jury would have no right to find was known to the plaintiff or "was generally known to the passengers from there," when the only evidence on the question of their having knowledge of the rule, is that it is was neither printed nor communicated to the public.

No passenger would be required to infer that he

was not permitted to ride in any car in the train, from the mere fact that there was uniformly one car started from 26th street and sometimes two. There is no evidence that the porter in attendance told the plaintiff or any one else that passengers taking the train at 26th street, were required or expected to take a seat in the car starting from that street rather than in some other car in the train.

We think therefore that the judge was right in refusing "under the evidence" to charge as secondly requested.

On the present appeal, the question whether the damages are excessive is not before us and was not argued. The appeal brings before us, for review, two exceptions taken at the trial and nothing else.

We think the exceptions are untenable and the judgment must be affirmed.

The Production and Exportation of Sugar.

An esteemed correspondent in Havana sends us the following interesting tabular statement respecting the production and consumption of sugar

EXPORT OF SUGARS FROM THE PRINCIPAL PRODUCING COUNTRIES IN 1863, AND PROBABLE PRODUCTION FOR NEXT YEAR.

	1862-'3.	1863-'4.
Cuba, tons	450,000	420,000
Porto Rico	67,000	60,000
Brazil	115,000	85,000
French Colonies	111,000	100,000
Dutch Antiller	18,000	18,000
British West Indies	195,000	115,000
East India	22,000	.....
Mauritius	59,000	59,000
Java	99,000	95,000
Manila	35,000	25,000
Louisiana	185,000	.....
Beet root produce—		
France	144,000	130,000
Belgium	25,000	25,000
Zollverein	100,000	100,000
Russia and Austria	90,000	60,000
Total tons	1,721,000	1,342,000
Deficit		370,000
Total		1,721,000
East India, instead of exporting, will import		20,000
Bombay and California will consume the more		20,000
England will increase her consumption, owing to the lower duties on tea, by about		20,000
Deficit in stock in France		3,000
Deficit in stock on the Continent		8,000
Loss by the fire in the stores of Regia		12,000
Total		46,000

Brazil is dedicating herself to the cultivation of cotton in preference to sugar, prices of the latter article being ruinous, whilst the rates of the former are high. Pernambuco especially will fall short in sugar crop by about 20,000 tons.

It is feared the deficit will be more, owing to the continued drought.

The beet root crop in France, according to the *Journal des Fabricants de Sucre*, will not exceed from 120,000 to 130,000 tons maximum, against 172,000 in 1862.

The revolution in Poland makes exportation impossible.—*N. Y. Herald.*

☞ A proposition is before the City Council of St. Paul, Minnesota, to loan five hundred thousand dollars, by an issue of bonds to that amount, to the Lake Superior and Mississippi Railroad Company, on condition that it shall construct and put in operation within five years a track from that city to Lake Superior.

Commerce of New York.

Value of imports at New York from foreign ports for the month of September:

American Railroad Journal.

Saturday, December 19, 1863.

Stock Exchange and Money Market.

If any one ten years ago should have ventured to predict that the National debt of the United States would, in 1863, amount to the sum of twelve hundred millions of dollars, with the likelihood of being increased to fifteen hundred millions in 1864, he would have been pronounced a lunatic. If he had also predicted that, large as it might become, it would be held above par in the Stock Market, he would have been pronounced not only a lunatic, but incurable. From the days of Washington, wars and even disunion were sometimes considered possible events; but armies of a million of men in the field, and a great National debt almost equalling those of European monarchies were never dreamed of. Our ablest Secretaries, such as Robert Morris of the Revolution, and later, Alex. Hamilton, Albert Gallatin and Robert J. Walker, gained great reputations for their finan-

cial ability; but it is doubtful whether any of the old school of American financiers would have been fortunate or able enough to have passed through the ordeal of the rebellion with even tolerable success. Unquestionably all these statemen would have gone on in the old way, raising money by loans at any price, trusting to the banks for the money required at each emergency, using their notes as the disbursing medium, and throwing on the country an irredeemable and uncertain currency, subject to discount at every point beyond that of their original issue.

Such a currency would have carried ruin with it in all directions. Debtors would have been driven to the wall for want of any acceptable forms of liquidation and payment, and to have been called on for gold or its equivalent, would have ended in the destruction of their properties and their personal ruin.

Even then the whole capital of the banks would have been insufficient to have carried on the war for six months, had they been willing to have loaned it to the Government, and the result would have been, that to have furnished the further amounts required by the Government, the restraining acts would have been repealed; the circulation of bank paper increased illimitably; and there would have been a financial chaos out of which, order could never have been restored, except on an entire reconstruction of business, upon the basis of general repudiation as its preliminary.

Fortunately for the country, it possessed a statesman who was equal to the position into which unforeseen circumstances had suddenly placed him; who, rising above forms, precedents and red tape, seized on the elements of strength which lay around him, brought them to light, into use, and activity; and with remarkable sagacity, unshaken purpose and wondrous energy, as with the wand of the enchanter, or as he himself has intimated, with the utensils of the alchymist, called forth the means required in millions by the day, and placed the country in a financial position which defied assault.

His countrymen responded to the call with the alacrity which always follows the gain of confidence; and without foreign aid, without impairing the national strength, its industry or its progress, he has found all the money necessary to carry on the greatest war of history, and against the most powerful array oi treason to be found in its pages.

The policy of giving the people a legal tender currency, saved the debtors from otherwise their certain ruin, equalized the currency everywhere, furnished an acceptable medium of trade, and with it full security, that of the nation, to every individual who received it.

Next, he has given a National system of banking, and with it a currency next best to that of the legal tenders, and far better than any we ever had before, which will come into effective play, as the Government limits, and withdraws its own; so that we may pass back to the resumption of specie payments through their influence without a shock, as the buffer receives the blows of the train in full career.

The Secretary's report is precisely such a document as we might have expected from such a man. He disguises nothing; he simply states what were his plans, and what has been the result. A result easily comprehended by the plainest understanding, viz: the obtaining of all the funds required, without a sacrifice of the national credit; all that may be hereafter required and secured beyond a peradventure; all the interest promptly paid in gold, and large stores of it for future use. The people receiving back, for labor, products and supplies, all the money they have loaned the Government, and employing it as capital in the business and occupations by which they are rapidly increasing their own wealth. This is a picture worth looking at. We commend it to the consideration of those foreign Ministers of Finance, who are chasing from one capital of Europe to another to replenish their empty coffers.

We give elsewhere an abstract of the Report, together with the tabular statements which accompany it. There are, however, several interesting portions of it which we were obliged to omit for want of space. These may be briefly stated in this place as follows, viz: The support to be given to the public credit by the adoption of the National Banking system, and the Nationalization of the currency. The fact that prices might have been affected by an overissue of gold as well as of paper, and that these prices are attributable in part "to the large amount of bank notes now in circulation."

The great advantages of the National Banking system for various reasons set forth in the report.

The condition of these National Banks given by the Comptroller of the currency, and some proposed amendments necessary to the successful working of these institutions.

A proposition to increase the amount of taxation, by duties on bank notes payable in small per centages.

The condition of the various mints.

The receipts and expenditures at the offices of the Treasurer and assistant Treasurers.

The commercial intercourse regulations between the loyal and the repossessed states.

The occupation and management of the abandoned plantations, and the sales of confiscated lands.

The keeping of the commutation money from the drafted men. The inquiry now going on in relation to our whole foreign commerce, especially that of the Pacific, and all the auxiliaries of our interior industry.

The report on Commerce and Navigation for 1863 now nearly ready.

The increase of official labors in the various departments of the treasury, and a suggestion of increased salaries.

The report of the frauds in the New York Custom House, and the prompt dismissal of the guilty parties yet remaining in office. The purchase of the Merchants' Exchange; The Coast Survey; the Inspection of steam vessels, and the Light-house Bureau.

These are the topics which make up the remainder of the report beyond what we have published, and it is sufficient merely to name them.

The falling off in the Internal Revenue, and the proposition to increase it by additional taxation occasion remark. It is believed that there is some error in regard to the income tax, and that it will be found more productive than the Commissioner of Internal Revenue supposes. For example in the city of Brooklyn, the third in size in the United States, the collection of this tax is still going on, and large amounts are being received. There has been much delay in this part of the National collections, and we have no idea that the total will be anything near as small as the amount named.

We give elsewhere, from the pen of S. De Witt Bloodgood, Esq., an article containing suggestions as to what he believes to be the *true* method of increasing the revenue, viz: by the establishment of a Government line of packets to be furnished from the Navy, and to ply between all the great foreign ports with which we have our most intimate commercial connections. Transactions in gold are moderate and without much excitement. The movement in Congress to restrict the transactions in it to actual sales with delivery, will no doubt have an important effect on the market.

It was quoted on Thursday at 149½ and exchange at 161. Two hundred thousand dollars in specie arrived here on Tuesday from New Orleans, and on Monday 3850 bales of cotton from various quarters equal to so much gold. Subscriptions to the 5 20's continue large and the assurance of Mr. Chase, that no more legal tenders are to be set afloat, must tend much towards the coming equipoise between the Government currency and specie. The total of gold received at the Custom Houses on the Atlantic, in the present year up to January next it is now ascertained will be $90,296,872 or nearly nearly one hundred million.

A public Mining and Manufacturing Board has been established in this city, a material advantage to those who are developing the great mineral resources of the country.

The Providence and Worcester Railroad has declared a semi-annual dividend of 4 per cent, free of Government tax, payable January 1.

The Michigan Central Railroad Company has declared a dividend of six per cent, payable on the 1st of January.

The Boston and Providence railroad have declared semi-annual dividend of 4 per cent., free of government tax, payable on the 1st January.

The Old Colony and Newport Railroad Company have declared a semi-annual dividend of three per cent and an extra dividend of four payable January 1.

The City Comptroller invites, until 2 o'clock p. m. on the 26th of December, proposals for $230,000 of the water-boads of the City of New York, bearing interest at the rate of 5 per cent per annum, payable quarterly, and the principal reimbursable on the 1st of November, 1879.

The Traffic in Gold, Silver and Exchange.

A bill was introduced in Congress on the 15th inst., by Mr. Lane, of Kansas, providing that all traffic in gold, silver and foreign exchange, for speculative purposes, or the purchase through a broker, by depositing less than the full amount of the purchase, on what is known as a margin, is expressly prohibited.

Section two prohibits the sale of gold, silver or foreign exchange by any banker or broker directly or indirectly, at any place except at the regular banking house or broker's office.

Section three prohibits the sale of gold, silver or foreign exchange unless actually delivered, and paid for on delivery.

Section four provides as the penalty for violating any of the provisions of the act, on conviction before the United States District Court in the district where the offence is committed, a sum not less than one thousand nor more than ten thousand dollars, and imprisonment for not less than one nor more than twelve months for each offence.

Section five gives informers one-half the fine.

☞ In the U. S. House of Representatives, on the 15th inst., Mr. Foot of Vermont, introduced a bill granting public lands to the "People's Pacific Railroad and Telegraph Line" by the Northern route, and asked that the bill be referred to a special committee. Mr. Henderson, of Missouri, presented a memorial relative to a new railway between Washington and New York.

☞ The annual report of the Trustees of the New York State Library, just published, shows that the number of volumes in the library at the close of the year 1861, was 59,776; while the number at the close of 1862, was 63,109—an addition of 3,328. Of these additions, 1,760 were by purchase and 1,568 by donation or exchange. The whole number of volumes, both in the Law and Miscellaneous departments, added since the publication of the catalogue in 1856, is 19,473.

Connersville and Newcastle Junction R. R.

This is the name of a new line of railroad extending between the points named, the organization of which is just completed, the line located, and the work let to responsible contractors, who will soon complete the whole.

This line will be of great importance to the business interests of Cincinnati, connecting as it does the Cincinnati and Indianapolis Junction Railroad with both the Indiana Central at Cambridge City and the Cincinnati and Chicago Air-line Railroad at Newcastle.

This company has purchased the work on the Cincinnati and Chicago Short-line Railroad, between Milton via Cambridge, and Newcastle, a distance of 15 miles, the grade of which was once nearly completed.

New York Central Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Erastus Corning, Dean Richmond, John K. Chedell, Alonzo C. Page, John V. L. Pruyn, Nathaniel Thayer, Livingston Spraker, Jacob Gould, C. L. Tracy, Chas. H. Russell, R. M. Blatchford, Hamilton White, H. H. Martin. Inspectors—George Dexter, Rufus G. Beardslee, Stephen Groesbeck.

☞ The Pittsburg Board of Trade are earnestly engaged in their endeavors to have the Ohio river improved, so that navigation can be kept up all the year. The cost of this work is estimated $7,000,000, but the committee add $5,000,000 to the estimates, making the total cost $12,000,000.

☞ There is a proposition before the Legislature of Missouri to sell out the railroads in the State, for the purpose of reimbursing the sums of money which the State granted toward their construction. The following table shows the amount which was loaned to each road:

Pacific Road	$700,000
South-West Branch	4,500,000
Hannibal and St. Joseph	3,000,000
North Missouri	4,350,000
St. Louis and Iron Mountain	3,501,000
Platte County Road	700,000
Cairo and Fulton	600,000
	$17,351,000

☞ An application will be presented to the Legislature of New Jersey at its coming session for privilege to construct a railroad from Perth Amboy to the Delaware River. The capital to be asked for is $2,000,000, with the privilege to increase to $6,000,000.

☞ The receipts and disbursements of the State Treasury of Pennsylvania during the year ending on the 30th of November were as follows:

Receipts	$4,289,451
Expenditures	4,314,964
Excess of expenditures	$26,513

☞ It is proposed to dig a canal which, starting from Marseilles, will join the Saone at Chalons, and thence form two branches. One of these branches will be continued to Dunkirk, and the other to St. Nazaire. A pamphlet explaining the details has been published.

☞ The Indianapolis *Journal* says, a movement is now on foot by the citizens of Clay and Owen counties to build a railroad from Brazil to Bowling Green, making it a branch of the Terre Haute and Richmond road. There is also much talk of extending the line to Bloomfield, in Greene county, in order to reach the valuable iron beds therein.

☞ The Wyoming Valley Coal Company, whose stock is now selling at the Board, is one of the Scranton Companies whose coal is sold at the monthly auction sale of the Delaware and Lackawanna Company. It has been in operation for many years, and owns a large property at Scranton, which has greatly increased in value. The Company is about constructing a road exclusively for carrying coal to New York at less cost than can be done on the Delaware and Lackawanna Company's road.

☞ Parties holding Compromise Bonds of the City of Allegheny, Pa., are notified that the sinking fund tor 1863 will be invested in those bonds at the lowest rates offered. Proposals will be received by C. Macferron, City Treasurer, the 2d day of January 1864.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh Rails**, and of any required weight and pattern.

PERKINS & LIVINGSTON,
54 Exchange Place,
NEW YORK.

CITY OF NEW YORK, DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, Dec. 16, 1863.

PROPOSALS FOR $230,000 OF "THE WATER STOCK OF THE CITY OF NEW YORK OF THE YEAR 1849."—Sealed proposals will be received at the Comptroller's Office until SATURDAY, Dec. 26, 1863, at 2 o'clock P. M., when the same will be publicly opened, for the whole or any part of the sum of two hundred and thirty thousand dollars of "The Water Stock of the City of New York of the year 1849," authorized by Chapter 90 of the Laws of 1849, and by an ordinance of the Common Council, approved by the Mayor Dec. 14, 1863.

The said stock will bear interest at the rate of five per cent. per annum, payable quarter-yearly, and the principal will be redeemable on the first day of November, 1879.

The proposals will state the amount of stock desired, and the price per one hundred dollars thereof, and the persons whose proposals are accepted will be required to deposit with the Chamberlain of the City, within five days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits the parties will be entitled to receive certificates for equal amounts of the par value of the stock bearing interest from the dates of payments.

Each proposition should be sealed and indorsed "Proposals for 'The Water Stock of the City of New York of the year 1849.'" and inclosed in a second envelope addressed to the Comptroller.

The right is reserved to reject any or all of the bids if the interests of the Corporation require it.

MATTHEW T. BRENNAN, Comptroller.

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

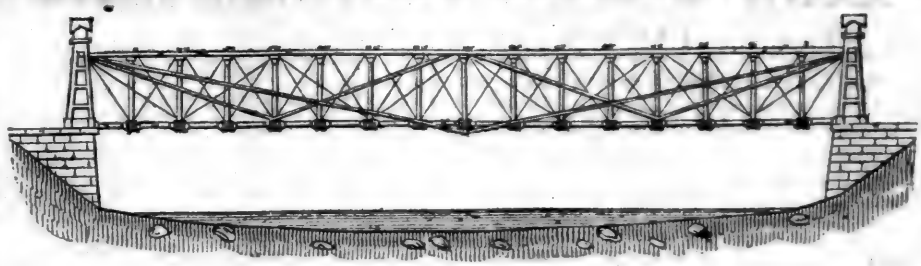
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **31 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 270 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN
SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated to degree of pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown st., PHILADELPHIA,** will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S. Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—[Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—[Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—[Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $3. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

MUNN & CO'S PATENT OFFICE.

ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,

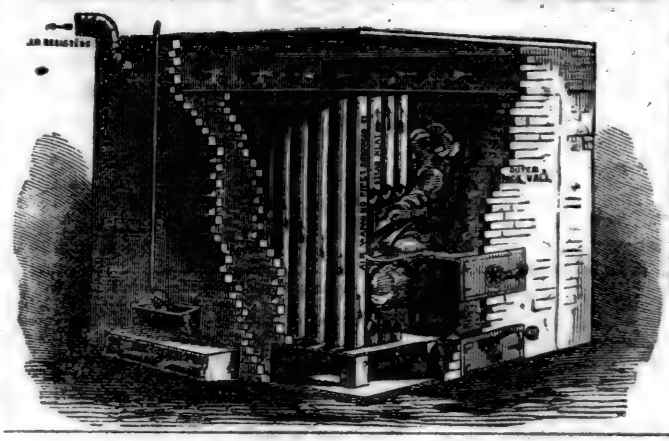
WILLIAMS & PAGE'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**



The Light is very strong and brilliant, requiring no reflectors and **lighting up** the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.

Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

SIMONDS' PATENT STEAM HEATER.

FOR Warming and Ventilating Buildings of all descriptions, Graperies, Greenhouses, etc.

THIS **HEATER** HAVING BEEN THOROUGHLY TESTED, has proved to be the MOST PERFECT WARMING APPARATUS IN USE. Parties having them in use, and to whom reference can be given, give them the highest recommendations.

Those requiring a SAFE AND PERFECTLY EFFICIENT APPARATUS FOR WARMING PURPOSES, are invited to call and examine before purchasing elsewhere.

Personal attention given to erecting the same, and a guarantee given for their successful operation.

J. H. SIMONDS,
Sole Proprietor,
52 CLIFF ST.,
NEW YORK.

STATIONERS' WAREHOUSE.

The following Materials for the use of ARCHITECTS, DRAFTSMEN and ENGINEERS, for sale by

AMES & BARNES,

No. 41 JOHN STREET, NEW YORK.

KRUPP'S PATENT CAST STEEL.

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others being cheaper at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination.

They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enameled Iron Water Pipe, Steel Tubes, etc., etc.

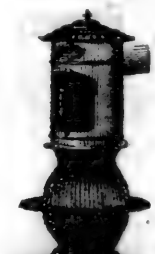
They have received the highest approval from all RAILWAY COMPANIES that have them in service.

THOMAS PROSSER & SON,

28 PLATT ST., NEW YORK.

PATENT SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 61 Beekman st., (up-stairs,) New York.



RAILROAD, SHIP, BOAT AND BRIDGE SPIKES,

MANUFACTURED BY THE

NEWARK SPIKE CO.,

Newark Avenue,

NEWARK, N. J.

SANFORD'S

MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

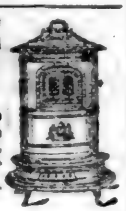
UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York,



OFFICE OF THE NEW YORK CENTRAL RAILROAD CO.,
ALBANY, November 2, 1863.

THE annual election for Directors of this Company, and for three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the City of Albany, on the second Wednesday (the 9th,) of December next. The polls will be opened at ten o'clock in the forenoon, and will continue open two hours thereafter. By order of the Board of Directors.

ROBERT L. BANKS,
Secretary.

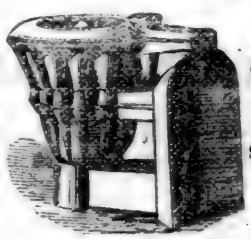
The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the LEADING STOVE for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

Sanford's CHALLENGE HEATERS SET IN BRICK, PORTABLE OR AS FIRE PLACE HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR

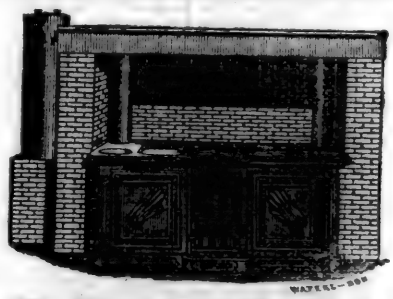
Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE

Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.



Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., **644 Broadway, corner of Bleecker st.** Local Agents wanted everywhere.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL**, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,

239 and 241 Water st., N. Y.

SPECIAL CAUTION TO

Railroad Companies & Car Spring Manufacturers.

Notice is hereby given that the Metallic Car Spring Co. of New York are the sole assignees of the Patent granted to Richard Vose of New York, March 11, 1862 (re-issued Feb. 24, 1863) for an *improvement in Steel Spiral Springs*; that they thereby own the *entire and exclusive right* of making, using, and vending to others to be used, any form whatever, of Steel Spiral Spring which is protected from entire exhaustion and from contact of Steel against Steel by mean of the *interposition* of *India-rubber, wool, or other elastic gummy, or fibrous substance between* its coils; and that they will hold responsible and prosecute for damages, all persons who may either make, use or vend Spiral Spring packed as described.

RICHARD VOSE,
Sec'y Metallic Car Spring Co.,
No. 54 William st., N. Y.

Horse Railroads.

RIGHTS OF OWNERS OF THE FEE OF A HIGHWAY TO COMPENSATION FOR ITS USE BY A HORSE RAILROAD.

The introduction of railroads upon public highways opened an important field of discussion as to the right of the person owning the fee of a highway to require compensation for its use. This right, as against steam railroads, has been thoroughly established in the State of New York, and we think in all other States. But a distinction has been taken in some cases, in favor of horse railroads. This distinction is repudiated in a late decision of the Supreme Court, (7th district,) of New York, in the case of Craig against the Rochester and Brighton Railroad Company.

This was a motion to dissolve an injunction—restraining the defendant from laying down the track of its railroad in a street of the City of Rochester, opposite the plaintiff's premises; no consent from the plaintiff, who was the owner of the fee to the centre of the street having been obtained, or damages appraised and paid. The defendant was duly incorporated under the general railroad act to construct a horse railroad from the City of Rochester to the village of Brighton, and had obtained a license from the municipal authorities of Rochester to lay its rails on certain streets of that city, of which the street in question was one. The opinion of the court was rendered by

JOHNSON, J., who said: In the case of Williams *vs.* the New York Central Railroad Company, (16 N. Y. Rep. 97,) it was held that an appropriation of a highway by a railroad company is the imposition of an additional burthen upon, and the taking the property of the owner in fee within the meaning of the constitutional provision which forbids such taking without compensation; and that the company can derive no title by any act of the legislature, or of any municipal authority, without the consent of the owner in fee, or the appraisal and payment of his damages in the mode prescribed by law. The same principal was again asserted in Carpenter *vs.* the Oswego and Syracuse Railroad Company, (24 N. Y. 655,) and also in Mahon *vs.* the New York Central Railroad Company, (*Id.* 658.) In the latter case, Clerke J., who delivered the opinion of the court says, "an easement for the purpose of a highway does not authorize as against the proprietors of the soil, the laying down of a railroad upon the track of the highway. The use of the land for a railroad is totally different from that public right of passage for which highways were designed." And still more recently it is understood, the same court in a case yet unreported, has emphatically reaffirmed the same doctrine. This must now be regarded as the settled law of this State, no other court having the power to overrule, or the right to disregard the decisions of the Court of Appeals.

These decisions settle and determine most conclusively the questions presented in this case, the important one being whether the defendant can use and occupy the soil of the street for its railroad without the consent of the owner or owners of the fee, or the appraisal and payment of damages to such owners. If anything can be regarded as settled by judicial determination, this with us at least is no longer an open question.

It is claimed, however, in behalf of the defendant, that inasmuch as the cars on the defendant's road are to be moved by animal, instead of mechanical power upon the railway, the decisions above referred to do not apply to this case, and several decisions of this court are cited, which do hold that the appropriation of a street or highway by a railroad company, so far as is necessary for the purpose of laying down and maintaining its track thereon upon which its vehicles are to be moved by animal power, is not a taking of the property of the owners of the fee within the meaning of the constitutional provision requiring compensation to be made. There are several cases of this kind in this court, it must be admitted distinctly asserting this doctrine. But so far as they are contrary to the decisions of the Court of Appeals, they are of no force or authority whatever, and are not to be followed. This corporation was formed under the general railroad law, and of course has no power, rights, or privileges superior to other corporations created under the same law. It can take under its charter and franchise precisely what other corporations created in like manner can take, without making compensation, or without the consent of the owner and nothing more.

Nothing can be clearer than that the burthen which the Court of Appeals has declared to be an

addition to that of an easement of a highway, and a taking of private property within the meaning of the constitution before referred to, does not consist in the particular force by which the carriage is drawn along the street. Every one must see that simply propelling the carriage along the street, whether by horses or mules, or steam or any other mechanical contrivance, would be simply exercising the right of passage over the highway, and no other or different right. But the new and additional servitude or burthen which constitutes the taking or appropriation, consists principally if not entirely in the use and occupation of the soil of the street, in laying down and maintaining thereon the permanent structure upon which alone the principal business of the corporation is to be carried on as the cases unmistakably show. This is a permanent and exclusive right and occupancy, which no other corporation or person can enjoy in common with the defendant without its permission.

I am aware of the interpretation put by Brown J., in the case of the Brooklyn Central and Jamaica Railroad Company *vs.* the Brooklyn City Railroad Company, (33 *Barb.* 420,) upon the decision in the case of Williams *vs.* the New York Central Railroad Company above cited. But it is only necessary to refer to the opinion in that case to show that the learned justice has entirely misconceived the grounds on which the decision must have been rested by the other judges. In the case now before us, it is true all persons having occasion to use the street or streets in which the defendants track is to be laid, may under the restrictions imposed upon this corporation by the municipal authority of the city, travel upon the track of the road the same as upon other parts of the street, but not in the same manner and for the same purpose for which it is to be used by the corporation. To a certain extent and in very material particulars the right to the use of the track for the purposes of passage merely, is in the company exclusively, and not common alike to all. It may be granted that the right of the defendant to the use of its track within the bounds of the city, is considerably less exclusive than it may be beyond those boundaries where no special restrictions have been placed upon it, beyond those imposed by the statute. But the difference is one of degree merely, and in no respect fundamental.

The provisions of the constitution must apply to the rights and immunities of this corporation in respect to taking private property alike in Rochester and Brighton. In either town so far as the principle of this case is concerned, the sole question is, does the corporation take private property or to any extent burden it, beyond the servitude of the easement of the highway.

This question as has been seen has been repeatedly answered by the court of last resort, and is no longer matter for controversy. Until that court shall see fit to reverse its numerous decisions upon this question the defendant, before it can lay down and use its track in the street, must either obtain the consent of the owner of the fee in such street over which the track is laid, or have the damages appraised and payment made as prescribed by statute. I have come to this conclusion after a careful consideration of all the authorities bearing upon the subject, and not without regret on account of the sacrifice of individual interests, and public convenience which it may occasion. But the rule of law when once ascertained must be upheld and enforced by all courts, whatever the detriment to the interests of individuals, or to the ease and convenience of the public. I shall not attempt to go over the several cases decided in this court in the first and second judicial districts, to which we have been referred by the defendant's counsel for the purpose of pointing out the erroneous character of decisions, or of showing their entire inapplicability, to the case before us. I rest the decision in this case entirely upon those of the Court of Appeals, which cannot as I conceive, without manifest perversion, be distinguished in any essential particular from the present case. It may be that in the City of New York, where the fee of all the streets is claimed and held to be in the city, the consent of the city authorities to the laying down and maintaining a railroad in the streets is to be regarded as the consent of the owner of the fee, as held by my brother Welles in the case of The People *vs.* Kerr. (*Barb* 357.) But the conclusion of Sutherland J. in the same case that the cases of The Trustees of the Presbyterian Church in Waterloo *vs.* The Auburn and Rochester Railroad Co., (*Hill* 567) and Williams *vs.* The New York Central Railroad Co. (*supra*) "should be considered as having been decided on the theory that the acts of the legislature authorizing the construction of the roads required these companies to acquire title to the soil of the highway, and to compensate the owners therefor," is without any foundation whatever as will plainly appear from an examination of those cases. But even if it were so, it would not aid the defendant here because the act under which it has its being has the same requirement in regard to compensation.

I have reason to know however that in the latter case (Williams *vs.* The New York Central Railroad Company), the court of appeals where the case was first argued was divided, and unable to come to a decision on the very question which lies at the foundation of this and all kindred cases to wit: Whether using a public street by a railroad company for the track of its road, was taking private property for public use within the meaning of the constitution, or whether it was but a mere mode of using and enjoying the public easement, without any essential extension or enlargement of such easement or encroachment upon the remaining rights of the source of the fee.

Upon a reargument before the same court composed in part of other Judges, the case was decided unanimously adversely to my views, and obviously as appears from the reported case upon the same questions on which the court had been previously divided. That decision settled and determined the question before controverted, and this defendant as well as others must submit to its authority.

Since writing the foregoing opinion I have been favored with a manuscript copy of the opinion of the court of appeals delivered by Smith justice in the recent case above referred to, of Wagner *vs.* The Troy Union Railroad Company, in which not only are the former decisions reaffirmed, but the distinction sought to be made between railroads operated by steam or horse power, is declared to be without foundation so far as the constitutional prohibition against taking private property without compensation is concerned.

The motion must therefore be denied with costs.

Michigan Central Railroad.

Annexed is a statement of the financial condition of this company on the 1st of December, 1863:

INCOME ACCOUNT.		Dr.
Dec. 1, 1863.—To balance of this account, per treasurer's report of June 1, 1863		$772,636 53
To receipts of road from June 1, 1863, to December 1, 1863		1,640,174 69
		$2,412,811 22
		Cr.
By dividend of six per cent. July 1, 1863		$363,420 00
By U. S. tax on dividend. $10,833 12		
" " passeng'rs 17,032 66		27,865 78
By annual payments towards sinking funds		84,500 00
By operating account, exclusive of interest and exchange, from June 1, 1863, to Dec. 1, 1863. $781,577 18		
By interest & exchange account from June 1, 1863, to Dec. 1, 1863. 296,298 25		1,027,875 43
By balance to new account.....		909,138 01
		$2,412,811 22

The foregoing account shows the net receipts of the road for six months ending 1st inst., after deducting operating, interest and exchange accounts, but excluding the amounts paid to the Sinking Funds, to be $612,299 26. After deducting the amount paid to the Sinking Funds, the balance is $527,799 26. Adding the balance to credit of this account June 1, $772,636 53, less the July dividend, $363,432, the amount to credit of income account is..... $909,138 01

Deduct dividend of Six per cent. declared, payable Jan. 1, 1864 ..... 363,432 00

Leaves a balance to income acc't of.. $545,706 01

The Company is free from floating debt. The sum invested in the sinking fund amounts to $570,062 27.

Erie and Niagara Railway.

At a recent meeting of the stockholders of this company held at Clifton, C. W., the following gentlemen were elected Directors:

Thomas W. Kennard, New York; Wm. A. Thomson, Fort Erie; Adam Cooks, Toronto; C. E. Blakesley, New York; Charles Day, New York; James McHenry, London, England; and Samuel Warren, New York. At a meeting of the Directors held subsequently, Thomas W. Kennard was elected President, William A. Thomson, Vice President and Charles Day, Secretary and Treasurer.

It will be seen by the following from the Buffalo *Commercial Advertiser*, that the company expect to have the road in working order from Chippewa to Fort Erie by the 1st of July:

"It is designed to make a railway connection between Fort Erie on Lake Erie, and Niagara on Lake Ontario. The distance between the two places is about twenty-eight miles. There has been for several years a railway in operation between Niagara and Chippewa. Between this date and the first of July next, the grading, ballasting and laying of the track between Chippewa and Fort Erie, opposite Buffalo, as well as the laying of new rails on that portion of the road between Chippewa and Niagara, will have been completed. At either end of this rond there are to be elevators for transfer of grain. Its charter grants the Company power to make railway connections with the Buffalo and Lake Huron Railway, and the Welland Canal at Port Colborne to our lines of steamers on

Lake Ontario, to run between Niagara and the several American and Canadian ports on Lake Ontario, as well as a ferry boat to connect Fort Erie with Buffalo, or to make a bridge across the Niagara river, making rail connection with the roads centering in this city. It is contemplated that important improvements will be made for harbor facilities at Fort Erie to accommodate lake vessels laden with grain designed for lower lake ports and Montreal. When this railway is completed with a railroad from this city to the coal regions of Pennsylvania, they will form important additions to our railway cannections, and will give us and our Canadian neighbors cheap fuel, and to the business interests of the city an important accession."

Erie Railway.

The earnings and expenses of this road for the fiscal years ending September 30, 1862 and 1863, have been as follows:

Earnings:	1862.	1863.
From Passengers	$1,096,196 60	$1,670,082 58
" Freights	6,642,914 68	8,432,284 47
" Mails, etc.	124,861 40	143,800 18
Total	$7,863,972 68	$10,246,117 23
Expenses, viz:	**1862.**	**1863.**
Transportation exp.	$4,391,393 89	$5,704,870 85
Taxes	74,220 80	155,653 22
Other items	166,507 42	197,614 00
Total	$4,632,121 61	$6,057,638 07
Net earnings	3,231,851 07	$5,188,479 16

Compared with 1862, the gross earnings of 1863 show an increase of $2,382,144 55; with an increase in expenses of $1,425,516 46—making the increase in net earnings $956,628 09.

Ship Canal Around Niagara Falls.

We learn from the Niagara Falls *Gazette* that within the past few days surveyors have been surveying the short route for a ship canal between Lewiston and the river above the Falls, to connect the upper and lower lakes. This is preparatory to the presentation of a bill in Congress for the construction of the great chain of Ship Canals from the Mississippi to the Atlantic, of which this piece will form an important part. It is understood that Hon. D. C. Littlejohn, of Oswego, has the bill in preparation, and will present it at an early day. The proposed route of this great International Ship Canal will be from the Mississippi River to tide-water at New York, *via* Keokuk, Chicago, Niagara Falls, Lewiston, St. Lawrence River, Lake Champlain and the Hudson River.

The following is the estimated cost of these gigantic international improvements:

Enlarging the Illinois Canal from Keokuk to Chicago, making the locks 350 feet long, 70 feet wide, and 7 feet deep, admitting vessels of 600 tons burthern—per survey of the State of Illinois	$13,000,000
Ship Canal around Niagara Falls, from Head Water to Lewiston, distance eight miles, locks 300 feet long, 50 feet wide, 10 feet deep, admitting vessels of 1,200 tons burthen—survey of Charles Stewart, 1854	5,500,000
From St. Lawrence River to Albany, *via* Lake Champlain, locks same as in Ship Canal around Niagara Falls—survey of Charles Stewart, 1854	4,000,000
Enlarged locks on the Oswego and Erie Canals, making locks 225 feet in length, 26 feet wide, 7 feet deep, admitting vessels of 600 tons burthen—survey of New York State Engineer Taylor	3,500,000
Total	$26,000,000

Finances of Ohio.

From the Report of the Commissioners of the Sinking Fund, we learn that the total funded debt of the State, May 15, 1863, was $13,585,442 26.

During the six months ending Nov. 15, 1863, their has been redeemed:		
Of foreign loan of 1856	$1,166 33	
" " 1860	27,566 00	
Of domestic loan of 1863	2,300 00	
Of Union loan of 1866	89,000 00	
		120,632 33
Outstanding Nov. 15, 1863		$13,464,809 93

The existing funded debt of the State consists of the following loans, viz:

FOREIGN DEBT.

Loan of 1860, 6 per cent. interest			$1,263,279 00
" 1865, 5	"	"	1,015,000 00
" 1868, 6	"	"	379,866 00
" 1870, 6	"	"	2,183,531 97
" 1875, 6	"	"	1,600,000 00
" 1881, 6	"	"	4,095,309 47
" 1886, 6	"	"	2,400,000 00
Total foreign debt			$12,935,986 44

DOMESTIC DEBT.

Stock of 1849, not bearing interest	$1,765 00	
National road bonds, not bearing interest	60 36	
Union loan of 1866, not bearing interest	2,000 00	
Miami Extension Canal loan of 1863, 6 per ct. interest	245,785 00	
Union loan of 1868, 6 per cent. interest	279,213 13	
Total domestic debt		528,823 49
Total debt, November 15, 1863		$13,464,809 93

The receipts into the sinking fund during the six months ending Nov. 15, 1863, were:

Balance in Treasury, May 15, 1863		$84,050 04
From taxes—sinking fund		463,683 81
" war loan fund		115,794 96
From school lands		74,178 75
From surplus revenue		17,238 45
From dividends		12,095 34
Total receipts		$767,041 35

And the disbursements were:

For interest on foreign debt	$371,058 72
Interest on domestic debt	5,985 71
Interest on Union loan	19,684 46
Redemption of foreign debt	699 79
Redemption of domestic debt	2,300 00
Redemption of Union loan	89,600 00
Sundry expenses	3,395 06
Total disbursements	$492,723 74
Balance in Treasury	$274,317 61
Add balance in New York	7,310 06
Total amount of sinking fund on hand Nov. 15, 1863	$281,627 67

Lancaster Locomotive Works.

The Lancaster (Penn.) Locomotive Works have been leased by Messrs. James Norris & Brothers, of Philadelphia, and workmen are now busily employed fitting them up. They expect to have them in operation in a few days, and from the energy displayed by the lessees, we have no doubt the enterprise will prove a decided success. The Messrs. Norris have established a world-wide reputation as locomotive builders, and we learn that they have already orders from this country and Russia, which will take them over a year to fill with all the force they can employ.

State of the Rebel Treasury.

The following table of the receipts and expenditures of the rebel Treasury, with the funded and unfunded debt for the past year (exclusive of the foreign loan for the same period), appears in the report of the Secretary submitted to the rebel Congress:—

RECEIPTS FROM JANUARY 1 TO SEPTEMBER 30, 1863.

For eight per cent stock	$107,292,900
For seven per cent stock	38,737,650
For six per cent stock	6,810,050
For five per cent call certificates	22,992,900
For four per cent call certificates	482,200
Cotton certificates, act April 21, 1862	2,000,000
Interest on loans	140,210
War tax	4,128,988
Treasury notes	391 623,530
Sequestration	1,862,550
Customs	934,798
Export duty on cotton	8,101
Patent fund	10,794
Miscellaneous, including repayments by disbursing officers	24,498,217
Total	$601,522,893

EXPENDITURES DURING SAME PERIOD.

War Department	$377,988,244
Navy Department	88,437,661
Civil, miscellaneous, &c	11,629,278
Customs	56,636
Public debt	32,212,290
Notes cancelled and redeemed	59,044,449
Total of expenditures	$519,368,559
Total of receipts	601,522,893
Balance in Treasury	$82,154,334
From which is to be deducted the amount of Treasury notes which have been funded and brought in for cancellation, but have not yet been regularly audited, estimated	65,000,000
Total	$ 17,154,334

The public debt (exclusive of the foreign loan) at the same period was as follows:—

FUNDED.

Eight per cents	$207,128,750
Seven per cents	42,745,600
Six per cents	41,006,270
Six per cent cotton interest bonds	2,035,000
Total	$292,915,620

UNFUNDED.

Treasury notes: general currency	$608,632,798
Two years notes	8,477,975
Interest notes at 3.65	627,460
Interest notes at 7.30	122,582,200
Under $5	4,887,095
Five per cent call certificates	26,240,000
Total	$766,447,519
Deduct amount of treasury notes funded and cancelled, above referred to	65,000,000
Total	$701,447,519

In order to estimate the amount of Treasury notes in circulation at the date of this report, there must be added the further sum of one hundred millions for the two months which have elapsed since the date of the above schedules.

The balances of appropriations already made by Congress, and not drawn on September 30, stood as follows:—

War department	$395,502,698
Navy department	24,413,645
Civil, miscellaneous, &c	56,240,996
Customs	294,460
Total	$476,451,799

The estimate submitted by the various depart-

ments for the support of the government, are made to 1st July, 1864, the end of the fiscal year, and are as follows:—

Legislative department	$309,005
Executive department	52,350
Treasury department	22,583,359
War department	438,078,870
Navy department	18,624,945
State department	544,409
Justice department	333,587
Post office department	62,908
Total	$475,498,493

If these estimates be extended to embrace the remaining six months of the calender year, they must be doubled, and that sum added to the undrawn appropriations would make an aggregate of $1,427,448,778.

Specie in the Vaults of the New York City Banks with the Amount of Circulation.

* Old issue.

☞ The track of the St. Paul and Pacific road is now laid to Anoka, a distance of 30 miles. The road will be formally opened at New Year, or upon the meeting of the Legislature, and completed to St. Cloud in the Spring, a distance of 75 miles, the iron and ties being ready.

Boston Line of Steamers to Europe.

The people of Boston are continuing to agitate the project of establishing a line of steamers from their port to Europe. The example of Montreal is held up as worthy of imitation. There a new company has been organized under the name of the North American Steamship Company with a capital of £500,000 in shares of £50 each, with a provisional board of directors.

In the year 1856, the total imports and exports of Montreal amounted to less than twenty millions of dollars. In 1862, the exports of breadstuffs alone, by sea, amounted to nearly seventeen millions of bushels, while the total imports and exports, by sea, for the same year, amounted to nearly thirty-nine millions of dollars, showing an increase of nearly one hundred per cent.

The Bostonians may therefore readily see what their advantage will be in establishing their line.

Meantime let them give their whole influence in Congress, in carrying out the proposition now before it to place a portion of our swiftest naval force on the great ocean routes, as mail and freight carriers. This is the most obvious and satisfactory method yet devised for restoring our foreign commerce.

Lynn and Boston Horse Railroad.

The gross earnings of this road for the year ending December 31, 1863, were $93,631 82; and the expenses for the same period, $77,169 26; leaving a balance in the hands of the Treasurer of $16,462 56. The expenditures for construction have been $151,395 94; and for equipment, $75,771 18. The floating debt, after deducting materials on hand, is $10,704 56. The entire capital of $150,000, as previously voted by the company, has been subscribed for and the stock issued. The bonds issued amount to $50,000. The company voted to increase the capital stock to $200,000, the amount authorized by the charter.

The directors elected for the ensuing year are: Isaac Stebbins, W. R. Pearmain, A. M. Kidder, N. W. Turner, P. P. P. Ware, Benjamin Shurtleff, A. A. Breed, Mark Healey, Dean Peabody, E. F. Waters and J. E. M. Gilley.

A Steamship Line for Philadelphia.

An important maritime port without a steamship line, in the present advanced state of commerce, is quite an exception. All the principal ports of Europe have steam communication weekly, and in some cases tri-weekly, with the United States; whilst our own port, having direct communication with the ocean, has no steamship connection with Europe. Passengers wishing to visit Europe on business or pleasure, must go to other cities, and merchants sending their produce to, or getting manufactures from Europe, must have all filtered through Northern cities, at a great increase of cost and delay as compared with direct communication.

There is no doubt a lively interest is felt in this question by the public; but *nothing is done.* One scheme after another has been projected, and the words "Steamship Line" are synonymous with failure; and, whilst we are deliberating, other cities are acting, and monopolizing trade which *naturally* belongs to us.

A line of splendid steamers is, however, to be organized at once, to run, fortnightly, between Liverpool and Philadelphia, provided negotiations now pending are successful, of which there is every probability. Messrs. Richardson, Spence & Co., of Liverpool, and Messrs. Thos. Richardson & Co., of this city, are about to contract with the best builders in England for the construction, as soon as possible, of four first class steamships, of three thousand tons register, to be equal to any steamer afloat, provided they meet with the proper encouragment. We hope that all who are interested in the prosperity of Philadelphia will give this enterprise their support, that our city may reap the benefits of the increased commerce which would result.—*Philadelphia Inquirer.*

☞ Gov. Morton writes to Messrs. Winslow, Lanier & Co., the bankers in this city who are now advancing money for the payment of the Indiana State interest, that their liberal conduct in stepping forward to aid him in this matter is warmly appreciated by good men of all parties in Indiana. The Indianapolis *Journal* says:

"The conduct of Messrs. Winslow, Lanier & Co., of New York, in advancing the money to pay the interest on Indiana stocks, is worthy of all praise. When compared with the conduct of the State officers, who have taken an oath to do their duty by the State, and who, living upon State salaries, have done all in their power to discredit her and forfeit her good name, it becomes the subject of high admiration. This is not the first time this eminent firm have shown liberality and a generous disposition toward our State. When the rebellion first broke out, and before a war loan could be effected, they tendered the use of a large amount of money to the State authorities to equip our troops. And subsequently, before the war bonds could be converted, they advanced large sums at various times for the purchase of arms, blankets and equipments. Their assistance in these respects were always timely; and now when they step forward to save the State's credit by advancing so large a sum, they display a magnanimity toward us and a just confidence in the integrity of the State, which, by contrast, exhibits the action of our State officers, who are especially charged with maintaining the financial character of the State, in a light at once shameful and disgusting. The public should understand these facts, that justice may be done to Winslow, Lanier & Co., as well as to our public servants who have proved recreant to the important trusts confided to them."

Railroad Earnings--Monthly.

The earnings of the Galena and Chicago Union Railroad for November, 1863, were $219,885 70
Do., 1862 159,530 35

Increase $60,355 35

Corrected earnings for October, $284,808.

The earnings of the Marietta and Cincinnati railroad for November, 1863, were $76,763 85
Do., 1862 55,257 12

Increase $21,506 73

The following is a comparative statement of the earnings of the Chicago and Milwaukee Railway for November:

	1862.	1863.
Passengers	$20,705 86	$30,485 89
Freight	12,386 69	15,845 36
Miscellaneous	1,597 69	2,469 74
Total	$34,690 24	$48,800 99
Increase		$14,110 75

The earnings of the Cleveland and Pittsburg Railroad for November, 1863, were:

From Freight	$115,000 00
" Passengers	54,000 00
" Mails	1,798 00
" Express, etc.	6,854 00
Total	$177,652 00
November, 1862	148,576 29
Increase	$29,075 71

The earnings of the New York Central Railroad for November, 1863, were $1,043,514 64
Do., 1862 968,228 21

Increase $75,286 43

The business of the Illinois Central Railroad in November was:

LAND DEPARTMENT.

Acres construction lands sold	14,890.49	for	$166,997 47
Acres interest fund lands sold	2,677.56	"	24,337 53

The Secret of the Inefficiency of our Steam Navy.--Working by Expansion.--Mattingly vs. Washington Steamboat Company.

A law case has just been concluded in the Supreme Court of the District of Columbia, which in its disclosures is not only extremely important to scientific men, and constructors of steam engines, but to that class of persons who are curious about the working of the political machine; in other words the administration of the Government. It appears by the evidence that the plaintiff sought to recover of the defendants a balance due him on a contract for the use of a cut-off applied in their steamers. The claim was resisted on the ground that the improvement was without value, as the working of steam on the principle of expansion which the cut-off effects in the cylinder of an engine, is worthless.

To sustain this defence, Mr. Isherwood, the Chief Engineer of the United States Navy, was called as a witness. This gentlemen is well-known in this city. In the time of Mr. Tyler, he was the correspondent of the *True Sun*, a daily paper in this city, and being well informed of the movements of the administration in advance of his associates at Washington, was able to make his letters desirable. From that time his advance as an engineer was continuous from the lower to the upper grades, while in the meantime he published some large folios on the subject of steam vessels, which gained him a certain kind of celebrity. Considerable originality and versatility of character, with good address, have served him through various administrations, until now, when he has become the entire master of the constructive policy in the Navy Department; and all the war steamers with a few exceptions, have been fitted with engines under his direction. In these he has repudiated the received principle of working these expansively by means of the cut-off.

At this trial, fortunately for the plaintiff, and more fortunately for the country, Mr. E. N. Dickerson, an eminent lawyer, son of the late Mr. Dickerson of New Jersey, who has also made the study of the steam engine a speciality, appeared for the plaintiff, and cross-examined Mr. Isherwood with an ability not often witnessed in our courts of justice.

For the first time in such a forum in this country has the subject of the expansion of steam been treated in a clear and popular manner; and the relations of science to Government made apparent as an element of success in its administration. In order that our readers may understand what we mean, we give extracts from the speech of Mr. Dickerson, regretting that it is not in our power to republish the entire argument of this very able man.

HISTORY OF WATT'S DISCOVERY.

This contract, on which this suit is brought, is just such an one as James Watt used to make, which led to the famous litigations of Bolton and Watt, in the Court of Common Pleas in England. James Watt had made that great improvement on the steam engine which rendered his name immortal. He was not the inventor of a steam engine, for a steam engine was used before James Watt ever saw one; and I will tell you how it operated. It had a cylinder and piston, just as it now has, but the cylinder was not covered overhead, as now. The steam was let into the cylinder at its lower end, and under the piston, which by its pressure was forced up against the pressure of the atmosphere, and thus one stroke was made. But, in order to make a second stroke, the steam now confined in the cylinder had to be condensed, or turned into water, and that was done by throwing cold water into the cylinder itself, and thus cooling it and the steam it contained. This was a very tedious and costly process; for at each stroke the cylinder, thus cooled, had to be reheated to a temperature at which it would permit steam to remain in it before another stroke could be made; and all this heat was lost at each stroke. No very useful steam engine could be thus made. At this point of time James Watt, the Shakspeare of mechanics appeared; a man whose equal as an engineer has not stood on this earth since, nor do I see any prospect that another will come; a man on whose intellect the Almighty had impressed that intuitive knowledge of His great physical truths, as He had impressed upon the intellect of Shakspeare an intuitive knowledge of His great moral truths. He was an humble man in station; but, illumined by the light of genius, he rose into grandeur which will never fade. He looked upon a steam engine, and at a glance saw its faults. Said he, "Take away this cold water from this cylinder; don't turn your steam into water in the cylinder; put your condenser on the outside; make a box somewhere, and carry the steam from the cylinder to that box, and there throw cold water on it and condense it, and then you won't have to reheat your cylinder at each stroke; you won't have to get rid of this water in the cylinder, for the steam will flow out by itself into the condenser and be there condensed."

There was the first great improvement on a steam engine, and it was the intellect of James Watt which made it. It was James Watt who fought the battles of civil liberty in the early part of this century. It was James Watt—not Lord Wellington—that conquered Napoleon. He it was who, by creating that physical power, enabled England to produce out of its internal resources those means by which she sustained herself against the gigantic strength of the great Emperor and carried on a war that resulted in his overthrow. Had James Watt never lived, the French Emperor would have wiped out from its place in the history of the world and out of the catalogue of nations that power and people who now domineer over land and over sea. James Watt was the great pillar on which they stood; and he it was who fought the great battle that maintained them in their present position, and he did it chiefly by that simple idea. He used to make contracts. He would go to a man who had a steam engine running on the old plan, and say, "I will put an engine here which will run as well and save largely in fuel. All the compensation I ask will be what one-half of the saving in fuel will amount to, if there shall be any saving. If not, I get nothing." Those were the "ifs" upon which the great suits of Bolton and Watts were founded. These suits became famous in the history of the world, and they form the dividing line between the past judicial determinations of England and the present.

PATENT VIOLATORS.

But Watt made those contracts I have mentioned; and when the defendants, as in this case, found that his share of profit was great—though theirs was great also—like dishonest men they refused to pay; and he, like this plaintiff, was driven into the courts for redress. Thus, you see, this is but an old story told again.

It has been said that in the affairs of the world history but re-enacts itself, and it is certainly true in regard to this matter. The moral character of the human species never changes. We may change our customs and our laws, erect our monuments of civil progress in every department of the human arts; but the human heart remains constant to its original pattern, and the fall of Adam leaves its impress indelibly fixed upon all his descendants through all time. And all these men in England who turned against James Watt, the great benefactor of his day and generation, and refused to pay him what they had solemnly contracted to pay, were just such men as to-day turn against the benefactors of their time, and refuse to pay what they contracted to pay, when they find that they might have bought their advantages much cheaper if they had not been ignorant. Of all things on earth, gentlemen, which men hate and refuse to pay for, intellect most excites their animosity. They will raise no objection to paying for coal, which they can see and shovel in and burn, the cost of which they can find out; but to pay for intellect—for that which apparently costs its owner nothing—they won't submit to that. They would have all men five feet ten inches high, and when one man rises above the average all the rest cluster around to pull him down. It is the old savage instinct; we are all more or less given to it; and I suppose we cannot help it. It will never die out in the human heart, and courts are created to control such passions when they come into play to the injury of society and the destruction of those principles and laws upon which society alone can stand.

THE PRINCIPLE OF EXPANSION EXPLAINED.

Let me now explain to you, gentlemen, what is meant by the "expansive power of steam," or "working steam expansively," which is the principal subject in issue here, and of vital consequence to the country. I will suppose a little cylinder one inch in diameter and of indefinite length, and a piston fitting in it steam tight, but without friction; and I will further suppose a cubic inch of water to be poured into the bottom of that cylinder, and the piston to be then let down on that water; and I will suppose that on top of that piston there is a platform placed carrying a ton weight of bricks. Now we have the machine ready for the experiment which is to determine the absolute power resulting from the conversion of water into steam. Now hold a lamp under that cylinder till it evaporates that cubic inch of water into steam, and it will lift that ton of bricks just one foot high. These are convenient units to remember. A cubic inch of water turned into steam will lift a ton weight a foot high—no more, no less. That is not precisely accurate, but it is so within a few pounds, and it is near enough for all practical purposes. When the weight is lifted a foot high it goes no further, and a valve must be opened in the bottom of the cylinder to permit another operation, by letting out the steam which has done its work. That machine is simply a full stroke or non-expansive engine, making one stroke; and for each stroke made by such an engine all the possible power to be got is the equivalent of a ton lifted a foot high for every cubic inch of water, evaporated—no more and no less. That is a law inherent in matter. It is the God given quality of water and heat. We cannot alter it. All we can do is to obey it. That is all you can get out of a steam engine without a cut off. But let us go a little further with our experiment. In place of opening the exhaust valve when the ton is lifted a foot high, take one brick off that platform. The load now is not quite so heavy as it was before, and the elastic steam compressed by that ton weight will expand a little under the diminished load, and will raise the bricks a little further. It gives you out a little more power. Then knock another brick off, and keep knocking them off, one by one, and up goes the piston, still carrying up those bricks which are left, until, when you have knocked them all off except the last fifteen pounds of bricks, they will have been raised about one thousand seven hundred inches high; and if you still further diminish that fifteen pounds, by knocking other bricks off, the steam will keep lifting the remainder higher and higher, and we do not know how high it will lift some weight. Now you will observe, gentlemen, that all the power which has come out of that steam after I began to knock the bricks off is a power which is, so to speak, a clear profit, since it cost no fuel or steam except that which had already raised the ton weight a foot high, and which was unable to raise it any higher unless by this diminution of resistance. James Watt discovered this principle—a law of steam—and measured its value remarkably well; and he also invented the best form of cutoff for carrying out this principle which has been made,

except that called the Sickles' cutoff, notwithstanding the hundreds of forms of cutoffs which have been invented and patented since. That form is now in use on the Cornish engines, and whenever in England to-day they wish to give an example of the great efficacy of steam the Cornish engine of James Watt—which depends entirely upon this cutoff for its value—is cited as the most striking illustration.

But you would wish to know how this principle of diminishing the load of resistance, as in the case of the bricks knocked off the platform, can be applied to machinery in general, and I will explain that. It is done by the aid of the momentum of the matter which the engine is moving—it may be a fly wheel, or the steamboat itself, or the train of cars, all of which, when once set in motion, will not suddenly stop, even though all power were suddenly suspended from driving them, and which, therefore, will continue to go on under the diminished pressure of the expanded steam. Thus you see that when the steam is cut off from the cylinder that which is in it continues to push on the piston with diminished force, but still with some force; and, as the piston cannot stop, it absorbs and through the wheels which it drives gives out again to useful effects whatever pressure is thus spent upon it; just as your watch will run all day although the spring which drives it grows weaker and weaker at each instant as it is relaxed.

The gain which can be obtained from this expansion is measured by the extent to which you carry it, or, in other words, how short you cut off the steam in the cylinder, and the amount of saving of fuel or increased power due to the different rates of expansion, or the different points of cut off, has been ascertained with mathematical precision by Mariotte and Regnault, and the law or rule which governs this rate is called the "Mariotte law." I will give you a few figures settled by that law, and then pass to more general considerations. As I have said, a cubic inch of water made into steam without expansion will lift a ton—a foot high, or whatever is equivalent to that. If that same cubic inch, after having done that work, is expanded into three cubic inches it will by that expansion lift another ton a foot high without calling on the furnace for any more fuel; if it is expanded five times it will lift one ton and six-tenths a foot high in addition to its original lift of a ton; and ten expansions will do three times and a third as much work as no expansion, using the same amount of fire and steam.

PRACTICAL ILLUSTRATIONS.

Now these are well settled facts in the world—such as rate of speed of a falling body—and are not disputed anywhere, except by our enlightened Secretary of the Navy and his enlightened engineer in chief. The navies of the world all use these principles by the aid of a cutoff; all merchant steamers in the world do the like; and steamers go fast and produce great results in proportion to the extent to which they use steam expansively. Mr. Forbes' steamer Foh Kien, of which I was the constructing engineer, and which we proved here before you, expands steam six or seven times, and she went nearly fifteen thousand miles in fifty-one days and a half, using about twenty-seven tons of coal a day, and carrying a full load of machinery in the hold; and she is a two thousand ton ship—much larger than those vessels in the navy, now building or built, which couldn't go that far in seventy days, nor with twice the total coal she used. And Mr. Roberts' steamer America, of two thousand tons, as we proved before you, when loaded with coal for a voyage to the Pacific, averaged at sea nearly twelve knots an hour, and ran thirteen measured miles in fifty-one minutes, with an amount of coal which Isherwood swore here could not possibly have made her go nine knots an hour on his theory, and which would hardly keep his twelve hundred ton sloops-of-war out of their own way. And so certain is all this, that when the defendants put Mr. Reede, of Baltimore—an engineer of large experience and intelligence—upon the stand, he was compelled to admit the truth, although you all know how reluctantly he yielded to my questions, (because he is building Isherwood's engines for the government, and fears the vengeance of the Navy Department.) I asked him:—

Mr. Reeder, isn't it perfectly certain that if you take out of the United States ships now building their small cylinders, and leaving everything else just as it is, put in large cylinders and an independent cutoff, you will vastly increase their power with the same coal—double it or treble it, according to the size of the cylinder?

He said:—

Yes, it is certainly true.

And it is true; and to deny it exhibits an ignorance or wickedness beyond my imagination to conceive.

EXPLANATION OF THE TERM CLEARANCE.

So much, gentlemen, for that part of the case. I will now show you that there were facts connected with this alteration of the Columbia—the steamboat to which the cutoff in this case was applied, and for the saving of fuel produced thereby this suit is brought—which render it perfectly certain that a great amount of fuel was saved; and this, too, entirely independent of the use of steam expansively—a saving about which they have called a witness on the stand—this Mr. Charles Reeder, of Baltimore—for the purpose of reducing it to ten per cent of the fuel burned; and that advantage resulted from the fact that the cutoff valve was close up to the cylinder, while the old cutoff was remote from the cylinder, with a large vacent space, called "clearance" to be filled with steam and lost at each stroke. Now, gentlemen, this advantage, you will observe, is entirely beyond that which results from working steam expansively. I will give you an illustration familiar to you all, by which you will see that advantage. If you have a barrel of sugar to sell which weighs a hundred pounds, and you sell it out in single pounds you will not get a hundred pound parcels precisely out of that barrel. If you have a roll of cloth on your counter, measuring a hundred yards, and you sell it out in yards, you will not sell one hundred yards of cloth out of it. And why? Simply because with each pound of sugar you weigh, or each yard of cloth you cut, you give good weight or measure, and each time sell a little over; and the sum total of these little excesses will always use up a considerable amount in the barrel of sugar or the roll of cloth. Therefore persons who sell at retail have to add to the price to make up for the loss. That is exactly the case of the steam engine. The piston travels ten feet in the cylinder; but it does not travel so as to fill up the entire space which the steam occupies. There is still beyond that ten feet a space; so that when you take steam out of the boiler at every stroke of the engine, you take out more than the ten feet to fill up the "clearance." There is an excess which you measure out at every stroke, and that excess diminishes the original supply in proportion to the amount of that clearance; just as you lose cloth or sugar in proportion to the amount your clerk overruns the yard-stick or how much sugar he throws into the scale more than needed to balance the weight. That clearance is an absolute and fixed quantity in a given engine, and how much it will cost is entirely calculable and can be ascertained by measurement exactly; and that absolute quantity is entirely independent of whether you work steam expansively or not, although it becomes a larger per centage of loss when running with than without expansion.

ISHERWOOD'S CONTRADICTIONS AND MOTIVES.

Now, gentlemen, before I came here Mr. Isherwood had sworn that item clean and clear out of this case, and had said it was "infinitessimally small"—"as eighteen is to infinity." But it was not necessary to do that in order to show that there was no practical benefit in expansion; because there is no connection between these two things at all—none whatever. The loss by clearance is a loss that occurs in a steam engine whether you work it with or without expansion; and you can save it just as well upon one engine as upon another. You can shorten the excess measured by the yardstick, or the excess of sugar that weighs down the scale; and that, I say, is independent of the quality of the sugar or the cloth. This man, therefore, was under no necessity to swear as he did. What then, did he want? Why did he come here? He came here regardless of the rights of these parties, for the purpose of swearing for the verdict of a jury of his countrymen, and the judgment of an intelligent court, which would tend to prove that the navy engines were built properly. That is what he came here for—to attempt to prove that the laws of Watt and Mariotte, and of all the great men who have preceded us in this great march of civilization, are mere fallacies; that the engineering of the world is entirely wrong; that this discovery, made within the last year or two, as Isherwood says, by himself, was entirely right. And if he could get that judgment from this jury the newspapers of the country would be filled with telegram after telegram and paragraph after paragraph to the effect that this great man whom my learned friends heralded here under such flying colors, and whom they dropped so soon when I had stripped him naked and produced only "Snug, the Joiner"—that this great man had succeeded in establishing in a court of justice, after the most searching investigation, how he was all right, notwithstanding the notorious fact that his new ships cannot catch a blockade runner; and he would then insist that their failures were not his fault but the fault of the workmen, and of the material used, and all that kind of trash, such as we have heard him swear to on this stand. Because, I observe, gentlemen, that the country has begun to be alarmed, and the newspapers are teeming with these accounts of our naval failures; and it is necessary for these people who have produced these shameful results to find some means to help them out of this mire; and so he came here to lead you, and to lead his honor into this train that he has following him, and to have the benefit of your support. Therefore it was necessary, in order to have a verdict, to strike out of this engine a saving which had no more connection with the use of steam expansively than the excess of your pound weight has to do with the quantity of the sugar you weigh. For we are entitled by a verdict for whatever saving was effected by putting on the cutoff, even if it were true that no part of it arose out of the use of expanded steam; and we had proved that a saving of ten per cent at least was due to the closing up of this immense "clearance" by moving the cutoff upon the cylinder.

When, therefore, I read this man's testimony, and found that he had set out to swear this case through at all hazards, I at once comprehended his object, and saw how important it was to the Navy Department, just now when so much public anxiety is felt at the constant failures of our navy, to have just such a verdict as this one would be if they could get it. But I was not a little surprised at the audacity of this particular piece of swearing, as I had in my hands a couple of books published by this Isherwood—one of them under the authority of this very Navy Department—in which he states the exact value of this loss by clearance, and reduces it to precise figures for different rates of expansion, according to the well known rules which govern this case; showing that in some cases where the clearance is much less than in this engine the loss it occasions is eighteen per cent of the total fuel. But I will read from his book (Engineering Precedents, vol. ii. p. 74):—

"Collecting the above, we have in the different cases following for the loss of economic effect from the steam due to the space comprised in the *clearance and port* of the cylinder, and expressed in per centum of the effect that the steam would have produced had there been no such space to have been filled with it:—Without expansion, 6.98 per cent; with an expansion of twice, 8.24 per cent; with an expansion of four times, 11.70 per cent, and with an expansion of eight times, 18.13 per cent."

This I read to him; and one would have thought it must have arrested him in his mad career to self-destruction; but it produced no such effect. He tossed it off as easily as if it were but a feather's weight. "Oh yes," said he: "that was my theory before I tried the Lake Erie experiment. It was true in theory, but not in practice."

OLD CUTOFF'S AND SICKLES' COMPARED WIRE-DRAWING AND FRICTION.

But there was still another cause of saving in the case of the Columbia, for which the charge made, by applying the Sickles' cutoff, was entitled to credit, and which was also independent of the principles of expansion, and that arose from the fact that the old cutoff valve on the boat was simply a damper turning in the steam pipe—just as a stove pipe damper is turned to shut off draft—and which, from its nature, must leak enormously; whereas the Sickles' cutoff valve was a single puppet valve—that is a tapering or conical stopper set into a corresponding hole, which it fits, and upon which the steam to be stopped presses, thus making it tighter and tighter as the pressure is greater and greater. Now it is plain enough that this cause produced a saving, and so Mr. Reeder admitted, and said that the old damper valve could not be made steam tight, as, indeed, you must see yourselves, without his aid. But Isherwood had to swear that fact out, too, for he was bound to get your verdict; and he swore that there was no difference whatever in the tightness of valves, and that with equal workmanship the damper was as tight as the plug. Now, as Isherwood is no mechanic, and never struck a blow as such in his life, he might have been ignorant of this simple truth, which Mr. Reeder, a good mechanic, testified to; and therefore I looked again to his book to see whether he had not written drown this fact about valves there—for every man who ever saw a steam engine work knows this obvious fact—and behold, as in the case of the "clearance," he has fully stated the whole matter, and tells us that this single valve is the only one which can be made tight. I read from page 58 of his precedents:

"Freedom from leakage, however, is from physical causes, and the forms habitually given to valves *an impossibility;* and of the large number of indicated diagrams that I have examined, from many engines of various types and proportions, I have never seen one which did not evidence a *very considerable leakage.*"

He then proceeds to describe the various valves in use; and, as if to prepare for his own destruction in this case, and thus concludes:—"The single puppet valve" (*i. e.*, the valve on the Columbia), "which is one flat, thin disk, *can be ground tight;* but it is now scarcely ever employed." Thus proving that when he swore these valves were all alike he knew better, and had published his knowledge to the world. This same subject will become important hereafter, and I pass it over without further comment.

And there was still one other cause why fuel was saved on the Columbia by the Sickles cutoff, which was, that by its use the valve cutting off the steam was closed very rapidly after it began to shut, whereas the old cutoff valve closed comparatively very slowly. Again, Mr. Reeder their witness, admitted this to be a cause of saving; and again, Isherwood was called to discredit their own witness, and to deny that self-evident proposition; and again, he was ready for the emergency. The loss by slow closing of the valve results from what is called "wire-drawing" the steam—a phrase which suggests that when the steam has been forced through a hole too small to pass the quantity required, it must lose some of its strength in forcing itself through—just as a wire is reduced in strength by being forced through a smaller hole. But Isherwood swore solid that there was no loss of power due to moving steam from the boilers to the engine; and when I put to him the case of a steam pipe a mile long and an inch in diameter, through which the steam had to travel from the boiler to the engine, as compared with a pipe of the usual length and size, he unblushingly swore that no loss of power would result, and that the steam at the end of the pipe would drive the engine just as well as in the ordinary way; for said he "steam has no friction," whereas if it were water—which I compared it to—he admitted there would be a loss due to the friction of water. Again I had but to turn to his book to prove him to be false, and not ignorant, and again he was overwhelmed, but not abashed. I read from page twenty of this large volume.

"According to the well settled laws of thermodynamics, steam, in overcoming any force of any kind, must suffer condensation. For instance, in rising in vacuo in a vertical column against gravity, exclusive of overcoming any resistance except that of its own weight, it will condense. It will condense in *transporting itself from the boiler to the cylinder*, and from the cylinder to the condenser, and in following the piston down the cylinder, supposing the load to be carried by an external power. In fact it cannot produce movement in its own particles of any kind *without expenditure of mechanical force*, and consequently transmutation of heat and resulting condensation."

And it follows, of course, that the greater are the difficulties to be overcome, the longer the distance over which the steam must "*transport itself*," the greater will be the loss of "*mechanical power*," and the less will remain to be used for some other purpose at the end. It is not true, however, as he ignorantly supposes, that the steam is condensed in thus losing its force; it only loses its pressure or tension, but it remains steam all the same unless cooled by external radiation. It does not become water.

JOULE'S EQUIVALENT.

Now I will explain a simple matter to you, as it is just now much talked of in the world, and but little understood. It had been supposed, long ago, by profound thinkers, that there was somewhere in the universe a measure or standard by which all the causes and effects seen in physical phenomena might be brought to some common unit, just as all the things we buy and use are brought to the standard of a pound weight or a pint measure. Dr. Mayer and Rumford investigated the question with great effect, and they ascertained very closely the true ratio which exists between motion and heat; but it was left for Mr. Joule, a careful and laborious experimenter, to fix with precision the standard and to give his name to the fact thus ascertained. The phrase, "Joule's equivalent," now signifies that Mr. Joule discovered that the mechanical power required to lift seven hundred and seventy-two pounds a foot high was the *equivalent* of the heat required to raise the temperature of one pound of water one degree of Fahrenheit; and that is all it means.

From this discovery of Joule many erroneous conclusions have been drawn, among which is the assumption that because heat and power are found to be equivalent to each other in a certain ratio, therefore that one is converted or transmuted into the other. This is not true any more than it is true that when a roll of greenbacks disappears ont of your pocket and a barrel of flour appears in your kitchen, the greenbacks are transmuted into flour. They are the equivalent of flour and you buy flour with them, but you can't "transmute" them into flour.

Isherwood, however, considered that as this subject was a little "confused and mixed up," like his book, he might use it as a cloak to cover his new juggle; and so he asserted that, in consequence of Joule's equivalent, the steam in an engine was condensed into water and lost, and that therefore there was no benefit in expansion. In his first book there was no room for this theory, for already he had used up all the benefit of expansion by other devices of his active imagination, and although he knew of Joule when he wrote that book he did not assign to him any of his losses; for if he had he would have more than used up all the benefits and left poor Watt in the minority entirely. But when I spoiled his first work he produced Joule to fill up the ranks, just as a fresh regiment is brought forward, after a crushing discharge of artillery, to carry on the fight.

And here opens a chapter of barefaced fraud which has no precedent in the history of the world in this department of swindling.

The remainder of Mr. Dickerson's speech consists of an examination of Mr. Isherwood's theories, and false application of principles, a criticism on his experiments on Lake Erie really scorching, and a statement in various ways of the evil influences which have prevailed in the Navy Department to produce a nearly worthless class of steamers, with engines which will not work, with speed of the lowest rates, and with boilers of such size and weight (to do without expansion) that they leave no room for the trews, guns and ammunition.

Every Engineer in the country should study this admirable production.

Railway Movements.

We learn from Chicago, that the railway system in its vicinity are in a state of great development. The leading lines are much stimulated by the commencement of the Pacific road, and it is believed that before the close of the next summer, the trains will be running to Council Bluff, opposite the initial point of the main trunk Pacific line.

A railroad to Denver City is daily becoming more and more a necessity. Two years is the limit we set for its completion. It is scarcely possible to delay it much longer. The line from Dubuque is also stretching away towards Sioux City, on the Missouri. It is to be opened to Cedar Rapids in January.

In Illinois a road is about to be commenced running from Cairo north, through the western tier of counties, and intersecting the St. Louis road at Belleville, in St. Clair County. Work has been recommenced on the Pike County road. This is an important link, about eighty-five miles long, connecting the Hannibal and St. Joseph road with the Great Western, extending across the country from the Mississippi to the Illinois. It is expected to be in running order next season. The Burlington and Quincy extension, thirty miles, is well under way. When completed it will give that company an independent track from the junction into the city. The Illinois Central has recently purchased the line of Upper Mississippi steamboats, and will, the coming season, run a line in connection with the road from Dunleith to St. Paul. There is also to be a line from Prairie du Chien, in connection with the Milwaukee and Prairie du Chien road. In Minnesota the great road from St. Paul to the head of Lake Superior, at Superior City, is engrossing much attention. The City Council of St. Paul have voted $250,000 in aid of the enterprise. The Winona and St. Peter's road is progressing rapidly. It is contemplated to have the first section, between Winona and St. Charles, in operation by the first of January. The road from Green Bay to Marquette, on Lake Superior, is approaching completion, though it is probable that not much will be done this winter.

The farm mortgagors are settling up their engagements. Half a million has been liquidated with the Milwaukie and Prairie du Chien Company.

In all parts of the west laborers on these works are paid $2.50 per day.

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal.

Saturday, December 26, 1863.

☞ The *postage* upon the AMERICAN RAILROAD JOURNAL is only *five cents per quarter*, if paid *in advance* at the Post office where the paper is received.

Stock Exchange and Money Market.

The operations in the Money Market are closing up for the year. It is the custom in "the street," at least with those who make their money or lose it there, to wind up as far as possible at this season their monied transactions. Before the war broke out there was always a perceptible closeness in the Money Market about the time of the holidays, as if people wished to be sure of what they made, and enjoy the contemplation of their actual balances, at least till after New Year. How it will be at the close of this year of excitements, 1863, we cannot tell, yet it is to be noticed the Money Market has been tightening for some weeks past, and the rate of interest has been steady at 7 per cent.

Borrowers of less than well-known responsibility have found it difficult to realize even at this rate, and there is a class of the needy who have ever to submit to whatever terms the lenders may impose upon them.

The year as a whole, in spite of the tremendous conflict going on, has been in all respects an improvement on the preceding one. Whatever doubts men had then as to the final results, there is none now. Those who feared that the resources of the country were nearly exhausted have discovered their mistake; those who believed the Union was to be shattered into fragments, begin to think that it is still to be one and indivisible. Those who thought our works of internal improvement were to be unproductive, perceive they were never more flourishing. Those who supposed our foreign commerce was to become extinct, find that notwithstanding it is now mainly carried on under other flags than our own, for which we may thank the inefficiency of a single department, have discovered that the world finds no better mart than ours in war as well as in peace, and that though gold and silver have retired from individual pockets, the Government gets all it wants to the extent of ninety millions and more per annum, and has a balance on hand to-day of more than twelve millions.

Those too, who imagined that foreign capital had deserted our cities, find it as active as ever in search of profits, and recovering from its early panic, is pouring in largely upon us to share in our present prosperity.

A most gratifying circumstance it is also, that, however, during the preceding year the two great parties in the North were divided on the subject of the war, and how it should be ended, there is but little difference now. The almost unanimous vote in the House of Representatives, (with but a solitary negative,) in favor of prosecuting the war vigorously until the rebellion is crushed, is a most remarkable circumstance, not like any other in our history, not even during the war of 1812–'15, when there was a sturdy and factious opposition to it up to the last moment.

We may therefore say with truth, that the close of the year at hand, is better than its beginning, and we may look forward to the public with greater confidence than ever.

Particularly may we do so, when we see the confederacy narrowing down to the scanty area whence it first raised its crest. Not a single State remains entire in its possession. The flag of the Union waves over the greatest and best part of the old territory, and we have every reason to hope that the loyal men who have remained there at the risk of their lives, waiting for their opportunity, will soon be sufficiently concentrated in their action, as to rise on their own soil against their betrayers and "do justice" on them, themselves.

From these remarks, it will be perceived we are not of that class of journalists who feel any particular anxiety as to the future of our beloved country. From long and habitual study of its resources, we are perfectly satisfied that we are to come out of this contest, as no other people so situated ever came out before.

The Government has paid out twelve hundred millions of dollars thus far. Who has got it? No foreign nation, but the American people themselves; quick as thought to advance their own interests, never tired of industrious exertion, ingenious, painstaking, inventive, enterprising and bold. Have these twelve hundred millions impoverished such a people? On the contrary is it for a moment doubtful that these in many ways as well applied capital, will speedily reproduce itself cent per cent. How is it that within a generation, so much solid wealth has been acquired in this country, and who doubts that if its early capital had been larger it would have been still more productive. When in a few short years a city like Chicago, can rise out of a marsh not worth a hundred dollars an acre, to become a great and populous city, our seventh in rank, with hundreds of thousands of tons of shipping plying to its port, and when this is not a solitary example of progress, but only a type of it in various other forms, such as we may see even within a radius of thirty miles around our own City Hall, who can doubt the enormous strides we are yet to make in this continued march to imperial strength, wealth and power. The best watered, the most fertile, the richest in soil and minerals in the whole world, with an area that is not figuratively, but practically continental, our country must soon stand at the head of all civilized nations, and this war though it has cost us precious blood and vast treasures, will consolidate its moral power, elevate its industrial pursuits, and give tone and value to its recovered institutions. This war has done wonders in developing the noblest of motives, elevating and purifying the standard of public opinion, in confirming our faith in principles, and stimulating our exertions to preserve our priceless inheritance.

Having as we believe overcome all the greatest difficulties in our way, success in the field and financial skill in the Treasury will solve the remaining ones. These appear to be before us in two forms only as at present apparent. The one is the return to specie payments, and the other the payment and extinction of the national debt.

Just as soon as the National Banking system reaches the point when it may furnish an amount of circulation equal to that afloat of a Governmental character, it is perfectly clear to our minds, the latter can be withdrawn to give place to the former, and this is doubtless the policy of Mr. Chase. All the Government has to do, is to pay its interest in gold up to that time. The National Banks will be as able to pay specie as well as any other banks have ever been in this country, and no more likely to be called on to be bullion banks, than their predecessors. It is ascertained beyond a doubt that there is far more gold in the country now than there ever was before.

And as to the payment of the national debt, the moment the war is over, the annual charge for interest will be entirely within the income of the Treasury from customs alone, likely to be doubled by our increased commercial activity. Even then with a reduction in direct taxation and internal revenue, not only the civil list and the army and navy may be kept upon a peace standard, but a large surplus to be carried to a sinking fund, sufficient to pay off the national debt within twenty or thirty years at farthest, at which time our population and developed resources will be twice what they are now. We must not look back on the operations of our Government as they were when suited to a population of eight or ten millions, but what they will be when it will be as at the end of this century not far off, and which many of our readers will see, one hundred millions.

When we therefore chronicle from week to week the disturbances of the money market, they appear small in comparison with the resources and stability of the future. All we want is coolness, persistance and faith, and the mountains which seem to have bounded our horizon will be removed at a word.

The stock Exchange closes like the money market, with great calmness. We may say of railway shares that they have maintained themselves fully both in character, earnings and popularity.

Our London dates to the 9th inst give us the information that the position of the Bank of France continued to give great uneasiness, and the fact is the Bank of England on the 7th inst. was actually asking 9 per cent in first class paper. This is positively stated in the Morning *Herald* of the above date. The whole system of discounts is shaken at this moment throughout Europe, as all the leading Governments are seeking for money. Even Spain is about to borrow one hundred millions of dollars through the agency of the Rothchilds, and France having a large deficit to provide for, is coming on the market with a loan of 300,000,000 fcs. to be offered at 66!

The drain of bullion to the East continues, and the London *Times* of the 30th of November says that India has taken from England within the last thirty years one thousand millions of dollars. For the year ending April last, eighty millions had gone in the same direction. We may therefore see how much more solid and satisfactory is our own position even with this war on our hands, then even the first class monarchies of the old world, with whom peace is as expensive as war, which exist on the toil and earnings of their populations whose interests and comfort are always held in subordination to those of their dynastic Governments.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of three dollars per share, free of United States tax payable New York stockholders of the Union Bank, on the 2d of January next.

The Housatonic Railroad Company have declared a dividend of four dollars per share on the preferred stock, free of government tax, payable on the 26th inst., in New York at Messrs Ketchum, Sons & Co., 40 Exchahge Place; in Boston at the office of J. E. Thayer & Brother; in Bridgeport at the office of the company.

The interest due Dec. 31, on the preferred certificates issued by the Trustees of creditors and stockholders of the Ohio and Mississippi Railroad Company Eastern Division, will be paid on and after Jan. 2 at 88 Wall st.

The Rome, Watertown and Ogdensburgh Railroad Company have declared a semi-annual dividend of five per cent, payable on the 15th of January, 1864.

The Boston and Worcester Railroad has declared a semi annual dividend of five per cent, free of Government tax, payable January 1.

The Eastern Railroad, and the Eastern Railroad of New Hampshire, will pay each a dividend of 3 per cent, free of Government and State tax, on Jan. 1.

The Franklin Coal Company of Lykens Valley have declared a dividend of $3 per share, payable Dec. 28.

The Marietta and Cincinnati Railroad Company have declared a cash dividend from the net earnings of the current half year of 3 per cent, payable on the 10th of February next, on the first preference shares. Also, a stock dividend of 3 per cent on the second preference shares. The cash dividend will be paid to the stockholders in New York at the Farmers' Loan and Trust Company, and those registered at Chillicothe at the office of the Company. Due notice will be given when the stock certificates accruing to the second preferred shares are ready for delivery.

At a meeting of the directors of the Galena and Chicago Union Railroad Company on the 16th inst. the following resolution was adopted:

"*Resolved*, That a dividend of three per cent upon the Capital Stock of this Company be, and the same is hereby declared, payable at the office of the Company in Chicago, on the 10th day of January next, to holders of said stock at the close of business on the 31st day of December next, in exchange on New York at par. The three per cent tax to the United States will be paid by the Company."

The Fitchburg Railroad Company have declared a semi-annual dividend of four per cent payable Jan. 1.

The Western Railroad Corporation have declared a semi-annual dividend of five per cent payable Jan. 1.

The annual interest of the bonds of Clinton county, Ohio, will be paid on 1st January by C. Fife & Co., Wilmington, Ohio.

The Lynn and Boston Horse Railroad Company have declared a dividend of four per cent payable, free of Government tax, on the 2d of January.

The interest maturing Jan. 1, on the public debt of Illinois will be paid at the American Exchange Bank this city from the 4th to the 19th of said month. After that date only at the office of the Treasurer at Springfield, Ills. The holders of Illinois and Michigan Canal bonds, where coupons are exhausted are requested to present the bonds.

The coupons due on the 1st of January on the first mortgage bonds of the Sacramento Valley Railroad will be paid after that date in gold, less the government tax, by Schuchart & Gebhard.

The interest on the bonds of the city of Marysville, Yuba county, California, due January 1, 1864, and the interest on the bonds of the county of Yuba, California, due at the same time, will be paid on presentation at the American Exchange Bank, in this city, after the above date, the former in currency and the latter in gold.

The coupons due Jan. 1 on the bonds of the Central Pacific Railroad Company will be paid when due in gold coin, less Government tax, at the office of Messrs. Eugene Kelly & Co., No. 36 Wall street.

George T. M. Davis, No. 47 Exchange place, will pay the January coupons on and after the 1st prox., of the Sacramento, Placer, and Nevada 10 per cent first mortgage railroad bonds, less the Government tax, on presentation at his office.

The holders of the second mortgage bonds of Cumberland Coal and Iron Co., now past due, are notified that the amount due thereon, with accrued interest, will be paid, upon presentation of the bonds at the office of Ab'm Bell's Son, 25 Park-row, in this city.

The Mercantile Mutual Insurance Company have declared a semi-annual dividend of three and a half per cent, payable on the 2d January.

The Columbian (Marine) Insurance Company, a semi-annual interest dividend of three and one-half per cent, on the cash capital, payable January 2.

By telegraph to Ross, Dempster & Co., dated San Francisco, Dec. 19, mining stocks were quoted:

Ophir, $16 per foot; Gould & Curry, $48; Savage, $27 50; Yellow Jacket, $9 40; Overman, $4 20; Sierra Nevada, 85 cents; Crown Point, $9 50; Grass Valley, 85 cents.

Market active, with an upward tendency. The injunction asked for by Grass Valley Company against Potosi denied.

Mr. Carroll Hyde, for a number of years with Mr. Jacob Little, has taken an office at No. 64 Beaver street, for the purpose of transacting a stock and bond brokerage.

Messrs. W. H. Platt and M. L. B. Martin have organized a house at 54 Wall street, under the name of Platt & Martin, for the transaction of a stock brokerage business.

Metropolitan Horse Railroad Company.

The receipts of this company for the year ending December 1, 1863, were $388,616 51; and the expenses, $320,077 86—leaving net earnings, $68,539 15; to which add surplus Dec. 31, 1862, $33,124 57—making a total of $101,663 72. Dividend paid $67,462 50. Surplus for payment of dividend $34,201 22. Capital stock paid in $749,300. Cost of road $621,602 52; less to depreciation, $53,500—net cost of road, $568,102 52. Cost of equipment $519,374 09; less to depreciation, $31,116 44—net cost of equipment, $488,357 65. Average cost of horses, $102 90. Average cost of cars, $712 62. Length of track about 31 miles. Number of miles run during the year, 1,483,443. Total number of passengers carried 8,153,110. It is proposed to fund the debt of the company caused by the purchase of the Dorcester Railway. The following gentleman have been elected directors for the ensuing year: Lemuel Shaw, John Flint, D. H. Bayley, W. B. May, Wm. Kendey, E. H. Derby and John R. Blake.

Camden and Atlantic Railroad.

At a meeting of the Board of Directors of the Camden and Atlantic Railroad Company held on the 19th inst. Mr. Robert Frazer was unanimously elected President. Mr. Brodhead, who has been President for a number of years, retires. Mr. Horace Whiteman was elected Secretary and Treasurer, and fills the position vacated by Mr. Frazer's advancement.

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.
In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.
You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

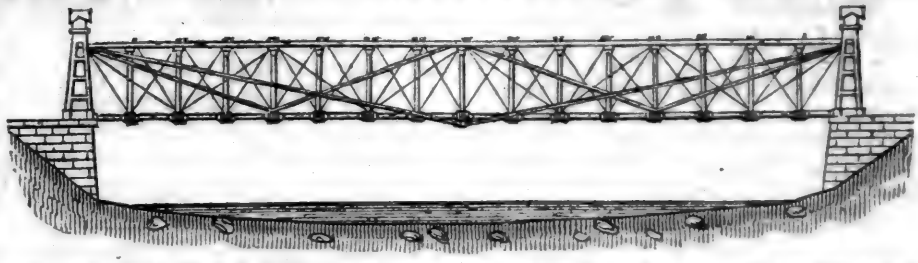
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **91 Nassau st.**, or by addressing

CHAS. W. WELSH,
Secretary.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, FINK'S PATENT IRON BRIDGE in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

BROWN'S ENGLISH

ROOFING PAINT.

THIS pure Black Paint is superior to all other Black Roofing Cements, Mastics and Patent Roofings now in use; and, for the last ten years, the genuine has been used in twenty-four States of the Union, and is now a fixed institution for the following purposes:—

THE PAINTING OF TIN, SHEET IRON, COPPER OR ZINC ROOFS, GALVANIZED IRON, BRIDGES,

LOCOMOTIVE

AND STEAMBOAT SMOKE PIPES,

And all IRON WORK requiring a PERFECTLY PURE GLOSSY BLACK, exposed to weather and fire.

It has been in general use in England for the last ten years, for the protection of Vessels' Bottoms from the water and the worm, for which it is particularly well adapted. For sale by the barrel or gallon.

SAMUEL REYNOLDS,
PROPRIETOR,
Depot, 879 Third Avenue, New York.
All Orders promptly attended to. Best City References given.

Central Transportation Co.

THIS Company, a Corporation organized in pursuance of a General Act of the Legislature of the State of Pennsylvania, having, by purchase, recently become the sole owner of

WOODRUFF'S, KNIGHT'S, MYERS'
AND OTHER PATENTS FOR
SEATS AND COUCHES IN
SLEEPING CARS,

would respectfully give notice to all RAILROAD COMPANIES IN THE UNITED STATES, that may desire Sleeping Cars on their Roads, that this Company are now prepared to negotiate for placing, wholly at its own expense, on such Railroads as may require them, their

SLEEPING CARS,

and operate them upon terms at once liberal and satisfactory to RAILROAD COMPANIES.

The Cars of this Company are constructed of great strength, and contain their late improved and patented plans of Seats and Couches, with STATE ROOMS AND BERTHS, finished in a style the most elaborate and tasteful, and are furnished with all of the modern conveniences and means of comfort usually found in the SLEEPING APARTMENTS OF OUR FIRST-CLASS HOTELS. The interior is lighted with gas; they are well ventilated, and at seasons of the year requiring it are warmed with pure heated air, regulated in degree at pleasure by registers in each State Room and section.

Where known, these Cars are not only regarded as indispensable on all through NIGHT TRAINS, but have become desirable, above all others, as DAY CARS.

Communications from the officers of Railway Companies desiring Sleeping Cars on their Roads, addressed to the Central Transportation Company at their office, **No. 1347 Brown-st., PHILADELPHIA**, will receive immediate attention.

Railway Companies using, or permitting to be used on their respective lines, Sleeping Cars or Couches, that infringe upon the patents owned by this Company, are respectfully notified that satisfactory arrangements for such infringement will be expected. Address as above,

O. W. CHILDS, President.

KING'S NOTES ON STEAM. LESSONS AND Practical Notes on Steam. The Steam Engine, Propellers, etc., etc., for young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief Engineer J. W. King, U. S Navy. Fourth Edition, enlarged and improved.

"This is the second edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, etc. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—[Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical treatises on the Steam Engine ever published."—[Philadelphia Press.

"Its republication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—[Philad. Ev. Bulletin.

In one volume octavo, with illustrations, price $2. Copies sent free by mail on receipt of price. Published by D. VAN NOSTRAND, 192 Broadway, New York.

MUNN & CO'S
PATENT OFFICE.
ESTABLISHED 1842.

DURING the past twenty years, Messrs. MUNN & Co., in connection with the publication of the WEEKLY ILLUSTRATED SCIENTIFIC AMERICAN, (the only paper devoted to the Mechanic Arts in the country,) have acted as Attorneys for procuring letters patent in the United States and all foreign countries.

They would state that they have acted, during this period, as agents for more than

TWENTY THOUSAND INVENTORS;

In fact, they have become identified with the whole brotherhood of inventors and patentees, at home and abroad. Thousands of inventors for whom they have taken patents have addressed to them most flattering testimonials; and the wealth that has inured to the inventors whose patents were secured through their office, and afterward illustrated in the SCIENTIFIC AMERICAN, would amount to many millions of dollars!

Messrs. MUNN & Co. are prepared to attend to patent business of all kinds, in the quickest time and on the most liberal terms.

For further information, send for a pamphlet which contains the Patent Laws of the United States, and much other valuable information of importance to inventors and all others who own patent property. Also pamphlets of information furnished regarding the Patent Laws of all foreign countries.

For further particulars address

MUNN & CO.,

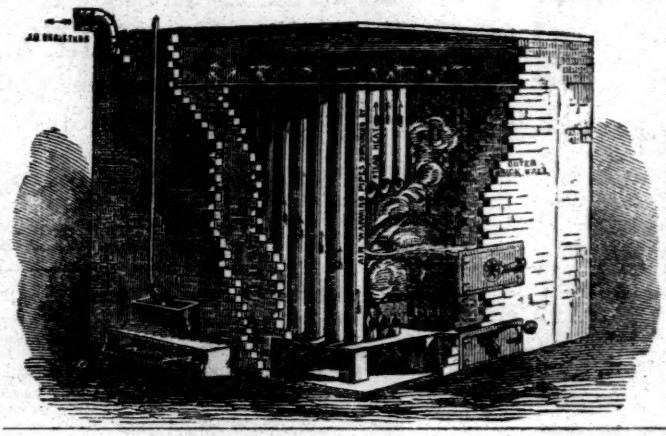
WILLIAMS & PAGE'S



PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the side of the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**
The Light is very strong and brilliant, requiring no reflectors, and **lighting up the Cars so as to give them that bright** and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers. These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.
For Cars with "raised" or "high" roofs we make these Lamps with brass arms to suspend in any required manner.
Manufactured and for sale by

WILLIAMS & PAGE,
67 Water st.,
Boston, Mass.

SIMONDS' PATENT STEAM HEATER.

FOR Warming and Ventilating Buildings of all descriptions, Graneries, Greenhouses, etc.
THIS HEATER HAVING BEEN THOROUGHLY TESTED, has proved to be the MOST PERFECT WARMING APPARATUS IN USE. Parties having them in use, and to whom reference can be given, give them the highest recommendations.
Those requiring a SAFE AND PERFECTLY EFFICIENT APPARATUS FOR WARMING PURPOSES, are invited to call and examine before purchasing elsewhere.
Personal attention given to erecting the same, and a guarantee given for their successful operation.

KRUPP'S PATENT CAST STEEL

RAILWAY TIRES

MANUFACTURED BY

FRIED. KRUPP,

ESSEN, RHENISH PRUSSIA.

These Celebrated Tires are made WITHOUT A WELD. Over 70,000 of them HAVE BEEN SUPPLIED.

By their extreme durability they are more economical than any others, being cheaper, at their cost than Iron ones gratis.

THESE TIRES have been furnished to the following American Railways: Erie; Hudson River; Camden and Amboy; Housatonic; Naugatuck; New Haven; Chicago, Burlington and Quincy; Quincy and Toledo; Ohio and Mississippi; Beaver Meadow; Central Georgia; Don Pedro 2nd (Brazil); Grand Trunk, Great Western (Canada); European and North American (N. B); Cleveland and Mahoning; Cleveland, Painesville and Ashtabula.

STEAMBOAT SHAFTS. KRUPP'S CAST STEEL RAILWAY AXLES. ANCHOR FLUKES.

CITY RAILWAY COMBINATION WHEELS AND AXLES.

PROPELLER BLADES, ETC., ETC., ETC.

They wear equally and are free from lamination. They are not liable to fracture and are unaffected by extreme cold.

LAP-WELDED IRON BOILER TUBES.

TUBE EXPANDERS. TUBE BRUSHES. THREE-CUTTER DRILLS.

Glass-Enamelled Iron Water Pipe, Steel Tubes, etc., etc.

They have received the highest approval from all RAILWAY COMPANIES that have them in service.

THOMAS PROSSER & SON,

28 PLATT ST., NEW YORK.

PATENT

SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 51 Beekman st., (up-stairs,) New York.

RAILROAD, SHIP, BOAT AND BRIDGE SPIKES,

MANUFACTURED BY THE

NEWARK SPIKE CO.,

Newark Avenue,

NEWARK, N. J.

SANFORD'S

MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

MANUFACTURED AND SOLD BY

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water street, New York.

RAILROAD IRON.

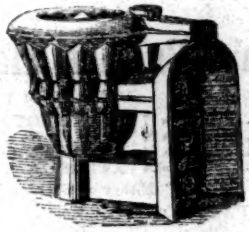
PERKINS & LIVINGSTON,

54 Exchange Place, NEW YORK.

Dr. J. Adelberg,

Mining and Assay Office and Analytical Laboratory, 90 Broadway, New York.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the LEADING STOVE for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

Sanford's CHALLENGE HEATERS

SET IN BRICK, PORTABLE OR AS

FIRE PLACE

HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR

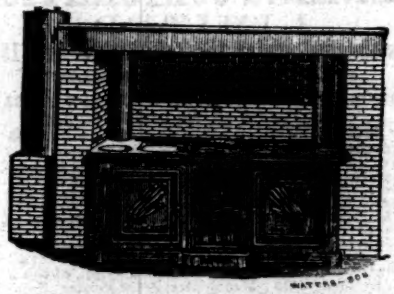
Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE

Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.



Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,

Nos. 239 and 241 Water st., N. Y.

BROWNE'S METALLIC WEATHER STRIPS, AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., 644 Broadway, corner of Bleecker st. Local Agents wanted everywhere.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This Range, already very popular, has the LARGEST OVENS of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary ECONOMY OF FUEL, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
